

Negligee Shirts for "Big Boys"

A man said to us the other day. "When will I get a shirt that'll fit me; no one has anything larger than 16 1-2." Right here "we told him" and he was satisfied too.

Big boys need big shirts and ours are made extra large in the body so there'll be lots of room in them. Sizes 17, 17 1-2, 18, 18 1-2.

\$1.45 each.

FUR PRODUCERS LTD. is the Biggest Fox Company in the World with the Best Foxes and the Lowest Ranching Cost

A DOUBLE GUARANTEE is back of every arrangement and every statement made in the prospectus of Fur Producers Limited. The Directors are successful men of high standing. In addition to this The Fur Farmers Bureau & Exchange, Limited, have placed their seal on the proposition, which means that we guarantee every statement to be correct—and guarantee that the foxes will be positively of the highest possible quality.

THINK OF WHAT PROTECTION MEANS in the Fox Industry. Think of how much better and safer your investment would be placed through an organization that has never handled anything but strictly "Class A" gilt-edge propositions. Think of what it means to have an organization like the Fur Farmers Bureau market the product of the ranch from year to year. Don't this mean protection—and what greater factor is there in Fox Industry than PROTECTION?

THE BIGGEST COMPANY WITH THE SMALLEST EXPENSES

Can you conceive of a stronger combination than the biggest Company in the world with the smallest expenses? One means the other, and both mean the same thing—business economy.

Anyone and everyone will admit that the expenses in a Company with one hundred foxes will be proportionately less than a smaller one; inasmuch as only one night watchman will be necessary in Fur Producers Limited in place of ten night watchmen in ten 5-pair Companies. It also saves the cost of buildings to house the watchmen and caretakers. One man can just as well look after twenty-five pair of foxes as five pair, and the cost of food in large quantities will be proportionately less to the shareholders of Fur Producers Limited.

BARE COST RANCHING ARRANGEMENT

This is often the dividing point between a good, and a not-so-good fox proposition.

While some ranches charge on the basis of from 10 to 33 1-3 p.c. of the production of young foxes for keep, the foxes in Fur Producers Limited will be ranched at actual cost—and this means even less than actual cost in a smaller proposition; as food purchased in wholesale quantities will be purchased at a saving.

And mind you, amateurs will not be employed to care for these foxes. The ranch supervisor will be Mr. Frank F. Tuplin, (the most successful pioneer rancher in Prince Edward Island)—and even his assistants are experienced men, who are eminently qualified.

Think of what this means to the investor in the way of security and protection.

The biggest company in the world with the best foxes and the lowest ranching cost. The Company has an expert rancher competent assistants, qualified veterinary, and a modernly equipped ranch.

What is more the Company will be the most influential of its kind, with world-wide connections. You will have better chances to secure a good average dividend in a Company with one hundred foxes, as a better average can be secured.

Then, again, administration expenses will be proportionately less in FUR PRODUCERS LIMITED. And any person will appreciate the fact that the stronger the organization the better the protection, and the greater are the possibilities for profits.

THE BEST FOXES THAT MONEY CAN BUY

The Foxes in FUR PRODUCERS LIMITED are the very best that money can buy—there will be nothing better to be had anywhere, at any price. In fact the Fur Farmers' Bureau & Exchange Ltd., would not place their seal on the proposition unless the foxes contracted for were positively the best on the market. They are all selected from strains with prolific propensities, and are all the progeny of the stock which brought the world's highest prices on the London Market.

EXPERT FOX RAISER WILL HAVE SUPERVISION OVER RANCH

Perhaps no person in the Black Fox Industry has made a greater success of Fox raising than has Mr. Frank F. Tuplin.

There will be no experimenting in Fur Producers Limited—every man who has anything whatever to do with the foxes is experienced and practical. What does this mean? It means that Fur Producers Limited is a safe and sound investment proposition, with the absence of risk and the possibilities of big profits.

Isn't it reasonable to conclude that your investment is safest in a ranch that does not have to experiment—in a ranch that is manned and managed by competent, efficient men, who have "made good" in every sense of the term.

If you wish to eliminate every speculative element and make your Fox Investment a permanent thing, then you'll acknowledge the advantages of FUR PRODUCERS LIMITED by a signed application for shares.
