Associated with Friday morning, it is made up of the best which has appeared in the Daily and is a first class newspaper containing all the latest news. Subscription \$1.00 a year.

THE DAILY EXAMINER

NOVEMBER 5, 1897.

THE MARKETS

The weather of the past month has been so favorable for farming operations that it has been unfavorable for the operations of the market. Up to this date, there has not been much movement of produce, and prices are without change to note.

Pork—The Montreal Gazette reports that the feature of the market is the continued weakness for hogs, and although the supply was not large prices scored a further decline of 40c per 100 lbs., with the ocean and slow at 4 1/2c per lb., live weight. Pork sells at \$15 to \$16 per bbl. In this Province, the Messrs. Ruttenbury are purchasing hogs for future delivery next month at about 4 1/2c per lb., live weight.

Cheese—The exports of cheese, local and through, from Montreal last week footed up 70,840 boxes. For the corresponding week last year they were 111,353. The total shipments so far this season now reach 1,542,477. For the corresponding period last year they were 1,553,737 boxes. The price of cheese is lower in the west, and Montreal quotes 8 1/2 to 8 3/4, while Ontario boards on Saturday were lifeless at 8 to 8 1/4.

Butter—The exports of butter from Montreal last week amounted only to 1,058, but even this compares favorably with the corresponding week last year, when they were but 7,878. The total shipments since May 1st now foot up 199,986 pkgs., whereas at this time last year they were only 144,281. Finest creamery sells in Montreal at 18 to 18 1/2c per lb.; seasons, 14 1/2 to 15 cents.

Oats and Potatoes—The state of the oats and potatoes markets remains unchanged. Oats sell in Charlottetown at 26c per bushel and potatoes at 25c.

Eggs—There is nothing new to report concerning eggs and the price in this city remains at 12 1/2c per dozen.

NOTES AND COMMENTS.

—Benin City, which until quite recently fully deserved the name of the City of Blood, has now become quite a respectable civilized centre—thanks to the efforts of the English officers stationed there. No trace now remains of the crucifixion trees and execution pits, which were so conspicuous when the British expedition reached there last February. The reign of terror ceased the day the city was taken, and now there is every prospect of a very improved order of things. They now have a fortnightly English mail—regular communication being kept up by runners between Sapele and the city. Golf links, too, have lately been established.

—Lord Rosebery addressed a large meeting at Manchester in connection with the centenary celebration of the chamber of commerce. Lord Rosebery contended that the condition of agriculture abroad, despite bounties and protection, was little better and in some cases worse than in England. He quoted Sir Wilfrid Laurier as a "most illustrious authority sustaining the view that it is free trade which has preserved and consolidated the British empire." He fully agreed with Sir Wilfrid Laurier, he declared, that any deviation from absolute political and commercial freedom would weaken the bonds holding the empire together and that "anything in the direction of an imperial zollverein would weaken the empire internally and excite the permanent hostility of the whole world, already seriously excited by British prosperity under free trade." He said he "would tread softly in the presence of the idea of a zollverein, for he believed it already dead. It behooved them to walk strongly and warily in the path of the empire, but such a zollverein would form a permanent menace of war."

Orders have been issued that all Spanish troops are to leave within two months the unused churches in which they have hitherto been housed for lack of other accommodations.

Marshal Blanco has issued orders to the effect that all money found upon the persons of killed or captured insurgent officers is to be deposited in the fund for the relief of invalid Spanish soldiers.

Ayer's Sarsaparilla.

ONLY HIMSELF TO BLAME.

There Was No Need of His Plunging So recklessly and Blindly.

Miss Pinkerly—Are you interested in charity, Mr. Tutter?

Tutter (who knows that she is and suspects a possible donation)—Well, Miss Clara, that depends. Some forms of charity are excellent. Others are misdirected.

Miss Pinkerly—Yes, I suppose that's so. You know we are going to give a little entertainment at the church.

Tutter—Oh, yes. Something for the heathen, I suppose. Do you know, Miss Clara, I haven't much faith in that sort of thing. Now, if it were nearer home.

Miss Pinkerly—But it is nearer home. We're just for the poor children of the neighborhood.

Tutter (seeing no escape)—Well, that's better. I approve of that. Of course I'll take a ticket. Awfully glad.

Miss Pinkerly—Oh, that is so kind of you.

Tutter—Not at all. Tell me, what sort of an entertainment is it going to be?

Miss Pinkerly—Oh, just a simple little affair. We thought it best, you know, to have everything as simple as possible. There will be refreshments, of course, but they will all be donated, and then we propose to have some sort of amateur play—possibly a charade.

