Isaiah Horne'S Famous Remedies.

MR ISAIAH HORNE.

Dear Sir,—My son strained the muscles of his arm some time ago, and suffered violent pain until treated with a rubbing of your magic Discovery, which gave relief at once. Also my other son struck his knee against a log and it pained him so that he could not sleep. He got out of bed and rubbed his foot with the remedy and fell asleep and was all right in the morning. I think it a grand liniment.

Yours truly,
WILLIAM NEIL,
Rustico Road.

Mrs Mary Webster, of Bay Fortune, who for ten years past has been lame with rheumatism, reports to Mr. Horne that she is now cured of her complaint by using his Rheumatism Cure. wy 11 -aug2

Weak, Tired, Nervous

Women, who seem to be all worn out, will find in purified blood, made rich and healthy by Hood's Sarsaparilla, permanent relief and strength. The following is from a well known nurse:

"I have suffered for years with female complaints and kidney troubles and I have had a great deal of medical advice during that time, but have received little or no benefit. A friend advised me to take Hood's Sarsaparilla and I began to use it, together with Hood's Pills. I have realized more benefit from these medicines than from anything else I have ever taken. From my personal experience I believe Hood's Sarsaparilla to be a most complete blood purifier." MRS. C. CROMPTON, 71 Cumberland St., Toronto, Ontario.

JOHN NEWSON.

Charlottetown, July 20, 1895.

MONEY IN COKE REFUSE.

Forty Gallons of Crude Naphtha From One Beehive Oven.

A new process has been discovered after a year's hard work and experimenting at the Larimer Coke Works in Westmoreland County, says the Connellsville Courier, by Foreman W. S. Cook, assisted by Engineer D. Harrity, to turn the by-product of the coal used in making coke into valuable material, instead of, as before, letting it go up in smoke, as it has been and is now doing, and will thus save millions of dollars' worth of oil, gases, ammonia, tar and other useful articles which are manufactured from coal. It will at the same time not affect the quality or quantity of the coke produced in the same oven.

The process is a very cheap and simple one, the secret of which is carefully guarded, but it is a success from the fact that they have already obtained in 12 hours from one beehive oven, holding about five tons of coke, some 40 gallons of crude naphtha, which is a thick, black, opaque, viscous liquid, from which a various number of the constituents can be distilled. With the same machine they extract an ammoniac liquor capable of producing a large amount of ammoniac salts, which are now being used for fertilizing purposes. A large flow of gas is also collected by the same process, and from this one oven, when conducted away from the machinery and ignited, sends up a flame four or five feet high, and appears to be nearly as good as natural gas.

The collecting pipes are simply attached to the outlet of a common beehive oven, and the smoke is conducted into a condensing apparatus, consisting of a number of upright pipes, down which a stream of cold water is continually flowing, and at the bottom of the same is a receiving tank.

They claim that the machinery used by this process would not cost over $50 an oven, which is very small, when compared to the cost of that used in foreign countries. Taking the average amount of coal tar alone which can be extracted from one ton of coal, which is eight gallons, at five cents per gallon, it can be estimated what an enormous amount of money is being lost every day. Taking the 365 ovens at Larimer, each burning five tons a day, gives 1,825 tons of coal burned in one day. From each ton eight gallons being extracted, would give the large amount of 14,600 gallons per day, and, at 5 cents per gallon, would amount to $730 per day, which is now an entire loss.

FUEL FOR THE GAS ENGINE.

A Small Apparatus Which Makes a Good Gas on the Spot.

Treating of gas engines, as at present employed in England, Mr. Donkin has stated before the English Institution of Gas Engineers that such engines are usually made there in sizes ranging from one-quarter to 600 I. H. P., and there is a marked increase constantly in the sizes and numbers sold The use of ordinary lighting gas is customary in sizes up to 10 H. P., but for larger sizes a small convenient apparatus has been devised for the production of a gas that cannot be used for illuminating purposes, but which gives very economical results when burned in an engine cyclinder. For this article termed a generator gas, the best fuels employed in its production are found to be anthracite coal and gas coke, as they yield no tar. The thermal efficiency is low, it having about 160 heats unit per cubic foot, as compared with 615 to 630 of London lighting gas, and consequently about four times the quantity is required to produce the same amount of power. The great quantity obtained, however, together with the small amount of depreciation and labor involved in productic render it in many cases comparable cost to gas at 20 cents per 1,000 fe . The disadvantage is acknowledged that gas engines cannot be started under full load, requiring the use of friction clutches in most instances having put one impulse to each four movements of the piston, necessitating greater weight per H. P. than with steam; on the other hand, the gas engine can be started instantly, and there is no danger from fire when it is shut down.

A Plea for Opium.

