

CYCLIST RECEIVES TROPHY

Mayor W. A. Currie of Summerside is seen presenting the Victory Clean trophy to Jim Farley of Charlottetown, winner of the annual Victoria Day 10-mile bicycle race between Kensington and Summerside.

The Charlottetown cyclist estab-

lished a new record of 30 minutes and 10 seconds when he crossed the finish line in front of Victory Cleaners to the applause of several hundred spectators.

In addition to the trophy Farley, who took the lead shortly after the start of the race, received prizes

awarded for being the first cyclist to pass the store of Harold Moose in New Annan, the service station of Lorne Wright at Read's Corner, and Jimmie's Grocery on Water Street East in Summerside.

'Side Home, School Ass'n Elects Officers

The following officers were elected at the annual meeting of the Summerside Home and School Association annual meeting held in the High School library last evening: past president, Allison MacLean; president, John Leuty; secretary, Mrs. Arthur Clark; treasurer, Mrs. Bennett Kelly. Other members of the executive — Mrs. Ben Schurman, Mrs. Judson Logan; Mrs. Keith Hobson.

stating a point of view which all of us have had for generations — a point of view which Maritimers particularly have always had in their dealings with the people of New England.

INTERNATIONAL STATUS

"But to-day no country can live unto itself. Canada has grown up internally and continues to grow, but is also growing up in her external relations. My own profession, the law, is a very conservative one, but the court which reflect that conservatism have been forced, in considering the country's treaty-making powers, to acknowledge this international status which has been acquired in the past 30 years.

"Our contributions to the late war were large and significant. In peacetime we must do our part to trade and commerce with other free countries. We play a significant role in the work of the United Nations; we contribute heavily in material and money to NATO, and we show a sense of responsibility for underprivileged areas by our participation in the Colombo Plan.

"Here is the Canada into which this class graduates. It is an over simplified description but it touches the highlights of the country's material balance sheet with which each of you should be familiar. This is the social and economic organization into which you will fit yourselves and upon which you will exercise your talents.

AGE OF SPECIALISTS

"If you are to share as you should in the burden of work, and if you are to reap as you should your share of the benefits, most of you will require more training. The age is one of specialization.

"In Canada we need many more scientists, technologists and economists for our growing industrial and commercial development; we need clergy, teachers and doctors and lawyers and to service our rapidly increasing population, and in each of these fields we need a high degree of skill and competence. The degree you get here will help you to enter these fields for training.

"You have been formed here in the study of the humanities, the basic sciences, literature, history and especially philosophy and theology. You have been trained to know what judgment is and to exercise it.

"I speak to you not as one of those engaged in directing any segment of the economy, nor as a lawyer who must help his clients occupy a proper place in that economy. I do not speak as a member of the executive of a government which formulates policy for the management of great national undertakings.

"I speak to you as a member of the Senate, of the Second Chamber in our Parliamentary organization, of the House which by its constitution is required to exercise judgment rather than initiative in its approach to national problems. Finally, I say I speak to you as a private member of that body.

"It is in having regard for sectional interests and minority rights that the Senate must exercise its judgment. But that judgment must not be exercised to the detriment of the public interest, and to the detriment of the national unity.

"For a nation of 16 million people, these are huge undertakings. Our public resources are not sufficient to develop the north half of this continent in early days, and to-day the same situation prevails, but there is capital and industrial know-how available in Europe and in the hands of private organizations among our friendly neighbours to the South.

"In their own interests, as well as in ours, they are glad to invest capital here if the economic climate is good; if our political institutions are stable, and if our people show a sense of responsibility in the management of their public and private affairs. By saying this, I am not entering a purely political debate. I am simply

step into presents a challenge. Ambition and integrity should help them well on the way to success, and if they have acquired a true appreciation for the Christian way of life, then happiness also may be theirs.

"The placing of supernatural values above the joys and pleasures of the present-day world demands principles and steadfastness, and even sacrifice. But such action will aid greatly to keep the right balance in the struggle between truth and confusion in modern thought.