Tutter—Oh, I see. Well, it's a worthy object. I believe in that sort of thing. Have you sold many tickets?

Miss Pinkerly—Not so many as I hoped to. Still there is some time yet.

Tutter—Put me down for two tickets.

Miss Pinkerly—Now, Mr. Tutter, you are really too generous. You must consider your own pocketbook a little.

Tutter—Don't say a word. A simple, inexpensive little entertainment like this, with such a worthy object in view, ought to be encouraged. By Jove, the more I think of it the better I like the idea. Charity begins at home. It's a good thing, Miss Clara. I'm not satisfied. Let me have four tickets. No, make it a half dozen.

Miss Pinkerly—Now, Mr. Tupper, really—

Tutter—Don't say another word. I insist upon it. Where are the tickets? Have you got them here? I'll take them at once.

Miss Pinkerly—Oh, yes! Here they are.

Tutter—Good! Now, how much did you say they were apiece?

Miss Pinkerly—Only \$5, Mr. Tutter!—Harper's Bazar.

Evolution of the Educational Ideal.
Let us place ourselves apart from the tumult which rages on both sides, and, closing our ears, question ourselves whether a new educational ideal may be evolved from this strife of contending factions and what the general character of this ideal would be. If we assume that the three features which I have mentioned may be combined, we should have a popular, realistic, individualistic ideal of education—popular, not exclusive or aristocratic in the narrower sense of the word; national, not foreign or international, but rather the result of an evolution from the national life itself; realistic, characterized by strength and action and not by mere thought and aesthetic sentiment; individualistic—i. e., aiming at the development of the individual and not at the establishment of dull uniformity; not democratic, therefore, if this word imply a general reduction to a dead level, but rather aristocratic, in the sense of an individual, not a class, aristocracy.

It would be presumptuous at the present day to state what the concrete form of such an educational ideal would be. I wish to say, however, that the society corresponding to the above ideal would be that of an aristocracy of mind. Is this the type toward which we are tending? Is the aristocracy of birth and wealth to be supplanted by the aristocracy of personal worth and merit? This has been the philosopher's dream from the day of Plato's "Republic" to the present hour. It is the tendency of nature. It would be the aristocracy of nature to have every individual stand independently upon his own personal merit and not upon the achievements of his father.—Professor Paulsen in Forum.

Shot at Two Stars.
Bob Cunningham and two companions went coon hunting near Palaski. Coons can be found only at night, and they are usually seen near a cornfield. The trio, with their dogs, had wandered about half the night, when Bob suddenly pulled up with "Hist! I see a big one." He became afflicted with a touch of the buck fever and danced about in a strange and weird manner. "Do you see his eyes?" he asked. "I'm going to shoot."

The gun went off and Bob said, with many an adjective, "I've missed him." He loaded up again and blazed away, and still he declared he saw the eyes. None of the other parties could see the first symptom of eyes, neither could they hear Mr. Coon rustling among the trees. Bob declared that he could, and he shot once more, but the "eyes" were still there.

He is a pretty good shot, and firing three times at so large an animal as a coon made him think, so he walked over to the tree where he saw the coon and took a good look, and then discovered that he had been shooting at two stars that were peeping from between the limbs of the tree.—New Castle Courant-Guardian.

A SOAP BUBBLE.

The Relation of Its Varying Thinness to the Colors It Shows.

The extreme thinness of the bubble is indeed wonderful. It is estimated that the film in some places is only one three-millionths of an inch in thickness. Probably few of us can conceive of such thinness. Let me express it in another way. The Old and the New Testament contain some 3,000,000 of letters. Now one three-millionth is such a part of an inch as the first letter of the Bible is a part of the sum of all of its letters.

The bubble, however, is not of equal thickness at all points, and it is for this reason that it has the various colors. For instance, wherever the film is orange red it measures about three-millionths of an inch; where it is blue, eighty-one-millionths of an inch, and at a point where lemon yellow is prominent about twenty-one-millionths of an inch. Perhaps you wonder why the colors change from one part of the soap bubble to another. This is because the film of the soap bubble evaporates and grows thinner, but unequally so at different portions. A greenish blue with a pale rose red spot near it indicates an extreme thinness, and at such a point the film is ready to give way at the least jar.

