

POSTSCRIPT.

The Colonial and United States mails arrived last evening. Our exchange papers contain nothing of importance. The Legislature of Nova Scotia met on the 30th ultimo, for the despatch of business, which commenced with a better feeling than that which attended the "fortnight's debate" last session.

A despatch having been received from her Majesty's Government, concerning the coal mines throughout the province, both branches of the Legislature prepared addresses on the subject, to be presented to her Majesty. This is a matter of some importance to our sister colony, but the want of space and time prevent us from giving it further notice in this number.

The question is frequently asked why so few slaves are taken by our cruisers on the coast of Africa, while so many are taken by the British cruisers? The answer is a plain one. By the terms of the Ashburton treaty, our vessels are prohibited from overhauling any vessels not bearing the American flag.--*An. pap.* Query.--Is this literally true?

A New Paper, bearing the title of the 'Toronto Periodical Journal, or Wesleyan Methodist,' has lately been started in Canada.

INSURANCE AGAINST FIRE!!!

THE Subscriber has often felt surprise, that in an enlightened Community, like that of Charlotte Town, its Inhabitants are not more deeply impressed with the great advantages attending Insurance. It is a well-known fact, that there are merchants in Charlotte Town, having thousands of pounds of Stock in their warehouses, and not one penny insured; and that there are many householders, who have a large capital invested in Wooden Buildings, and not one of which is protected, by insurance, from the ravages of fire. Fire is very try to the uninsured, strikes a knell to the heart;—but to those who have had the prudence to seek protection, where it can be found, by applying to the subscriber, the cry of "FIRE" has lost its terror, and they rush to the spot, ready to render effective assistance, having their reason at command, as they know, that their property to a certain extent, is safe.

The Subscriber still continues to issue Policies in the "ALLIANCE LIFE AND FIRE INSURANCE COMPANY," of London, at moderate rates of premiums. From the Capital of £5,000,000 sterling, that the Company has at command; from the honor and liberality which it has displayed in the settlement of losses here and elsewhere; from that novelty in Insurance, by allowing those who have preferred to insure for five successive years, a participation of the profits of the Company,—and which last year amounted to seven and a half per cent. upon the premiums paid; and from the perfect security which the Public possess by transacting business with such an old established and highly respectable Company: the subscriber feels that all those who are desirous of insuring to a discerning public to obtain Policies from his office,—independent altogether of the important consideration, that it is a British Institution—a British Association—in fact, a British Company.

As the subscriber intends to appoint sub-Agents throughout the Island, he will ratify the policy, as to their names and places of residence, as soon as he has completed his arrangements. Any further information can be obtained, and will cheerfully be given, by applying to the subscriber at his office. CHARLES YOUNG. Agent.
