INTEREST WANING IN STRING MUSIC

WINNIPEG, June 7 — Keenness of Canada's string musicians is generally lower now than in 1931, Maurice Jacobson, London composer, said here. He is returning to England after adjudicating musical festivals throughout Western Canada.

"That is a great pity," he said, "because it is in the instrumental field that Canada, as a nation, excels. The standard of the string music is still good but the keenness is less."

"Canada," he added, "is far in advance of the Old Country in orchestral music in the aggregate."

BENEFITS SEEN IN CHINA WAR

REGINA, June 7 — Dispersing of seats of learning to outside provinces and unification of China were seen as benefits of the Oriental war by Professor L. Forster, head of the Teachers' Training Department at Hong Kong who is visiting here.

[illegible] surprising feature of the war was that the Chinese [illegible] antagonists so long. He described the struggle as a duel between Chinese flesh and Japanese weapons.

"Maureen O'Sullivan" At Capitol

Lovers pretending to be social celebrities to impress each other, an irrepressible small brother who plays a clarinet and complicates romance, troubles with a huge St. Bernard dog, mingle in a combination of hilarity, romance and intimate human touches in "Hold That Kiss," current attraction at the Capitol Theatre.

Maureen O'Sullivan, Dennis O'Keefe, Hollywood's newest romantic leading man, and Mickey Rooney form the principal trio in the medley of mirth and heart throbs.

The story deals with a travel agency clerk, played by O'Keefe, and a pretty shopgirl, Miss O'Sullivan's role. Attending a society girl's wedding as part of their work, they meet, each assuming the other is a social celebrity. They fall in love. Each tries to maintain the deception to impress the other. An absent-minded millionaire gives them a St. Bernard dog which neither can afford to keep. The heroine's small brother threatens exposure. A borrowed fashionable apartment is used for a dinner party that ends in disaster. After various hectic and comical troubles, they learn the truth about each other and love blooms on a new basis.

Miss O'Sullivan is charming in a series of costumes all in black and white. O'Keefe, in his first modern role, is a dashing and romantic young American Mickey Rooney and his boy's jazz orchestra add effective comedy, and George Barbier plays a difficult role with skill as the eccentric millionaire. Fay Holden of the "Judge Hardy Family" plays Miss O'Sullivan's mother effectively in the little family sequences and human touches woven deftly into the structure of comedy and romance.

Britons Celebrate Old Customs On Whitsun Weekend

By PAT USSHER
Canadian Press Staff Writer

LONDON, June 6—The warmest Whitsun weekend weather since 1933 today encouraged Britons to make the most of the holiday and to observe some of the old customs for which the country is famous.

A stampede to the country packed the highways and trains while a less noticeable trek took country folk to the city. Twenty airplanes tonight brought holiday makers back from the continent to Croydon airport. Business generally was at a standstill today—a bank holiday.

In London the grim old tower was one of the most popular spots. Sightseers queued for an hour waiting to see its chambers and dungeons including the place where the little princes were done to death centuries ago.

Two of the quaintest customs were observed at South Harting in Hampshire and at Coopers Hill in Gloucestershire.

South Harting men went to church wearing rosettes and carrying sticks, then drank 600 gallons of free beer. This observance dates back to the Norman conquest and is so old there is no record of why hazel sticks are carried.

At Coopers Hill cheese-rolling was the big event. Six carefully wrapped were sent down a steep slope with runners chasing them. The first to catch each won the cheese as a prize.

Essex bellringers attended a service at Chelmsford Cathedral Sunday then rang bells for eight hours in 12 churches in the vicinity of Chelmsford.

The royal family spent a quiet holiday at the Royal Lodge in Windsor Great Park where Princesses Elizabeth and Margaret enjoyed the first swim in the new pool built for them. They also rode with their father through the grounds.

London Catholics offered a supplication for world peace in a service at Westminster Cathedral conducted by Cardinal Hemsley.

Stresses Gravity Of Situation In B. C.

(By The Canadian Press)

OTTAWA, June 6—Declaring his belief unemployed men who held possession of public buildings in Vancouver have "support of the majority of the people of that city", Angus MacInnis (CCF-Vancouver East) reopened discussion of the subject today on a motion to resolve the House of Commons into committee of supply.

