A Camel Can Go Nine Days Without Water, but Men Can't Go One Hour Without Hickey's Black Twist
 It is just as hard for a man who uses Tobacco to be without Hickey's Twist, as the man who is in the desert and wants water. Because Hickey's is the only thing that will satisfy men who use tobacco, just as water is the only thing that quenches thirst in the desert. Hickey's is unequalled for flavor and quality.

HUNDREDS OF PASSENGERS STALLED IN HOT DESERT
 LOS ANGELES, Aug. 17.—Auto-mobils were being planned or have become stalled at various points. Only one overland train left Los Angeles on this road there, in the blazing heat, aboard yesterday.

LETTER OF SYMPATHY.
 Letter of sympathy received by Mrs. Hanford Reeves, Kensington To Mrs. Hanford Reeves. We, the members of the W. M. S. wish to express our deepest sympathy with you in the sore affliction through which you in the Providence of God are called to pass in the removal by death of your dear mother. We deeply sympathize with you in this your sad bereavement but that your dear mother was taken from you was at the call of an Allwise God. His ways are hidden to us. But we do know and feel that He doeth all things well.
 We humbly and fervently pray that God the source of all grace and good may sustain and comfort you in this your trying sorrow.
 Signed in behalf of the Womens Missionary Society, this seventh day of August 1922.

Yarmouth, N. S., March 24, 1921
 The Secretary of the Yarmouth Athletic Association, who were the champions for 1920 of the South Shore League and Western Nova Scotia Base Ball, states that during the summer the boys used MINARD'S LINIMENT with very beneficial results, for sore muscles, bruises and sprains. It is considered by the players the best white liniment on the market. Every team should be supplied with this celebrated remedy.
 (Signed)
JOSEPH L. LeBLANC,
 Secy, Y. A. A. A.
 Champions N. S. South Shore League 1920.

POINT OF VIEW.
 "Don't you want to buy a bicycle to ride around your farm?" asked the clerk as he wrapped up the rails. "Sell you a first-class one for \$35."
 "I'd rather put 35 in a cow."
 "But think how foolish you'd look riding around on a cow."
 "No more foolish, I guess, than I would milkin' a bicycle."

Are You Handicapped
 By Defective Sight? Perhaps your eyes may be defective, although you are not aware of the fact. If you have difficulty in doing what other do easily, or if you have trouble in seeing what others see clearly, it is time to have your eyes examined. Do not delay, for delay is dangerous where your eyes are concerned. We will give you expert advice.

Back to Shredded Wheat
 Thousands are lured into all sorts of food experiments—trying this new one and that new one—only to come back to
Shredded Wheat
 Seems like coming "home again" after wandering around in the wilderness of Dietetic Doubt. There is no doubt or uncertainty about Shredded Wheat. It is 100 per cent whole wheat, always the same high quality—pure, clean, wholesome, nourishing. Eaten every day by millions of people in all climes. There is no substitute for it. Made in Canada.

Two Biscuits with milk or cream make a complete, nourishing meal. Eat it for breakfast with sliced bananas or prunes for lunch with berries; for dinner with sliced peaches, apricots, stewed raisins, or fresh fruits. Ready-cooked, ready-to-eat.

