Study Of Insects In Canada Boosted By Defence Effort

By ARCH MacKENZIE

OTTAWA (CP)—The study of Canada's teeming insect life drew a substantial boost from defence planning, the first session of the centennial entomology meeting was told here.

De once moves in Alaska against the Japanese in the Second World War and the radar line construction in northern Canada brought man in direct conflict with hordes of biting insects, said G. J. Spencer, professor emeritus at the University of British Columbia.

He was delivering a historical review of 100 years of entomology—or insect study—in Canada at the start of the conference being attended by 450 scientists from Canada and other countries.

The upshot of the exposure of military and construction men to voracious mosquitoes, black flies and their allies was a wholesale campaign to find antidotes. It resulted in programs to catalogue the insect world from Alaska to Greenland. Prof. Spencer declared, with the capture of some 750,000 specimens.

Northern Canadian species of biting fly are few but they swarm in unbelievable numbers, he said in an often lighthearted appraisal of Canadian insect study.

WHY MOSQUITO BITES ITCH

The conference ends Friday and scientific papers are scheduled on facets of insect life including the prairie grasshopper, the mosquito's mouth juices which make its bites itch, insect populations, control and insect resistance to cold.

Hosts are the Entomological Society of Canada and its Ontario branch. On April 16, 1863 the first formal society was formed by nine amateurs in Toronto.

Since then study of Canadian insect life—with particular applications to the good and bad impact they have on agriculture—has evolved into an industry including substantial federal and provincial participation.

An unfortunate trend today seems to be "insectophobia," Prof. Spencer commented. It was marked by an unreasoning concern about insect life and he said that size 1952 in the United States 500,000,000 pounds of insecticides have been used.

Lawyers Told Move Needed To Meet Increasing Demand

By BOB TRIMBEE

BANFF, Alta. (CP)—Premier E. C. Manning told the opening session of the Canadian Bar Association annual meeting here that professional groups must initiate action to meet society's greatest demand for their services.

He said people today regard such services as a democratic right, regardless of financial or social position.

The change in social concept already has been witnessed in the medical profession in Canada and the legal profession in Great Britain.

"You, who are leaders in great wisdom in giving careful your profession, should show great wisdom in giving careful consideration to these new patterns in the changing concepts of the world today.

"They will not go away by simply ignoring or resisting them. They must be faced and they can best be met by the professions themselves."

He suggested it was better for the professions to initiate the steps to meet the demands rather than "turn your backs upon the problem and wait for public pressure to bring them about."

The professions must take the public into their confidence in evaluating the problem and mapping future action. They must initiate internal re-organization to handle the increased work load and they must extend their interest in the sphere of public service beyond the limits most closely associated with their professions.

MUST TAKE LEAD

R. A. MacKimmie of Calgary, retiring CBA president, urged lawyers to play a dominant role in hearings of the royal commission on biculturalism and bilingualism.

In his annual address he said:

"The minority groups in Canada should be able to rely on lawyers more than any other group of citizens for support of, and to champion, any legitimate cause they may have."

Various sections of the CBA will launch their annual meetings during the remainder of the week-long convention, which ends Saturday.

Wingless Aircraft Gets Test

SANTA BARBARA, Calif. (AP)—A wingless craft resembling a bathtub, designed to return men from space, flew successfully from Edwards Air force base.

The 20-by-30-foot vehicle was twice towed to 13,000 feet by a B-47 craft and each time U.S. space agency pilot Milton O. Thompson glided it to a landing.

It's able to glide because its broad, rounded undersurface provides "lift" as do an airplane's wings.

The craft, called the M-2 because it is the second of several shapes tested as possible atmospheric re-entry vehicles, has a rounded nose, and a square stern. It is controlled by twin fins at the stern.

Thompson, 36, has been testing the M-2 for some time. This was the first public flight.

Ground observers held their breath as the 1,000-foot tow cable was detached. Some obviously felt the M-2 would fall like a brick.

But Thompson spiralled it down for a smooth landing after a three-minute flight. The craft has a window on the underside of the nose for downward vision.

