

CITIZENS' MEETING

There will be a citizens' meeting in the Strand Theatre on Tuesday next the 6th inst at 8 o'clock sharp for a discussion of City affairs and for any other desirable purpose. By order of the Mayor.

ELECTION CARD FROM MAYOR STEWART

To the Electors of Charlottetown: After my election as Mayor two years ago I had the hope and desire, with the assistance of a majority of the Council, to effect certain specified reforms that I believed would result in ending the annual recurring deficits which have since 1927 become a settled practice in civic affairs. All efforts, however, failed to induce the majority in the Council to concur in the measures proposed. Shall the fight for better government be continued or given up? To choose the latter alternative would be to harken to the council of despair and yield to cowardice. In order to clarify my position, I here submit to the judgment of the electorate a policy embraced in the following five planks: 1. The appointment of a competent city manager and the assigning to him the carrying out of all the duties now performed by the city engineer, the street committee and the public property committee. 2. The making it ineligible for the Stipendiary Magistrate to be appointed city recorder. 3. A complete change in the mode of assessing property, whereby the work of the assessor may be simplified, the cost may be lessened, existing inequities in the value of many properties may be remedied, and the procuring thereby of more revenue for the city. 4. The doing away with all unnecessary offices. 5. The balancing of the city budget within a reasonable time limit. I am assured that candidates will be nominated in the several wards and all due efforts made for their election pledged to support and carry into effect such a policy. On that assumption I consent to be nominated for the mayoralty. I appeal for support of such a policy to the plain, ordinary, everyday people of our city, who must be deeply interested in an effort to save it from financial disaster. As I shall make no personal canvass, I take advantage of this opportunity to respectfully ask for your support and confidence. I fully realize that intelligent men and women who understand the existing situation quite well will have no wish to be urged or coaxed as to how they should vote. As the coming election will perhaps be one of the most important in the history of the city, I would urge upon all the necessity of exercising their franchise.

W. S. STEWART.

Seed Cleaning

(Experimental Farms Notes) An effort has been made in many parts of the country to make seed cleaning as simple and comparatively easy for the farmer to get his seed cleaned. The establishment of local and district seed cleaning plants has been encouraged by government institutions, including the Dominion Experimental Farms, and many have been in operation for a number of years. Where local cleaning plants are in operation, it remains only for the grower to haul his seed to the plant where it will be cleaned and graded at comparatively small cost. When a grower is not fortunate enough to be located reasonably close to a cleaning plant and has no other convenient means of getting the work done, it is good business either to purchase a small sized fanning mill himself or arrange to have the use of one in his locality. In some parts of the country, particularly in Western Canada, travelling cleaning plants take care of considerable seed cleaning. Complete outfits mounted on trucks do custom cleaning in much the same way as custom threshing is done. To any one who can finance

the undertaking, the travelling cleaning plant offers an opportunity of turning spare time during the winter into cash particularly in districts where no modern seed cleaning equipment is available. Seed cleaning is an off season job and should not be put off until spring when time is more valuable on the farm and cleaning plants are usually running at full capacity. If the cleaning is to be done by the local plant it is best, therefore, to haul the seed during the winter when better satisfaction can be given by the plant operators and the cost of hauling may be lower. If one waits until spring to prepare or set aside enough good grain for seed, he often finds that the best has been fed during the winter with the result that poor seed may actually be used thereby. It is important in this connection to guard against the purchase of new or little known varieties and further to insist on Government graded seed. The Italian Government has required millers in the province of Lazio to use 95 per cent of domestic soft wheat in making flour and those in Southern Italy to use 90 per cent.

Something New

WE HAVE JUST RECEIVED A SHIPMENT CONSISTING OF TWELVE DIFFERENT MODELS OF CANADIAN GENERAL ELECTRIC TELECHRON ELECTRIC CLOCKS.

As the Maritime Electric Co., Ltd., have recently installed a master clock in their Power House in Charlottetown and we are now receiving what is known as regulated frequency current, Electric clocks are accurate and governed by the Master clock, will keep perfect time.

We invite your inspection of these beautiful models and whether you wish to purchase or not, we will be glad to show them. Our new line includes Mantel type, Kitchen, Boudoir Dressing Table, Desk or Electric Alarm. All Clocks guaranteed.