The opium commission appointed many months ago by the British Government was charged with the investigation of three questions—whether opium, when taken in moderation, is injurious; whether Indian opinion is opposed to its use, and whether prohibition is a practicable policy. The commission has published its report, and declares that, by a vote of eight to one, it answers all three questions in the negative. The commission finds that an immense number of doctors in India believe opium to be less injurious than alcohol. Witnesses drawn from every grade and class testified that it is an excellent remedy against malarial fever; and that its effect on the constitution is practically nil. Among the natives the opium habit is almost universal, among all classes. The commission, therefore, though they believe some improvement could be made in the restrictive laws, they refuse to suggest any, and advise, substantially, that the present system be undisturbed.

How to Walk.

A Delsarte teacher, who is peculiar in knowing somethnig of Delsarte's system of expression, says that women can improve their walk without a teacher, though they can't learn without walking from print. The proper length of the step is twice the length of one foot, and it is measured from the hollow of one foot to the hollow of the other. Now, take a piece of tape and sew on it bits of flannel at intervals twice the length of one of your feet, stretch it across the longest room you have at your disposal and you are ready for practice. Maybe you don't know that each foot should cross the same line with each successive step? It should—that is very important, so now you must walk your tape and set one foot and then the other right over one of those bits of flannel, letting the flannel come just under the instep. Do this and turn your toes out well, and swing your legs from the thigh, and you are far on the road to a beautiful walk.

THE BEST is what the People buy the most of. That's Why Hood's Sarsaparilla has the largest sale OF ALL MEDICINES.

BARBADOES SUGAR.

The Schooner "NEVA," from the West Indies direct, will be due in a few days with a full cargo of Barbadoes Sugar in Hogsheads and Barrels.

N. RATTENBURY.

aug12—1351

A Miracle in a Prosate Age.

Hitherto a decent wine has been confined to the rich. Middle class people never dreamt of paying the prices asked and did without. Now, by direct and large importations, the Bordeaux Claret Co. are able to offer an excellent wine at $3 and $4 per dozen quarts, which certainly looks like a miracle, for this is just at out half the price dealers have been in the habit of asking for poor wines. A good wine which makes blood, which builds up the system, and which has medicinal properties, can now be had by everybody without any appreciable tax on the pocket. The Bordeaux Claret Co. bottle also it 150 dozen in the day, and yet this does not overtake the orders which keep pouring in from all parts of the country. Genuine, old wines direct from from the classic soil at a nominal price. Address—Bordeaux Claret Co., 30 Hospital Street, Montreal. 1 3 5 wy

IT'S ALL NONSENSE

For people to say there is no cure for consumption. Sufferers from that dread disease and kindred ailments are being saved every day by Miller's Emulsion of Cod Liver Oil. Do not die without giving it a fair trial. If it will cure others it will cure you. The secret of its success lies in the fact that it creates new blood in the system, thus enabling sufferers from lung troubles to overcome the destructive forces at work to waste the tissues of the body. Miller's Emulsion is the great nerve strengthener and blood maker, and cures Coughs, Colds, Bronchitis, Scorfula and all Lung affections. In Big Bottles, 50c and $1, at all Drug Stores.

A POINTER FOR TOURISTS.

Summer visitors to Canada in search of renewed health and vigor will find what their need in that great Canadian remedy, Hawker's nerve and stomach tonic. It is a powerful blood and flesh builder, and a nerve and brain invigorator. It restores perfect digestion, induces healthful slumber, and renews both bodily and mental vigor. For dyspeptics, sufferers from nervous prostration or general debility it is the sure medium of health and happiness. Thousands testify to its wonderful renewing and invigorating power. It is sold by all druggists and dealers, and is manufactured only by the Hawker Medieine Co., St. John, N. B., and New York city. Price 50 cents per bottle, or six bottles for $2. al4 d w

Remedy for the Horn Fly.

O H WADMAN, of Crapaud, writes: "After trying many experiments this summer on my own cow, I have at last discovered a cheap and substantial remedy. Cod oil, petroleum, coal oil, etc, should not be used, as they are injurious to the cattle, and I am persuaded that farmers who have used those remedies will, after examination, find a great many sores." He will supply the remedy for 40 cts per gallon which will be sufficient quantity for twenty cows. One application will last for ten or twelve days. Will mail receipt free by enclosing three-cent stamp for reply.

Crapaud, August 17, 1895—dy & wy

WHITE LIES OF SOCIETY.

Worn and Meaningless Phrases Can be so Vitalized as to Have Charm.

Indulgence in social fibs grows apace into a habit. The conscience of the average person acquits these little subterfuges of immorality, but the use of them renders social intercourse even more insincere than it need be. Let a woman pause to think and she will be astonished when she takes to noting how many of these little fiblets she resorts to and without which she would do very well, says the New York Commercial Advertiser. There is that phrase, "charmed, I'm sure"—could anything be more foolish? Why miss the chance to make a hit by substituting for this idiocy an apparently sincere and grave "It will give me much pleasure." The phrase has at least the air of meaning something and of being originated for the occasion. Then there is "Quite well, I thank you," gabbled off in unheeding responses to an unheeded question. Try saying it as though it meant "Thank you for caring."

