COLD GOT YOU ALL STUFFED-UP?

Do This Quick for Relief!

If you are sneezing and snuffling from a cold . . . all stuffed-up, with your nose and throat raw and sore—combat this distress, as thousands do, by gargling with new Pepsodent Antiseptic.

The reason it's recommended is this: Standard laboratory tests *prove* new Pepsodent Antiseptic kills millions of germs that go with colds. The very type of germs that many medical authorities say often *heighten* the misery and *prolong* the effects of a cold.

Isn't it only common sense then, to gargle with new Pepsodent Antiseptic at first sign of a cold! What better way to combat millions of germs that swarm on mouth and throat surfaces as far back as you can reach . . . back where illness often strikes first!

So treat a cold this sensible way: Get plenty of rest, avoid exposure, dress warmly, drink plenty of liquids . . . and gargle *frequently* with new Pepsodent Antiseptic. See if you don't relieve discomfort almost at once!

PEPSODENT ANTISEPTIC

WAKE UP, CANADA !

One item in Canada's Second Great War history of which citizens of this country have no reason to be proud is summed up in an official statement as follows: "357,634 Canadians of military age — rejected in the National Selective Service mobilization call-up as unsuitable for army service anywhere in any capacity."

Any thoughtful Canadian must be stunned by this record. The face that 357,634 out of the 1,260,952 called up were unfit is a staggering fact. This surely must be a mighty blow to Canada's national pride. And, it might be pertinent to ask how long a nation can survive if decade after decade it fails to provide the healthful conditions and training necessary to develop a physically fit people.

If it is money that blinds the nation to the situation, it should be noted that the cost of establishing modern health services everywhere in the country would be but a mere fraction of the amounts now being wasted in attempts to take care of illness which should have been prevented.

Sickness—much of it preventable—and untimely deaths in Canada are estimated to be costing at least one billion dollars a year. Canadians should wake up to the fact that something should be done — and done quickly.

Wake up, Canada! In their efforts to make the nation healthy, health department administrators need the whole-hearted support of public opinion. To help mould public opinion, the Health League of Canada has designated the week of February 3 as "Health Week." This observance is designed to make known the facts about the state of the nation's health, and to make known what can be done immediately to remedy some obvious defects.

"Health Week" is sponsored by the Health League in co-operation with federal and provincial health departments and provincial education departments.

A Bronchial Ailment Quickly Subdued By NERVILINE

Plessisville—Local residents are pleased to learn of the recovery of Mrs. Alphonse Turgeon. To-day she is well—thanks to Nerviline.

"I had been suffering from Bronchitis for some time without obtaining any real relief. My niece happened to pay me a visit and advised me to try Nerviline. For many years she had used Nerviline herself—always with good results. I applied Nerviline to the throat and chest and secured quick relief. I can recommend Nerviline as very good for colds, pains in the muscles or back; for sprains it is a good all-round liniment." Get your 35c bottle of Nerviline from any druggist.

Sees Great Future In Fish Industry

ST. JOHN'S, Nfld., Feb. 5—(CP)—Newfoundland is better situated than any other country in the world to make a business out of fisheries and every effort should be made to develop the industry, Vice-Admiral Sir Humphrey Thomas Walwyn, governor of Newfoundland since 1936, said prior to his recent retirement from that post.

"There will always be a substantial demand for salt fish and there is no reason why prices should fall to pre-war level," he said before a joint meeting of the Newfoundland Board of Trade and a St. John's Service club.

"I am certain there is a great future for the fisheries of this country if she will seize her opportunities and work them out steadily," he said. "When fishermen refuse to go out after the crews consider they have made enough money for the season, and when men work for a few months and having made a few hundred dollars walk out and blow it for six weeks, the outlook for the future is rather disconcerting.

"The herring industry has recently had a great incentive and I hope will continue to maintain a large export market. Some of the most prosperous parts of Newfoundland are where the herring fishery is actively prosecuted.

"Newfoundland's war effort was magnificent and her contribution in manpower to the navy, army and air force, merchant navy, foresters ad civil defence has often received generals and worthy tribute in England and elsewhere.

"The war brought a boom of prosperity to the island while completely transformed the economic position of the country, and I hope this will continue for many years to come.

"It is a debatable point as to whether this country can be called 'self-supporting'; at the present time, yes, but looking some years ahead, I doubt if it will be for practical purposes, even with our present purplus of nearly $26,000,000."

PRE-NATAL PROTECTION

The porcupine is equipped, even before birth, with quills half an inch long.

FIRE ALARM — The firemen responded to an alarm from the Lewis Packing Co., Queen Street wharf about 7 o'clock yesterday morning. Their services were not required.

