Commission Adjourns To Study Evidence On Prices

By ALAN HARVEY
Canadian Press Staff Writer
OTTAWA (CP) — The royal commission on price spreads of food products Friday completed 30 days of public hearings and adjourned to study some 2,000,000 words of written and oral evidence.
Its report may not be published before next autumn.
In final hearings, the seven-member commission investigating the difference between what the farmer receives and what the public pays heard criticism of profits in the food industry and an outline of the wholesaler's role in marketing.
Aime Boisvert, representing the Canadian Wholesale Grocers' Association and the Province of Quebec Wholesale Grocers' Association, said the so-called middle-man now is "mentor," just adviser and friend "of his suppliers and customers."
In a trade of growing complexity, he was often expert in store "engineering" and helped retailers in advertising, accounting, merchandising and training of personnel.

Suspended Sentences Given Teenagers On Arson Charges

Four of five teenagers were given two-year suspended sentences when they appeared in County Magistrate's Court on Friday afternoon charged with arson. In addition the quietest were fined when all pleaded guilty to a charge of committing damage to public property.
The fifth member of the party will appear for sentence on Wednesday, November 26th on the arson charge.
Four of the five were fined \$25 and costs or 30 days each. The other was fined \$10 and costs or 10 days when it was noted by defence counsel that the accused did not take any part in either of the offences but was driving the vehicle.
Included among the offenders were two residents of Charlottetown, two from North River and other from West Royalty.
Four Charlottetown youths, appearing on two separate charges each of committing damage to the Dunstaffnage and Ten Mile House schools, were fined \$10 and costs or 10 days on each charge. Similar charges against three teenage girls from the city were withdrawn at the request of the crown.

Baptist Womens Executive Hold Conference At Moncton

The fall Sessions of the executive of the United Baptist Women's Missionary Union convened at Moncton, November 19-20. Fifty-two members from the three Maritime Provinces were in session under chairmanship of the president, Mrs. Erna Fash Hicks of Moncton. Welcome was extended to several new members and the new general treasurer, Mrs. G. H. Purdy of Amherst, and the new superintendant of White Cross supplies, Mrs. Neil Price of Saint John were presented to the executive gathering.
Sessions opened with devotions led by Mrs. Colin Waugh and Mrs. Raymond Wood of Prince Edward Island with Mrs. D. L. Kennedy of Saint John at the piano.
The general treasurer presented her first report of receipts and expenditures for Home and Overseas Missions. Provincial secretaries — Mrs. M. O. Brinley, Moncton, secretary for N.B., Miss Marion Eaton, Canard, secretary for N.S. and Mrs. Charles Scanton, secretary for P.E.I., submitted reports of the various aspects of the work. Reports were also received from the superintendents and secretaries of the departments of the union.
An invitation to hold the spring executive in First Baptist Church, Truro, in April was accepted.
The Executive members of Moncton area accepted the responsibility for preparing the program for the annual convention of August 1959.
All departments reporting stressed the need for earnest prayer on behalf of their work.
Members attending were entertained over night at the homes of members of the congregation of First Baptist Church. Ladies of the Missionary Organizations of the church provided bountiful meals at the church.
Those attending the sessions from Prince Edward Island were Mrs. Dan Smallman and Mrs.

Shippers Check Christmas Trees For Santa Notes

BATHURST, N.B. (CP)—While lands and forests officials inspect Christmas trees here for disease, shippers are inspecting them for notes to Santa Claus.
Last year Lands and Forest Minister Buchanan rapped the habit of tying Santa Claus notes to trees headed for the United States. He said unscrupulous adults had made capital of a children's practice and turned it into a full-fledged business.
A lands and forest official said Friday the department was not inspecting trees for pleading notes. He said there was no law against the practice and the department had no right to remove the notes.
But shippers were making a check, he said.
The province had no direct interest in the practice that pleads poverty and asks for a Yuletide handout.
In Nova Scotia, a government spokesman said there's no inspection. Most of the trees are baled before they leave the woods.

MAN IN ORBIT SOON

BOSTON (AP) — Dr. Werhner von Braun, the U.S. Army's missile expert, says that within eight years the United States will have many manned ships in orbit. He told members of the General Electric Company's small aircraft engine department that the craft will be used for communications and weather forecasting.

Cancer Society To Spend More On Research

The Canadian Cancer Society will be required to provide more money for cancer research while increasing the scope of its local education and welfare program.
This was the message pronounced at the recent meetings of the boards of directors of the National Cancer Institute and the Canadian Cancer Society in Montreal last weekend.
Mr. W.H. Boston, president of the P.E.I. Division of the Society and member of the national board of directors, attended the meetings along with the division's executive secretary, Mrs. J.G. Dennis.
The board of the National Cancer Institute of Canada is made up of prominent doctors from different parts of Canada and includes four representatives from the Canadian Cancer Society.
Institute president, Dr. H.E. Rawlinson of the University of Alberta, explained that "the presence of these business men on the board of directors of the institute which is primarily concerned with cancer research is very useful. Since we are now spending approximately a million dollars annually their business experience is necessary. Also, they have a very keen interest in the cancer problem and practical ideas about meeting it."

Gas Seen No Threat To Power Firms

MONTREAL (CP)—Col. Maurice Forget, president of the Quebec Natural Gas Corporation, Friday termed "completely unjustified" statements that the electrical industry may be hurt by natural gas competition with an ultimately damaging effect on the provincial economy.
He was addressing the opening ceremony of a gas appliance exhibition marking the utilization of Western Canadian natural gas in the Montreal area, brought here through a 2,300-mile pipeline.
Referring to gas - electricity competition, Col. Forget said the field is "big enough" for both enterprises.
"Certainly there will be competition," he said. "But such competition will only guarantee the consumer better service from both industries."
The natural gas corporation, a privately owned business, took over the Montreal gas distribution system—previously operated with manufactured gas—from the Quebec Hydro, a provincial agency.

Study Marine Birds' Drinking Of Salt Water

DURHAM, N.C. (AP)—Marine birds drink salt water and thrive. If man does it, he dies. Why?
The U.S. office of naval research has granted \$9,730 to Duke University to study the puzzle.
Dr. Knut Schmidt-Nielsen, professor of zoology and an authority on the kidneys of animals other than man, is chief investigator of the project. Gulls, auks, puffins, petrels and cormorants will be included in the research.
The study will focus attention on the recently-discovered gland in marine birds that eliminates salt from the bird's body. Dr. Schmidt-Nielsen says this mechanism is more important than the kidney in the elimination of salt by birds.
Grant funds will be used primarily for field research. Research headquarters will be at Mount Desert Island biological laboratory in Salisbury Cove, Me. Field studies will be made at Duck Island, Gulf of Maine, Kent Island, New Brunswick; Bird Island, Victoria County, Nova Scotia, and Bonaventure Isle, Gaspé Peninsula Quebec.

Que. Mineral Output Down

QUEBEC (CP) — The value of Quebec provincial mineral production dropped to \$438,701,683 during the 1957-58 fiscal year from \$463,680,968 during the 1956-57 year.
The annual report of the department of mines for the 12 months ended March 31 said causes were the reduction in the price of copper, lead and zinc and the lowest rate of exchange for the U.S. dollar in 25 years.
One bright spot was the increase in the value of iron ore shipped from Ungava's iron mines. Value jumped to \$101,000,000 from \$99,050,321. Iron now was the largest single production item in Quebec.
Industrial minerals did well.
