...e necessary consequence of the present distressing ... of the manufacturing interests is a want of confidence, ...*that* naturally tends to increase the difficulties out of ...h it springs. Hopes, which we trust are well founded, ...ntertained that better times are at hand, and with a ... harvest we shall have a revival of trade. No doubt ...h depends on the produce of the growing crops, but we ...ve much of the present distress arises from over trad- ...and we fear that there is little prospect of the manufac- ...g interests recovering a sound state until the production ...ore nicely balanced with the demand. Notwithstand- ... however, the general decline of our commerce, we ...n from that excellent publication, *Burn's Glance*, just ...lished, that the exports to the United States have been ...iderably greater (fully 50 per cent.) in cotton goods, ... during the corresponding period of last year. This ...is remarkable.

...he crops throughout the country, notwithstanding the unpropitious weather, are not in such a bad state as ...ht have been expected. Fine weather now is only want- ..."to bless England with as abundant a harvest as man ...ld wish." The same is said of France, by several ...is journals.

...he troubles at Toulouse are finally settled.

...rom Spain we have the usual melancholy narratives of ...rage, faction, wretched finance, and weak government; ... Portugal continues in the same state of indolent bank- ...tcy as before. Greece and Turkey are in the uninter- ...pted enjoyment of their own peculiar troubles, and in none ...these countries have any circumstances occurred in any ...y altering the general features of their condition.

...Austria has been alarmed by rumours of an approaching ...volution in Italy.

...The overland mail from India informs us that Commodore ...emer left Calcutta on the 26th of May, in the Queen ...amer, and it was expected that the whole fleet would ...ch Canton by the beginning of July. The whole of the ...th had proceeded to China. The Cameronians and the ...st were to follow. The steamers had been fitted up with ...ronades for river service. The emperor's edicts breathe ...ngeance against, and extermination of, the English, and ...swears "both powers shall not stand, one or the other ...ust conquer, or die." His orders are, "Seize the barba- ...ns, and make an entire extermination and end of them." ...ese edicts were published at Macao on the 31st of March. ...e Sesostris, two iron steamers, and the Larne, are await- ...g at Bombay the arrival of Sir H. Pottinger and Sir W. ...rker.

...Dost Mahomed Khan had reached Calcutta as a prisoner ...war.

...The King of Madagascar, expelled by his subjects, had ...rived at Calcutta, to solicit British aid to reinstate him.

...the Punjaub affairs wear a worse aspect than ever; the ...untry continues in a most disturbed and tumultuous state, ...d the sheiks are said to have plundered about four or five ...cs of British treasure on its passage to Cabool, and to have ...estroyed the bridge of boats across the Indus. A war with ...e Nepaulese is again talked of, in consequence of their ...aving made fresh encroachments on the British territory.

Downing Street, August 3.—The Queen has been ...leased to appoint Sir Charles Augustus Fitzroy, Knight, to ...e Governor and commander in Chief of the Islands of An- ...igua, Montserrat and Barbuda, St. Christopher, Nevis, Ar- ...guilla, the Virgin Islands, and Dominica.

Since our last, New York papers to the 9th and Boston to the 10th inst. have been received. By an arrival at the former place we have been furnished with news from China fifteen days later than formerly received. The most important particulars will be found below:—

NEW YORK, August 5.

Important—Fifteen Days Later from Canton.—The ship Ackbar, Capt. Dumas, arrived yesterday morning, with a full cargo of Teas, having sailed from Canton on the 15th of April. The latest advices previously received were to the last of March, via England. The news is important.

Commodore Elliot with the British fleet, had undisputed possession of Canton. His head quarters were then protected by British soldiers. The fleet was lying above and below the place. No intelligence had been received there that the Commodore had been superseded. A large Chinese army occupied the hill, in sight, behind the city, but they offered no interruption to the British arms, nor to the commerce of the place.

Teas were permitted to come into Canton as usual. The last edict from the Emperor at Pekin, was, that the barbarians must be exterminated.—The Emperor had not heard of the fall of Canton when the Ackbar left. The Chinese Governor had been sent in chains to Pekin, for permitting the British to capture the Forts at the Bogue, and it was reported that he had been strangled on the way.

