ANOTHER OLD IDEA EXPLODED.

The old fashioned idea that to keep warm one had to be loaded with a succession of garments till the weight of them was a burden and one felt too bulky to move, has been exploded. The age of common sense and comfort has arrived, when a man can adapt his clothing to suit all weather without swathing himself like a mummy. Fibre Chamois, the interlining which makes this possible, has gained its great popularity because it is an absolute non-conductor of heat and cold. No breath of cold or frosty wind can penetrate it from without, neither can the natural heat of the body escape through it, and it is so light that clothing may be interlined with it, all through, without its adding any perceptible weight.

LAST NIGHT'S ROAD RACE.

Waldron Prowse Wins, With Collings Second and Sutherland Third.

If we may judge of the popularity of any sport by the number of people attracted to witness it, bicycling is rapidly growing in popularity. The immense crowd both at the start and the finish of the road race last evening sufficiently indicated the growing demand for this kind of sport.

Ten men lined off in two rows near T. C. James' corner at 7 o'clock last evening. The first row of five men, namely, W. Prowse, J. Sutherland, W. Collings, L. Sellars and Art Gaudet, were sent off at 7 o'clock sharp; the second row, Woods, Leclair, Kennedy, Owen and Newsome five minutes later. At the start, Sellars punctured his tire, and before he had secured another wheel and had started again he was practically out of the race. The crowd that had witnessed the start, swelled by hundreds of others, crossed over to the Malpeque Road, where the finish was to be. Considering the distance, about nine miles, and the state of the roads, the head man was not expected in inside of thirty-five minutes, but before the half hour was up cyclists were seen dashing past St. Dunstan's College, closely followed by W. Prowse who dashed under the flag amidst cheers, in the splendid time of thirty minutes and four seconds. Half a minute behind him arrived Collings and Sutherland. As they neared the finish Sutherland was leading by about a yard, but a few feet from the wire Collings made a final dash and came in first by about a foot. Following these came Gaudet. Of the second crowd, Newsome was the first in. This plucky young rider was the smallest of the racers, and had he not had a bad upset by another cyclist falling in front of him, he might have made it interesting for the winner. As it was, his time was a little over two minutes slower than Prowse's. Next came Leclair, then Owen, Kennedy and Sellers. Owing to a puncture Woods did not finish. The following shows the time made by each rider:—

Prowse	30.04
Collings	30.29
Sutherland	30.29½
Gaudet	31.32
Newsome	32.15
Leclair	32.32
Owen	33.37
Kennedy	33.47
Sellar	37.29

Prowse and Sutherland are members of the C. A. C. C. and rode Brantfords. Collings belongs to the C. W. A. and rode a Sterns.

GREAT LOSS OF LIFE

By a Disastrous Tidal Wave on the Coast of Northern Japan.

SHANGHAI, Aug 1.—The recent disastrous tidal wave along the coast of Northern Japan has been paralleled by a similar phenomenon on the Coast of Haichau, northeast of the province of Kiangsu, in which Shanghai is situated. The news of the disaster did not reach here until to-day, owing to the lack of facilities for communication with the part of the country devastated. On July 26th there suddenly appeared in the Yellow Sea a huge bank of water that was rushing shoreward with terrible velocity. The water off the coast is shallow and when the wave was some distance away it began to comb and the roaring could be heard for a great distance. From the stories of eye-witnesses and the reports of people in the country back from the coast the wave was five miles wide. Thousands of tons of water were thrown for miles inland and everything in its path was swept away. Many villages were entirely destroyed and it is estimated that fully four thousand people perished. All the cattle were drowned and the rice fields were obliterated. It is expected that the survivors will meet with a worse fate than death by drowning, for with the destruction of the rice fields famine will stare them in the face in the autumn. Had it not been for the gradually sloping land under the water the effects of the wave would have been far more disastrous than they actually were. This had the effect of greatly retarding the progress of the immense mass of water, which, had it been unchecked, would have swept far inland over the comparatively flat country. In many cases whole families were lost. There is already much suffering among the survivors, who, miserably poor before the disaster, are now absolutely homeless and foodless. It is feared that later details will add to the number of lives lost and the extent of the damage done.

CAUTION TO SUBSCRIBERS.

A letter received from Mr. A. F. Woodbridge, Superintendent of the Deaf and Dumb Institution, Fredericton, N. B., says:—

"Complaints have reached us from some of our subscribers in Prince Edward Island, that they had been called upon by deaf mute collectors who pretend to be collecting for the above Institution. To assist their canvass they had extracted the list of subscribers from this year's Report of our Institution, and a number of our subscribers had handed their subscription to these deaf mute collectors, thinking they were from the Fredericton Institution.

"These amounts do not reach us, but are intended for an Institution which is being opened in St. John.

"We would warn our friends about handing their subscriptions to any deaf mute collectors. Mr. Geo. E. Powers, our collector in the Island, can both hear and speak."