Chappell & Company Electrical Contractors, 178 Grafton St.

SUMMERSIDE GUARDIAN and Prince County Chronicle

APPROVED BY MINISTER OF AGRICULTURE - Word has been received by Mr. G. Galbreath, President of the Canadian National Silver Fox Breeders' Association, that the resolution passed at the annual meeting of the Association to reduce the fee for registration and transfer of 1933 puppies, has been approved by Hon. Mr. Weir, Federal Minister of Agriculture. This will be pleasant news for the members of the Association. The fee for registration of each 1933 puppy is 75c. Fee for transfer of each 1933 puppy, \$1.00. This is effective till March 31, 1934. Each tattooed puppy retained or sold must be registered by March 31st. No other change has been made in the fees. Reduced transfer fee does not apply to transfer of adults. -S.

THE CROSS EXAMINATION of Otto Tyres (Pelix Gallant) by Mr. Tait (W. J. Lidstone) at the trial of Marcus Carbon at the Court House on Tuesday evening, February 6th, is worth more than the price of admission. L-141.

NORTH SHORE LEAGUE Play Off in the Kensington Rink, Monday, February 5th at 7:30 P. M. Indian River vs Kensington Aces. Final game to decide winner to meet Sand team. Show after match. Admission 10c and 20c. L-144.

DON'T MISS the step dancing of Fannie Flapper and Gladys Grier at the Capital Theatre Tuesday evening, February 6th, in the trial of Marcus Carbon. L-143.

FRIENDLY TOURNAMENT - C. Y. M. E. Badminton Club were the guests on Friday evening of the Trinity Club in Epworth Hall. Some interesting matches were played during the evening. The ladies of Trinity Club served a dainty lunch at the conclusion of play. -S.

THE ANNUAL MEETING of Central Bedouge Egg Circle will be held in Central Bedouge Hall on Monday, Feb. 5th, at 2:30 p.m. The guests at the Capital Theatre Tuesday evening, February 6th, in the trial of Marcus Carbon. L-143.

L. O. B. A. SOCIAL - The ladies of the Summerside Branch of the L. O. B. A. held a bean supper in their Lodge Rooms on Friday evening. A very large number of people were present. After the good things provided had been disposed of, a very enjoyable program of vocal and instrumental music with readings were much appreciated. This program was followed by games and a social hour. -S.

SUMMERSIDE POLICE COURT - The first case of drunkenness to be heard in the Summerside Police Court for some time came before Stipendiary Magistrate, E. H. Strong, K. C., on Friday when a drunk was fined \$5 and costs. On Saturday a drunk was fined \$15 and costs. -S.

PERSONALS - Mr. J. C. Wilkinson of Springfield West left on Friday morning for Boston en route to Florida where he will spend the winter months. -S. Mr. Rex Dawson of North Tryon left on Friday morning for Vermont to visit his parents. Mr. and Mrs. W. E. Dawson. -S.

Mrs. G. E. Harboure of Charlottetown was the week end guest of her sister, Mrs. J. W. Hogg and Mr. Hogg. -S. Mrs. J. G. Bennett is visiting her mother, Mrs. Alexander Lockhart of St. Eleanors. -S. Mr. Albert Peters of Summerside was a passenger on the excursion for Boston to visit relatives. -S. Mr. and Mrs. Hardy of Alberton were visitors to Summerside on Saturday. -S.

Mrs. W. W. SMITH - Her many friends throughout the Province will regret to learn of the passing of Mrs. W. W. Smith, at her home in Summerside after a long illness. Mrs. Smith before her marriage was Daphne Bullman and was born in New Glasgow on August 19th, 1889. She was married in 1902 and came with her husband to reside in Summerside in 1910. Mrs. Smith was a life long member of the Christian Church and was very active in church work until her health failed. Mrs. Smith had a retiring disposition but by her kindness and charitable works made many friends. There are left to mourn besides her sorrowing husband, one son Clifford, at home, and two stepsons, Mr. L. W. Smith, manager of the Canadian National

IN MEMORIAM - MRS. W. W. SMITH - Her many friends throughout the Province will regret to learn of the passing of Mrs. W. W. Smith, at her home in Summerside after a long illness. Mrs. Smith before her marriage was Daphne Bullman and was born in New Glasgow on August 19th, 1889. She was married in 1902 and came with her husband to reside in Summerside in 1910. Mrs. Smith was a life long member of the Christian Church and was very active in church work until her health failed. On My Head! How It Aches! Headaches are one of the most aggravating troubles a person can be tormented with. Those dull throbbings indicate there's something wrong with the system. However, whatever the cause, you will find in Burdock Blood Bitters a remedy to work in such a way that the headache, or any other ailment, will disappear and you will not be further troubled with them. For sale at drug and general stores; put up for the past 50 years by The T. Millers Co., Limited, Toronto, Ont.

