

**Postpone Army Camp Opening**

OTTAWA (CP) — The official opening of Camp Gagetown, N.B., scheduled for July 1, has been postponed, army headquarters said Friday.

Date of the opening or who will officially open the camp is not yet known.

However, the annual Dominion Day parade of the 1st Canadian Infantry Division will be held at Gagetown July 1 as scheduled.

Great majority of Turkey's 23,000,000 population are of the Moslem faith.

**I'm A Retired Politician, Howe Informs Reporters**

By DAVE MCINTOSH  
Canadian Press Staff Writer  
OTTAWA (CP) — Bushy-haired, lantern-jawed Clarence Howe, Liberal government "minister of everything," Thursday announced his retirement from the political wars.

The commander of key ministries in the Liberal administration for 22 years told reporters before entering an all-day cabinet meeting: "I'm a retired politician."

Thus in four words he summed up his defeat by CCF candidate Douglas Fisher in Port Arthur in Monday's general election and his decision to have done with Parliament.

Parliament may not see his like again for a long time. At 71, he is as hard-driving as he was when he came out of New England as a youth to amass a fortune in Canada before he was 40.

The broad-shouldered boss of the trade and commerce and defence production departments became a legend in his own time.

**CHARMING AND POLITE**

Outside of the Commons he can be—and usually is—charming and polite, except when some recalcitrant industrialist who, he thought, might be holding back Canadian economic progress by blunder or faint heart.

In the Commons, when aroused by some attack on his actions or policies, he could be a terror to his political foes.

Clutching the front-row desks on either side of him, his jaw thrust into the centre aisle of the Commons, Mr. Howe sometimes assembled a many-gunned spewing fury in all directions.

If his opponents did not quail before him, they often had a grudging admiration for his stout defence of his actions. They sometimes called him a "dictator" and were called in return "twirps" or small, carping men who had had

**United Church Needs Ministers**

SACKVILLE, N.B. (CP) — Dr. Ernest E. Long of Toronto, secretary of the general council of the United Church of Canada, said Thursday while the church needs 200 additional ministers, the overall picture is "wholesome and encouraging."

He told the church's Maritime conference that 659 students are preparing for the ministry, compared with 368 students 10 years ago.

Talks concerning union with the Anglican Church in Canada were continuing "slowly but satisfactorily," he said. "If they should ever be broken off it will not be by the United Church."

Meanwhile the conference took

**Infantry Adopt Advanced Atomic War Methods**

CAMP GAGETOWN, N.B. (CP) — The Canadian Army is as far, if not farther, advanced than any other army in infantry methods under nuclear warfare conditions, Maj. Gen. J. M. Rockingham, officer commanding the 1st Canadian Infantry Division, said at a press conference here Wednesday.

Rather than becoming outmoded, the role of the foot soldier in the atomic age has become more important, he said.

"As an old infantry man myself, I think the foot soldier is more important than ever because he has built-in mobility. The only

**Stand against all forms of gambling and nuclear weapons testing.**

One resolution asked all United Church members to refrain from gambling. Another asked Canadian representatives at the United Nations to change the minds of world leaders who support nuclear tests.

The conference also asked for decreased use of alcohol, and plans were made to co-operate with the temperance leagues of the Roman Catholic diocese of Bathurst, Edmundston and Moncton.

**Way of hiding troops from air reconnaissance is to put them on foot.**

In our look into the future, we think the importance of the infantry is increased rather than diminished by the advent of nuclear weapons."

Gen. Rockingham said he had been "doing practically nothing else the last two years than trying to figure out how to fight this atomic war." The chief purpose of manoeuvres here this summer would be to test the practical value, with live ammunition and under simulated battle conditions, of what had been discovered so far.

"Use of live ammunition and several new types of weapons is to give troops confidence in what these weapons can do and enable them to distinguish the sound of their own weapons from those of the enemy," he said. Training will

**be carried out by about 12,000 soldiers until Aug. 3.**

"It is the first time we have been able to do this live ammunition thing on this side of the country because, previously, we did not have the area needed."

On June 29 a "divisional sports day" will be held in Fredericton. Winners will compete in a Canada-wide army meet at Camp Borden, Ont., later in the year.

