-TENDER ACCEPTED—At an adjourned meeting of the Summerside Town Council held on Tuesday night, tenders were received from the Journal Publishing Company and Messrs. Williams and Crue for printing the Bonds recently sold to Messrs. Johnson and Ward. The former's tender was \$65 for the fifty bonds required and the latter's \$40, which was accepted. -FIRST CARGO OF FERTILIZER FROM AMSTERDAM—The S. S. Brunswick, arrived at the Marine Wharf, Summerside, on Wednesday morning with 3700 tons of fertilizer from Amsterdam, Holland. The steamer's gross tonnage is 2500. She is owned by Messrs. Exhardt and Dekkers of Rotterdam, and was built in 1919 and is commanded by Capt. Vrolyk. This is the first water borne shipment of fertilizer to the Island by a Canadian firm. Mr. McIvor of Kinkora, is the Island representative of this firm, the Tangway International Fertilizer Company of Quebec City. Mr. McIvor brought fertilizer from this firm nine years ago. Last year a car load was used on Island farms. Mr. Perry of St. John, N. B., who is here in the firm's interest, says that although his firm have been doing business in their fertilizer with the sister Maritime Provinces for twenty-three years, this is the first time that any has been landed at an Island port. A schooner, the Florence G., from Tignish, Capt. Hodder, is now at the Marine Wharf and will take 500 tons of fertilizer from this steamer to Victoria for Mr. McIvor. S.

-CHILDREN'S AID SOCIETY—The regular monthly meeting of the board of management of the Children's Aid Society was held in the town building, Summerside, Tuesday evening. The Vice President, Mr. Geo. E. McNutt, presided in the absence of the President. Cases of two families of needy children in Malpeque and O'Leary were considered and the secretary instructed to visit them and to grant some financial assistance. A good report was received as to the progress being made in school by a boy who is under the care of the society and who came into town from an outside district. The Truant Officer, Mr. Vincent Harrington, reported that during the past month he had no cases of habitual truancy. A boy usually had the effect of getting him back to his class. The Truant Officer urged upon the Society the necessity of having the fire bell rung at the hour designated by the Curfew Bye-Law so as to give the necessary warning to the children that they should be in their homes. He stated that he found the Curfew Law was working very well, but the children had no means of knowing the time and some warning should be given at night by either the fire bell or fire whistle being sounded at the Curfew hour. -NEWS OF KATHERINE MAY—Captain Sampson Grady of Summerside, has received an interesting letter from Mr. Ronald Lindley, of Hamilton, Bermuda. The Katherine May is the large four-masted schooner, which was at Summerside for some time last summer and which was badly disabled and adrift with a broken rudder off the Florida coast last fall. Mr. Lindley was desirous of obtaining a charter for a load of coal for Summerside. In his letter he spoke very highly of the treatment Captain L. W. Fletcher and his crew had received while at Summerside. The schooner is loading at Jacksonville with lumber for Bermuda, where she will take on iron for Norfolk, Virginia, and will get her charter there for a cargo of coal for Summerside. She should arrive about the end of June. S.

-GOOD RIFLE SHOOTING AT RANGES—Five teams competed at the indoor rifle range at Summerside on Tuesday night, the shoot being for a prize of five hundred rounds of ammunition. The match was won by a team composed of J. Brooks, of Linkletter, and J. Deschamps and Dr. A. L. McDonald, of Summerside. The highest score for the evening was made by Henry Noonan, with 88. Among the younger shots, William Brennan turned in a score of 85, showing that with the rifle at any rate is a chip off the old block. The younger generation are out to make their fathers step some. Another prize of 500 rounds of ammunition will be competed for next Friday evening on this range. The outdoor range was opened on Monday. This (May 12th) is the earliest date that shooting ever took place on the Summerside range; and remarkable good shooting it was for the first of the season. Two possibilities of 35 were made by one marksman and two other scores of 34 and 35 were turned in. S.

GUARD YOUR PROFITS WITH FROST FOX FABRIC

WHEN you use ordinary netting or weak fox wire on your ranch you are never sure of profits. Rust and constant tugging by foxes open the way to escape and loss of valuable animals.
Keep your profits safe with Frost Fox Fabric. It is a complete protection because it is made of unbreakable chain link mesh and its flexible hinge-like joints resist every effort of foxes to find a weak spot. It is economical because it is heavily galvanized after weaving and gives years of efficient service. It is profitable because it ends loss, does away with repair costs and outlasts every other type of fox wire.
