Coyne Is Being Paid $25,000 Year Pension

OTTAWA (CP)—The $25,000-a-year pension for former Bank of Canada governor James E. Coyne—one of the hottest issues in the 1961 furore over the government's attempt to fire him—is being paid.

Finance Minister Gordon has told the Commons that the controversial pension has been paid to Mr. Coyne effective from the date of his retirement on July 13, 1961.

Mr. Coyne, now 53 and an officer of a Toronto Trust Company, resigned after the Senate voted to strike down a bill proposed by the former Conservative government to remove him from office.

The pension was one of the issues—though not the only one—in the 1962 battle between government and central bank governor.

The bank's board of directors in February, 1960, approved unanimously an increase to $25,000 from $11,500 in the governor's pension, to which he had contributed since 1938 under the bank's own retirement pension plan.

Mr. Gordon, replying Monday to a Commons question by Robert Muir (PC — Cape Breton North and Victoria), said that the bank's board of directors, at a meeting nine days after Mr. Coyne left office, suspended a bank bylaw governing his pension pending a review.

"Following the review, the suspension was terminated. Mr. Coyne has been in receipt of a pension of $25,000 a year, effective from the date of his retirement."

The bitter fight between Mr. Coyne and the Conservative government was touched off May 30, 1961, when Donald Fleming, then finance minister, at a private meeting asked for his resignation. Mr. Coyne's seven-year term was due to expire at the end of 1961.

Maritime Tel And Tel Costs Mount Rapidly In 9 Months

HALIFAX (CP) — Operating expenses for the Maritime Telegraph and Telephone Co., rose 11.8 per cent in the first 9 months of this year over the same period in 1962. It compared with only a 6.4 per cent increase in operating revenues.

In his quarterly report to shareholders, J. A. S. Archibald, president of M. T. and T., said the increase in operating expenses was due to higher depreciation rates on a growing plant investment and higher maintenance charges arising from storm damage and general service improvement.

Total operating revenues for the first 9 months of this year were $14,863,189, compared with $13,964,244 in 1962. Operating expenses for the same periods were $9,596,219 and $8,584,318 respectively. They gave net operating revenues of $5,266,970 in 1963 and $5,379,926 in 1962.

Earnings available for dividends amounted to $2,137,655, or 84 cents per common share compared with 97 cents per average common share in the Jan.-Sept. period in 1962.

Mr. Archibald estimated that earnings for the entire 12 months of 1963 will be $1.12 per common share. He said the average number of common shares outstanding was 12 per cent higher in 1963 than in 1962.

NEW PHONES LISTED

An additional 6,873 new telephones were installed in the first nine months of this year, a gain of 3.7 per cent over the highest record for a similar period in previous years.

The company at the end of 1962, had 187,536 telephones in service, 86.8 per cent of which were dial operated. Long distance telephone calls so far this year amounted to 6,650,476, or a four-per-cent increase over the first nine months of 1962. The total number of long distance calls in 1962 was 8,589,756

The company, which operates the telephone system in Nova Scotia, New Brunswick and Prince Edward Island, had at the end of 1962 a total of 12,359 shareholders, of whom 9,819 or 79.45 per cent, were outside Nova Scotia. Only 1.88 per cent of shareholders reside outside Canada.

Mr. Archibald became president of M. T. and T. several months ago after the former president, J. E. Richardson, resigned to become president of B.C. Electric Corp. in Vancouver. Mr. Archibald had been vice - president and general manager.

Rio Algom Mines Acquires Block Of Shares In Brinco

TORONTO (CP) — British Newfoundland Corporation Ltd. has revealed that Rio Algom Mines Ltd., is to acquire 185,000 shares of that company.

A. W. Southam, president, said in a letter to shareholders that Rio Algom will provide assistance "as may be required from time to time in co-ordinating and carrying out the development of the company's assets."

Brinco is developing the power resources of Hamilton Falls in Labrador. Rio Tinto of England. Rio Algom's parent firm, was one of the founders of Brinco. Other companies involved in the project are N. M. Rothschild and Sons, Anglo-American Corporation of South Africa, Anglo-Newfoundland Development, Bowater Paper and English Electric.

Mr. Southam also said Rio Algom will acquire 75,000 shares of Hamilton Falls Power Corporation Ltd., a Brinco subsidiary, with an option to purchase an additional 75,000 shares.