"We are hoping, by running sports on a country-wide basis, that we may get some athletes for the next Olympic games. It is our own idea entirely but, certainly, we will co-operate with any organizations or groups which are trying to promote the same thing."

Herbert Sutcliffe, famed Yorkshire cricketer, scored more than 1,000 runs in each of 21 playing seasons.

**Beat Industrial Air Pollution**

By FORBES RHUDE  
Canadian Press Business Editor  
BANFF, Alta. (CP) — A scientific battle against air pollution has apparently been won at the nylon plant at Maitland, Ont., of Du Pont Company of Canada.

A technical 28-page paper on the matter—a sort of textbook in itself for those faced with similar situations—was read at the current annual meeting of the Engineering Institute of Canada by H. R. L. Streight of Du Pont's engineering department.

The battle began when the plant was in the design stage with the result that by the time operations began, the amount of contaminating matter sent into the air was, in the words of Mr. Streight, "low and safe."

The experience gained has convinced us that air pollution from a complex organic chemical plant can be controlled.

"Success of control is indicated by the establishment of a recreational area on the St. Lawrence River by the employees, on a site which is both downwind and downstream from the plant."

**NEEDED MUCH RESEARCH**

Indicating the extent of research required, the normal degree of air pollution around Maitland was determined and compared—for purposes of arriving at a basis—with rural areas at McGregor, 15 miles south of Windsor, Ont., and a location 30 miles from Leicester, England.

Gardens were planted to assess effects of potential pollution on vegetation, and Mr. Streight commented: "The effect of pollutants on animals and insects is much less than on plants. For instance, air contaminants which damaged

alfalfa by 25 per cent did not affect the cattle consuming it."

He summarized the results of the prolonged and intricate study as follows:

"Air pollution was reduced by designing the boiler-house stacks for adequate dispersion of flue gases and by developing and installing an absorption system for almost complete removal of oxides of nitrogen in efficient gases."

His paper, describing how this result was arrived at, was packed with chemical formulas, equations and graphs and was typical of some two-score presentations which are being made at the institute's three-day annual meeting, Wednesday to Friday.