"It was rash of me to intrude myself upon the time of an extremely busy man to come all the way from the Capital of Canada to address our graduates today. Most other parts of Canada have been privileged to hear him, and I wished sincerely that the small Province in the Gulf might be similarly privileged. Senator Connolly has had a singularly distinguished academic career, and could command a leading place in the field of philosophy or of literature, as well as in his chosen profession of law, in the realm of education, too, he has attracted attention. Perhaps his early experience in the University of Notre Dame gave him a lasting interest in the whole field of education. His contribution to educational associations in Ontario has been outstanding. Certainly it is a joy to see men of his calibre gracing the Red Chamber of our government. We are most grateful for his very gracious acceptance of our invitation to come here today.

"As a final thought, I wish on behalf of the Faculty to express our cordial thanks to all donors of prizes.

Says Beachhead Battles Planned By Squirrel-head

SALERNO, Italy (AP) — The bloody beachhead battles of Salerno and Anzio during the Second World War were "totally unnecessary and planned by some squirrel-headed general," former president Truman said today.

Truman, who was in the U.S. Senate under the Roosevelt administration at the time the battles were waged 13 years ago, delivered this judgment to reporters after looking over the beach and the grim cliffs back of the Salerno landing area.

"I don't know who it was," Truman said. "There were a lot easier places that could have been picked."

At the spot in Salerno where Truman stood British troops landed under murderous fire from German guns hidden in the hills back of the beach. German tanks also counter-attacked.

Salerno, with only a handful of tourists on hand, was a peaceful vacation village. But at midnight on Sept. 8, 1943, when Allied troops stormed ashore under cover of a tremendous naval and air bombardment, the town was aflame.

LONDON (AP) — Britain's Lt. Gen. Sir Oliver Leese Tuesday described British troops' appraisal of the Second World War Salerno and Anzio beachhead battles as "absolute nonsense."

Leese, who commanded Britain's 8th Army in the Italian campaign, told reporters: "To land on the most obvious beaches would have been suicidal. Has not ex-president Truman heard of the surprise value of warfare? We chose to land on beaches which were not so obvious."

Field Marshal Lord Alexander of Tunis was in charge of the operations. To call him "squirrel-headed" is rubbish. "The operation was a very fine one — well planned and well carried out."

Ukrainians Meet — More than 1,000 delegates and guests representing hundreds of Ukrainian organizations and churches from coast to coast, are expected to attend the fifth all-Canada congress of Ukrainian Canadians here July 5-7. The congress is sponsored by the Ukrainian Canadian committee, consisting of affiliates from 23 Ukrainian dominion-wide organizations.

WINNIPEG (CP) — More than 1,000 delegates and guests representing hundreds of Ukrainian organizations and churches from coast to coast, are expected to attend the fifth all-Canada congress of Ukrainian Canadians here July 5-7. The congress is sponsored by the Ukrainian Canadian committee, consisting of affiliates from 23 Ukrainian dominion-wide organizations.

CHRISTMAS ISLAND SITE — LONDON (AP) — Christmas Island, claimed by the United States, will be used as a base for Britain's first hydrogen weapon tests next year, an authoritative informant disclosed Tuesday.

An admiralty spokesman said preliminary work has been started for putting up an airfield on the disputed Pacific island, which lies near the Equator about 1,200 miles south of Hawaii in the south central Pacific.

Ships of the Royal Navy and chartered merchantmen already are loading hundreds of tons of stores and airfield equipment in Scottish ports for transportation to the British-run territory.

Britain has made it publicly clear that she has developed hydrogen weapons but thus far has not tested them. It has long been assumed that her first series of hydrogen — as distinct from atomic — tests will be held in the Pacific within 18 months.

OWNERSHIP DISPUTED — Spokesmen for the Eden government refused publicly to confirm that Christmas Island or its neighboring atolls would be used for testing British nuclear weapons, but an authoritative informant said this was the case.

Meanwhile, Anglo-American talks have been under way in Washington for several weeks about the future of the 220-mile square island.

One aspect of the talks was said to be an American plan for setting up observation posts on or near the territory for some geophysical work, the British explorer who earlier had sailed to Australia. It was included in the Gilbert and Ellice Islands colony in 1919 and is under lease to a coconut plantation company until the year 2001.