You will be glad to know the source of the beautiful colors. Every one is delighted with them, even if not interested by the explanation of their origin. We may say that they come from the light. Light gives color to all objects, but not exactly as it does to the soap bubble. White light from the sun can be broken into the seven colors which we have seen in the rainbow. In that instance the raindrops separate it into its parts. A glass prism will do the same, as you may prove by looking through a glass pendant from a hanging lamp. When the light reaches the surface of the soap bubble, a part is reflected from it, and we see images on its surface as if it were a curved mirror. Another portion of the light, however, enters the film and is separated so that parts of the seven colors are thrown into the bubble, and we can see them at various portions of the opposite surface. Another part of the light, after being broken by the film, is reflected by its inner surface back to our eyes, so that we see colors at the point where the light enters.—Jacob F. Bucher in St. Nicholas.

Beating Janus' Best Record.
"No, sir," said the rural voter, "I wouldn't trust that politician under no circumstances."
"Why not?"
"Ye've heard about how ye orter beware of a two faced man?"
"Yes."
"Well, after seeing all the different pictures of him in the newspapers, I've come to the conclusion that he's a 17 faced man at the lowest calculation."—Washington Star.

Hood's Pills
Are gaining favor rapidly. Business men and travellers carry them in vest pockets, ladies carry them in purses, housekeepers keep them in medicine closets, friends recommend them to friends. 2c.

If You are Going  **BOSTON**

Or any part of the United States, the cheapest and best route is via the **Plant Line,** THE POPULAR SUMMER ROUTE

THE WONDERS OF A WATCH.

Few Persons Know How Great Its Marvelous Powers Are.

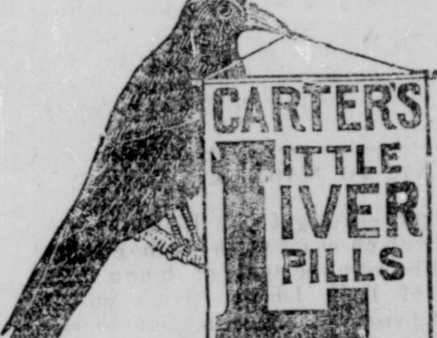

A Boston jeweler who has a talent for advertising as well as a genius for mechanics has been reminding his patrons lately that a watch is the smallest, most delicate machine that was ever constructed of the same number of parts. About 175 different pieces of material enter into its construction and upward of 2,400 separate operations are comprised in its manufacture.

Some of the facts connected with its performance are simply incredible, when considered in total. A blacksmith strikes several thousand blows on his anvil in a day and is right glad when Sunday comes around, but the roller jewel of a watch makes every day and day after day 432,000 impacts against the fork, or 157,680,000 blows in a year without stop or rest, or 3,153,600,000 in the short space of 20 years.

These figures are beyond the grasp of our feeble intellects, but the marvel does not stop here. It has been estimated that the power that moves the watch is equivalent to only four times the force used in a flea's jump; consequently it might be called a four flea power. One horsepower would suffice to run 270,000,000 watches.

Now the balance wheel of a watch is moved by this four flea power one and forty-three one-hundredths inches with each vibration—3,558 3/4 miles continuously in one year.

If you would preserve the timekeeping qualities of your watch, you should take it to a competent watchmaker once every 18 months.—Youth's Companion.

 **CARTER'S LITTLE LIVER PILLS**

SICK HEADACHE
Positively cured by these Little Pills.

They also relieve Distress from Dyspepsia, Indigestion and Too Weary Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coated Tongue Pain in the Side, TORPID LIVER. They Regulate the Bowels. Purely Vegetable.

Small Pill. Small Dose. Small Price.
Substitution the fraud of the day.

See you get Carter's, Ask for Carter's, Insist and demand Carter's Little Liver Pills.

GREAT CLEARING OUT SALE SUPERIOR FURNITURE.
For Sale By Auction

I am instructed by the Hon F. Peters to sell by Auction at his residence, Sidmount on **WEDNESDAY, 10th NOV.,** Next, commencing at 10 o'clock, a. m. All his household effects comprising Superior Piano, Drawing Room, Dining Room Hall, Bed Room and Kitchen Furniture.

Terms cash. **R. BEARISTO,** Auctioneer.

oct 20

For Sale or to Let "SIDMOUNT."

The beautiful residence of the Hon. F. Peters for sale or to let.

This property comprises 20 acres excellent land, with large and commodious dwelling house, and outbuildings, all in good repair. The house is fitted with modern improvements, having hot and cold baths and heated with hot water, and lighted with electric light. The grounds are beautifully laid out and planted with ornamental trees.

If not sold by private sale, it will be sold by auction on Tuesday, the 9th day of November, at 2 o'clock p. m.

—ALSO—

One driving mare, one superior cow, carriages, sleighs, robes, harness, farming implements, and a lot of hay and straw, etc., etc.

The extensive sale of superior furniture will take place the following morning at 10 o'clock. **R. BEARISTO,** Auctioneer.
