"ENGINEERS DO IT WITH PRECISION"

## ENGINEERING SOCIETY NEWS

### Guest Speaker

On Monday, October 19, 1992 the Engineering department had Elizabeth Cannon, a representative from the University of Calgary, come to UPEI to speak about the Survey Engineering program in Calgary. The presentation was interesting and informative. We would like to thank Elizabeth for the time.

### Taste Test

The Engineer decided to try to put a stop to the taste test which is always annoying us on T.V. We conducted our own campus blind taste tests which are always annoying us on T.V. We randomly sampled people on campus and our results were as follows:

1 out of 10 Engineers spit both out and asked for a Labatt's product. (The 10th Engineer was passed out.)

1 out of 10 Artsies spilled it on themselves (the other 2 couldn't get the bottles open)

1 out of 10 Business students wanted to know if it was free cheap bunch of \* & ^ % \* % \$ ! @ # )

1 out of 10 Philosophy/Psych students are still pondering the question

5 out of 10 jocks said "huh" the other 5 said "urp".

1 out of 1 Chemistry students couldn't remember the chemical formula for either composition so declined to answer. (We could only find one Chem student)

### Pub Crawl

Last Friday, the Engineering Society went on our "Middle of the Fall Pub Crawl". There were six teams entered with about 30-40 people in all. A few new members joined our society since their faculty is boring. The fun officially started at 7:00 and finished at 12:00 however some started early and many ended late. The winning team of the crawl will be announced next week and we will have all the juicy detail at that time.

Engineering Quote of the Week -- *A day without fusion is like a day without sunshine.*

P.S. The Engineers would like to extend their extreme thanks to the "X-Press" for f!@#\$\$% up our last three articles
