Isaiah Horne's Famous Remedies.

MR ISAIAH HORNE.

Dear Sir,—My son strained the muscles of his arm some time ago, and suffered violent pain until treated with a rubbing of your magic Discovery, which gave relief at once. Also my other son struck his knee against a log and it pained him so that he could not sleep. He got out of bed and rubbed his foot with the remedy and fell asleep and was all right in the morning. I think it a grand liniment.

Yours truly,
WILLIAM NEIL,
Rustico Road.

Mrs Mary Webster, of Pay Fortune, who for ten years past has been lame with rheumatism, reports to Mr. Horne that she is now cured of her complaint by using his Rheumatism Cure. wv 11 -aug2

SHORT HAND Anyone who can take notes graphic notes rapidly and correctly, and can neatly typewrite their dictation afterwards, is surer of a lucrative position than a College Professor with a knowledge of half the "stories" at his command. Write for circular.

Nervous Prostration

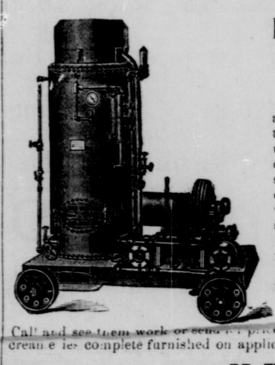
It is now a well established fact in medical science that nervousness is due to impure blood. Therefore the true way to cure nervousness is by purifying and enriching the blood. The great blood purifier is Hood's Sarsaparilla. Read this letter:

"For the last two years I have been a great sufferer with nervous prostration and palpitation of the heart. I was weak in my limbs and had smothered sensations. At last my physician advised me to try Hood's Sarsaparilla which I did, and I am happy to say that I am now strong and well. I am still using Hood's Sarsaparilla and would not be without it. I recommend it to all who are suffering with nervous prostration and palpitation of the heart." MRS. DALTON, 56 Alice St., Toronto, Ontario. Get Hood's, because

Hood's Sarsaparilla Is the Only True Blood Purifier

Prominently in the public eye today. It is not what we say but what Hood's Sarsaparilla does that tells the story.

Hood's Pills act harmoniously with Hood's Sarsaparilla. 25c.



Pronounced First Class by Expert Testimony.

A thing of beauty and a joy to those who are using our new steam hoists in Charlottetown. And we will guarantee that all who will use our new automatic piston valve creamery engine will after years of constant use say the same thing, as they will do their work at less cost of fuel and repairs than any of the lightweight machines imported here. They are strongly made, with solid forged cranks, large bearings, wearing surfaces easily taken up when required, requiring no expensive foundations. Being self-contained, can be moved on any min floor and fastened down. Sold at competition prices. Valves considered, they are cheaper than can be furnished by any in the business. Call and see them work or send for prices before purchasing elsewhere. Estimates for creameries complete furnished on application to

True Lovers

of delicious TEA are satisfied when supplied with our lines of English Breakfast Congou, India, China, Oolong and Ceylon Teas. We believe our 22c. Blend to be the best on the market for quality, strength, flavor and price. The public realize a good article when they use it, and to-day our sales on this Tea are larger than ever before.

We carry a full line of Canned Goods, Jams and Jellies, Fish, Boned and Skinned Dried Codfish, Flour, Meal, etc., which we will sell at the very lowest prices.

Our aim is to buy the most reliable good and sell them at the lowest prices. Eggs taken in exchange for cash or goods. Goods delivered to all parts of the city.

WILLIAM GRANT & CO.,

Charlottetown, June 19, 1895—135 w QUEEN STREET.

ARTIFICIAL BEAUTIFICATION.

More Women, It is Said, Paint Their Faces To-day Than Ever Before.

A very observing writer declares: 'More women paint their faces to-day than ever before. Whoever takes his walks abroad and observes cannot fail to perceive that fact. Not only is the quantity of the self decorator greater, but her quality is higher. Of course there is a tradition that making up is tabooed in society, but it is only a tradition. The fact is a great deal of tinting is done by people of very high standing. If the painting epidemic spreads, as it threatens to do, it will soon become impossible for even the smaller society fry to adhere to the comparatively sober tints that nature has bestowed. They will begin to imitate the shining example set up before them, and there will be none to 'cut' them or make them afraid, for, you may be sure, it would never do for Mrs. Smith-Jones and her friends to bring up a discussion of the mysteries of the toilet."

