"HEATHER BELLE,"
STEAMER
Summer Arrangement, 1883.

ON and after Tuesday, July 24th, the new
steamer "Heather Belle," Hugh McLean,
master, will run as follows:—
Every Tuesday morning at four o'clock, will
leave Charlottetown for Orwell Brush
Wharf, leaving Orwell Brush Wharf, at
seven a. m., for Charlottetown, calling at
China Point and Halliday's Wharves,
leave Charlottetown at 3 p. m., for Halli-
day's China Point and Brush Wharves,
where she will remain over night.
Wednesday, will leave Brush Wharf for
Charlottetown, at seven a. m., calling at
China Point and Halliday's Wharves,
leaving Charlottetown at three p. m., to
return, remaining at Brush Wharf over
night.
Thursday, will leave Brush Wharf for Char-
lottetown, at seven a. m., calling at China
Point and Halliday's Wharves, leaving
Charlottetown at three p. m. to return,
leaving Brush Wharf about six p. m. for
Charlottetown.
Friday, will leave Charlottetown for Crapaud
at four a. m., leaving Crapaud at seven
a. m. for Charlottetown, leaving Char-
lottetown at three p. m. for Crapaud,
remaining there over night.
Saturday, will leave Crapaud at seven a. m.
for Charlottetown, leaving Charlottetown
at one o'clock p. m. for Crapaud and re-
turning to Charlottetown from Crapaud
same evening.

FARES—Cabin, to and from Orwell and
Wharves, 30 cents; deck, 20 cents. Cabin,
to and from Crapaud, 40 cents; deck 30 cents.
Excursion Return Tickets will be issued
from Charlottetown to Orwell every Thursday
evening at one first-class fare. Also, Excursion
Return Tickets will be issued
Saturday to Crapaud at one first-class fare.

A Sacred Hen.
AN EGG WITH HOLY HIEROGLYPHICS—VILLAG-
ERS SCARED INTO FIFTY—THE EXPOSE.
Last Tuesday Mrs. Whital, the estimable
wife of a harness-maker of Erieville,
county, heard her favourite hen cackling in
the barn in a strange and unprecedented
manner. Upon reaching the nest she
found an egg of ordinary size, but em-
blazoned with raised characters, which
nearly caused her to faint. Staggering
from the barn into the house, she dis-
played the hen's miraculous product to her
sons and daughters, some of whom rushed
out and spread the alarm among the popu-
lace. All further work on that day was
suspended. Men working in the fields put
up their horses and tools in the barns,
after which they congregated in Griffin's
hotel and gazed anxiously at the Whital
residence diagonally across the road. The
excitement was intensified when the report
was confirmed that Samuel Curtis, an hon-
oured shoemaker and a brother of Mrs.
Whital, had become so unnerved at the
sight of the egg that he had taken to his
bed in alarm and refused to be comforted.
Meanwhile Mrs. Whital went from house
to house telling the inhabitants to com-
mence immediate preparations for the
coming of the Lord in 1884. One Metho-
dist sister suggested the expediency of
assembling all the people in the church for
an all-night service of prayer. Another
sister said she had known it all the while,
as the Lord had told her so a few nights
before in a dream. Other women got out
their Bibles and hymn-books and called
upon the passers-by to repent of their sins
and be saved. The news spread rapidly
into the country and for miles round
excited farmers hitched up their horses
and drove to town.