British officials on the island recently evicted a group of workmen building a 600-seaplane base for South Pacific Airlines.

Government sources said Tuesday Christmas Island has no indigenous population and that, presumably, is an important reason why it has been chosen as a nuclear testing ground. Around 100 plantation workers living there will be employed on the construction of the new airfield and will be taken back to their homes on neighboring islands when the British tests begin.

OTTAWA (CP) — The RCAF announced Tuesday its two Comet jetliners will be modified in the United Kingdom to make them safe for operational use.

The two British-built planes, which cost \$1,544,000 apiece, have been grounded for nearly two years following two Comet crashes off Italy which took 56 lives.

The air force said a decision has been made to have modifications carried out on the two Comet transports "to permit full operational use of the speedy jets."

The two four-engine jets will be flown to the De Havilland factory at Brough, near Chester, Eng., for the modification work which will take about a year to complete. The planes were built by the same company.

STRUCTURAL DEFECTS — The modifications will be similar to those now being incorporated in the RCAF's Comet 2's.

"When returned to service with the RCAF they will provide facilities for transport, as well as a suitable means of exercising the Canadian defence system against high-speed aircraft simulating enemy bomber attacks," the air force said.

The RCAF took the Comets out of service early in 1954 after British Overseas Airways Corp. grounded its Comet fleet pending an investigation into crashes of the plane.

A British court of inquiry found that structural failure caused the first crash of a Comet jet and possibly the second. The first crashed off the island of Elba in the Mediterranean in January, 1954, and the second off Naples in April, 1954.

British To Test H-Bomb

By ARTHUR GAVHON LONDON (AP) — Christmas Island, claimed by the United States, will be used as a base for Britain's first hydrogen weapon tests next year, an authoritative informant disclosed Tuesday.

An admiralty spokesman said preliminary work has been started for putting up an airfield on the disputed Pacific island, which lies near the Equator about 1,200 miles south of Hawaii in the south central Pacific.

Ships of the Royal Navy and chartered merchantmen already are loading hundreds of tons of stores and airfield equipment in Scottish ports for transportation to the British-run territory.

Britain has made it publicly clear that she has developed hydrogen weapons but thus far has not tested them. It has long been assumed that her first series of hydrogen — as distinct from atomic — tests will be held in the Pacific within 18 months.

and Thomas Ford, Franconia, N. H. A prize of twenty-five dollars for the highest aggregate in the Sophomore Year, presented by Dr. L. I. Cusack, Toronto, Ont., and Charles Campbell, Kelly's Cross, P. E. I. The Mary E. MacDonald Scholarship for the outstanding student in the Freshman Year, awarded to Beverly Howard Glengarry, P. E. I.

A prize of ten dollars for English 4, presented by the Charlottetown branch of the Canadian Legion, awarded to Nancy Gillis, Alberton, P. E. I. A prize of ten dollars for Religion in the Junior Year, presented by Rev. L. A. Herrell, awarded to Charles Campbell, Kelly's Cross, P. E. I. A prize for Philosophy in the Junior Year, presented by the Basilio Subdivision of the Catholic Women's League, awarded to James Noonan, Summerside, P. E. I. A prize of ten dollars for Sociology, presented by Judge C. St. Clair Trainor, awarded to Henry Gaudet, Tignish, P. E. I. A prize for Religion in the Sophomore Year, presented by Rev. L. A. Herrell, awarded to Charles Campbell, Kelly's Cross, P. E. I. A prize for Religion in the Freshman Year, presented by the Basilio Subdivision of the Catholic Women's League, awarded to James Noonan, Summerside, P. E. I.

A prize of ten dollars for Latin 2, presented by Mr. H. P. MacPhee, awarded to Charles Campbell, Kelly's Cross, P. E. I. A prize of ten dollars for French 2, presented by Rev. J. N. Poirer, awarded to Gerard Burns, Quebec City, P. Q. A prize of twenty dollars for contributions to Red and White, presented by an Alumnus, awarded to William O'Flaherty, Northern Bay, Newfoundland, Thomas Ford, Franconia, N.H. and John Walsh, Charlottetown, P. E. I. A prize of ten dollars for Mathematics 1, presented by Rt. Rev. J. A. Murphy, awarded to Pictou Bloudeau, Ottawa, Ont.

