

British Selling Methods Backed By Prince Philip

NEW YORK (AP) — Prince Philip said here the markets for capital and consumer goods are bound to grow and more countries will take part in international trade.

"The sad thing is that the tremendous increase in the world's population merely succeeds in slowing down the spread of higher living standards," he

told a luncheon of the British-American Chamber of Commerce.

"We may pride ourselves on reducing the proportion of people at starvation level but with the increase in the total population the actual number of people on starvation level will probably remain the same or even increase," he said.

Speaking of the fierce competition in the foreign and particularly the United States market, Prince Philip said that for the really fantastic market which exists throughout the booming United States.

"Several of them haven't even discovered that the U.S. goes beyond New York," he added.

Prospecting Course Given

HALIFAX (CP) — To the detached layman, prospecting is a distant world of grizzled miners panning gold, swinging pickaxes and living on jerky in one-room shanties.

For \$12 the image is being dispelled in a six-week course on prospecting under the sponsorship of the Halifax branch of the Nova Scotia Mining Society and the provincial mines department.

Mr. Nowlan says the course, the first of its kind in Canada, offers a history of mining in Nova Scotia, describes rock structure in relation to mineral deposits, shows how to use prospecting tools and methods. It even teaches proper handling of explosives and supplies information on procedures in acquiring mineral rights.

"Each person is given textbooks, a set of minerals and rock specimens," he says. "The course covers a wide field in a short time, but it is meant to stimulate learning of geology and prospecting."

And at \$12 for a six-week course providing free materials and instructors, he adds, "it's good public relations."

"The course gives them some idea of the province's geology," says deputy mines minister J. P. Nowlan, "and due to limited facilities and time we have a waiting list."

Mr. Nowlan says an average of 30 people attend classes twice a week at Halifax, Sydney, Truro, Wolfville and Antigonish under the instruction of

university professors and mines department personnel.

Opening lead — king of diamonds.

The finesse is undoubtedly a wonderful instrument of play, but there can be no doubt that it is used to excess. After all, whether a finesse works is largely a matter of luck, and it is surely undesirable to rely on luck when there are other means of attaining your goal by substituting a less precarious form of play.

This hand serves to illustrate the point. Let's say you're declarer at four hearts and West leads the king of diamonds. At