The most skeptical were convinced of the
sacred egg's genuineness when it was taken
to the hotel and exhibited by two of Mr.
Whital's sons. It was clear that the
characters had been traced upon the egg by
no pen or pencil. No coloring matter had
been used. The characters were simply
raised upon the shell as if they had been
made on the inside and puffed out by some
interior agency. On one side stood out
boldly the figures "1884." On another
side was a cross, and on a third side was a
strange symbol, which some thought was a
letter "C," while others held that it was a
half moon. The latter theory was more
generally accepted, since, when the egg was
held to the light, something which re-
sembled a face was discernible in the con-
cavity of the character. This was inferred
to represent the man in the moon. The
universal interpretation put upon the egg
in its entirety was that it foretold the
advent of Christ in the year designated.
Orville Whital, one of the sons, brought
out two other eggs, the shells of which
were wrinkled. He said that they had been
laid by the same sacred hen. The sacred
hen had always been a strange and super-
natural creature. Frequently her life had
been miraculously spared when a wagon
had come upon her when she was burrowing
in the sand of the road. When the horses
arrived at the spot where she was lying she
would arise and coolly step on one side.
She had been observed to take the rooster
around the corner of the barn and lecture
him on the bad end to which he would come
if he persisted in pursuing his bold, bad
course. Altogether she was a strange hen.
On that night the morals and manners of the
village of Erieville were excellent beyond
parallel. New resolutions were formed and
bad habits were sworn off. Husbands and
wives no longer exchanged doubtful com-
pliments and flat-irons, but tenderly em-
braced each other and agreed to await the
coming of the Lord in a commendable
manner. Mrs. Whital's household were
too excited to sleep. Her daughter, Sarah,
was very ill, and it was feared that the
sacred egg would tend greatly to shorten
her life. Alarmed at this, Frank Richard-
son, a clerk in the post office, acknowledged
that the miracle had been performed
through his instrumentality. He explained
that to get even with one of Mr. Whital's
sons he traced the characters on the egg
with tallow, and then placed it in vinegar.
After the acid had sufficiently eaten the
shell as to allow the parts traced with
tallow to become prominent, he visited the
Whital barn, deposited the egg in a nest,
scared an innocuous hen, and decamped.
Mr. Richardson's expose has had the unfor-
tunate effect of dispelling the moral in-
fluence exerted by the egg. The villagers
have returned to their former ways.

Seven Miles Overhead.
In 1862 Messrs. Glashier and Coxwell
made eight ascents on behalf of the British
Association, in one of which, from Wolver-
hampton, they appear to have reached the
prodigious altitude of 37,000 feet. Up to
29,000 feet Mr. Glashier took his many
observations in comparative comfort; but
shortly afterwards, trying to move his arms
he found that they had become stiff.
"I then," says he, "tried to shake my-
self, and succeeded in shaking my body. I
seemed to have no limbs. I then looked
at the barometer, and whilst doing so my
head fell on my left shoulder. I struggled
and shook my body again, but could not
move my arms. I got my head upright,
but for an instant only, when it fell on my
right shoulder, and then I fell backwards,
my back resting against the side of the car,
and my head on its edge. In
this position my eyes were directed
towards Mr. Coxwell in the ring. When
I shook my body I seemed to have
full power over the muscles of the back,
and considerable power over those of the
neck, but none over either my arms or my
legs; in fact I seemed to have none. As in
the case of the arms, all muscular power
was lost in an instant from my back and
neck. I dimly saw Mr. Coxwell in the
ring, and endeavored to speak, but could
not; when in an instant intense black dark-
ness came. The optic nerve finally lost
power suddenly. I was still conscious,

with as active a brain as at the present
moment whilst writing this. I thought I
had been seized with apoplexy, and that I
should experience no more, as death would
come unless we speedily descended. Other
thoughts were actively entering my mind
when I suddenly became unconscious as in
going to sleep. I cannot tell anything of
the sense of hearing—the perfect stillness
and silence of the region six miles from the
earth (and at this time we were between six
and seven miles high) is such that no
sound reaches the ears.
Whilst powerless I heard the words
"temperature" and "observation," and I
knew Mr. Coxwell was speaking to me,
and endeavoring to arouse me; therefore
consciousness and hearing had returned. I
then heard him speak more emphatically;
but I could not see, speak, or move. I
heard him again say, "Do try—now do!"
Then I saw the instruments dimly, then
Mr. Coxwell, and very shortly saw clearly.
I rose in my seat and looked round, as
though waking from sleep, though not re-
freshed by sleep, and said to Mr. Coxwell,
"I have been insensible," he said, "You
have; and I too, very nearly." I then drew
up my legs, which had been extended before
me, and took a pencil in my hand to begin
observation. Mr. Coxwell told me that he
had lost the use of his hands, which were
black, and I poured brandy over them.