Centenary of Great Astronomer
 LONDON, Aug. 17.—The one hundredth anniversary of the death of Sir William Herschel is to be commemorated this month by the Royal Astronomical Society, of which he was the first president. Herschel was one of the greatest of modern scientists and the founder of the science of sidereal astronomy. That is to say, he was the first observer of the heavens who studied their unfathomable depths and tried to determine the order and motions of the stars as distinct from the planets. From the popular point of view his great discovery was that of the planet Uranus in 1781. The astronomer was born in Hanover in 1738. He was brought up to be a musician, and at 14 years of age was a member of the band in the Hanoverian Footguards. His father was an excellent musician, and he inherited all of his talent. After five years of army service he ran away from his native country and came over to England to seek a better fortune. He was sufficiently expert in music to obtain employment without difficulty. He had been nine years in England when he received the lucrative post of organist at Bath, the fashionable watering place, where wealth and beauty and social distinction congregated every year. With a strong taste for astronomy he began to interest himself as an amateur in observation of the heavens. He had studied optics and was competent to construct telescopes, of which he made no fewer than 430 of 7, 10 and 20 foot focus. His instruments were the best that had been made up to that time, and after he had perfected one magnifying 227 times he began a careful survey of all the stars. These observations were made after his regular labors of the day, and his sister Caroline, whose name is associated with his own in astronomical history, came over from Hanover to live with him and to serve throughout life as his scientific assistant. On the night of March 13, 1781, while he was examining the constellation of Gemini, he noticed that one of them seemed very large, and appeared to have changed its place. He concluded that he had discovered a comet, and so announced in a scientific paper. Instantly the attention of astronomers everywhere was drawn to the discovery, and in a short time it was found that it was nothing less than a new planet. This was news of the most sensational nature to the world of science. The discovery of the amateur astronomer was declared to be the most striking since the invention of the telescope, and to have absolutely no parallel, since every other major planet had been known from time immemorial. The organist at Bath, of course, immediately became the most famous astronomer of England. The King appointed him private astronomer, with a salary of £2,000, and at the same time offered to defray the expense, £20,000, of the finest and largest telescope that Herschel could construct, a 40-foot instrument of 2,000 pounds weight. Herschel was 42 years old when he made his first great discovery, and he lived to be just 42 years older, in which period he discovered an almost unprecedented number of new bodies in the planetary world and laid the foundations of modern sidereal astronomy. Sir William lies buried under the tower of St. Lawrence's Church, at Upton, near Slough, within a few hundred yards of the site of his 40-foot telescope through which was first discovered the polar snows of Mars.

Changes In Staff At King's College
 WINDSOR, N. S. August, 17.—The Professorship in Physics and Chemistry, vacant by resignation of Prof. Sturley, who goes to Yale, has been accepted by Walter Clifford. Prof. Clifford was educated at school in England and in London University (B. Sc. degree in Mathematics, Physics and Chemistry), in the University of Bishops College, Lennoxville, P.Q. (Hon. Course in Mathematics) and post graduate work in Physics and Chemistry and Chemical Engineering at Queen's University, Kingston, Ont. After four years' teaching experience in High Schools, Prof. Clifford spent some ten years in the active practice of his profession as a Chemical Engineer in Pulp and Paper Industries in Quebec, Wisconsin and Canton, N.C. He is a member of the American Society of Chemical Engineers and also of Mechanical Engineers. During the war he served as Ensign in the U. S. Navy, and as a Lieutenant in the U. S. Army. Prof. Clifford has organized a number of industrial classes in Applied Science, himself teaching Physics and Chemistry. The chair of Mathematics, vacant by the resignation of Prof. Wadley, who has returned to England, will be filled by Prof. E. A. Stone. Prof. Stone is an honor graduate and gold medalist in Mathematics, holding the degrees of Bachelor of Applied Science and Master of Engineering from McGill University. Besides having considerable practical experience in the engineering profession, Prof. Stone was for three years Dean of Engineering and Prof. of Civil Engineering at the University of New Brunswick, and for four years Prof. of Civil Engineering at Queen's University, Kingston, Ont., and lectured in the McGill University College of Vancouver whilst engaged in engineering practice there. King is to be congratulated on having secured the services of two men, both with excellent records as successful teachers and with wide practical experience as Professional Engineers. An additional instructor in the Science Faculty will be appointed before the opening of the College year. King this year will offer exceptional opportunity to students who contemplate entering any branch of industrial or Applied Science of Engineering, as they may receive their preliminary training at the hands of teachers with wide and fresh experience of the practical application of University work in industrial life. It is expected that the successor to Prof. Kingston in the Chair of Philosophy will be announced shortly.

Non-Union Men Beaten By Mob
 SUPERIOR, Wis., Aug. 17.—One Great Northern Railway special agent was shot and seriously wounded, another severely beaten and four others bruised at Saunders, Wis., seven miles from here, early Saturday, when a mob of strike sympathizers intercepted a carload of non-union employees en route from Minneapolis to Superior. The non-union employees, said to number about 30, were then kidnapped and taken into the woods nearby. A detachment of police and Deputy Sheriffs are searching the woods for them.