PAINFUL ACCIDENT — Mr. Lewis Reid of Hope River is still suffering from an injury received in a hockey game in New Glasgow Rink three weeks ago when he had the misfortune of having his ankle broken.

IN HOSPITAL — Mr. Arthur McQuaid, collector of mail from the city boxes, is a patient in the Charlottetown Hospital, following an accident when his sleigh was struck by an auto at a street intersection.

HEALTH LITERATURE — National Health Week, Feb. 3-9, is being observed at the Public Library, where recent books on public health are prominently displayed. National Health Week is sponsored by the Health League of Canada in cooperation with the provincial departments of health and education.

ISLANDER DEAD. — Mr. E N. Easter of North Wiltshire has received the notice of the death of his brother Frederick F. Easter of Davidston, Saskatchewan, who passed away in Regina Hospital. Mr. Easter was born at North Wiltshire, Prince Edward Island on January 29, 1877. He leaves to mourn his wife and two daughters also two brothers and two sisters.

STILL GOING STRONG — One of the most active branches of the Provincial Command of the Canadian Legion has been the one established about nineteen years ago at Tignish, and still going strong. In a recent issue it was inadvertently stated that this branch had been "opened" by His Honour Lieutenant Governor Bernard. The purpose of His Honour's visit was merely to present the branch with portraits of the King and Queen.

LAID TO REST — The funeral of Mrs. Winnifred Bagnall was held yesterday morning from the A. A. Hennessey Funeral Home to St. Dunstan's Basilica where Requiem High Mass was celebrated by Rev. P. F. McDonald, who also conducted service at the grave. The pall bearers were: Messrs. Judge C. G. Duffy, Lt. Col. J. R. Paton, W. E. Bentley Simon P. Paoli, W. D. Gillis and D. J. Riley.

FUNERAL SERVICES — The funeral of the late Mr. William H. Mahar took place Saturday morning, February 2nd. at 8.45 from N. D. McLean's Funeral Home to St. Dunstan's Basilica where requiem high mass was celebrated by Rev. P. F. McDonald who also conducted service at the grave. The pallbearers were Messrs. Patrick Dennis, Patrick Cullen, Frank Heron, John W. Gormley, Ralph Chipman, A. Ryan. Interment in the R C. Cemetery.

CITY POLICE COURT NEWS — The operator of a motor vehicle charged with "reckless driving" was remanded to jail for a week yesterday at the City Police Court without option of bail. The accused in a case of drunken driving was remanded until today. Bail was set at $5.. Three drunks were each fined $5 and costs or 10 days. A fourth drunk was remanded for three days. A drunk and disorderly was fined $10 and costs or 20 days and another man on a similar charge given 20 days to be followed by another 20 on an old commitment.

SUCCESSFUL CARD PARTY — Another of the weekly card parties was held at the Knights of Columbus Home, Summerside on Tuesday evening with a good attendance. Prize winners for bridge were: Ladies' First, Mrs. W. J. Sullivan; Ladies' Consolation, Mrs Josephine Murphy; Men's First, Elmer McDonald; Men's Consolation, Rev. J. C. McDonald. For Auction: Ladies' First, Mrs. John C. Gallant, Ladies' Consolation, Mrs. Gertrude Mullin; Men's First, Wilfred Gallant; Men's Consolation, John Arsenault. The committee in charge were J. Henry Gaudet and Cecil Carver. —S.

Personals

Mr. Campbell L. Smart, vice-president of Messrs. Cockfield, Brown and Co. Ltd. Advertising agents, was in the city yesterday on a tour of the Maritime Provinces.

Mr. James Coyle, make-up foreman of the Patriot who has been a patient in the Charlottetown Hospital for a short time, has returned to his home.

Lt. N.S. B. E. MacArthur, Cornwall, and Lt. N.S. Margaret MacNeill, Summerside, left Halifax last week, for England on board the hospital ship Lady Rodney.

TO INSTAL FIRST TISELIUS ELECTROPHORESIS MACHINE

There will shortly be installed at Dalhousie University in the Medical Sciences Building the first Tiselius Electrophoresis Apparatus in Canada. This piece of equipment was originally designed in the famous laboratory of physical chemistry at the University of Upsala in Sweden. It will be assembled and built in the Department of Biochemistry under the terms of a grant of about $5,000.00 from the National Research Council of Canada to Dr. E. Gordon Young.

The purpose of this instrument is to measure the rate of flow of particles under the force of an electric current of high voltage and thus to separate and identify compounds from complex mixtures such as blood. By this means it is possible to study the antibodies of the blood stream which are responsible for resistance to various diseases. The instrument has proved a powerful and valuable tool in the hands of the biochemist in the modern study of proteins

POPULATION INCREASE

The population of the earth approximately 20,000,000 annually.