Something should have been done to prevent the situation arising in Vancouver, Mr. MacInnis said, and the Government should certainly act now to see it ended satisfactorily. Unemployed men had now been a fortnight in possession of the Post Office and Art Gallery.

The men were being fed daily which indicated they have support of the people, Mr. MacInnis said. But they had been in cramped quarters a long time and were likely to get "irritable." The Government at Ottawa would be responsible if trouble of a more serious nature arose.

WOMAN DOCTOR'S GRIT

JOHANNESBURG — (CP)—Riding 14 miles on horseback up a mountain, Dr. Ruth Gray of Northampton, England, worked by candlelight and treated wounds of a guide who had fell several hundred feet. He recovered.

NEEDLE WENT THROUGH

HEREFORD, England — (CP) — Mrs. Elizabeth Izzard ran a needle into her hand 40 years ago and the other day the woman, now 80, complained of a pain in her leg where the needle was removed.

Brides In Wake Of Nippon Army For New Colony

(By DEWITT MACKENZIE)
(Associated Press Staff Writer)

NEW YORK, June 7 —(AP) — Several thousand lovelorn young Japanese immigrant-farmers are sighing under the spring moon of Manchoukuo (Manchuria) and counting the lagging hours until the arrival of 2,400 girls who are being sent out from the homeland to become colonial brides.

These little women and their prospective husbands are among the "covered wagon" pioneers of one of the world's greatest colonization schemes. They are the vanguard of 5,000,000 Nipponese who will be sent out to consolidate for Mikado and country this rich conquest, for which Japan stands condemned by many nations. The girls will go forward to the youths they never have seen, to build homes and work in the fields and bear babies for the glory of Nippon, trusting blindly in the old Japanese proverb: "Love makes every girl beautiful to her man."

The slums of cities present terrible conditions and it is estimated that at least 2,000,000 people must be moved to relieve the situation. As things are, whole families of six or seven people live in single rooms perhaps 12 feet square.

In the overcrowded country districts the farms are too small to provide livelihoods for all who are born to the soil. Sons and daughters either become virtual pensioners of their parents or seek their fortunes in the big cities, frequently to land in the 12-foot cell of the slums.

Such conditions produce many serious social problems. One of them is political unrest. So the government proposes to ease the situation by sending 1,000,000 families—5,000,000 souls —to Manchuria in the next 20 years. Such as are capable among the improverished of the slums will be sent over-seas, as will the younger sons of hard-hit farmers.

Thus far some 20,000 families, totalling 100,000 people, have been sent to Manchuria. They are being helped financially by the government. The colonization will be speeded up as the settlements grow.

Loan Bill Gets Third Reading

(By The Canadian Press)

OTTAWA, June 6—Finance Minister Dunning expects the whole $30,000,000 the Government seeks authority to loan on self-liquidating municipal works to be taken up if the provinces and municipalities take advantage of it.

He told the House of Commons today as the municipal improvements assistance bill received third reading.

The bill authorizes loans to municipalities at two per cent interest where the provincial governments guarantee repayment. Loans are to be made to individual municipalities on the basis of their population except that any municipality may borrow up to $200,000.

When the bill was in committee of the whole Mr. Dunning obtained adoption of an amendment to make it clear loans could be made to boards or agencies representing more than one municipality in the construction and operation of joint projects. The amount of loans to such board is not to exceed the maximum amount the group of municipalities would be entitled to if borrowing separately.

Quiet Restored In Strike-torn Jamaica

KINGSTON, Jamaica, June 6—(CP Cable)—Effective patrolling of the island by military and armed police squads stopped what authorities believed was a proposed Jamaica-wide strike planned for today.

At Lluidasvale in St. Catherine parish and Gray's Hill in St. James, however, mobs clashed with police who fired on them when they grew threatening. Two were wounded at the former place and three at Gray's Hill. Several were arrested at each place.

URGES HOSPITAL CARE INSURANCE

WINNIPEG, June 7 — Practical low-cost methods for putting group hospitalization insurance into the family budget were outlined by Dr. C. Rufus Rorem of the American Hospital Association in an interview here. He said any plan adopted in Winnipeg should follow those now successfully operating in the United States.