Arranges Funeral Then Takes Poison
 DETROIT, Aug. 17.—After two visits to an undertaker to discuss the expense of a funeral, Ryerson Falls, 45 years old, took his own life early Saturday by swallowing poison at the home of his brother, Wesley Falls, 830 Colburn Place. Falls, whose home is on a farm near Palmerston, Ont., had lived with his brother here for six months. He had been despondent recently because of ill-health, members of his family said. Falls went to an undertaking establishment in the neighborhood two weeks ago, and asked for complete data on the cost of caskets and funeral, and returned on the same mission Friday, according to the Coroner. He left a note, requesting that he be buried at Palmerston.

ALL RECORDS BROKEN
 "THE UNLOVED WIFE" to break stage records! It is believed that all records for attendance at a dramatic performance will be broken when the production: "The Unloved Wife," a new play in three acts, plays an engagement at the Prince Edward Theatre, Wednesday and Thursday, August 23 and 24 with matinee Thursday for ladies only. Anyone who goes to the Theatre prepared to find "The Unloved Wife" intolerable melo drama, will stay to enjoy one of the happiest surprises in play-going experience. Strange as it may seem in these days, the authoress, Florence Edna May, has succeeded in completely upsetting sex problems. "The Unloved Wife" is said to be a thrill that keeps you with your mouth wide open and a tense grip on your seat. It is punctuated with a lot of hearty laughs and contains a number of great character drawings. But they are not the real secret of its interest and success. It is the bearing of a woman's soul. Florence Edna May has delved into this subject one that has aroused so many big thinkers and one that has caused Equal Suffrage. The play covers an original theme; how much deception should a wife tolerate on the part of her husband? Should the wife be tied to the home, while the man can do as he pleases. Miss May, the authoress of "The Unloved Wife," challenges the opposite sex to dare dispute her answers to these important questions which are found incorporated in her play. The play comes here with an adequate cast of Broadway players and a production worthy of the most critical theatre goers. The evening performances are for everybody over the age of 16 years. Seat sale opens Monday morning August 21st at 9.30 a. m. at the Theatre.

Eight People Killed By Pack Of Roving Tigers
 MEXICO CITY, Aug. 17.—A pack of tigers, driven from their mountain lairs by hunger, attacked three families who were travelling from Puerto Vallarta to Mascota, State of Jalisco, killing three women, two men, two small boys and a baby, according to El Universal Grafico. Natives who went to the rescue fought the tigers, killing one of them. The remainder escaped to the mountains.

ONTARIO HIKER WALKING TO HALIFAX ON WAGER.
 ST. JOHN, N. B., Aug. 17.—Another hiker came to town today. He is Frank Spry, of Hamilton, Ont., who served in the 116th Battalion in France for nearly two years. He left Hamilton on June 7 on a wager that he could walk to Halifax by October 12. He wagered an automobile against \$400 and when he left for Rethersay, eight miles from this city, this afternoon, he expressed the opinion that he would win easily. Spry came from his home city, via Quebec, Edmundston, Woodstock and Fredericton. At every place he calls he gets the signature of the head official of the town or city to show as proof of his journey.

ENJOYABLE EVENING SPENT.
 On Wednesday evening, August 16, a very enjoyable evening was spent at Springview Farm, Orwell, under the direction of Mr. Michael McKenna, in honor of his guests, Mrs. F. A. McKenna and Miss Helen K. McDonald, both of Lethbridge, Alta. Mr. Frank Mooney ushered the guests to the drawing room, where they were received by Miss Reta McKenna. At 9.30 the guests were accompanied by Mr. Owen McKenna to the ball-room, where the Grand March was led by Mr. Luke Praught and Miss Stella Delorie. Excellent music was furnished by Messrs. Austin Bradley and Stephen Delorie. A delicious lunch was daintily served at the midnight hour in cabaret style. The party dispersed after joining hands and singing Auld Lang Syne.
