and her royal party taxied to a stop on schedule. The new Queen stepped down to nearly the exact spot where one week ago she bade a fond farewell to her ailing father.

A handful of spectators stood outside the airport gates as the royal convoy pulled away. Churchill earlier had urged the public to stay away when the mourning Queen arrived.

Along the road outside the airport, men bared their heads and women—some of them weeping—waved handkerchiefs. The Queen obviously under strain, waved back graciously but with a saddened face.

The royal party went directly to Clarence House, built for Elizabeth and Philip when they were married. Waiting inside was her 84-year-old grandmother, Queen Mary, who had driven from her own London residence at Marlborough House as soon as she received word of the arrival.

As the royal party arrived at Clarence House in the gloomy dusk, Queen Elizabeth appeared tense but composed.

Meteors Defeat P.W.C. Team 6-3 In Exhibition

In a penalty-studded exhibition hockey game at the Montague rink last night the P. W. C. Welshmen went down to defeat 6-3 at the hands of the Montague Meteors.

A close checking game all the way, the Meteors capitalized on the many penalties handed out to the visitors for hooking and roughing to take command of the scoring.

As the game progressed tempers grew short, and Gillis and Cudmore were sent to the pen with majors and Clark with a misconduct, besides many other players with minors. Both teams kept up a killing pace through three periods of hockey constantly attacking and repelling the assault of the other. Throughout the game the two goalies had a hot time of it but gave such fine performance that they were instrumental in holding down the score.

MacLean and Power each scored two goals for Montague, with Power and P. Fraser getting singletons.

For P. W. C. Wood tallied twice at Carleton Place. Fourteen penalties were imposed.

Wool Makes Cash For Commonwealth

LONDON, Feb. 7 — (Reuters) — Wool has proved a golden fleece to Britain and the three wool-producing dominions—Australia, New Zealand and South Africa.

In six years they have made a profit of £170,810,000 from sale of wartime stocks of 10,500,000 bales. The figure was announced in accounts of the joint organization set up to sell wartime wool surpluses—U. K.-Dominion Wool Disposals Limited.

The British Government bought up the wartime surplus to add the dominions. Profit from sales is divided equally, half for Britain, half to be split among the dominions.

The wool which brought the record sum originally cost only £6,000,000 at wartime prices—some 700 per cent profit.

The organization now has sold all its stocks and is going into voluntary liquidation.

Inventor Makes Reality Of A Hoopie Brainstorm

OUR BOARDING HOUSE... with... Major Hoopie

ESAD, WITH MY SADDLE-HORN RADIO PERFECTED, THE LONESOME COWBOY WILL HAVE HIS ENTERTAINMENT WHILE HE RANGES THE LONELY RANGE—HARR-RUMPH—THE BATTERY POWERED SEAT OF THE SADDLE, THE LOUD SPEAKER IS CONCEALED IN THE SADDLE HORN WHILE THE AERIAL FORMS THE GIRTH!

THAT'LL SET THE WEST WILD! NOW, IF YOU COULD ADD A SPOT AND A CHARCOAL-LINED KEE TO THAT OUTFIT, TH' IN COWBOYS WHO STILL ARE GETTING BOWLED FROM STRADDLING POPS, OUTSIDE OF DUDE RANCHES, WOULD GO FOR THAT IN A BIG WAY!

Major Amos Barnaby Hoopie, star of the "Our Boarding House" cartoon in The Guardian, has just won national recognition for an invention he perfected almost 15 years ago.

The famous inventor, in a cartoon appearing in this paper June 18, 1937, unveiled his saddle horn radio, designed to carry soap operas, disc jockeys and other (ahem) entertainment to the lonely cowboys riding the range.

And now along comes Elmer Rovere, of San Francisco, Cal., who has applied for a patent on a contraption based on the Major's idea. The patent was granted, but the Patent Office believes in granting credit where credit is due, so it was Major Hoopie, and not Rovere, who won recognition for originating the device.

In Rovere's saddle, the controls are behind the saddle horn and the speaker is in the same place. The Major's saddle has the sound coming out of the top of the horn with the controls forward of it.

Thus all that Rovere has a patent on is how he has bored a hole in the saddle and where he has placed the controls. If anybody wants to carry out the Major's plan to the letter, it's all right with the Patent Office, and they can get a patent, too.

Interviewed on the subject of Rovere's saddle horn radio, Major Hoopie was tolerant and amused. "Feh-heh," he chortled. "Good luck to Mr. Rovere! We inventors must stick together—har-rumph!"

While many of the Major's inventions have been found practical, others have been relegated to the department of fantasy. Of these latter are the revolving doormat, luminous shaving cream for shaving in the dark, and many too numerous to mention.

Police believe they have solved the two-year-old murder of Sam Delibash, whose bloodstained and frozen body was found near Welland, Ont., in 1949. Arrested in Brookville, N. B., is Lloyd Frank Cross, above, who was taken into custody after his brother, travelling under the name of Kelsey, was arrested in Niagara Falls, N.Y., on charges of illegal entry appearing in Welland court. Cross was remanded to county jail.

Refreshments were served to all. The next meeting will be held at the home of Messrs. Miles and Lloyd MacKinnon.
