

Action Deferred On New S'ide Auditorium, More Classrooms For School

—Action was deferred regarding construction of a new auditorium for the town of Summerside and additional classrooms for the High School at last night's meeting of the Town Council presided over by His Worship Mayor Henry W. Wedge, with all councillors present.

Mayor Wedge stated at the conclusion of the adjourned meeting that "there were some matters that we had hoped to clear up at this meeting but because some committee reports were still being awaited this was impossible." His Worship stated that a special meeting will be called as soon as the committees are ready with their reports. He said the property committee had met in regard to the above mentioned items and the chairman had prepared a resolution to place before the council, but that it was found necessary to give it further study. In regard to remodeling the old post office, the Mayor said the specifications had been studied by the property committee and that in possibly a week or ten days costs on this proposed rebuilding would be available.

In his report as chairman of the police committee, Councillor MacDougall said it was the decision of the committee, in regard to the parking meters destroyed in the Town Hall fire, that it would be much more economical to replace them with twin parking meters. However, due to lack of parking space in some areas, single meters will be necessary. Councillor MacDougall said it was the committee's decision that 42 double parking meters and several single meters will be necessary and as recommended contacting parking meter companies for tenders on this project.

Councillor Perry, chairman of the street committee, reported that the paving work done in the town last year has held up well, except for a couple of places on Ottawa Street. He said that the storing of 100 tons of good gravel each fall would help immensely in improving conditions of the streets each spring. Councillor Perry suggested that because of the location of the cemetery, something should be done to improve the condition of the MacEwen or Victoria Roads, pointing out that the latter is preferable as it is much shorter. In this matter Coun. Perry was supported by Coun. Clark, who said the condition of Victoria Road "is a disgrace to the town" and added that regardless of what support can be obtained from the Provincial Government "we should have a paved road through to the cemetery within the next year."

Mayor Wedge suggested that the Town Clerk write the Department of Highways regarding this matter. Correspondence included letters from tax payers in Summerside.

Move To Lower Pensionable Age For Blind To 18

OTTAWA (CP) — The government Monday night paved the way for legislation to lower the pensionable age limit for Canada's blind to 18 years from 21 and to increase the permissible income under which they qualify for pensions.

The resolution, to be followed by a bill, was welcomed by the spokesmen for all parties in the Commons, though some said the pensionable age should be 16 years so blind teen-agers could begin collecting pensions when their parents could no longer claim family allowances for them.

Besides lowering the blind pensionable age to 18 the measure boosts by \$120 a year the permissible income in all categories.

This will increase permissible incomes for single persons with out dependents to \$850 a year from \$640; for single persons with dependents to \$1,160 from \$1,040; for married persons where one is blind to \$1,560 from \$1,320 and for married persons where both are blind to \$1,880 from \$1,440.

The changes will increase the federal blind pensionbill by about \$250,000 a year to some \$4,250,000.

Leading figures are expected to be Chou and Nehru whose countries hold more people than the other 27 combined.

Neither spoke at the opening session. But sources said they would meet soon for private talks on the Formosa problem. The question of strategic aid is not on the conference agenda but is certain to be a subject of high-level discussion of the conference floor.

Questions on the five-point agenda are economic co-operation, cultural co-operation, world peace, human rights and self-determination with nuclear weapons and peaceful use of atomic energy scheduled for debate under these general headings.