46 More Dieppe Awards Announced

By DOUGLAS HOW

OTTAWA, Feb. 6—(CP)— The army, in its flat, colorless style, told new stories today of the braveries of Dieppe.

They may or may not be the last official stories, the last of the citations, the last awards. Not even the army's honors and awards section is sure of that. If they are not the last they are nearly the last. But their chief importance lies in the new words the new knowledge of that Aug. 19, 1942, they bring forth for history and for memory.

They came in the form of 46 awards and citations, ranging from D.S.O.'s for brigadier and battalion commanding lieutenant-colonels to military medals and mentions in dispatches for privates.

The peculiar fire and dash of Dieppe is in them all. The things that individual men do to work the achievement of tactical and strategical successes is in them all, obscured, submerged though they are by the phrases of official style.

The vicious give and take that reaped 3,250 casualties among the 5,000 Canadian raiders is there, too. From them, all togather, emerges more of the human stuff that went into making this reconnaissance in force a thing that men such as Eisenhower and Churchill called a vital element in final victory.

Through Dieppe Allied planners learned many things they had to learn before the battles of decision could be fought. Its main purpose was to find what would happen when a great port was attacked, to get knowledge of German strength on Europe's western shore, to find out whether a successful invasion should spearhead itself for a port.

North Africa, Sicily, Italy, Normandy are monuments to the Canadians who fell at Dieppe to find out these and other things.

The 46 award and citations are monuments, too, in their own way. Maybe they are the last. Maybe they aren't. Really, it won't make much difference.

Dieppe was the sort of thing that lives by itself and by its memories, needful of nothing else.

UIGG-KINROSS W. I.

The annual meeting of Uigg-Kinross W. I. was held at the home of the President, Mrs. S. A. MacLeod with eight members and three visitors present.

Minutes of last annual and regular meetings were read and adopted.

During the year the Institute sponsored a chicken supper, 3 card parties, Red Cross meetings during winter months, packing and mailing 14 overseas boxes, 400 cigarettes or chocolate bars each month. A Blood Donor's Clinic, a three-act play (repeated 6 times) an auction sale, a community canvas for X Ray Unit, prizes, picnic and Christmas treat of fruit to school children, purchase of school supplies, repairs and painting of interior, purchase of a set of the 'Books of Knowledge" to be presented to Uigg School in memory of Donald Hume and Stanley MacLeod, lettering and unveiling of honour roll, a district collection, reception and presentation of signet rings to service personnel, dinner for teachers attending convention, district collection of clothing for National Clothing Drive. District canvass for Salvation Army Drive. Meetings were held to discuss Rural Electrification and a canvass of residents of Murray Harbour Road undertaken and the forming of a committee to discuss Rural High Schools with the Superintendent of Education. Donations were sent to the Princess Alice Fund, T. B. League, Save The Children Fund and Salvation Army.

War work included: 8 quilts, 1 crib quilt, 1 afghan, 2 hooked rugs, 2 prs. pillow cases, 2 towels, 7 prs. socks, 8 prs. gloves and 4 navy scarves.

The retiring officers expressed appreciation for co-operation given them during their term of office and extended a vote of thanks to all who had in any way assisted with the work of the Institute. The school committee reported interior of school in better repair than formerly. Exterior and toilets suggested as projects for coming year. This committee moved that a vote of thanks be extended to Mr. S. A. MacLeod, Eddy and the men who put up the ceilings, also Mr. Greenwood, Orwell, for the excellent paint job. This work gained for the school full marks for improvements from the Department of Education.

Election of officers for 1945-46 was as follows: President— Mrs. Hugh Martin. Vice President — Mrs. J. O. MacLeod. Secretary-Treasurer— Mrs. Hudson Musick.

Directors—Mrs. S. A. MacLeod, Mrs. Edison MacLeod, Mrs. W. E. Mackinnon. Auditors— Mrs. A. A. J. MacLeod, Mrs. J. D. MacLeod.

Financial statement by Mrs. J. D. MacLeod, Secretary.

Satisfactory Year for North American Life

The year 1945 has been a very satisfactory one for the company in many respects, reported W M. Anderson, general manager of the North American Life Assurance Company, at the company's recent annual meeting. Of the new business total of $43.7 million, new assurances accounted for $40.4 million, increasing 8.5 per cent as compared with 1944. New annuity business of $3.2 million was somewhat lower than in the previous year. The new business as a whole consisted of 15,440 policies averaging $2828 in amount. Due to slightly higher lapses and surrenders, net terminations were somewhat increased at $16.2 million, being 4.3 per cent of the business exposed to termination. The gain in business in force of $27.4 million represented an increase in total business of 8.2 per cent. The business in force at the year end, which totalled $362 million, included 139,000 policies averaging $2604 in amount.

