ASK YOUR DRUGGIST FOR MILLER'S EMULSION OF PURE NORWEGIAN COD LIVER OIL.

When we assert that Dodd's Kidney Pills Cure Backache, Dropsy, Lumbago, Bright's Disease, Rheumatism and all other forms of Kidney Troubles, we are backed by the testimony of all who have used them.

DARSON'S PILLS Make New, Rich Blood! Grateful—Comforting.

Eppe's Cocoa. BREAKFAST—SUPPER. "By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the properties of well-selected Cocoa, Mr. Eppe has provided for his breakfast and supper a delicately flavored beverage which may save us many doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shot by keeping ourselves well fortified by pure blood and a properly nourished frame."—Civil Service Gazette.

James Eppe & Co., Homoeopathic Chemists, London, England.

TALKING UNDER THE SEA.

Transatlantic Telephoning Possible if a Single Copper Wire Could be Laid.

The scientific advance of the telephone is interesting. In 1858 the first transatlantic system was in use, and still prevails to an extent of 50 per cent. Unless you subscribe to a long distance service you are using the ground wire service. It may be distinguished by the burring and electrical noises that confuse the ear. Such noises are caused by the long distance service on metallic wires. The ground wire system has drawn copper wires. The former is "bad," the latter is "good," in electrical terms. The difference is due to magnetism. The atoms of iron are magnetized, with each electrical "impulse" of telephonic transmission. These electrical impulses being instantaneous, follow each other immediately. The first impulse is retarded, because before it has time to act on the iron the magnetic effect is discharged. Hence, impulses following closely, and wires discharging closely, its magnetic effects, there is a constant buzzing and noise in the ground-wire system, rendering it useless for long distance telephoning.

Copper wire is not magnetized. Hence its atoms are not charged, and discharged and are not retarded. Theoretically one can converse any distance on a copper wire. If 200 copper wires are thrust in a conduit in a two inch tube one eighth of an inch apart they are so close together that there is an inducting of the telephone effect. This brings up the great question of a transatlantic telephone. Rich indeed would be he who could succeed in such a project. No company could afford to give each wire crossing the Atlantic a separate conduit or tube. To place more than one wire in a tube would result in induction from one wire to another at no great distance from the shore, and absorb or destroy the telephonic effects. Nor has anyone inducted a tube in which a single wire could be carried across the sea. The present tubes are inductors and water is a conductor and is affected by induction, and hence the telephonic effect soon dissipates in water. Induction on land is overcome by an electrical balance, created by transposing the wires at intervals.

It is believed that if a single copper wire could be laid under the sea without a tube, transatlantic telephonic communication could be effected. Without a tube there could be no induction affected by water, which is a conductor. But a single unprotected wire would soon be a plaything of the inhabitants and shifting currents and sands of the deep, and probably eaten by some new water bug, always created by something new to eat.

Alexander Graham Bell, recognizing something of this principle, found means by telephonic communication between vessels at sea. He trailed a wire behind a vessel, connected with a dynamo on board which electrically charged the wire. The wire, trailing in the water, had an equivalent of a ground connection. The dynamo end of the wire was positive for one half its length; the other end was negative. Consequently the water was positive on the positive end of the wire, within the circle of which the positive half of the wire was trailing. The negative end of the wire created a circle of negative water of the same area. A telephone attached to the wire on the vessel induced the induction of any object, vessel or iceberg coming within the water charged by the wire. Should any other vessel trailing a wire come in contact with the wire charged water, conversation could be carried on between the vessels by their telephones.

Snow can be formed in the bright sunshine by the following operation, but the experiment must take place far from any flame or fire, says the Chemist. An ounce of water is put in a glass bottle and a cork stopper provided with an aperture in the centre. Into this aperture introduce a piece of twisted unspun paper. This should reach the bottom of the bottle, but not touch the sides. The paper should project about an inch above the cork. At the end of a quarter of an hour the free part of the paper will be seen to be covered with small particles of snow. The liquid has ascended by capillary through the paper, just as the oil of a lamp rises in the wick. On reaching the exterior, it has evaporated, and the water contained in the air, being suddenly brought to a temperature of 30 degrees below zero, has coagulated.

If the upper part of the paper be cut into three narrow strips, well separated from the rest of the paper, the whole becomes adherent, through the formation of ice, there are obtained serrated flowers of the most charming aspect, which may be varied in hundreds of ways.

