THE PARK ROADWAY.

It will be conceded by all that the right thing has been done in the submission of the matter in dispute between His Honor the Lieutenant Governor and the City authorities to the Bench of Judges. Charlotteville wants only that which belongs to her; His Honor is anxious only concerning the rights of the Province and the grounds of Government House; and the Judges may be relied upon to decide justly and according to the law.

By an act of the Provincial Legislature passed in the year 1876 and assented to by the Governor-General, one hundred feet of land set forth in a plan made by the late John Ball and duly registered, was vested in the City of Charlottetown for the purpose of a roadway to Victoria Park. Is that act in force, or may certain things done and left undone have rendered it void? If in force, the City Councilors claim the land; if not in force they have no right to any portion of it. The act was not published in the statute book of 1876 though it was published in the Royal Gazette. Is it void by reason of that omission? Again in 1887 an act respecting the Park Roadway was passed, apparently in ignorance of the Act of 1876; but the terms of that act were not fulfilled and it has therefore lapsed. Has the act of 1876 been nullified by reason of the passage of the Act of 1887? These are, in brief, the questions to be decided by the judges, and until the judges have published their decision we shall not presume to offer an opinion concerning the points at issue, though it may be stated that the Attorney-General has declared the act of 1876 to be in force.

But we may be permitted to say that the citizens at large are exceedingly anxious that the Park roadway shall be obtained and opened forthwith. We are now, as it were, compelled to go a long way round to enter the Park by a back door; let us have the use of a front door and a direct way to it—if we are entitled to the boon. This will be not only best for the city, but also, in the long run, best for the Province and for Government House Farm, because the city authorities will be compelled and are ready and willing to build a breakwater to save the land which is every year being washed away.

WANTED—A SUMMER HOTEL!

This is the cry of the tourist in Prince Edward Island. It is not stated that the hotels here are not good. On the contrary, we have repeatedly heard the leading hotels highly spoken of, and in respect to the bills of fare favorably compared with the best hotels of Halifax and other cities. But there is, undoubtedly, a want of sufficient hotel accommodation in the tourist season and a want of some of the appliances and luxuries found in the first-class hotels in which wealthy tourists are accustomed to put up. It is argued, too, that if a first-class hotel were erected upon a convenient site at the water side, or in close proximity to Charlottetown, the volume of tourist travel would be greatly enlarged. We learn that passengers by the Boston and other steamers were recently, as in former years, compelled to sleep and eat on board while in Charlottetown, because they could not obtain rooms at the hotels or were dissatisfied with the accommodation afforded. These people will, of course, relate their experience to everyone they meet, and the result is a diminution of tourist travel, where they would stay here, and spend their money, and enjoy the invigorating air and the beauties of the place, and bring their friends with them next year, if only sufficient and satisfactory hotel accommodation were provided. A summer hotel in Charlottetown ought, certainly, to be convenient to boats and bathing houses, so that its guests may easily have the use of our beautiful harbor as well of our town and country. We hope to see a new and successful movement made this year towards the erection, establishment and management of an additional first-class hotel in Charlottetown.

A beetle which feeds on the larvae of the potato bug has been discovered in Japan by Prof. Koebel, of the California Horticultural Commission, who recently discovered the Australian lady-bird, which is fast clearing California orchards of scale pests. He has not communicated any details concerning the new discovery, but says he believes the beetle will exterminate the potato bug, which has cost American farmers so many millions of dollars.