Gross death claims and net incurred death losses were significantly lower than in 1944 in spite of the materially increased amounts at risk. On the other hand, the demand for surrender values was somewhat higher. Total contractual benefits and dividends, amounting to $5.3 million, were slightly higher than in the previous year while the net increase in policy reserves was $5.7 million, a total of $11 million in amounts paid to policyholders or held additional for their benefit. This compares with premium receipts of $10.7 million, which increased materially from $9.8 million in the previous year.

The surplus earnings for the year, which totalled $1,248 thousand, were 5.5 per cent higher than in 1944, the increae being more than accounted for by the improvement in mortality. Dividends allotted to policyholders, which amounted to $1,011 thousand, were 81 per cent of surplus earnings.

ARMY OFFICER RETURNS

(Phoenix Arizona Exchange)

A former Arizonian whose decorations include the Silver Star, the Bronze Star, and Purple Heart with cluster, returned to Phoenix this week for his first visit in three years.

Col. H. A. Hunt, former civil engineer in the Yuma bureau of reclamation office, came here to visit his aunt, Mrs. E. E. Hiller, and Mr. Hiller at their home 897 East Roma avenue.

The veteran, who grew up in Miami, is on terminal leave until April. In the army for almost five years, he spent 21 months in the European theater before returning to this country.

While overseas he took part in the Southern France, Ardennes, Rhineland, and Central Europe campaigns. He won the Silver Star Medal, awarded for gallantry in action, when he continued to direct an armored task force near Chateau Salins, France, after being wounded. The action took place in November, 1944.

The Purple Heart which he received on that occasion was his second. He was awarded the first for wounds received a month earlier.

He won the Bronze Star for meritorious service in Germany.

Colonel Hunt served with the Fourth Armored Division.

On leaving here he will go to Southern California for a vacation, then return to his present home in Salt Lake City. He will work with the bureau of reclamation there.

The Col. Hunt referred to is a cousin to Mrs. Elizabeth Luque, of Crapaud and Stanley Bridge, and was born at Tyron, P. E. I., a son of the late Mrs Frankie Howatt Hunt.

REPUBLICANS OUT

BELFAST —(C P)—With the recent release of 11 Irish Republican Army internees, the jails in Northern Ireland are clear of internees for the first time since the autumn of 1936.

Princess Seeks Higher Status

NEW YORK, Feb. 2 —(AP)— Princess Safiyeh Firouz, founder of the Woman's Party of Iran—where women cannot vote—now is in the United States, studying the ways and means by which American women won suffrage.

"Now that the war has ended, the Persian Woman's Party expects to redouble its efforts for the vote," says the princess, who is the wife of General Hussein pose giving women the vote. Also, Firouz, former Minister of Roads and military governor of the Fars Province."

"To some it may seem that we have a long way to go. In a country where women were freed of the veil only 10 years ago it is natural that many men should opthere are some women who are not fully aware of its benefits.

"But as modern education has reduced illiteracy among women, it is only a matter of time until Persian women will manifest faculties and practical capacity in carrying on the work which is still largely done by men. To that end I am travelling in order to meet and know American women and to study the methods which they employ in organization."

Princess Firouz's American schedule includes conferences with Mrs. Carrie Chapman Catt, America's No. 1 suffragette, who now is in her late eighties; Dr. Lena Madesin Phillips, president of the International Federation of Business and Professional Women; Miss Margaret Hickey, president of the National Federation of Business and Professional Women's Clubs, and Miss Pauline Mandigo, winner of the American Woman's Association 1945 award for outstanding achievement.

Membership Doubled

Madame Firouz, who is a beautiful, dark-eyed, chic woman in her thirties, says that the organization was founded in 1942 with a membership of 200 and that it has more than doubled its membership. She says that it has never had a president and that it is governed by a committee of 19 women, elected once a year. She is one of the 19.

"Much of our work is done through committees," she explained, in discussing the organization's program. "For instance we have a committee of health, which conducts a clinic, dispensing treatment, medicines and clothing to those who need it. Much of my work has been done with this committee We also have a committee of education, which holds adult classes to teach women to read and write, a committee of arts and crafts, teaching women to do fine sewing, and others.

Recently the organization has been devoting much of its activity to prison and health reform. In our country girls of 16 and women of 90 were placed in the same prison without segregation according to crime. Their children had to go with them, because there was no other provision for their care. We protested against this to the Department of Justice, which has now rectified the situation.

Despite her interest in women's suffrage, Madame Firouz said that the primary object of her second visit to the United States was to see her two sons, now students at Yale University.

Princess Firouz was born of Persian parents in Hongkong, where her father owned and operated a shipping line.
