SPECIAL DESPATCHES TO THE EXAMINER.

## AN ATTACK REPULSED.

### Five Reported Killed and Many Wounded.

### Great Excitement Among the Tribes Along Boland River.

BOMBAY, Aug. 30.—Little fresh news has been received here from the frontier. An attack has been made on Shimwari in the Samana Range but the attacking party has been repulsed with the loss of five killed and many wounded. There is considerable excitement among the tribes along the Boland River to quit and the telegraph wires have again been cut.

It is reported that the tribesmen are gathering near the Zisset Sanitorium and anxiety is felt regarding the safety of ladies and children as the railway officials are kicking for military protection for their property. If the route is considered safe ladies and children at Sin will be brought away, but otherwise the troops will be sent from Quetta to protect them. Fears are expressed of the fall of Rustam, northwest of Maidan, the whole district being in the hands of the enemy.

General Woodhouse has gone from Maidan to Husian where the force which now numbers 2,000 men with two guns will be strengthened.

### Wrestling Match.

LONDON, Aug. 30.—The wrestling match for the championship of the world between Strangler Lewis and Bulldog Clayton on Saturday was won by Lewis.

### More Klondyke Gold.

OTTAWA, Aug. 30.—The steamer Portland arrived at Victoria yesterday from the mouth of the Yukon river. It brought some miners and Klondyke gold valued at \$200,000. The miners corroborate the previous statements as to the marvelous wealth of that district.

There is a saving if you buy your watch at W W Wellner's.

Beer & Goff received forty 12 quart baskets plus and green gages by express Saturday night and are now offering them for sale very cheap by the basket. 202-2in.

SUNNYSIDE,

LATEST NEWS BY WIRE AND MAIL

DUBLIN, Aug. 27.—The Duke and Duchess of York, in Phoenix Park this morning, presented new colors to the second battalion of the Royal Fusiliers, the second battalion of the East Yorkshire Regiment, and the first battalion of the King's Own Yorkshire Regiment.

OTTAWA, August 27.—The federal government will take over the Drummond county railway for the experiment of extending the I. C. R. to Montreal on October 26th. It is likely by that time all the arrangements will have been made for the service.

THURSO, Quebec, August 27.—The post office here was burglarized last night. One hundred dollars in stamps were taken.

DUBLIN, August 27.—The post office at Laneborough, county Longford, was dynamited at 2 o'clock this morning. The front of the building was destroyed, but nobody was injured.

HALIFAX, Aug. 27.—A shocking event is reported from Wheland, Labrador. A little thirteen year old daughter of one of the Irishmen there was on her way to visit a relative at some distance from her own home when she was set upon by some of the fierce dogs used by the population on the coast and almost torn to pieces by them in their attempts to devour her.

ATHENS, August 27.—The powers have asked Greece to state the amount she is able to pay as a first instalment of the Turkish indemnity and to mention the revenues which she can assign to guarantee the whole amount. The Marquis of Salisbury has suggested that Great Britain, France and Russia, jointly, guarantee the payment of the indemnity loan, and that they control the Greek revenue which may be set apart for the purpose of meeting this obligation. The English premier invites the other powers to participate in the guarantee if they chose to do so.

MANCHESTER, N. H. Aug. 27.—A special to the Union from Colebrook, N. H., says: "The disclosures regarding the shipment of paupers to Canada from Coos county farm at West Stewartstown, seems to have aroused the Canadian authorities and given them information necessary to return the helpless ones abandoned in their territory to the place where they belong. The last two sent over to British soil have been taken to the county farm, and are likely to remain there, since it is learned that the officers will take precautions to prevent any further unloading in their jurisdiction. It stands that the officials across the line are very indignant at the practice which has been brought to light to ensue."

HALIFAX, Aug. 27.—The Behring sea commission met this morning. The work will be taken up in regular order. A printed argument will be spoken to point by point. Premier Peters, chief council for Great Britain, began his argument on behalf of the imperial government. He discussed the scope of the commission and insisted that Great Britain had a right to demand compensation on behalf of private parties. Mr. Peters quoted instances where vessels were overhauled and after being stripped of guns and ammunition, were released and ordered to proceed to Sitka. Mr. Peters argued that the vessels when mentioned in the claims, included indemnity not only for property, but for loss of prospective catches, and hardship to crew. Much of the afternoon was taken up in argument to show that Great Britain's claim for damages for the loss of the prospective catch was well founded in international law, and, in fact, the United States had intentionally prevented the possibility of Canadians making the prospective catch.