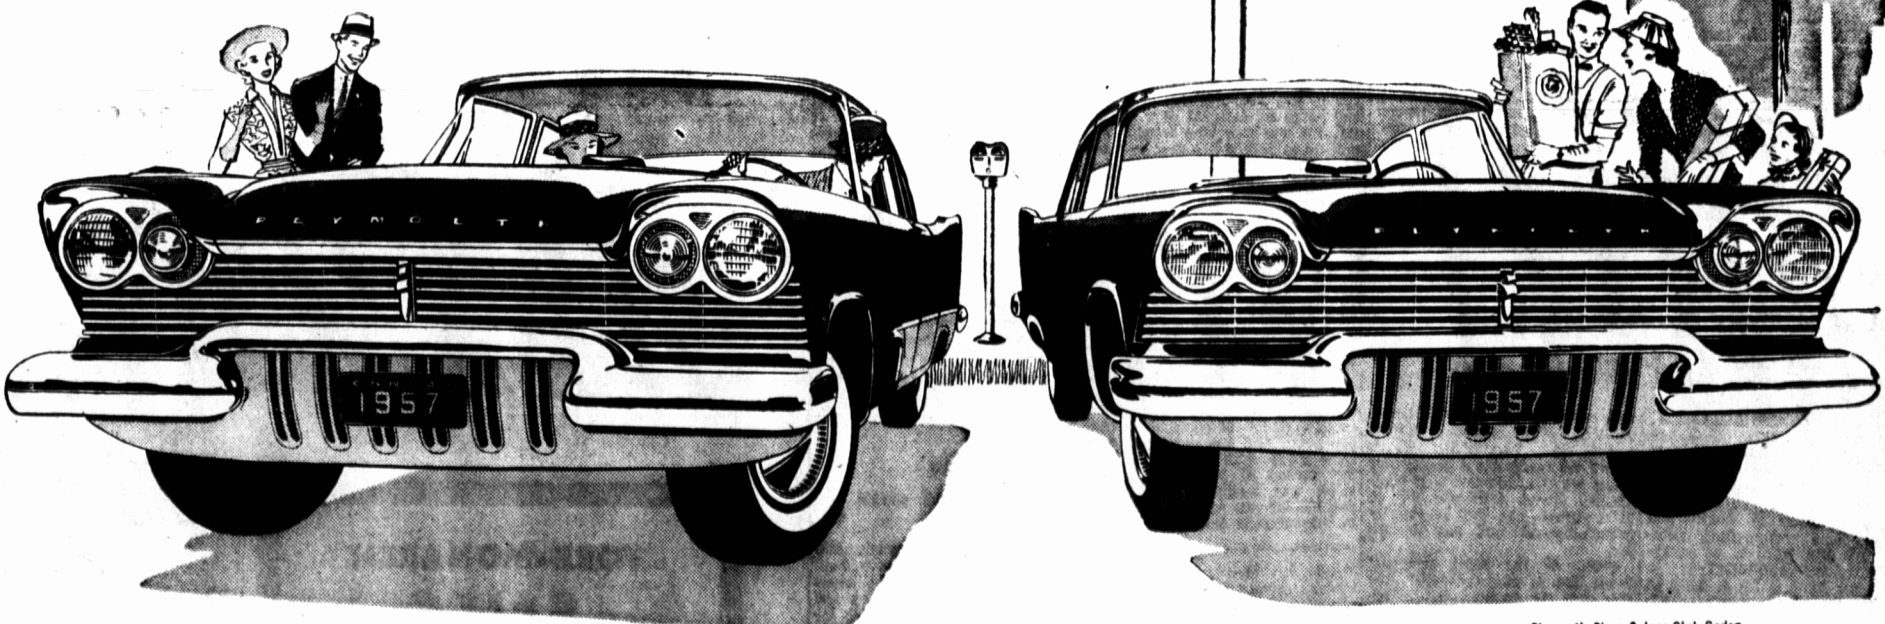

**United Church Conference**

SACKVILLE, N.B. (CP) — The Maritime conference of the United Church of Canada Friday spoke out against the possible appointment of a Canadian envoy to the Vatican.

The conference decided to send a petition to the prime minister asking that no such appointment be made because we believe such appointment is unnecessary and disruptive of the religious life of Canada.

The conference also renewed its appeal to members to refrain from drinking. It went on record as opposing alcoholic beverages in view of the individual and the community, and would urge those who use alcoholic beverages in any form to reconsider their position in the light of Christian witness and responsibility, and the policy of our church."

If you pride yourself on getting the sleekest beauty for the slimmest price . . . the highest power for the lowest cost . . . the most new advances for the least expense—then make a special note of the names PLAZA and SAVOY! Matter of fact, when you check prices on these long, low and lively Thrill-Power Plymouth models, you'll get a real surprise . . . the kind of low-cost surprise that's making Plymouth big value news coast to coast!

eying . . . trying and buying this year than ever before. There are scores of other features, and we'd love a chance to put you in the driver's seat and show them to you firsthand. When are you free to go for a demonstration ride in a brand-new, low-priced Plymouth Plaza or Savoy?

Thrifty? . . . You bet! Yet Plymouth is the eye-catcher of them all—the slim, trim, terrific beauty with the jaunty tail fins . . . sparkling glamour grille . . . "double-header" lights . . . and sports-car look of luxury that many a high-priced car can't match.

Plymouth is the car that gives you your choice of the biggest standard V-8 in the low-price field (a peppery 215 h.p.) or the silkiest Six that ever answered your toe. Plymouth's the eager, lively one. The job with all the ginger and snap!

And what a honey of a highway-handler this car is with its new snug-to-the-road centre of gravity, and revolutionary Torsion-Aire suspension! Old bumpety-bump crossings are levelled out. You cling to curves like you're part of them. And when you stop, there's never a trace of "nose-dive"—even though Plymouth's advanced Total-Contact brakes are the quickest stopping ever.

These are just a few of the most obvious reasons why the Thrill-Power Plymouth has more folks

Plymouth's priced low . . . and rarin' to GO!  
Dial for a demonstration soon!

It'll open your eyes! For Plymouth's the lowest priced car with V-8 or 6 Thrill-Power GO . . . Flight-Sweep styling . . . Torsion-Aire Ride . . . Total-Contact brakes . . . and all the other new Chrysler-engineered advances. Its low price makes extra conveniences like push-button automatic drive . . . power steering, power brakes, power seats and window lifts easier to own, too!