Sometimes the unexpected vitalizing of a worn and meaningless phrase on the lips of the one just introduced is what arrests the attention and gives an expression of individuality and sincerity before three sentences have been spoken. Often a serious and sincere reply to a gabbled catch remark will at once set the talk running along lines of interest. Try it! When he says to you, "Pleasant weather we are having," perhaps when its raining, in proof that he wasn't thinking a bit of what he said, you can return gravely, "I like the rain, too," this with an air of unfaltering and quite unaffected sincerity. And, behold! the topic of the weather, so threadbare, will be an interesting one inasmuch as it starts you to some sort of argument and exchange of opinions, instead of empty phrases.

The not-at-home fib is one that is difficult to avoid at times. It is often the gentlest way of denying one's audience, for the disappointed visitor is left the option of believing circumstances and not your unwillingness prevents an interview; but many times a candid excuse sent to a friend would meet the case much better. Let the maid say, "Mrs. S.—— is so sorry, but she is too ill to see any one to-day, and hopes you will call again soon," or something like that.

"I beg your pardon," is another phrase too really pretty to be spoiled by careless use. Don't fire it off on every occasion, and when you are really sorry about something say so. "I beg your pardon," said with moving sincerity, is absolutely startling, just because of its hackneyed use. She is a wise girl who takes to studying phrases and sets herself to give new life to them in her usage. She will find her social career advanced wonderfully without extraordinary wit or beauty to help.

All for Neptune.

The amount of provisions an ocean steamer requires is appalling. Fifteen hundred passengers in a six days' voyage will eat:

Sixteen thousand eggs.
Fifteen hundred pounds fresh beef.
One thousand of canned beef.
Seven hundred of mutton.
One thousand of lamb.
Five hundred of pork.
Three thousand of fresh fish.
Five hundred chickens.
One hundred and fifty ducks.
Seventy-five geese.
One hundred turkeys.
Three hundred brace of grouse.
Twenty tons of potatoes.
Fifty hampers of vegetables.
Five hundred quarts of ice-cream.
Two thousand quarts of wine.
Ten thousand lemons.
One thousand one hundred bottles of champagne.
Nine hundred and fifty claret.
Seven thousand ale.
Three thousand porter.
Five thousand mineral water.
Seven hundred of various spirits.

As to breakage, nervous housekeepers should look at this list for one voyage and count themselves lucky:

Nine hundred plates.
Two hundred and eighty cups.
Four hundred and thirty-eight saucers.
One thousand, two hundred and thirteen tumblers.
Two hundred wine glasses.
Twenty-seven decanters.
Sixty-three water bottles.

Bluebottles as Bacillus-Bearers.

That flies carry about infection from place to place, and from person to person, has long been an article of popular belief. Their influence in the spread of ophthalmia has attracted the attention of all who have written upon the social history of Eastern countries. As everyone knows, there is some sort of fatuous religious scruple that forbids the Egyptian or Asiatic from brushing away the flies that settle on and about his inflamed eyelids. Hence it has been generally assumed that the flies carried about the specific poison of ophthalmia, and that theory has of late years received scientific endorsement by the wonderful discoveries of bacteriology. At the Royal Society last month some interesting experiments were shown by Mr. T. W. Burgess, illustrating the capability of the common house fly for transmitting infection. His plan was to expose a fly to a momentary contact with a culture of bacillus prodigiosus and then allow it to escape into a large room. At various subsequent periods the fly was recaptured and made to walk over the sterilised surface of a cut potato. These infected slices were then placed in the incubator, and after a time showed flourishing cultivation of the original bacillus. These results, it is worthy of special note, were obtained even when the fly had spent several hours in active movement about the room between the time of its original infection and recapture. Mr. Burgess has certainly furnished us with some highly suggestive and interesting scientific data. It is to be hoped that he will extend his researches with pathogenic bacteria, so as to find out as far as may be whether the bluebottle may not be the unsuspected bearer to and fro over the face of the earth of many a baleful bacillus.—Medical Press and Circular.

When Adam Married.

Two children are "making up" conundrums at a party. One asks:

"At what time was Adam married?"

"Give it up."

"Oh, on his wedding Eve."—Philadelphia Lutheran.

Painless Dentistry!

This is addressed to all those who are suffering from TOOTHACHE, or who may require treatment of any kind at the hands of a Dentist. I make the very best Teeth, guaranteed, for $15 00 a set. If not satisfactory money refunded. Gold and Silver Fillings a specialty.

The following letter from Dr Robertson of Crapaud, as regards the Painless Extraction of Teeth, speaks for itself:—

To J E McDonald, D D S, Summerside, P E I.

Dear Doctor,—I am so well pleased with the work you have done for me that I will take it as a special favor if you will give publicity to this letter. I positively assert that after an experience extending over twenty-two years, under the hands of many dentists, you are the only one who ever extracted a tooth for me Absolutely Without Pain. The TEN teeth you removed for me at one sitting did not hurt a particle, as Mr James Dawson of Tryon, who was present at the operation, heard me testify. The man who invented your method should be knighted.

I am yours, gratefully,
H W ROBERTSON, M D.
Crapaud, Jan 10, 1895.

J. E. McDONALD, D. D. S.