In order to avoid the disagreeable odor of the liquid, it is well to perform this experiment outside of the room, on the edge of a window, for example. The operation can be performed in summer, in bright sunshine. The result will be only the more rapidly obtained, the production of vapor being more abundant.

Small sized coal. President Eckley B. Cox, of the American Society of Mechanical Engineers, says: Within his recollection sizes below stove coal were considered of little or no value. Chestnut coal was used about the collars, but much of it was thrown away. It gradually became a household fuel, and pea coal took its place for use in generating steam.

Pea coal is now coming to be used for household purposes, and buckwheat, rice and other stoves taking its place for the generation of steam. The cost of the coal at the mines decreases rapidly with the size, being \$2.75 for chestnut, 75 cents for buckwheat and 10 cents for barley. Transportation from mines to tide-water is 20 cents less on pea, and on buckwheat, rice and barley coal, 50 cents less per ton than upon the household sizes.—Power.

A Step in the Right Way. We are told that in Denmark the law provides that all persons found drunk shall be taken to their homes in carriages at the expense of the person who sold them the last glass of liquor.

Capt. G. C. Haley, of the Schr. Jessie B. says: that for the last 4 years he had been a great sufferer from rheumatism in his knee, which at times swelled up and became very painful. He tried many remedies without success until he obtained some of Dr. Manning's German Remedy, which gave him instant relief. He also says: "I have used it for rheumatism, flatulence, cold in the stomach, cramp, neuralgia, and in fact for almost every kind of pain or ache. I would be without it, he adds, at any price." Dr. Manning's German Remedy is manufactured only by the Hawker Medicine Co., St. John, N. B., and is for sale by all druggists and dealers.

For Over Fifty Years. An Old and Well Tried Remedy. Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children with teething, with perfect success. It soothes the child, softens the gums, allays the pain, cures the colic, and is the best remedy for a fatal cholera. It is pleasant to the taste. Sold by Druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.—M. W. F. Wiley.

USE SKODA'S DISCOVERY, the greatest Blood and Nerve Remedy.

USE POND'S EXTRACT FOR PILES, BURNS, SORE EYES, WOUNDS, SORES, Headache AND ALL PAIN. Have the early frosts or too late a lingering by the garden gate aroused that RHEUMATISM so peacefully slumbering the summer long? Well, if it's very bad you must change your diet and perhaps take some distasteful drug—the doctor will tell you what—but first rub thoroughly the part afflicted with POND'S EXTRACT, then wrap it warmly with flannel, and the rheumatism may wholly disappear. It will certainly be much relieved. Now that you have the POND'S EXTRACT try it for any of the many things its buff wrapper mentions. It's a wonderful curative. But don't accept substitutes. POND'S EXTRACT CO., 76 Fifth Ave., N. Y.

Our Machinery is new and of the very best description, and we manufacture of the best Quebec pine. Give us a call.

ROBT. PALMER & CO., Ch'town, Nov. 3, 1893—wky

PEAKE'S NO. WHARF.

Don't Stifle a Cold. If you do you will nine times in ten, have a fever to starve. A cold is a shock received by the myriads of nerves that bristle near the surface of a human body. This shock is transmitted to the nerve centres, and then back to the mucous membranes, forcing a great amount of blood to the membranes, creating a more or less severe irritation and causing the fever. The temperature is followed by chills. Excess of food in the stomach still more increases the temperature, and, worst of all, helps clog the secretion of natural outlet of the body. It is high time we broke away from the old notion which, like others, has done more harm than good. For example, in years past how many poor fever sufferers, burning with an internal fire, and who were hurried to an untimely grave because not allowed cooling drinks or a bit of ice by the old time treatment for fevers, as foolish as the usage for colds. At last one cunning delirious patient got to a point of cold water and drank his fill; determined not to leave until the well ran dry, he slacked his fever, recovered, and doctors learned a lesson. Experimenting with a severe cold is a dangerous custom, and most friends try remedy only until some one else suggests another "sure cure," as Mark Twain so humorously describes. When slight hoarseness or tightening of the throat is noticed, it is a warning of exposure or chill from wet, act promptly; a delay is dangerous. With children it may mean croup and strangulation; with adults, catarrh, bronchitis, perhaps pneumonia. If nothing can prevent the sneezing, red nose, and worse-looking look of a person with a cold. Scores of mothers would as soon go to bed without medicine in their hands, as that old-fashioned remedy, Johnson's Anodyne Liniment, near at hand for croupy children. Used with a mild laxative, as described in a pamphlet which I. S. Johnson and Co., Boston, Mass., will send free to any, Johnson's Liniment will cure a cold for adults quicker than any known remedy. A mild nutritious diet, a gentle physic to open the secretions, and a bottle of that old Anodyne from your druggist, will cure any cold. Johnson's Anodyne Liniment was originated by an old family physician more than seventy years ago.