Commodore Elliot promptly opened the port of Canton to all shipping of every nation. Ten American ships had already arrived, all of which were discharging, and taking in cargoes of Teas.—A large number of British ships were taking in teas.

All vessels were hurrying to get in their cargoes to get away before any more trouble should break out. Commodore Elliot had declared that if the Chinese prevented Teas from coming in from the country, or obstructed the trade of the city, he would immediately commence hostilities.

Major General Sir Hugh Gough arrived on the 2d of March, as commander-in-chief of the land forces.

The loss of the Chinese in the various engagements was estimated at 2500 or 3000 men, and about 800 pieces of cannon. The Chinese Admiral, Kewang, fell in defence of the Bogue forts, as did two other mandarins of high rank. The captain of a British transport, arriving at Chusan after the surrender of that Island to the Chinese, was slain on landing. The day after the fall of the Bogue forts rewards were offered for the capture or destruction of British ships; 100,000 dollars for a line-of-battle ship, $10,000 for a steamer, $50,000 for the Admiral or Captain Elliot if taken alive, and $30,000 for either of their heads.

Canton, April 12, 1841.

You will have learned from various other sources of the late important events which have resulted in the re-opening of the trade of this port, and the general return of the English and Foreign community. An active business is going on, both in imports and exports. Prices of the former, as might have been expected from the sudden influx into the market, are declining, and losses on them must be considerable, while on the other hand the Chinese are taking advantage of the demand for teas to enhance their prices; and on the whole the business of the season does not promise very satisfactory results, unless there should be, as some apprehend, another interruption some months hence to the trade. As at present carried on, it is certainly of a compulsory character, and actually brought about and maintained by force; still I am inclined to the belief that the emperor, however reluctantly, will be obliged to acquiesce in its continuance, rather than expose the provincial city to a second attack. It is believed, however, that the forces intend moving to the northward, with the change of the monsoon, to demand the indemnity and to settle other points of importance, and that, in the event of a non-compliance of the court of Pekin, hostilities would recommence and another interruption of the trade be the consequence.

Macao, April 14.

It is said that the different warlike operations of the British since the taking of Chuennee and Tycocktow have thinned the ranks of the Chinese soldiers by 6000 men, of whom about one third may have lost their lives, but the other two thirds have deserted.

The utmost activity prevails in all the arsenals and foundries. It is the express desire of the great emperor and the war party now in power to cast as many guns of the largest calibre, weighing 8000, 20,000 and even 30,000 catties, as the state can afford. The principal object of these colossal missiles is to sink several ships with one shot, and to annhilate a whole detachment with one ball. These immense masses of iron are not only put at landing places to strike alarm into the approaching barbarians, but at conspicuous spots on the city walls. In the trial, however, several of the pieces have burst and killed the gunners—so that the men who in future discharge them must be of undaunted courage. To insure success, the instruments of death and destruction are laid on a bed of stone or sand, so that the ball may fly straightway, without any elevation or depression, and completely demolish every object in its progress. Thus the gracious intentions of the great Emperor to extirpate a whole rebellious race, will be carried into effect.

Since the invasions of the Tartars there has never been such a clangor of arms, from one part of the maritime provinces to the other. Junks have been built on a new model to carry destruction with the rapidity of lightning to the barbarian men of war.

Divers are assembled to bore holes in the bottoms of the vessels; vessels have been sunk at the entrances of rivers, and stakes been driven across the channels. Even the coasts of Manchouria, that have never been thought of, are to be put into a state of defence.

BOSTON, Aug. 7.

The Macleod Case at Washington.—The Washington correspondent of the New York American says:

"Of the Macleod affairs, little is said. It seems to be understood that Mr Fox will be content to abide the result of the trial by the petit jury,—at least, he does not menace war because the Supreme Court did not discharge the prisoner. Nevertheless, uneasiness may, I think, be perceived in certain high quarters, which is not at all mitigated by the absolutely defenceless condition of our seaboard against any serious attack. I have faith still unshaken that the spirit of the age, and the material interests of the two countries, keep the peace. So may it be."