He does not agree that only Trans-Canada is able to obtain the necessary 34-inch pipe for the line. It pipe was available in the U.S., it could be obtained by interests other than Trans-Canada.

The government's proposal was in the nature of a "gigantic joke on the Canadian taxpayer." Producing had produced a number of facts from the government not previously disclosed.

As Mr. Howe "continues the dance of the seven veils, we might find out more," he said.

WESTERN GUARDIAN

EAST PRINCE CREDIT UNION Chapter in Miscouche Hall, at 8.30 p.m., on May 23rd. Special film, visitors welcome.

WILL THE PARTY who picked up a tarpaulin at Arthur Graham's gate last week-end, please notify John Adams, Elmsdale.

REGULAR Wednesday night dance Borden Legion Home, 9.30 to 12.30. Music by Lowell Huestis orchestra featuring Russell Warren.

REGULAR Thursday night dance Kensington Legion Home. Music by Rolfe MacKenzie and his orchestra. Dancing from 9.30-12.30. Admission 50c.

FUNERAL AT ALBERTON The funeral of Mr. Allan Hayward whose death occurred in Lowell, Mass., was held Tuesday afternoon from the home of his brother-in-law and sister, Mr. and Mrs. Gordon Hardy, Alberton. The service was conducted by Rev. Murray Gardner, minister of Alberton United Church. Hymns were "The Lord's My Shepherd" and "The Sands of Time Are Sinking."

All bearers were Messrs. Keith Gard, John Platts, Robert Hunter, Donald MacAusland, Harold Horne and James Gard. Flower bearers were Messrs. Donald Clark, Robert Hardy, Wendall Hardy, Perley Hardy, Roy Hayward, Ralph Hayward, William Bell, Jr., Roger MacAusland, Sutherland Bell and John Clark. Interment was in Bloomfield Cemetery.

The concerts will take place from October to April and will be held in Summerside's new Civic Auditorium.

Mrs. Walter Lawlor, Charlottetown is visiting her brother and sister-in-law, Mr. and Mrs. G.J. Johnston, Alberton.

Miss Dianna Larkin, daughter of Mr. and Mrs. Dave Larkin, Kensington, was a week end visitor to Burlington.

Mrs. Horace Lyle returned to her home in Summerside on Monday after visiting her sister-in-law, Mrs. William Aubrey, Alberton South.

The many friends of Avard Harris, O'Leary who is a patient in Prince County Hospital on Monday had to hear that he is showing steady improvement since his recent illness.

Following the completion of last week's successful membership campaign, the Summerside Community Concert Association made arrangements over the weekend for a series of four concerts to be presented next season.

The artists who will appear here are: the Beaux Arts Trio (Daniel Gullet, violin; Bernard Greenhouse, Cello; Monheim Pressler, Piano); Mary Mac Murray, Mezzo soprano; John McCollum, tenor; and the Concertmen, a male chorus in joint recital with Edmond Karlusd, bass-baritone.

ment. We sold nearly 6 billion dollars' worth of goods and services abroad.

COLOSSAL DEVELOPMENT "These are official figures and to confirm them we should look at some of the major projects which are responsible for the development of these figures. Our original basic industries, like agriculture, fishing and lumbering, have grown at a rate commensurate with the rate of national growth, but there have been some spectacular developments, both of discovery and of exploitation.

"I refer to the iron ore project on the Labrador Coast; the expansion in the production of base metals and strategic materials in the Laurentian Shield. The most significant development of a similar character is our new frontier to the North. And here let me pause to say that as recently as 25 years ago we had thought of our country as having no new frontiers. Now we realize that a new and vast area could be occupied and from it we can not only derive great wealth, but in it people can make their homes and live out full and interesting lives. The fabulous petroleum and natural gas resources in the Western Plains; The great industrial and agricultural development in British Columbia. The new industrial potential mainly in Central Canada, born in the desperation of war and adapted now to both defence requirements and industrial uses.