Montreal Gazette: The customs taxation on the people of Canada in the fiscal year ending June 30th, 1895, was lighter than for many a year past. In all about \$17,500,000 in duties was paid into the Treasury, being at the rate of \$3.44 per head of population. A comparison of the customs taxation per capita in past years will show how low the figure in 1895 was: 1872.....\$4.61 1889.....\$5.02 1875.....3.95 1892.....4.20 1878.....3.13 1894.....3.49 1883.....5.22 1895.....3.44

In five years the customs taxation has been reduced by no less than \$1.58 per head of population. —St. John Sun: The Montreal and Toronto grit press accounts for the election of Mr. Powell by "the railway vote." Mr. Powell got his largest majorities in parishes which had no railway vote. The Telegraph says that "it is a French majority" but several purely French districts gave majorities for Mr. Killam, and though Mr. Powell probably got a majority of the French vote his English majority was far larger. Mr. Powell got a majority of the railway vote, a majority of the agricultural vote, a majority of the artisan vote, and a majority of the vote of the commercial and professional classes. He obtained a majority of the English vote, the French vote, and the Irish and Scotch vote. He had a majority of the Protestants and a majority of the Roman Catholics.

GENERAL TELEGRAPHIC NEWS.

Quebec, Aug. 27.—A despatch from Grand River, Gaspe, states that at a public meeting there on Saturday Mr. Laurier spoke for some time on the Manitoba school question, telling the people that as a French Canadian and a Catholic, he could not but render full justice to the Catholics of Manitoba, and should certainly see, if he came to power, that they were given equal rights with those given by the Catholics of Quebec to the Protestant minority. He said there should be a more careful inquiry into the whole matter before it was settled, and assured his hearers that it would never be satisfactory to proceed until a Liberal government was in power, and that the Conservatives would never settle it. L'Electeur, speaking of Mr. Laurier's oratorical successes in Bonaventure, remarks how proud Mr. Mercier would be could he rise from the tomb and see the welcome accorded by his old county of Bonaventure that he loved so well, to the near and dear friend of his lifetime, and especially of his last hours.

Acosta, Me., Aug. 25.—Labor Commissioner Matthews has been engaged in collecting information and statistics regarding the manufacture of butter and cheese in the factories and creameries of the state. The number of creameries in the state make butter exclusively is twenty-four, one not having commenced business until 1895. Besides, there are two factories which manufacture both butter and cheese. The creameries where attention is directed to butter alone represent a capital invested in plant and equipment of about \$50,000.

Montreal, Aug. 28.—Action Burrows, an old newspaper man from Winnipeg, says the great crop of 1887 is not to be compared with the present season. The profits of Manitoba are expected to net \$25,000,000 of which is work for not less than 25,000 farmers.

Baltimore, Aug. 28.—Rev. Gilbert T. Holcombe, who has travelled extensively in China, in the interest of the American Board of Missions and the American Bible Society, protests against the "Chinese side of the recent disorder," as given in Chicago despatches, quoting a prominent Chinese merchant. "Mr. Holcombe said: 'It is perfectly ridiculous to think that our missionaries are unfamiliar with the Chinese language, and, as reported, at the mercy of disreputable natives, who use the missionaries as tools for their own disreputable practices. As a matter of fact our missionaries in China are known the world over for their linguistic abilities. Every interpreter in the United States legation in China has been, until Minister Denby's administration, a missionary. The greatest authorities we have on Chinese and Chinese affairs are our missionaries, and with China have been drawn up by American missionaries.'

Winnipeg, Aug. 28.—Mr. James Chambers, of Ingersoll, one of the prominent horse judges at the recent Winnipeg Industrial Exhibition, returned yesterday from a visit to his three sons, who are on farms near Wawanawa. Speaking to a reporter about the crops, Mr. Chambers said that wherever he had been they were simply magnificent and the best he had ever seen. He did not believe the various estimates given out of from 25 to 29 bushels per acre would nearly cover the crops he had seen, and thought 40 would be nearer the mark. Mr. Chambers did not believe any damage had been done by frost, and it is safe from any such danger now, as the cutting is practically over at Wawanawa.

Boston, Aug. 28.—Business and pleasure have been combined today to take up the question of Knight Templarism. Everywhere receptions are being held and the Sir Knight who more venturesome enough to attend them all would find himself heavily laden with revenue. The grand encampment are all busy to-night preparing for to-morrow's election of officers and private meetings for consultation are frequent. The weather all day has been clear. It is warm, but it has been a fine day nevertheless, and has been especially enjoyed by those who have participated in the many excursions of the day. The streets are still thronged with people. It has become the proper thing for the commandery that happens to have a fine band to visit the various headquarters and serenade its fellow Sir Knights, and all day long and all the evening music has filled the air. Ranges from opera selections to "Two Little Girls in Blue, and On the Bowery."