"After all, why is it more questionable for a woman to 'make up' daintily and judiciously than to select a blue gown because it is more becoming, or to soften her accentuated shoulder blades by a layer of wadding, her curving, scrawny shoulder blades, that would otherwise pierce the sensibilities of her friends? The chief objection that I can see to 'making up' is the suggestion it gives of uncleanliness, but that can be obviated with care. Of course there are a few wise women who 'make up' successfully, but the world need not be in any alarm over the degree to which it will be deceived.

"The trouble with the average woman is that she won't realize how little deception can be practiced in this regard. She starts out by applying a faint, scarcely perceptible bloom and ends up with a vermilion coating that could be scraped off with a towel. Were I a man I could never bring myself to kiss the cheek that borrowed its bloom from a rouge pot, and what eyes could look love to eyes, even to eyes that spoke again, if it were known that what seemed the reflection of those long, thick eyelashes was in reality produced by a painstaking application of the pencil? The question resolves itself into this: 'Is it bad to do it, or to do it badly?' There's the rub."—Chicago Post.

The Same Woman After All.

The new or coming woman will not differ much from the old one, notwithstanding all which has been said or predicted concerning her. She will wail and coo, take soothing syrup when she is cutting teeth and be the same source of misery and happiness to doting parents when she is a baby that she is now. As she grows apace she will go to school, play with the boys, tear her clothes, soil her hands and face, surreptitiously appropriate sweetmeats and play mischief generally, as she does to-day. When she reaches young womanhood, she will dress as fashion dictates, bang her hair, or cut it off, or coil it on top of her head, pile nearly all of her dress on her shoulders, put needle-pointed No. 2 shoes on No. 3 feet, paint and powder to show the world her Creator didn't give her the right complexion, want a new bonnet or two for every season of the year, fall in love, swing on front yard gates, talk sweet nothings to her best fellow, get married, have babies, and in all other respects do about as young ladies do nowadays.

The new woman, as painted, is a myth. Time changes fashions and customs, and education and invention open new fields for the employment of women, enlarge their sphere of action and usefulness, offer them a wider field in which to dispaly their power and worth and to assert their God-given rights that man in his ignorance has withheld from them.

But human nature to-day is the same human nature which moved Adam and Eve to costume themselves in the best goods at hand and to multiply and replenish the earth. The very same loveing, devoted, self-sacrificing women, the same blushing brides, the same kind, doting young mother and the same fond, forgiving old ones will bless the world in the future as they bless it today. The world must be born over again to produce a new woman. The old one is good enough. God bless her. —Butte Inter-Mountain.

Rational Dress in Bicycling.

Ladies who ride cycles appear to be pretty evenly divided on the question whether a short skirt or knickerbocker is the most rational dress for their pastime, but an incident which occurred last night outside a newspaper office points to the suitability of the latter. There is a custom which is general here of carrying at night a paper Venetian lantern within the spokes of the wheel, instead of a regulation lamp. One young woman has found that the plan may be pretty but it is dangerous. She came into contact with the curb, upset the machine, and the candle in the lantern set her skirts alight, and there was a rush on the part of gallant pedestrians to put the flames out, which were happily extinguished before much damage was done, except to the lady's knees. "Had I worn knickerbockers," she said, "I should have come to no harm."—London Telegraph.

A New Liquid Fuel.

A new fuel for steamboats has recently been tested, first, in the merchant marine, and later on, in the Italian and French navies, with great success. The German Navy Department has just ordered experiments with this fuel, which is called masut. It is properly speaking, a derivative of coal tar, which in turn is manufactured from soft or bituminous coal. This liquid fuel is carried in tanks, and is led into the fire boxes through pipes, at the end of which a strong current of air atomizes the fuel and blows it into every corner of the fire-box. A strong flame passes up through the tubes and wall of the boiler, burns almost smokelessly, and develops a considerably higher temperature than coal, generating thereby a larger amount of steam. It is claimed for this fuel that it will increase the steam capacity about 20 per cent. The first experiments on the schoolship Carola were so successful that the Navy Department has ordered the battleship Weissenburg, and the armorclad Siegfried to be supplied with masut fire boxes, and the result of the experiment is looked forward to with great interest.

PECULIAR in combination, proportion and preparation of ingredients, Hood's Sarsaparilla possesses great curative value. You should **TRY IT.**

HOME THOUGHTS.

AUNT ABBIE'S ADVICE.

Never utter a word of slang;
Never shut the door with a bang.