"To service many of these great projects, we have undertaken the construction of the Seaway, which brings the ocean shipping to our agricultural heartland, as it passes through the greater part of our industrial area.

"To supply the power needs of our people we have embarked with courage but not without heart-searching upon the gigantic natural gas pipeline project. No one at the moment can predict the great benefits that will flow from the availability of this power in central Canada, but everyone must concede that they are tremendous.

ASSISTANCE AVAILABLE "For a nation of 16 million people, these are huge undertakings. Our public resources are not sufficient to develop the north half of this continent in early days, and to-day the same situation prevails, but there is capital and industrial know-how available in Europe and in the hands of private organizations among our friendly neighbours to the South.

"In their own interests, as well as in ours, they are glad to invest capital here if the economic climate is good; if our political institutions are stable, and if our people show a sense of responsibility in the management of their public and private affairs. By saying this, I am not entering a purely political debate. I am simply

ST. LAURENT

(Continued from page 1)

lowing the present course of lending money for private construction. Trans-Canada was the only organization with the necessary pipe and purchase and sales contracts.

WOULD GET LINE "If the company defaulted on its loan, that is did not pay it back by next April 2, Canadian taxpayers would have the line at 90 per cent of cost.

But Mr. St. Laurent hesitated when he asked Fleming (C-Tor-H) whether the Government would take over the line in the event of default.

"We shall cross all those bridges when we come to them and we shall cross them in the expectation that they will still, when we come to them, enable us to meet the situation and to meet the response we have been getting over the past year every time we faced them."

He disagreed with Mr. Drew who claimed there is a "joker" in the government's agreement with Trans-Canada, allowing the government to vary the contract without Parliament knowing about it.

Mr. Drew maintained also that although Mr. Howe had stated 51 per cent of the company's voting stock would be offered in Canada, the agreement made clear that only 20 per cent need be offered in this country to comply with the terms.

Mr. St. Laurent said 51 per cent would have to be offered, although he conceded there is no way of controlling the actions of those who purchase the stock. To control ownership would require a unilateral attitude which Mr. Drew would not contemplate. Mr. St. Laurent added.

DESCRIBED AS MONGREL Mr. Drew described the legislation as a "mongrel" bill and demanded again that it be brought before a Commons committee for full review and for study of other proposals. The committee also would try to find out what "threat" Mr. Howe used to get Calgary gas executive Frank McMahon — who offered and then withdrew an alternative proposal — out of the way.

The bill involves an "outrageous transaction" for which Canadian money would be turned over to the control of one of the largest resources to a company that is 83-per cent owned by U.S. investors," he said.

Justice Minister Garson, also entering the debate for the first time, said he wants the line built east to the West coast. The Manitoba city, Canada's fourth largest, can get some cheap fuel for a change. When the whole line was built, it would reduce Canadian imports of fuel by some \$43,000,000 annually.

Davey Fulton (PC-Kamloops) said Mr. St. Laurent now was on record "favoring the use of taxpayers' money to turn over a Canadian natural resource to private U.S. interests. The surrender to American interests had not only been supported but encouraged by the prime minister. Colin Cameron (CCF-Nanaimo)

"THE GOOD BOOK STATES . . ."

WO1 D. R. Pirie, officer in charge of clerk accounts training at the Clerk Accounts School, RCAF Station Aylmer, is shown with Cpl. Clifford Hutchison, 30, whose wife Catherine resides at Spryfield, Halifax County, N.S. His father Mr. Willard Hutchison lives at Ellerslie, P. E. I. Field Marshal Lord Alexander of Tunis was in charge of the operations. To call him "squirrel-headed" is rubbish. "The operation was a very fine one — well planned and well carried out."

A course of this type is designed to modernize and bring up to date in regulations all accounts NCO's and Warrant Officers at the supervisory level. In this manner the RCAF is maintaining a high standard of efficiency and service to the public in the expenditure of government funds.

UNDERGROUND FIRE

LONDON (AP) — A fire raging out of control deep in a wartime underground air raid shelter sent 19 firemen to hospital early Tuesday. Only one was seriously injured. The shelter 150 feet below the streets of London now is used as a troop transit centre.
