ALUMINUM WARE POPULAR

Aluminum kitchen utensils, despite their high price, are being asked for by those who have come to appreciate their good points. The Winter's sales have been good and the growing demand is a mark of their popularity. For the woman who has to lift the heavy iron pots and kettles off and on the stove many times during the day, the cast aluminum pots are a welcome change. Their weight as compared with cast iron is a thing that to be felt is to be appreciated. They are said to meet all expectations as to their wearing qualities by those who have had them in constant use, as well as being found liable to burn their contents than any other utensils.
