## ROAD TO DELHI

Transient tobacco workers are stopped by police on a road leading to Delhi, Ont., as they marched on the town

complaining about food and lodging on a nearby camp. The workers were met by police armed with shotguns and by

Mayor A.M. Saveau of Delhi, who read the Riot Act.

## FACTS FOR FARMERS

## Questions And Answers On New Dairy Policy

By EARLE ADAMS,  
Dairy Superintendent  
P.E.I. Dept. Of Agriculture

Most dairy farmers have understanding of how the federal dairy policy works and how they can participate in it.

However, say Agricultural there appears to be still some confusion in the minds of a few milk producers.

Here are some of the main questions farmers are asking the Stabilization Board.

Question: What do I do to get paid?

Answer: You must be registered with the Agricultural Stabilization Board in Ottawa. Forms are available from the creamery, manufacturing plant, cheese factory, dairy or other outlet to which you ship milk or cream. It is not necessary to register again if you already have an A.S.B. registration number.

Question: Why am I getting less from the plant for my cream this year?

Answer: Last year, cream prices were based on 55-cent butter plus a subsidy of 10.9 cents per pound of butterfat. The subsidy was paid by the plants to the farmer and the plants were reimbursed by the Stabilization Board. This year cream prices are based on 53-cent butter plus a subsidy of 21.43 cents per pound of butterfat. But remember that this year the subsidy is being paid direct to the farmer from the Stabilization Board in Ottawa. These payments will be made to cream shippers every three months. The first cheques will be going out to this group of producers within the next few weeks.

Question: If I ship both milk and cream to the same manufacturing plant do I need two registration certificates?

Answer: No. But you should make sure that both plants have your registration number so they can forward the information on your deliveries to the Stabilization Board for payment on your total production.

Question: I am registered as a fluid milk shipper and I also separate cream for manufacturing. Do I need two numbers?

Answer: No. But you should give your creamery the registration number you received as a fluid shipper. Fluid producers' numbers are prefixed by the letter F.

Question: If some one is helping on the same farm and owns some of the cows and all of the milk is shipped together, can this person be registered for payments too?

Answer: No. Only one registration per farm is permitted.

Question: I have sold my old farm and bought a new one. What should I do about registration? I am now registered under my old address.

Answer: Return your certificate stating you have bought another farm and give your new address. A new certificate will be issued. You should inform your plant of the new address and other particulars as shown on the new certificate.

Question: I am registered as a manufacturing milk shipper but now have a fluid milk quota. Must I get a new registration number?

Answer: Yes. You should re-register with the Stabilization Board and then inform both plants of your new status. The same thing would hold true if you were registered as fluid milk shipper and were now shipping only to a manufacturing plant.

Question: I am getting more than \$3.25 a hundred-weight for my milk at a cheese factory. Does this mean that the 75-cent subsidy will be reduced accordingly?

Answer: No. The Stabilization Board does not know, except in a general way, what you receive for your milk. The 75-cent subsidy will be paid regardless of what you receive for your milk. It is, therefore, in your own interest to negotiate the best possible price for your milk.

Question: If the plant pays me less than \$3.25 per hundred-weight for my milk (testing 3.5

per cent butterfat) will I get more than 75-cents per hundred-weight in subsidy?

Answer: No. Such an arrangement would not work because there would be no incentive for the processor to pay, or the producer to negotiate, a fair price if the Government agreed to pay to each individual the difference between the amount the actually received and \$4.00 per hundredweight.

Question: Does the \$4.00 per hundredweight average support level mean the average for each farmer or the average for all farmers?

Answer: All farmers. See last answer above.

Question: The butterfat test of my milk is 3.8 per cent. How much subsidy should I receive? What if the test was 3.2 per cent?

Answer: The payment for eligible milk testing 3.5 per cent butterfat is 75 cents per hundredweight. This is 21.43 cents per pound of butterfat. For milk testing 3.8, the payment would be 21.43 times 3.8 which work out to about 81 cents. If the milk tested 3.2 the payment would be about 68 cents per hundredweight.

Question: Last year direct supplementary payments were made to manufacturing milk and cream shippers on the basis of the deliveries during the 1964-65 dairy year. Does this mean that another direct supplementary payment will be forthcoming this year based on the 1965-66 dairy year production?

Answer: No. While 1964-65 production records were used in order to make payments as soon as possible, the direct supplementary payments were part of the 1965-66 dairy year support program. These have been replaced in this dairy year by a direct payment to producers of 21.43 cents per pound of butterfat based on current production. The 21.43 cents per pound of butterfat is equivalent to 75 cents per hundredweight of milk testing a standard 3.5 per cent butterfat.

For further information contact Earle Adams at the Provincial Building, Charlottetown or at P.O. Box 2000, Charlottetown, P.E.I.

## Marine Union Is Certified

MONTREAL (CP)—The Canadian Marine Officers' Union, representing some 1,000 licensed engineering officers aboard Canadian ships, has been certified by the Canadian Labor Relations Board as a national and international bargaining agent, a union spokesman said Thursday.

Previously it had held certification only for Quebec province.

The union's original charter was granted by the Seafarers' International Union of North America (AFL-CIO) in 1964 and its constitution was ratified by the membership in January, 1965.

The application for certification was first refused because of a technicality. Six months later, the CLRB granted certification for one of the companies represented by the union and followed this action with certification of six more companies shortly after.

Gilbert Gauthier, president of the CMOU, said his union recently signed a new labor agreement with four major dredging companies. The previous contracts expired last September.

SANTIAGO (Chile, Reuters)—Five Indians have been charged with murder after a young Indian girl and her illegitimate baby daughter were strangled in what police claim was a sacrifice to a pagan god.

## ASKED TO RUSSIA

TORONTO (CP)—Mayor Phil Givens, now on a European trip, has been invited to visit Russia but a reply will not be made until he returns to Canada. The invitation was delivered to Controller William Denison by officials of the Soviet Embassy at Ottawa.