ROME, August 27.—Italy has wired to Morocco, threatening to despatch a mar-of-war to Tangier unless the crew of the Italian brig Fiducia is released. Moorish pirates recently attacked and plundered the Fiducia and detained the crew.

CANEA, August 27.—Island of Crete—The insurgents, on Wednesday last, fired on Djavad Pasha, the commander of the Turkish forces in Crete, while he was outside of Suda, compelling him to abandon his intention of visiting the fortresses of Izzeddea.

Boys' Suits, former price \$3.80, now for \$2.75. Boys' Suits, former price \$4.25, now for \$3.00. Boys' Suits, former price \$5.50, now for \$3.90.

### THAT WATERED MILK.

The first prosecution of which we have heard for the adulteration of milk in New Brunswick was conducted before Justice Hatfield at Norton, Kings Co., on the 9th and 10th inst. The facts of the case were as follows:

The cheesemaker at Norton factory, Mr. John Mills, found that the milk coming from one of his patrons was showing an abnormally low percentage of butter fat. As this condition continued he sent for Dairy Superintendent Mitchell, who upon careful test found that the milk coming from the patron contained on the morning of the test at the most favorable estimate at least 25% water. Mr. Mitchell then wrote Mr. V. Cripps the patron in question, telling him of the condition of his milk and advising him to send straight milk as he was liable under statute to fine.

Mr. Cripps on receipt of the letter apparently lost what little sense he may previously have possessed and began publicly to revile Mr. Mitchell in terms more forcible than elegant for maliciously interfering with his business. Upon hearing of this the Dairy Superintendent went to Norton and called on Mr. Cripps, telling him there was a hard way and an easy way out of the difficulty for him. It he would tell by what means the water got into the milk in question and promise to observe the law in future, there would be no further trouble; on the other hand the law would have to take its course. Mr. Cripps's only reply to this was a tirade of abuse and a defiance of the law. He would not, he said, permit any man to milk his cows for the purpose of comparing freshly drawn milk with milk taken to the factory, nor would he accept any proposition on the subject whatever.

Accordingly information was laid and the matter came up for trial, George W. Fowle, M. P. P., of Sussex, prosecuting attorney, and F. L. Fairweather, of Sussex, defending the case.

The formula by which the Dairy Superintendent found the milk to contain the water was as follows:

The Babcock test showed the milk to contain 2.6% fat, the lactometer showed a reading of 22 at 68° temp. To find the per cent of solids not fat in the sample the lactometer reading 22.8 was added to the per cent of fat 2.6 and this divided by 4 according to formula. This gives 22.8 + 2.6 ÷ 4 = 6.35% solids not fat. As normal milk contains from 8.5 to 9.5 solids not fat, to find the amount of pure milk in sample we multiply its solids not fat by 100 and divide by the per cent found in normal milk, say 8.5. This gives us 6.35 + 100 ÷ 8.5 = 74.7 pure milk in the sample or an addition 25.3 water. This statement was admitted in evidence.

Cripps, for the defence, swore that his cans were out in the heavy rain storm during the night and that on the way to the factory the waggon broke down and a quantity of the top part of the milk was spilled. These statements were, however, not proven clearly, and the justice decided that Mr Cripps should pay a fine of \$25 and all the costs, making altogether a little bill of over \$50. Should any milk and water man see this he should make a note of it and save himself trouble.—Co-Operative Farmer.

The Waltham and Elgin factories advanced the price on their watches. W W Wellner bought largely before the rise and sells at the old price.

Miss Helena McDonald, having returned from Montreal, where she took a course of lessons in ball-room and fancy dancing from Prof. Norman, president of the Western Association of Dancing Masters of Canada and the United States, and from whom she holds a diploma, will resume her classes in Charlottetown on Wednesday, the 15th September. 196-136