Never say once that you "don't care;"
Never exaggerate; never swear.

Never lose your temper much;
Never a glass of liquor touch.

Never wickedly play the spy;
Never, oh never, tell a lie.

Never your parents disobey;
Never neglect at night to pray.

Remember these maxims
Through all the day,
And you will be happy,
At work or at play.

WELL SATISFIED.

Folks Living Under the Shadow of the Mountain are Pleased.

HAMILTON, Sept. 9.—A very large increase has lately taken place in the sale of the specific remedy for complaints of the liver, and Dodd's Kidney Pills are in great demand. There are no complaints either from druggists or the public. The druggists being so near Toronto, the headquarters for distributing, are never in any danger of running out of the medicine for long, no matter how large the demand may be, and the public has long been thoroughly satisfied as to the valuable qualities of the pills, and the manner in which they invariably effect a cure.

At the meeting of the Association for Advanced Science at Springfield, Mass., Mr. Cortheil predicted that in 1320 the population of London would be 8,344,000 Paris, 3,808,586; New York, 6,337,500; Berlin, 3,422,221; Chicago, 7,797,600; Philadelphia, 1,888,160; and St. Petersburg 1,470,000.

Not that Kind.

Scott's Emulsion does not debilitate the stomach as other couch medicines do; but on the the contrary it improves digestion and strengthens the stomach. Its effects are immediate and pronounced.

The Marquis of Dufferin has sent Pte Havlour a silver medal and the congratulations of himself and Lady Dufferin on the winning of the Queen's prize at Bisley.

LOSS OF FLESH

is weakening. You cannot afford to fall below your healthy weight. If you will take Scott's Emulsion of Cod-liver Oil with Hypophosphites of Lime and Soda when your friends first tell you you are getting thin, you will quickly restore your healthy weight and may thereby prevent serious illness.

Persons have been known to gain a pound a day by taking an ounce a day of Scott's Emulsion. This seems extraordinary; but it is absolutely true.

Don't be persuaded to accept a substitute.

Scott & Bowne, Belleville. 50c. and $1.

Hot Air.

The Cumberland Hot Air Furnace Makes Warm Friends!

Parties contemplating having their Dwellings heated with Hot Air would do well to leave their orders before the rush of fall work.

The CUMBERLAND FURNACE is acknowledged by all competent to judge to be the most powerful and durable Heater in the market, and those who want a Furnace should consider well its special features.

Reference as to its satisfactory workings can be made to the following gentlemen and numerous others:—R. C. Goff, Esq., A. S. Johnson, Esq., F. Jost, Esq., at Miller Bros'. Store.

PRESERVING THE EYESIGHT.

Rules That May be Useful to Those Threatened With Blindness.

A few simple rules carefully obeyed will do much to preserve the eyes in health. Light and color in rooms are important. The walls are best finished in a single tint. Windows should open directly upon the outer air, and light is better when they are close together, not separated by much wall space, not distributed. Light should be abundant, but not dazzling. It should never come in from in front nor should sunlight fall upon work or on the printed page. Never read or sew in the twilight, after an exhausting fever nor before breakfast. Look up frequently when at work and fix the eyes upon some distant object. Break up the stretch of wall by pictures that have a good perspective. These rest the eye, as does looking out of a window.

When at work on minute objects rise occasionally, take a deep inspiration with the mouth closed, stretch the body erect, throw the arms backward and forward, and step to an open window or out into the open air for a moment. Two desks of different height are valuable for a student or writer, one to stand by and the other to sit by. Plenty of open air exercise is essential to good eyesight.

The general tone of the nervous system has much to do with the eyesight. Prolonged or excessive study frequently has pain or poor vision as symptom. The use of tobacco may bring about defective vision and alcohol sometimes destroys it utterly, owing to nerve inflammation that it sets up. City life with shut-in streets and narrow outlook, favors the production of errors in vision. When looking at distant objects the normal eye is at rest. To see near by muscular effort is required. This effort, when constant, changes the shape of the eyeball. After the eighteenth or twentieth year parts of the eye that earlier showed signs of bulging or becoming near-sighted may acquire new strength, and those who escape myopia up to this time are usually free from it after that. The children of near-sighted parents are in special danger. Thy require constant care. It is best to have all children's eyes examined for defects when they are 10 years old.

