Bercovitz Murder Trial Nears End

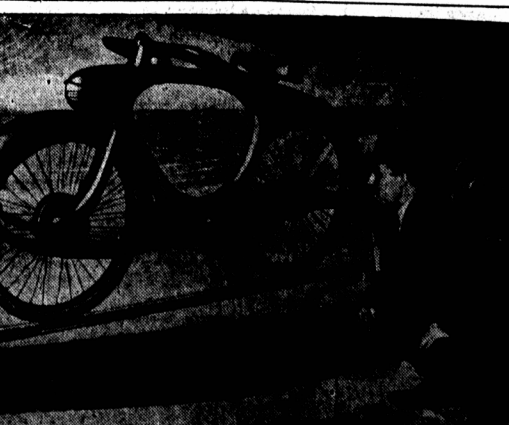

(By The Canadian Press)
MONTREAL, Oct. 4.—Louis Bercovitz, under trial for the murder of Harry Davis, testified he had until the night of July 2 the gambler was slain in his own back yard.

Auto Output Shows Increase

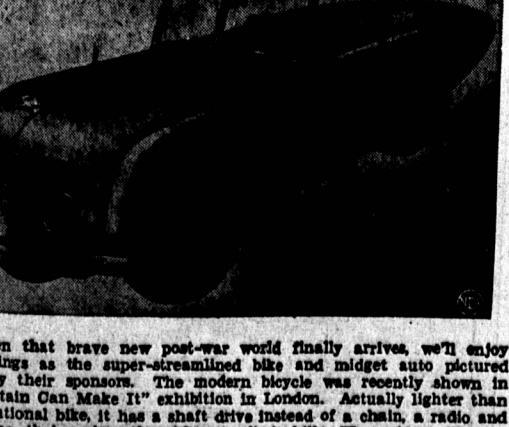

OTTAWA, Oct. 4.—(CP)—Those people who are waiting patiently for a nice shiny new automobile can take some consolation from the fact that Canadian plants produced 17,221 units in July—an increase of 1,636 over June.

Bonnie Refiner, grand champion Clydesdale stallion at the 76th annual Chilliawack Fair for Claude Worthington's Clydesdale Farm.

When that brave new post-war world finally arrives, we'll enjoy such things as the super-streamlined bits and midget auto pictured here, say their sponsors. The modern bicycle was recently shown in the "British Can Make It" exhibition in London.

The July figures brought the total of the first seven months of 1946 to 127,000 units which represented only a minor increase over the 1945 production for the corresponding period.

To Get New Appointment

LONDON, Oct. 4.—(Reuters)—Charles Goss, one of two British diplomats in Iran recently accused by the Tehran government of espionage, is being made in accordance with a previous plan and is not due to representations made by the Iranian government, he added.

GEE, MAYBE THE CAN CURE THAT DUCK!

not required, and general survey from which likely areas will be chosen for detailed survey.
In vertical photography only one camera is used. It takes a series of overlapping pictures of the ground. In theory the centre of each picture represents the ground directly below the aircraft at the time it was taken.

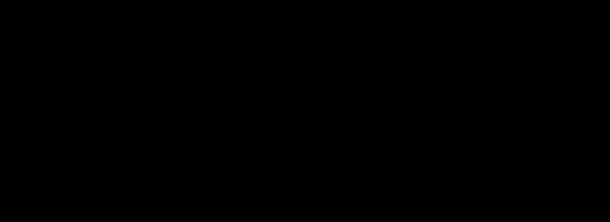

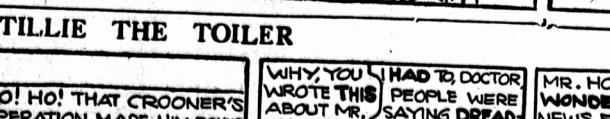

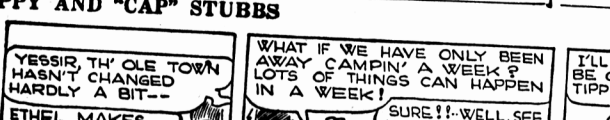

On a good photographic day 25,000 square miles of tri-camera photos can be taken, as compared with only 600 to 1,000 square miles by the vertical method. Canada could not be photographed completely for 50 or 60 years at the present rate if only verticals were used. But from now on, these experts can select areas for further investigation, which will lead to the most economical use of the facilities available for vertical photography.

Corrects Old Maps
For instance it was discovered by the R. C. A. F. 12 years ago that Akimiski Island in James Bay was practically upside down on all maps.

Astonishing Facts About Hurricane
Do you know that a hurricane can be likened to a steam turbine of over a hundred thousand million horse-power, and generates enough power to run all the dynamos, motors and steam engines in the world for three or four years?

One of its kind in the London area, the school's capacity is 125 students. Before they are licensed all taxi-drivers must pass police examinations in taxi-driving technique and geographical knowledge. "Cabbies" must know all squares, clubs, hospitals, main buildings, hotels, theatres, embassies, railway stations, police stations. They must know the shortest route between any two places within six miles of Charing Cross railway station, which is approximately the centre of London.

BARREN EGYPT
Egypt is twice as large as France but per cent. of its area is barren sand and rock.

1934 vessels of over 2,000 tons were lifted over seawalls into the streets. When winds up to 150 m.p.h. hit the New England coast in September, 1938, about 600 lives were lost, damage was estimated at \$500,000,000, and 25,000 motorcars, 200,000 miles of electric lines, and 2 million trees were damaged or destroyed.

Mr. Frank W. Lane records other astonishing facts about the nature, cause, and effects of hurricanes. From the vertical method of photography, he has selected areas for further investigation, which will lead to the most economical use of the facilities available for vertical photography.

Lightning achieves astonishing feats. It has knocked holes in stone or brick walls. When it struck a carpenter's shop where two rows down a bench, with a coat laid between, it burnt all the handles of the tools and the bench under them, and tore a hole through the wall, but left the coat undamaged.

Striking a church belfry, lightning flung a 2 cwt. lump of stone 60 yards; it has melted holes right through church bells, and made windows vanish because the heat evaporates the glass. When a field of potatoes was struck, some of the stalks were burnt to cinders, but the potatoes were cooked to a turn!

One fierce discharge over the Wasatch National Forest in Utah killed 504 sheep. When a like was hit, 18 cartloads of dead fish were room where a girl sat at her sewing-machine, scissors in her hand found herself sitting on the machine.

The scientist Flammarion tells of a man whose head was singed but whose body was not. It was off, roots and all, so that it was never grown again. Another man,