THE BUCHANAN CASE. Equal to a Resurrection—Almost Helpless from Kidney Disease—A Burden to Himself and his Friends Dodd's Kidney Pills Cured him.

CHATHAM, April 30.—The story of Sherman Buchanan, living near Leamington, is worthy of notice. He says he was almost helpless, bloated and a wreck powerless and he was rapidly becoming a burden to himself and his friends. Naturally he had all hopes of recovery, but a happy thought suggested Dodd's Kidney Pills, and these cured him. Dodd's was the first kidney remedy in pills form ever offered to the public. Its wonderful success in curing all forms of kidney disease has led to the introduction of numerous cheap and worthless imitations. Purchasers, for their own safety, should insist on getting Dodd's Kidney Pills. Sold in large boxes; price, fifty cents or six boxes for \$2.50. To be had of all dealers.

The great coal strike continues in the States, and increased inconvenience to many branches of trade is reported. In the great coke regions only 1,300 of the 17,519 ovens are at work.

Some surprising effects have been recorded from the use of Miller's Emulsion of Cod Liver Oil in the most desperate cases of consumption. Miller's Emulsion is "the kind that cures" colds, coughs, bronchitis and lung diseases generally. Every bottle warranted. No oily taste like other. In big bottles, 50c. and \$1.00, at druggists.

Nugzar Pasha, the new Egyptian Premier, is 65 years of age, and of the Armen race. He has been in the service of Egypt since he was 24, and he is more fully and avowedly in sympathy with the British policy than any other Egyptian statesman. He was educated in Switzerland and in France.

A Perfect Cure for Cold in the Head. "I cured me of a severe cold in the head," writes Mr. A. B. McLaughlin, of Franchois, C. B., says of Hawker's Catarrh Cure. Sold everywhere, only 25 cents.

CAMPBELL'S QUININE WINE. Cures: Dyspepsia, low spirits, loss of appetite, painful digestion, malaria, and gives tone and vigor to the whole system. Be sure you get CAMPBELL'S.

JOHNSON'S ANODYNE LINIMENT. UNLIKE ANY OTHER. Originated by an Old Family Physician. Think of It! Years, and still he is Every Sufferer from Rheumatism, Sciatica, Neuralgia, Gout, Gravel, Headache, Toothache, Stomachache, Backache, Pain in the Limbs, Sprains, Bruises, Burns, Scalds, Cuts, Wounds, Ulcers, Sores, Eruptions, Itch, and all other skin diseases. It is a safe and reliable medicine, and its use is recommended by all the best physicians.

MORTGAGE SALE. To be sold by Public Auction, on THURSDAY, the 11th day of May, A. D. 1894, on the Premises situate in the County of Charlotteville, in the Province of P. E. Island, at the hour of Twelve o'clock, noon.

All that tract, piece or parcel of land, situate, lying and being in Charlotteville, bounded and described as follows: To wit: Commencing on the north-west side of the Saint Peter's Road, at the corner of the same with Mount Edward Road; thence following the course of the said road, to the north-west corner of the same; thence following a right angle line north eighty degrees east sixty-seven feet; thence south sixty degrees forty-five minutes east thirty-six feet; thence the same south twenty-eight degrees twenty-two minutes west one hundred and thirty-six feet to the place of commencement, and is a part of Pasture Lot Number Thirteen in the Royalty of the City of Charlotteville, and is situated on the island, as the same is delineated in a plan of the above-described land, and annexed to the deed of conveyance of the same from the Duke of Devonshire to Prince Edward Island to George Ferguson, and dated twenty-sixth day of June, A. D. 1872.

The above sale is made under and by virtue of a power of sale contained in an Indenture of Mortgage bearing date the seventh day of June, A. D. 1890, and made between William McCullure, of Charlotteville, in Queen's County, Province of P. E. Island, and James McCullure, of Charlotteville, in Queen's County, Province of P. E. Island, his wife, Mary McCullure, and John McCullure, of Charlotteville, in Queen's County, Province of P. E. Island, the other part. For further particulars apply to the office of the undersigned in Charlotteville, on the 11th day of May, A. D. 1894.