Halifax, N. S., August 16.—The brig Mariner, Hemeon, which arrived yesterday, 35 days from Greenock, with a general cargo to Bolton & Leishman, and W. Stairs and Son, has a number of passengers on board, among whom the Small Pox broke out on leaving port. There have been but three cases, and they are all in a fair way. She is now at quarantine.—*Journal.*

Pictou, N. S., Aug. 18.—Melancholy Accident.—On Saturday afternoon, Mr. James Monro, jr., in company with an intimate companion, proceeded along the shore at the mouth of the harbour in quest of game. While strolling along the beach, Mr. Monro in the rear of his friend, the gun carried by the latter accidentally discharged while resting on his shoulder, and lodged its contents in the cheek of his unfortunate friend whom we have named! Instant death was the result. Seldom has it been our duty to record a more melancholy event. Mr. Monro was a cabinet-maker by trade, 29 years of age, persevering in his business, inoffensive in his disposition, and upright and obliging in all his transactions. He was married only a few months since, and has left a wife and two aged parents to lament his sudden death. Mr. Monro's companion, who was unfortunately instrumental in this event, is in the greatest state of mental agony; but a Coroner's Jury have acquitted him of any ill intention whatever, and feelings of sympathy are expressed towards him by the community generally.

Jamaica papers announce the deaths of Captain Slade, Lieuts. Tytler and Alston, Royal Artillery, Lieut. Randolph, Royal Engineers, and Lieut. MacLauchlan, 82 Regiment, son of Colonel MacLauchlan, half pay 69th Regiment.

The following is from the Royal Gazette:—"We regret exceedingly to be informed that a serious epidemic has broken out among Her Majesty's 60th Regiment of Rifles, stationed at Fort Augusta, and that already several deaths have ensued, and upwards of 150 invalids are now in the hospital. We also regret to hear that out of the detachment of 100 men of the same corps at Newcastle, twenty are laid up with dysentery. The late cold and rainy weather is suggested as the cause of sickness in the latter place."

The Tyrolese Minstrels (the Rainers), gave a Concert in the National School Room on Saturday, and another on Monday evening. Owing to various causes, the Concert on Saturday was very thinly attended; but on the latter occasion the *amende honorable* was made, as the room was crowded in every part with a very respectable and fashionable audience. It is, perhaps, needless to say, that the various performances fully met the high expectations which had been raised, and that this was manifested in the most unequivocal manner.

Launched,

On Monday last, at Fullarton's Marsh, a well-built, copper-fastened Barque called the *Siron*, 265 tons, new measurement, built for Messrs. R. & F. Longworth.

On Tuesday last, from the Shipyard of Mr. John M'Isaac, Orwell, a Schooner called the *Henrietta*, 180 tons, built for Mr. C. Welsh. The materials, workmanship and model of this vessel are said to be of a very superior description.

On Wednesday, from the Shipyard of Messrs. James Macdonald & Co., Pisquid, a Brig called the *James Reddin*, 245 tons. She was built under the superintendence of Capt. E. Nowlan, for Mr. D. Reddin, and is considered by competent judges a very superior vessel.

On the same day, from the Shipyard of Mr. Donald M'Phee, Elliot River, a superior vessel, called the *Amelia*, 166 tons, built for S. Nelson, Esq.

PASSENGERS.

In the Pocahontas, from Pictou, on Monday last—The Right Rev. the Bishop of Nancy, Count Forbin de Janson; Hon. Charles Young; Messrs. W. De Lery, H. S. Huot, A. W. Cochrane, J. Pallister, and 5 in the steerage.

Charlottetown, Aug. 5, 1841.

MOFFATS

VEGETABLE LIFE MEDICINES.

THESE Medicines are indebted for their name to their manifest and sensible action in purifying the springs and channels of life, and enduing them with renewed tone and vigor. In many hundred certified cases which have been made public, and inalmost every species of disease to which the human frame is liable, the happy effects of Moffat's Life Pills and Phenix Bitters have been gratefully and publicly acknowledged by all persons benefited, and who were previously unacquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act.

