tools recommended

- Steel square
- Linoleum hammer for leveling seams
- Steel Straight edge
- Dividers, for fitting around pipes, radiators, etc.
- Cement spreaders, with tooth edges
- Linoleum knife
- Ball of twine
- Piece of Chalk

estimating quantities:  
Tiles measure 9" x 9" . . . and for every 9 square feet of floor, you need 16 tiles. Example: A room measuring 9 ft. x 10 ft. would contain 90 square feet. This would require 160 tiles (10' x 16'), plus a few extra spares and waste. The number of each colour required depends on design. The safest thing to do is to lay out your design on squared paper, remembering that each tile measures 9" x 9".