"Hospital care insurance is not a panacea for the public or the hospitals," he said, "but it helps the patient by paying his hospital bill, the doctor by increasing his chance of collecting a fee the taxpayer by removing some people from tax-supported hospitals, the businessman by decreasing need for philanthropy and the general public by removal of the economic barrier to hospital treatment."

Dr. Rorem conferred with directors of the association on technical details of the local plan, now in formative stage.

He advised that hospital service care for Greater Winnipeg provide coverage for families instead of just the wage-earner. "It is fatal not to include family coverage," he stated.

He believed communicable diseases should also be covered in the plan and that rates in United States averaged from 65 to 75 cents a person and one to two dollars monthly for an entire family.

Hospital care insurance had rapidly expanded in the United States in the past five years until now there are 1,600,000 persons participating.

Denton Massey Stresses Unity

Toronto M.P. Addresses Moncton Service Clubs.

(C. P. by Guardian's Special Wire)

MONCTON, N. B., June 6—"If we cease to be a united Canada how far can we expect to progress? If we cease to hang together are we not exposing ourselves to the danger of hanging separately?" asked Denton Massey, M. P., Toronto, in addressing a joint luncheon meeting of Moncton service clubs today.

"You and I, as Canadians, are challenged as we have never been challenged before to determine whether we wish to be citizens of Canada, a nation welded together indissoluble by the principles worked out and laid down by the Fathers of Confederation, or whether we wish to see our country disintegrate into an unhappy collection of Balkan-like principalities," he said.

"How futile it is for one province to attempt to meet single-handed the great national problems that express themselves within each province," continued Mr. Massey. "No one province alone can possibly cope with the cause of unemployment, with the trend toward urbanization, with the reestablishment of youth, with social reform and with all the other great national problems."

Manila Volcano Stages Eruption

(By The Associated Press)

MANILA, June 6—Hot ashes from the erupting Mayon volcano fell tonight upon towns in Albay Province, sending terrified inhabitants in headlong flight to safety.

Flame and smoke belched from the 7,900-foot peak and rocks were hurled high in a brilliant display. Earthquakes shook the region.

Streams of lava flowed down the mountain's steep slopes as the eruption, which began Friday, continued with unabated fury.

Fearful of repetition of the disaster of 1814, in which the volcano buried a village and killed 1,200 people, Philippine soldiers and police were ready to lend all possible aid. Since that catastrophe, Mayon has erupted scores of times but had been inactive the past 10 years.

THREE YEARS QUIET

CAPE TOWN—(CP) — Granted separation a man here said his wife had not spoken to him since 1935 and had not gone out with him since 1921 although she lived in the same house with him.

SERVICE GOES FOREIGN

LONDON—(CP)—Durng the year ended March 31, 1938, permits were issued for employment of 13,576 foreign women and girls in domestic service in this country.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

HOW TO AVOID SLUGGISHNESS AFTER FIFTY

In 1931 Mr. M. was fifty-six years of age. For some time back he had been feeling sluggish—no pep at all. He also had a little indigestion and his bowels didn't work as well as usual. The men who worked with him remarked to themselves that Mr. M. was getting old, and "couldn't take it" any longer. Mr. M also thought he was getting old and would soon be on the shelf. However, he decided to get his family doctor to look him over.

Now you must remember that Mr M was not sick. In the course of a few days he made an appointment with Doctor S. When the doctor had finished his examination he told Mr. M that he thought most of his trouble was that he had slowed up, giving up taking any exercise, sat in his office all day, drove to and from the office and read most of the evening till bedtime. The indigestion Mr. M had complained about, though slight, was the beginning of a mild inflammation of the bowel.

The doctor called his particular trouble "colitis". His prescription consisted of a slight change in diet. He also advised Mr. M to walk the two miles to work night and morning and leave his car in the garage. He also suggested that Mr. M be checked over every year.

Mr. M followed the advice given by Doctor S. He put his motor car away as far as driving to and from business was concerned, changed his diet and reported back to the doctor in the summer of 1932. This time he was a different man. As he expressed it "Doctor E I feel better than I have for the last fifteen years."