BRINGING UP FATHER - DADDY, THERE'S THAT CROONING 'TIS ON 'TIS EVERY NIGHT. BY GOLL, IT'S BOLD, IT'S BOLD, HE'S WITH A CLAM. YES, MR. JIGGS, I RECEIVE A THOUSAND DOLLARS ABOUT MY SINGING. WELL, YOU'D BETTER WRITE ME AND STAND PER SINGING. YOU KNOW I SING SO MANY SONGS THAT HE CAN'T ME. I DON'T DROST. YOU'VE BEEN ENOUGH OF 'EM.

Face Winter with Good Resistance

You go only half-way when you take outward precautions against winter exposure. But you go all the way when you also fight winter conditions with good resistance. Build up good resistance with those precious health factors - Vitamins A and D. And the most pleasant, convenient and effective way of doing this is to take Squibb Adex Tablets regularly every day. Every Adex Tablet contains 1500 units of resistance-building Vitamin A, 2450 units of the sunshine Vitamin D, specially protected to ensure you of greatest benefit. Start with Adex now. SQUIBB ADEX TABLETS 10-D Bested Sunshine - Regularly, every day, give your child Squibb Cod-Liver Oil. Squibb's is vitamin-protected - a single teaspoon of Squibb's contains many times as much Vitamin A and D as oils not protected. Always ask for Squibb Cod-Liver Oil. Plain or mint-flavored. SQUIBB 'A NAME YOU CAN TRUST'

Telegraphs at Summerside, and Mr. Robert Smith, North Wiltshire, and a step daughter, Mrs. Clarence Noy of North Wiltshire, also two brothers and two sisters, Mr. William Bullman of New Glasgow, Mr. Adam Bullman of Wheatley River; Mrs. Brenton Dickson of New Glasgow and Mrs. W. H. Stevenson of Charlottetown, to all of whom the Guardian extends sincere sympathy. The funeral will take place on Tuesday at 1 p.m. from her late residence on Belmont St. to the People's Cemetery. Rev. Carlyle Waterworth will conduct the service assisted by Rev. W. H. Harding.

Acadia Wins Hockey Game (C. P. by Guardian's Special Wire) WINDSOR, N.S., Feb. 3. - Acadia University's hockey squad beat Windsor Maple Leafs 4-3 in a Valley League game here tonight. Windsor protested the winning goal, declaring it was scored on an offside play. Windsor scored the only goal in the first period, but the collegians scored three quick goals in the opening minutes of the second. Windsor rallied again before the final bell. Maple Leafs tied the score early in the final, and then came the protested goal to end the scoring.

N.B. College Pioneer In WinterSports

(C. P. by Guardian's Special Wire) FREDERICTON, N.B., Feb. 3. - The University of New Brunswick is pioneering in winter sports among the Maritime colleges, now being engaged in organizing a winter carnival of various winter sports for the 10th inst. and already having held a skating meet, the carnival is to include ski events, snow-shoe racing, hockey and skating. The New England States have had numerous college winter sport carnivals for some years past, but in the Maritimes this has been quite generally neglected. "Ted" Coffey in charge of intra-neutral sport is the organizer.