REPORTS PROGRESS

Mr. Southam said encouraging progress has been made in the complex negotiations to develop the Hamilton Falls power project in Labrador.

"It is hoped that agreement in principle will soon be reached. Meanwhile, Brinco has taken certain steps to prepare for carrying out this important project."

The project is about 165 miles west of Goose Bay and the company estimates the capital cost, including more than 100 miles of high - voltage transmission lines, will be roughly $700,000,000.

"Our financial advisers have indicated that closer association with a Canadian company of established reputation in resource development should facilitate the financing of so vast a project," said Mr. Southam.

H. G. Acres and Co., Ltd., and Canadian Bechtel, Ltd., have been retained by Hamilton Falls Power Corp. Ltd., a Brinco subsidiary, to handle engineering and construction management for the project.

REPORT POTENTIAL

H. G. Acres recently carried out an engineering investigation and reported:

The regulated firm flow should produce a continuous energy generation of slightly more than 5,000,000 horsepower rather than the 4,000,000 horsepower originally estimated.

That 6,000,000 horsepower of generating capacity should be installed in the Hamilton Falls site.

Confirmation that first power can be obtained from the development approximately four years after the start of major construction.

Brinco hopes to sell its entire Hamilton Falls output to the Quebec government, which will use it domestically and for export to the United States. Talks have already taken place with Consolidated Edison of New York, Inc.

Brinco was formed in 1953 to explore and develop the natural resources of Newfoundland and Labrador, particularly water power, minerals and timber.

Hamilton Falls Power Corp., was granted in 1961 a 99-year water power lease on the upper Hamilton River.

In May, 1962, another Brinco subsidiary, Twin Falls Power Corp., completed construction of a 120,000 - horsepower hydro-electric plant at Twin Falls on the Unknown River, 20 miles southwest of Hamilton Falls.

The Twin Falls capacity was recently doubled to 240,000 horsepower by the addition of two 60,000 horsepower units. The power is being sold to the Iron Ore Co. of Canada and Wabush Iron Co.

Reuther Seeks Lakes Harmony

By JIM PEACOCK

NEW YORK (CP)—President Walter Reuther of the United Auto Workers said here he intends to pursue action within the AFL-CIO to bring about an amiable and proper solution to problems raised by the Great Lakes labor dispute in Canada.

He left open, however, the question of how and where he would seek to bring harmony within the AFL-CIO and between this giant U.S. labor organization and the Canadian Labor Congress on the differences arising from the lakes dispute centred on the Seafarers' International Union of Canada.

It is expected that Reuther, an AFL - CIO vice - president and member of its executive council, will seek an executive council meeting to deal with the SIU issue.

MIGHTY FALLS

A maximum of 75,000,000 gallons of water a minute thunder down Victoria Falls in Africa during the November-December period.

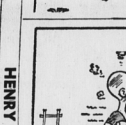
Yesterday's Answer



DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X E
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.

♣ ——

The bidding:

South	West	North	East
1♥	2♠	4♥	Pass
6♥			

Opening lead—king of clubs.

The declarer's first aim is to make the contract. In trying to accomplish this task — even though it may appear to be impossible on the surface—he is entitled to make any reasonable assumptions about the makeup of the adverse cards that would permit him to make the contract.

Here is such a case. South is in six hearts and West leads the king of clubs. The apparent losers are two diamond tricks and the problem is to cut one of them off.

There are several things declarer knows about the East-West hands. West is marked with at least five diamonds, having made an overcall of two diamonds, and a goodly number of clubs headed by the A - K. Consequently, there is not much room in his hand for the two remaining suits.

This information is very valuable to declarer because it presents him with a legitimate chance of making the contract. What this chance narrows down to is the question of whether or not West has the majority of the outstanding spades. If, as is likely, East has most of them, the slam can be made.

Accordingly, South ruffs the king of clubs and proceeds to set up an endplay situation. After drawing a round of trumps, he cashes the A-K of spades and ruffs a spade. Then he cashes the ace of diamonds to remove East's only diamond from his hand, and next ruffs the queen of clubs. He is now ready for the critical play.

He leads the nine of spades and discards a diamond from dummy. East is forced to win with the queen, and having only clubs left, must lead one. This permits South to discard the last diamond from dummy as he ruffs the club in his hand, and in this way he makes six.

Note that declarer deliberately loses a spade trick which he does not have to lose, but gets back two tricks in exchange. The operation is known as a loser - on - loser play.