Now, the important thing about this story is that Mr. M wasn't sick—at least not in his own opinion. The only time many people consider themselves sick is when they can't carry on with their work and have to go to bed, and that is the only time they will call a physician. Then, again too many people are afraid of the doctor, they are afraid he will suggest an operation. In the case of Mr. M he didn't need an operation. It is true that his bowel condition would have turned into a very uncomfortable condition in time, which would have required medicine and regular treatment by his doctor. The main thing about Mr. M was that he was sluggish, had no pep, and as he himself put it, was "soft."

A family doctor should be looked upon as one who will keep you well and feeling fit. There are countless numbers of men like Mr. M around our country. They need advice as to how to keep fit. There are no two people alike and no two people require the same advice. A health examination at regular intervals by your family doctor is the best means of keeping your health. You can't buy health once it is lost. Preserve it. It is priceless.

NEW TIRE WINS
IN SENSATIONAL NON-SKID TESTS!

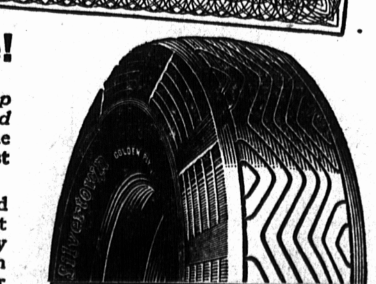
HERE'S THE EVIDENCE
from World's Largest Independent Testing Laboratory!
"Both regular, and also the premium-priced tires of the six largest tire manufacturers were submitted to a series of exhaustive road tests made over a three months' period by us, to determine their resistance to skidding and wear, with the following results:
"NON-SKID—The new Goodrich Silvertown with the Life-Saver Tread gave greater skid resistance than any other tire tested, including those tires listed up to 40% higher in price.
"MILEAGE—The Goodrich Silvertown gave more non-skid mileage than any of the other tires tested in its own pricerange—averaged 19.1% more miles before the tires wore smooth".
A.R. Ellis, President
PITTSBURGH TESTING LABORATORY

Stops Quicker Than Tires Costing up to 40% More!

No tire tested, regardless of price, came up to the new Goodrich Silvertown in skid resistance! And these tests were made against the regular and premium-priced tires of the six largest tire manufacturers.

That's because the New Silvertown Life-Saver Tread accomplished what Goodrich engineers had spent years in trying to perfect a tread that is actually a road dryer. A tire so different in appearance, design and action that it turns the wet road under your car into a "dry" surface—protects you from skids in all directions! Gives you Golden Ply blow-out protection, too. And both of these great life saving features are yours AT NO EXTRA COST.

Come in today for a demonstration that will give you one of the greatest motoring thrills you've ever had. For safety's sake, ride on Goodrich Safety Silvertowns.



LIFE-SAVER TREAD WORKS LIKE A BATTERY OF WINDSHIELD WIPERS
Its never-ending spiral bars sweep the water right and left—force it out through the deep drainage grooves. Thus, you constantly have a dryer, safer road surface for the rubber to grip.