SAULT STE. MARIE, Ont., Feb. 3. - One upon a time, perhaps before Columbus discovered America, a Chippewa Indian kindled a fire on St. Mary's River to warm his hands while hook-and-line fishing. That's how the sport of fish-spearing started. It was late in the day and the brilliant glow of the fire was reflected on the fish swimming in the water. The Indians lost no time in devising a spear, probably of wood, with which to kill fish. To the Indian the spear represented an easier way of eking out a livelihood. Today spearing is one of the most popular of the Sault's winter sports. Hundreds of fish shanties dot the river ice from Iroquois Point to De Tour. There appears to be no waning of the popularity of the sport this winter. The prize of the 1934 season, caught in St. Mary's river thus far, is a 48 inch muskellunge weighing 35 pounds. It was killed by William Hestmiller, Mack B. O'Connell, and many others. The fish killed a 7 1/2 pound musky near Six Mile Point. It was 46 1-2 inches long. The spear the aboriginal Indian used was probably of wood and the wood fire gave him light, but they have changed. Today fish spears are made of bab' metal and the spearing is done in a stove heated shack with the aid of electric lights. Electric lights are in the experiment stage but they are rapidly taking the place of the kerosene lantern and bucket. Though popular for the sport that's in it water fishing is more than that. It is estimated between 30 and 85 Sault families depend on it for a living, and many a family, hard pressed during the past few years, has had its income comfortably augmented, both in matter of cash and larder. Fishing is chiefly for herring but occasionally a fisherman will spear a loach, a soft jelly-like fish of the carp family, common in northern waters. The sport appeals to almost all fishermen. Ministers common labors, business executives, office boys, and others. All have their shacks on the ice from the first freeze until the ice begins to thaw in the spring. The season continues about three months, and the cost of a fish shanty is from \$2 to \$3. New shacks each season at minimum cost, while others are built in sections and bolt the pieces together so that they may take down the shanties and store them during the summer. A light, usually a lantern, on the outside of the shack throws a beam across the "spear hole" so that when the fish swim under the opening they appear a silvery form in the water. Electric lights are used with a flashlight reflector and power is from a storage battery. The fisherman kneel down when in action. An allow rest is usually built across the fishing hole, and the fisherman leans over the opening. As the fish "come up to the hole" they are made visible by the light shining on them. The spear is then carefully placed in the water, and lowered directly over the fish. A snap of the wrist sends

The season continues about three months, and the cost of a fish shanty is from \$2 to \$3. New shacks each season at minimum cost, while others are built in sections and bolt the pieces together so that they may take down the shanties and store them during the summer. A light, usually a lantern, on the outside of the shack throws a beam across the "spear hole" so that when the fish swim under the opening they appear a silvery form in the water. Electric lights are used with a flashlight reflector and power is from a storage battery. The fisherman kneel down when in action. An allow rest is usually built across the fishing hole, and the fisherman leans over the opening. As the fish "come up to the hole" they are made visible by the light shining on them. The spear is then carefully placed in the water, and lowered directly over the fish. A snap of the wrist sends

SAULT STE. MARIE, Ont., Feb. 3. - One upon a time, perhaps before Columbus discovered America, a Chippewa Indian kindled a fire on St. Mary's River to warm his hands while hook-and-line fishing. That's how the sport of fish-spearing started. It was late in the day and the brilliant glow of the fire was reflected on the fish swimming in the water. The Indians lost no time in devising a spear, probably of wood, with which to kill fish. To the Indian the spear represented an easier way of eking out a livelihood. Today spearing is one of the most popular of the Sault's winter sports. Hundreds of fish shanties dot the river ice from Iroquois Point to De Tour. There appears to be no waning of the popularity of the sport this winter. The prize of the 1934 season, caught in St. Mary's river thus far, is a 48 inch muskellunge weighing 35 pounds. It was killed by William Hestmiller, Mack B. O'Connell, and many others. The fish killed a 7 1/2 pound musky near Six Mile Point. It was 46 1-2 inches long. The spear the aboriginal Indian used was probably of wood and the wood fire gave him light, but they have changed. Today fish spears are made of bab' metal and the spearing is done in a stove heated shack with the aid of electric lights. Electric lights are in the experiment stage but they are rapidly taking the place of the kerosene lantern and bucket. Though popular for the sport that's in it water fishing is more than that. It is estimated between 30 and 85 Sault families depend on it for a living, and many a family, hard pressed during the past few years, has had its income comfortably augmented, both in matter of cash and larder. Fishing is chiefly for herring but occasionally a fisherman will spear a loach, a soft jelly-like fish of the carp family, common in northern waters. The sport appeals to almost all fishermen. Ministers common labors, business executives, office boys, and others. All have their shacks on the ice from the first freeze until the ice begins to thaw in the spring. The season continues about three months, and the cost of a fish shanty is from \$2 to \$3.