The Life Medicines recommend themselves in diseases of every form and description. The first operation is to loosen from the coats of the stomach and bowels the various impurities and crudities constantly settling around them; and to remove the hardened fæces which collect in the convolutions of the small intestines. Other medicines only partially cleanse these, and leave such collected masses behind as to produce habitual costiveness, with all its train of evils, or sudden diarrhœa, with its imminent dangers. This fact is well known to all regular anatomists, who examine the human bowels after death: and hence the prejudice of these well informed men against quack medicines—or medicines prepared and heralded to the public by ignorant persons. The second effect of the Life Medicines is to cleanse the kidneys and the bladder, and by this means, the liver and the lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red colour from the agency of the liver and the lungs, before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the veins, renews every part of the system, and triumphantly mounts the banner of health in the blooming cheek.

Moffat's Vegetable Life Medicines have been thoroughly tested, and pronounced a sovereign remedy for Dyspepsia, Flatulency, Palpitation of the Heart, Loss of Appetite, Heartburn and Headache, Restlessness, Illtemper, Anxiety, Langour and Melancholy, Costiveness, Diarrhœa, Cholera, Fevers of all kinds, Rheumatism, Gout, Dropsies of all kinds, Gravel, Worms, Asthma and Consumption, Scurvy, Ulcers, Inveterate Sores, Scorbutic Eruptions and Bad Complexions, Eruptive complaints, sallow, cloudy and other disagreeable complexions, Salt Rheum, Erysipelas, common Colds and Influenza, and various other complaints which afflict the human frame. In Fever and Ague, particularly, the Life Medicines have been most eminently successful—so much so, that in the Fever and Ague Districts, Physicians almost universally prescribe them.

All that Mr. Moffat requires of his patients is, to be particular in taking the Life Medicines strictly according to the directions. It is not by a Newspaper notice, or by any thing that he himself may say in their favor, that he hopes to gain credit. It is alone by the results of a fair trial.

☞A Fresh Supply of these valuable Medicines just received, and for sale by

COOPER & BREMNER.

Sole Agents for Prince Edward Island.

Charlottetown, June 4, 1841.

Auctions.

Surveyor General's Office, 13th July, 1841.

July 30th, 1841.

WATER LOTS IN GEORGETOWN FOR SALE.

TO BE SOLD by Public Auction, at the Court House, in Georgetown, on Tuesday the *TWELFTH* day of October next, at eleven o'clock, that

VALUABLE and EXTENSIVE PROPERTY

in the said Town, belonging to Margaret Gilbert Wood, widow of the late J. A. Wood, formerly of Antigua, Esquire, deceased, comprising FIVE WATER LOTS, lying in one block, with a large Warehouse thereon. These Lots, in point of situation, are not surpassed by any property in that rising Town, having a fine water frontage of 420 feet, and being bounded on the west by Kent (or the Main) Street, along which they extend 287 feet, above high water mark, and on the north side by Water Street, extending thereon 420 feet. It is intended that a Street forty feet in width shall be laid off, across the Lots, parallel with Water Street, and connected with the latter by another Street, to run parallel with Kent Street; and the whole Property will be sold in small Lots, agreeable to a plan to be seen at the Store of W. B. Aitken, Esq., in Georgetown.

Particulars as to Terms and Title, made known on application at the Office of the undersigned, where a Plan of the Property can be also seen.

JOHN LONGWORTH, Solicitor.

Charlottetown, Aug. 20th, 1841.

THE Honourable Samuel Cunard having become possessed of the whole of the legal and equitable Estate of the late John Cambridge, in all those Townships, Tracts and parcels of Land, mortgaged by the said John Cambridge to John Cave, as by Deed duly registered in the Office of the Colonial Registrar will fully appear—the Subscriber, as the Agent of the said Samuel Cunard, is now prepared to sell and lease the same. Tenants having long Leases, at 1s. per acre, may purchase at Twenty Shillings, sterling, per acre. The Tenants must be prepared to pay up all arrears at once, and to those who are prepared to purchase, a liberal deduction of the back rent will be made.

The Subscriber will be at Lot 14 on or about the 3d August, and will afterwards visit the different Lots, in rotation, for the purpose of settling with the Tenantry.

JAMES H. PETERS.