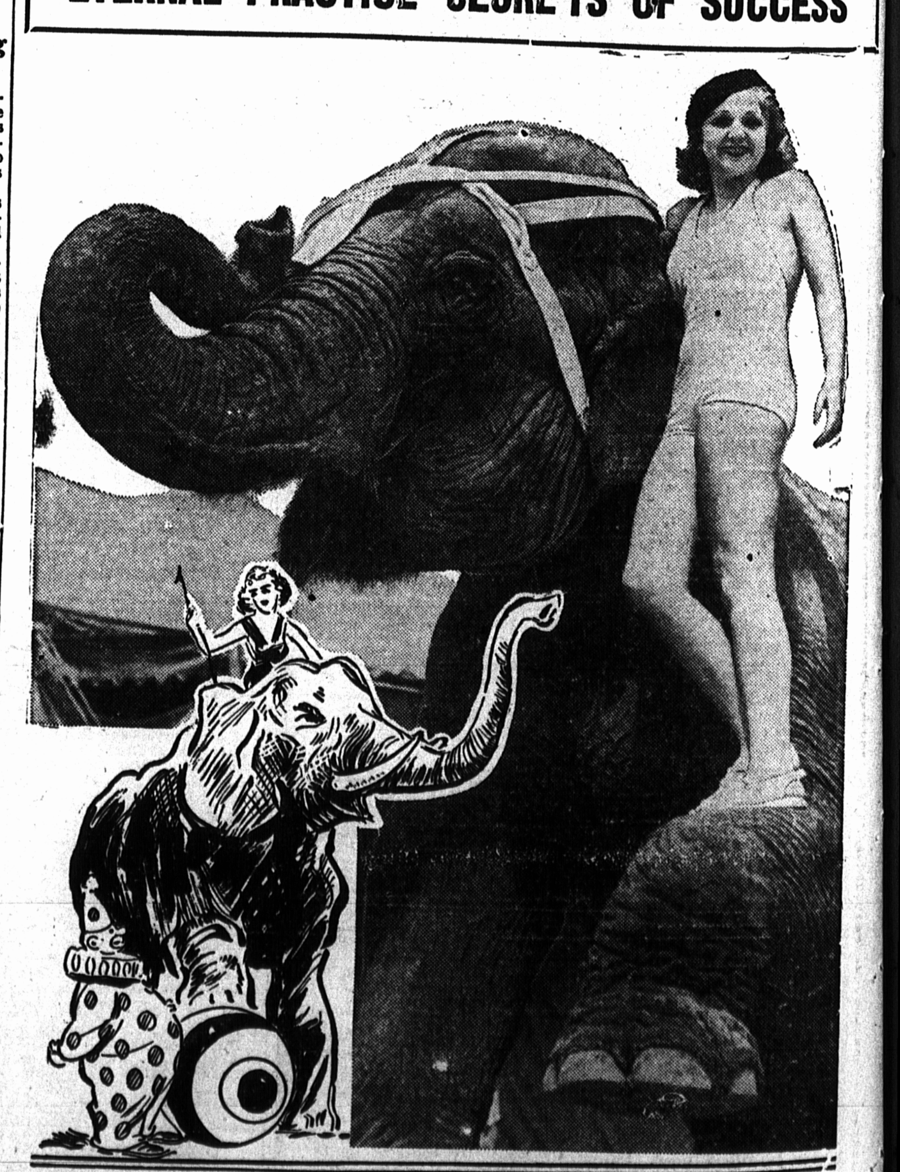
ETERNAL PRACTICE SECRETS OF SUCCESS



JERRY CARROLL AND OLD BALDY WITH ROBBINS BROS., CIRCUS

Like the conductor who went trolley riding on his day off, circus people spend their spare time "performing."

Before the matinee and between the afternoon shows of the Robbins Bros., Circus, exhibiting in Charlottetown Saturday, June 11th, three performances 1.30, 3.30 and 8 P. M., it is eternal practice. And the big top is a jumble of gyrating tumblers, equestrians, trapeze artists, animal trainers, clowns, all of them working to perfect new stunts and to keep their acts in form.

"It is necessary that we don't waste our spare time," Jerry Carrol the little elephant trainer, explains. "The performance itself is the easiest part because we have practiced so well that—well, I'd almost bet I could do my act blindfolded. The audience wants novelty and something new. Some of my stunts have been practiced many thousands of times before being polished enough for public presentation."

There are 300 performers with the Robbins Bros., Circus. They represent 18 foreign countries. Among the high lights there will compete two great flying acts, the Flying Thrillers of Europe and the Aeral Behos Troupe. The famous Toyama Family of equilibrists; Hobson Troupe, 10 European bareback riders and Cese O'Dell, the greatest woman gymnast in the world, who weighs but 100 pounds.

A magnificent pageant of gorgeous processional beauty will serve as a prelude to the main circus performance. It is called the "La Argentine" and embraces the efforts of upwards of 1,000 men, women, horses, elephants, camels, yaks and other beast of the forest and jungle. There will be 100 dancing girls, great choruses of trained singers and native dancers, yet it affords but a single feature of the colossal big show.

Circus day's festivities will be inaugurated by an immense street parade to be seen on the downtown streets at 11 A. M. There will be nearly 50 magnificent and elaborately carved and gilded allegorical floats, tableaus, cages and dens. Hundreds of mounted riders; 20 elephants and two caravans of camels. Five trumpeting bands and two calliopes will furnish music.