Water in a vessel required for the experi-
ments was now solidly frozen. While Cox-
well was up in the ring he found that his
hands were frozen, and had to drop down
into the car by using his arms. He wished
to approach Mr. Glashier, but could not,
and felt insensibility gradually stealing over
him. Then he thought of the valve, but
could not work it with his frozen hands;
ultimately he succeeded, by seizing the cord
with his teeth and dipping his head till the
balloon showed evident signs of descending.

derick Whymper, in Good Words.

Consumption.
THE SOOTHING INFLUENCE OF HOT WATER.

A Canadian correspondent writes:—Noti-
fying an extract from the *World of Science*
in which a physician strongly recommends
hot water in place of tea or coffee, as a stimu-
lant for the use of those requiring to
study late at night, I would like to give my
experience of it as a beneficial agent in con-
sumption. Mrs. H—, one of a family a
number of whose members had died of con-
sumption, was, after severe exposure to a
snowstorm, seized with a serious cough and
expectoration, accompanied with loss of
flesh. Examination by a physician showed
that one lung was seriously affected. She
was wholly confined to her room, and every-
thing that medical attendance and loving
care could do to mitigate her suffering was
done, but ineffectually. The depressing
night-sweats continued, together with loss
of rest from repeated fits of coughing. Los-
ing all faith in medicine, some six or
eight months ago, its use was wholly aban-
doned, and the use of nourishing diet
only continued. About ten weeks ago the
patient's attention was directed to a news-
paper paragraph recommending hot water as
a remedy for consumption. Finding that no
harm could ensue from its use, she deter-
mined to test it. At the moment of retiring,
a large tumbler of hot water, in which
the juice of a lemon was mixed to free it
from nausea, was taken. In a few moments
a glow of warmth would pervade the
lungs, chest, etc., quickly followed by the
most refreshing sleep, which would be
unbroken by any cough, and the patient
would awake in the morning rested and
strengthened. A few days ago she was
seized with a fit of coughing, during which
she was coughed up in her mouth, a small stone
about the size of a pea—formed of a sul-
phate of lime, I believe, and usually con-
sidered a symptom of the healing of a cavity
in the lung. Whether this marked im-
provement was due to the use of the hot
water, I cannot venture to say; but its
beneficial influence in securing sweet sleep
and exemption from coughing at night was
so marked that I would like some of your
readers to test it with their consumptive
friends, and give, through your Notes, the
results of their experience.—*Chambers' Journal.*

Bishop Riordan, the New Brunswicker
who has recently been nominated conditor
to and successor of the Archbishop of San
Francisco, was born in 1841. He went
west while young, and entered the Univer-
sity of Notre Dame, Ind., where he distin-
guished himself by the brilliancy of his
talents and progress in studies. Bishop
Duggan, recognizing the young student's
intellectual worth advised him to go to
Rome for the completion of his studies.
He did so, and entered the American
College in the Eternal City, where he re-
mained until he had completed his philo-
sophical course. Thence he repaired to the
university of Louvain, in Holland, where
he studied theology for three years, at the
end of which time he was ordained a priest
in the year 1865. He then returned to
Chicago immediately after his ordina-
tion, and was assigned to his first mission-
ary labor as assistant to his uncle, the
late reverend Dr. Dunne, pastor of St. Pat-
rick's. Subsequently he was honored by the
bishop with the appointment to the
chair of theology in St. Mary's seminary,
of that city, which position he held until
the closing of that institution. Thence he
was transferred to St. Mary's church,
Joliet, where he remained until 1871, when
he succeeded Father P. J. Conway, pres-
ident vicar general of the arch diocese, as
pastor of St. James' church. During his
pastorate he built one of the finest
churches in the archdiocese, a handsome
parish residence, and a parish school. Be-
sides this he has kept a close watch over
the spiritual welfare of his flock, and has en-
deared himself to each and every one of
them.

HEADACHE, COSTIVENESS and PILES, are easily
and thoroughly cured by a judicious use of
Ayer's Pills. [Aug 20 1w wkly