London, August 28.—A despatch from Constantinople to the Pall Mall Gazette confirms the statement previously cabled that the Porte has complained to France and Russia of England's attitude in regard to Armenia. The Gazette's despatch adds that the despatch sent by the Sultan to French and Russian diplomats bitterly complains that Great Britain's discourteous and unbecoming attitude is derogatory to the prestige of the Sultan. He therefore appeals to Russia and France to use their good offices to induce Great Britain to modify her attitude.

Lexington, Ky., August 28.—A peculiar triple wedding occurred in Pike county on Friday. The contracting parties were Levi Thornberry, eighty-one years of age, and Mrs. Linda Fiddlock, a widow, eighty years of age, this being the sixth marriage of each, the Rev. Samuel Ray, sixty-seven years of age, to Miss Martha Love, aged sixty years, and Trimble Leslie, twenty years of age, to Miss Emma Weddington, fourteen years of age.

Winnipeg, Man., Aug. 27.—Premier Bowell, Hon. Mr. Daly's Commissioner, Hercher and Reed, Dr. Dawson and Editor Willison, of the Toronto Globe, arrived at Edmonton last night. To-day the party visited the Indian reserve about Edmonton, and tonight the Premier was tendered a public reception, the address being presented by the town Council of Edmonton and the board of trade.

Boston, Aug. 27.—Seven hundred and fifty thousand people saw the parade of over 25,000 Sir Knights Templar to-day, and one record pronounced it the greatest pageant ever seen in Boston. People were everywhere in the streets, on the sidewalks, on the roofs of buildings and street cars, clinging to tops of telegraph poles and lining the vigilance of the police and line-men were at a moment, in wagon and drays filled with seats on the side streets, and hundreds of grand stands large and small along the route. Never in the history of ancient Boston has a greater host of strangers crowded within the city's gates, and for many years a spectacle of to-day will be the precedent with which great gatherings in New England will be compared. It was a good, natural crowd, and, considering its size, was well handled.

Paris, Aug. 28.—The Echo de Paris (newspaper) to-day announces that the Duke of Orleans, head of the royalist party in France, and claimant to the throne, has become convinced of the futility of further fighting the republic. Therefore, he had decided to abandon the Royalist propaganda in France, cease payment of subsidies to royalist newspapers, and abandon the office in Paris occupied by the royalist committee.

NOTES AND COMMENTS.

The Toronto Globe is discouraging upon "Party and Pessimism." It is a past-master in respect to both subjects. —It is stated that the C. P. R. are about to raise the wages of the officials from 10 to 20 per cent as a result of the revival of good times and plenty to do.

NEWS NOTES. It is stated that the rye crop of Europe is short by over 150,000,000 bushels. Harvesting continues under favorable conditions in Manitoba, and some phenomenal yields are reported.

It is hinted from Winnipeg that Premier Bowell and Premier Greenway may meet and make some settlement of the school problem.

It has been proposed that a monument shall be erected in St. Louis Square, Quebec, in honor of the late Premier Mercier. How the gris delight in the memory of that good man.

Weak cables and heavy Russian receipts of wheat, with the prospects of an increase of 1,000,000 bushels in the world's visible supply of wheat have depressed the market in Chicago. A New York newspaper cites the recent collapse of a great building in that city as an argument against Herbert Spencer's theory of independent self-interest in regulating all things. Mr. Spencer holds that the interference of legislators in such things as the construction of buildings is never beneficial, as the persons interested will naturally provide against accidents. As the collapsed building was constructed under official supervision the result is rather in favor of Mr. Spencer's position. Believers in Governmental regulation will unconsciously assume the omniscience of legislators and omnipotence of officials.
