NOTICE

NEW YORK (AP)—The stock market was jolted last week by the sharpest weekly loss since June.

"It was a rough week down here," said a Wall Street broker, "but we've had rougher ones."

The market declined each day except Tuesday, when it managed an irregular advance.

Although the slump reached substantial proportions in two sessions, most brokers took the setback as something to be expected—the setting in of a period of consolidation and correction that carried the market uphill from October to January.

There was nothing particularly discouraging or encouraging in the business news although the flow of dividend raises and stock splits continued to be good.

The Associated Press average of 60 stocks fell 6.8 to 251.1, the steepest decline since June 22. The Dow Jones average of 30 industrials plunged 21.92 to 659.72.

Volume was 19,057,800 shares, compared with 16,945,955 in the previous week, which was shortened to four days by the Washington's birthday holiday. Brokers took heart from the fact volume did not rise sharply on declines.

The most active stocks last week on the New York Stock Exchange were:

Chrysler, off 3⅛ at 87⅝ on 307,000 shares; American Motors, off 1¾ at 20⅛; General Motors, off 2 at 60¼.

Most active stocks this week on the American Stock Exchange were:

Continental Vending, off ⅞ at 2½ on 177,300 shares; Molybdenum Warrants, up 2¼ at 7¼; Webb and Knapp, unchanged at 1.

Mining Corporation Has Profits Sliced

TORONTO (CP) — Mining Corporation of Canada Ltd., a holding exploration and financing company, had a net profit in 1962 of $2,049,248 or 93 cents a share compared with $2,091,859 and 98 cents in 1961.

Revenue was $2,564,612 compared with $2,499,836, but increased expenditure on exploration more than offset the revenue rise.

In addition to these figures there was profit on sale of investments of $115,593 compared with $594,683 in 1961; and a second liquidation dividend from Emtwo Mines Ltd., amounted to $675,500 compared with the first Emtwo liquidation dividend of $450,331 in 1961. These sums were credited to earned surplus. Since the yearend a third and final liquidation dividend of $658,613 has been received from Emtwo, which formerly held nickel-copper property in Ontario's Sudbury area.

Accompanying mining corporation's annual report are those of four other companies in its group—Normetal Mining Corporation Ltd., Quemont Mining Corporation Ltd., Geco Mines Ltd., and Torbrit Silver Mines Ltd.

PROFIT INCREASES

Geco, copper—zinc - silver-gold producer in Northwestern Ontario's Manitouwadge area, had net profit of $4,419,484 or $1.47 a share compared with $3,648,037 and $1.22 in 1961. Operating profit was $9,423,518 compared with $5,748,106. Working capital at year-end was $12,043,999 compared with $7,363,884.

Geco's higher profit was due mainly to increased millhead grade, premium on U.S. funds, higher prices for silver and slightly better copper and zinc prices.

As reported earlier Normetal had net profit of $1,435,749 compared with $1,273,123 and Quemont had net profit of $2,610,395 compared with $2,409,416. Both are Northern Quebec base metals producers.

Funds of Torbrit, former silver-lead producer in British Columbia's Cassiar district, are for the most part invested in short-term government securities, pending "satisfactory opportunities for conservative mining investments."

Torbrit's liquid assets, including marketable securities at quoted market value, exceeded current liabilities by $1,543,942 at Dec. 31, compared to $1,358,604 at the end of 1961.

N.Y. Stocks Are Jolted By Declines

Steel Output In U.S. Shows Upward Trend

CLEVELAND (AP) — Steel production and shipments of finished steel this month will exceed February's by 10 to 15 per cent, even without any marked step-up in inventory build-up, Steel magazine predicts.

The estimated 2,135,000 tons poured last week by the industry was 2.3 per cent above the previous week, and in the coming week ingot output will rise again for the sixth straight week, the weekly journal of metalworking says.

General Motors' announcement that it will add a million tons of steel to its stockpile by July 31 has given the market a moderate lift, Steel says.

But most buyers will wait until after March 15—when the United Steelworkers executive board meets and decides on whether to reopen its contracts—before making any move to increase inventories much.

That means it will be April before the effect of any inventory boosting in anticipation of a steel strike would be felt by the industry.

Inventories totalled about 9,000,000 tons at the start of the year, and by the end of this month will be about 9,800,000 tons, Steel says. Last year, in anticipation of a strike, consumer inventories were about 4,500,000 tons above normal.

In spite of the pickup in operations, steel mills have been buying scrap sparingly and prices show signs of weakness, Steel reports. The magazine's composite price on No. 1 heavy melting grade scrap held at $28.33 a gross ton last week for the fourth straight week.
