### Two Pead Guilty To Legal Fishing

ALBERTON — Two Tignish fishermen, Leo Joseph Richard and George LeClair, pleaded guilty before Magistrate W. Chester S. MacDonnell yesterday to charges of poaching while fishing gear in district 7B fishing grounds during a closed season and with using a fishing boat in committing the violation. The case was adjourned to Sept. 12th.

Fishery officer Stanley Dicka said the boat had been seized for evidence under fishery regulations.

Wymann Philip Mulligan, Alberton, was fined \$100.00 and costs for driving without due care and attention and Helen

vey and report. Our committee was asked to make recommendations and pass them on to council for consideration."

Mr. MacNeill maintained that his employees had to correct a traffic violation and he was prepared to accept the fine if they were "right to be caught doing it's and dotting the i's."

Mr. Mannell said, "I don't feel you should accept the report in principle. I believe under your own motion you should have had a meeting of city council on the subject of this problem. I handled it. I worked in 300 communities across Canada and they all want to know what you are doing. This is the first time I was ever told to not work fast."

### MOVE SLOWLY

Mr. Mannell said, "here we like to move slow, here we like to move fast."

Mr. Mannell: "Yes, but you should be able to make a decision."

Mayor Gaudet: "I don't like to see the council make decisions, but we are not going to be made to work under pressure."

Coun. MacNeill said there were now just two things his committee wanted to know and that was whether or not the traffic man said he could have it ready by noon today.

The committee chairman said the first thing they were interested in the proposal for meters in different time zones and asked where they were in the preliminary report filed by Mr. Mannell proposed complete metering of the city.

### PARKING SPACES

Mr. Mannell said he could have 100 parking spaces in the city. Mr. Mannell said this was a matter for Board of Trade action.

The police committee head flatly denied this. "No," he stated. "It is up to City Council as the elected representatives of the people. All we want from you is your report as to where the meters should be placed and how many."

Some oil was poured on the troubled verbal waters by Coun. Loyal Nicholson.

He told Council "it may be that we do not want to cure our traffic problems at the expense of convenience. He said people were arguing that parking spaces were needed, that they were complaining about losing all the parking spaces on Market Square and asked "what are they going to do about giving us these spaces we have heard a-bout?"

His suggested council not implement any part of the report if they "what they are willing to do."

### MATTER FOR BOARD

Mr. Mannell insisted that parking in the downtown area is a Board of Trade responsibility but that parking meters and one-way streets was council business.

He had proposed in his first report that many vacant areas in the center of business blocks in the city be utilized for parking and getting cars off the streets. These extra spaces are owned mostly by the business houses surrounding them and he suggested that the city should together and permit the city to grade the sections to supply needed parking. This matter he said had been a discussed with the Board of Trade officials as well as the business representatives of the merchants.

The action started first and foremost by the business firms after the opening of the special meeting.

Mayor Gaudet told Mr. Mannell that the council was working on his report and that they were viewing the matter first hand, by driving around the city to see how the report would affect traffic.

He said that the key to the problem was the number of one-way streets proposed by the traffic consultant and that the major hold up was the lack of

### British PM Facing New Market Tangle

By GODFREY ANDERSON, LONDON (AP)—Prime Minister Macmillan returned from a hunting vacation Wednesday afternoon to a new tangle threatening further complication of Britain's negotiations to join the European Common Market.

Macmillan and other members of the cabinet were reported dismayed over statements by West German Chancellor Adenauer, which were interpreted here as a misunderstanding of the British attitude towards European political union.

In a West German television interview broadcast Tuesday night, Adenauer quoted Macmillan as telling Parliament Britain's entry into the market would not necessarily mean her accepting political union with its present six members. But Adenauer claimed that Macmillan in a personal letter to him a few days later reversed himself.

The British view is that Adenauer, while a friend in good faith, quoted Macmillan incompletely and misleadingly.

In an unprecedented move the British made public part of Macmillan's letter to the chancellor with an accompanying statement insisting that there was no conflict between the prime minister's letter and what he had told the House of Commons.

### Bicyclist Fined \$5 In Police Court

Pleading guilty to operating a bicycle in a manner dangerous to the public, George Patrick Dunn, Charlottetown, pleaded guilty and was fined \$5 and costs or two days in jail by Magistrate A.J. Haslam in city police court yesterday morning.

The evidence of Sgt. Lloyd Wakelin, disclosed that the accused operated a bicycle with more than one person on the machine.

OTTAWA (CP) — Canada and the United States have a "mutual interest" in solution of problems affecting the North American softwood lumber industry, officials of the two countries agreed in talks Tuesday and Wednesday.

This was reported in a communiqué issued Wednesday afternoon following conclusion of the talks which were initiated by the U.S. government.

They grew out of complaints by U.S. lumber producers that Canadian suppliers are making increasingly large inroads in the American market.

There was no mention in the communiqué of quotas on Canadian lumber exports. U.S. producers have suggested that Canada should voluntarily institute restraints to bring her share of the American softwood market to a level acceptable to the machine. The producer being a 13-year-old youth. In handling down a sentence the magistrate pointed out to the accused that this type of thing constituted a dangerous habit, not only to those on the machine but also to pedestrians and motorists.

Pleading guilty to being drunk and incapable, an accused was sentenced to 30 days in Queens County jail.