Thompson hit speeds up to 135 miles an hour then slowed by tilting the nose up.

Engineers estimated the M-2 was going 80 miles an hour when its tricycle landing wheels hit the dry-lake-bed landing strip. It rolled about 250 feet.

EARLY VOYAGERS

WASHINGTON (AP) — The Smithsonian Institute reports that Orientals may have crossed the Pacific to South America as early as 5,000 years ago. "Prehistoric voyages across the Pacific Ocean from southern Japan to the coast of Ecuador—possibly as early as 3000 BC—now are postulated on the basis of substantial archeological evidence," the Smithsonian announced Monday.

The bidding:

North	East	South	West
1♣	Pass	2NT	Pass
3NT			

Opening lead — queen of hearts.

Let's say you're declarer at three notrump and West leads the queen of hearts. How should you play the hand?

Of course, you don't see the opponents' cards; if you could, you would be sure of making the contract regardless of how they were divided. This is because you would be certain of at least four clubs tricks, knowing where the queen was located and how to finesse against it.

However, you do know that if you misguess the club finesse and also lose four (or five) heart tricks you are down. So what you do is try to prevent this from happening, and the first step in that direction is to let West win the queen of hearts.

What you do next depends on the line of defense West adopts. If he abandons hearts, say, by leading a spade, you win it in dummy and play the jack of clubs and finesse. You don't mind losing a jack to the queen because, with West on lead, he can make no harmful return and you already have nine established tricks.

If West continues with a heart trick two, say, with the jack, you win with the king and then lead the king and another club, planning to finesse the jack. You are not afraid of letting East win with the queen because he can do you no harm.

The reason is that if East has a heart to return, West cannot have had more than four hearts to start with — which means you make three notrump —while if East has no more hearts, you are likewise sure of the contract.

It may seem dangerous to refuse to win the queen of hearts at trick one, but the danger is more fancied than real. Actually, the danger lies in the other direction. If you take the queen of hearts, you may be defeated by later misguessing the club situation, but if you duck the queen, you can afford to misguess in clubs and still come out on top.

Rival Nudist Organizations To Join Forces In Britain

By EDDY GILMORE

LONDON (AP) — Two rival nudist organizations have announced plans to join forces to try to make nudism a regular part of Britain's recreational life.

A clash of personalities in the leaderships of both camps had separated the British Sun Bathing Association and the Federation of British Sun Clubs ever since nudism made its official entry into England after the First World War.

Members of one had refused to mix even when dressed.

Now there are signs they may unite under the cover of a single organization calling itself the Central Council for British Naturism. They frown on the word "nudism."

A joint announcement Tuesday said:

"Can naturism—the old-fashioned nudism—now be regarded as an integral part of the recreational life of the community?

THEY THINK SO

"Britain's two national organizations representing some 70 sun clubs and 10,000 naturist sunbathers think that it can."

The announcement said the two organizations, at their annual general meetings, would consider amalgamation.

The joint announcement concluded:

"Whilst no naturist official would for one minute consider that all Britons will become naturists, it is recognized that in the rush of modern life, naturism increasingly offers an effective antidote to the stresses which surround us.

"It is to increase the awareness and facilities for this modern health movement that the Central Council for British Naturism is being formed."

FALSE ALARM

AYLESBURY, England (Reuters)—Two carloads of police raced out from here Wednesday when the Glasgow-London mail train stopped unexpectedly at the same time and place where it was looted a month ago. But no bandits were lying in wait. The 84 - minute holdup was caused by a defect in the diesel locomotive.

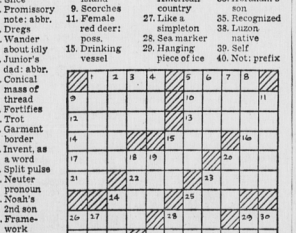
Yesterday's Answer



DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation

T Y M R Y O. I Z O C A R T Y J Q C M G T F Q R X Y C Y O Z X C Q R A Z F X F U L A O T Z K R. — O R X R P U

Yesterday's Cryptoquote: SUMMER'S LEASE HATH ALL TOO SHORT A DATE.—SHAKESPEARE