Near-sight and color-blindness are barriers to the army and navy, to certain fine and mechanic arts and to many industrial pursuits. Their early recognition saves time and money and often prevents the discouragement of defeat. Ounces of prevention are better than tons of cure. There are but few forms of partial or total blindness that were not at one time the reverse of hopeless. In view of this fact the duty of parents and guardians is clearly manifest. Ignorance must be replaced by knowledge and carelessness by enlightened forethought. Precaution in the way of type, light, color, rest and exercise, together with occasional calls upon the oculist, will probably secure fair eyesight for life.—The Outlook.

Catherine's Generals.

The soldiers to whom Catherine was indebted for the glory of the Russian arms included Rumiantsoff, the conqueror of Kagoul; the savag Kamienko, who would lite pieces of flesh out of his men at the maneuvers, and who stripped his prisoners in 30 degrees of cold and dashed cold water over them until they were literally frozen; the Prince of Nassau-Siegen, who was beaten by Gustavus of Sweden at Svenskund; Joseph Ribas, upon whom was written the unusual epitaph that "by his own wits he became a good general, an excellent diplomat, and even an honest man," and, most famous of all, Suvorf, or Suwarow. This celebrated general, who figured inaccurately in Byron's "Don Juan," was never defeated in the field. He was short of stature, being only five feet four inches in height. Suvorf was idolized by his soldiers. He had implicit faith in his star, his conceit was unbounded, and he behaved something like a raving lunatic. He would come out of his tent stark naked and turn somersets in the grass. His other eccentricities were equally amazing. At times apparently humane and averse to the shedding of blood, on other occasions he sanctioned the most awful massacres. It was his deliberate conviction that there were only three great generals in the history of modern warfare—Turenne, Laudon and Suvorf.—The Saturday Review.

Getting Two For One.

It is a fact not generally known that naval officers and crews in Chinese and Japanese waters on the Asiatic station receive their pay in Mexican dollars. "Mexicans" is the term applied to them by the naval officers. The paymaster of a ship makes a draft on a banking establishment and receives "Mexicans" for the amount, which he locks in his safe to make his payments. In the Mediterranean French money is used almost exclusively. In South America it is usually American and English gold.

In Europe some years ago, American gold was looked upon with some disfavor, but English gold was always popular. Now American gold and even paper money passes without difficulty. On the Asiatic station the "Mexicans" are purchased by the paymaster at their bullion value and are paid to the officers and crew at the same rate, usually being $2 for every one due the men. The money usually being expended in those countries, the men want the kind that circulates, and "Mexicans" are the favorite, especially with the Chinese. Officers who do not use their money while on the station generally prefer New York drafts.—Philadelphia Bulletin.

Japanese Memories.

The jinrikisha men are coolies, without education or mental training. Most of them can read and write the names of streets and men and merchants and factories. They know the location and the number of every one of the 138,320 houses in Tokio, and the name of almost every one of the 1,500,000 inhabitants. They are very seldom puzzled to find an address, even though it may be given incorrectly, and if you tell them accurately where you want to go they will take you without the slightest delay or hesitation. The same phenomenal memory appears in other classes of the people, and you have to be careful about telling a Japanese gentleman the same story twice.—Chicago Record.

Christianity vs. Agnosticism.

Just published in Pamphlet form, 48 pp., the course of Sermons recently preached by the Rev. James Simpson, on "Christianity vs. Agnosticism."

These Sermons have been widely read, and an opportunity is now offered of securing the series in complete form.

Price 10c. per copy; $1.20 per dozen copies.

Painless Dentistry!

This is addressed to all those who are suffering from TOOTHACHE, or who may require treatment of any kind at the hands of a Dentist. I make the very best Teeth, guaranteed, for $15 00 a set. If not satisfactory money refunded. Gold and Silver Fillings a specialty.

The following letter from Dr Robertson of Crapaud, as regards the Painless Extraction of Teeth, speaks for itself:—

To J E McDonald, D D S, Summerside, P E I.

Dear Doctor,—I am so well pleased with the work you have done for me that I will take it as a special favor if you will give publicity to this letter. I positively assert that after an experience extending over twenty-two years, under the hands of many dentists, you are the only one who ever extracted a tooth for me **Absolutely Without Pain.** The TEN teeth you removed for me at one sitting did not hurt a particle, as Mr James Dawson of Tryon, who was present at the operation, heard me testify. The man who invented your method should be knighted.

I am yours, gratefully,
H W ROBERTSON, M D.
Crapaud, Jan 12, 1895.
