

**DANGER AHEAD**

When Children Are Weak and Sickly in Summer Time.

**PAINE'S CELERY COMPOUND**  
Makes Them Healthy.  
Happy and Joyous.

The Great Medicine is Blessed by Thousands of Mothers.

Try it for Your Boys and Girls.

WELLS & RICHARDSON.  
DEAR SIR:—I think it a duty to write you for the benefit of all who have delicate children, and to make known what Paine's Celery Compound has done for my child. She has been delicate all her life. I have tried many medicines, and have had her under allopathic and homoeopathic treatment with but little benefit. Almost in despair, and as a last resort, I tried Paine's Celery Compound, and after using three bottles she is now perfectly well and strong. I have also used your medicines for complications arising from overwork and loss of rest, and am greatly benefited thereby. I would strongly urge all who are in any way afflicted to do as I have done, "try Paine's Celery Compound," and be convinced of its wonderful curing power.  
Yours gratefully,  
MRS. A. R. STITCHCOMBE,  
William St. London, Ont.

**Plant Line. To Boston**

COMMENCING MAY 10th.

The favorite S. S. "HALIFAX" will leave Charlottetown for Boston Every Tuesday, at 1 p. m. calling at Hawkesbury and Halifax.

**RETURNING**  
leave Boston every Saturday at noon.

Passengers leaving Ch'own Wednesday morning via Picton, can make close connection at Halifax with

S. S. "HALIFAX."

Sailing Wednesday evening at 11 p. m.  
Tickets for sale at stations P. E. I. Railway.

For further rates and all information apply to H. L. Chipman, Canadian Agent, at Halifax, or to  
W. W. CLARKE,  
Agent, Ch'town.

**DOBELL LINE.**

S. S. ACADIAN is due here from Montreal, Wednesday, 22nd inst, and sails for St. John's Nfld via Sydney, and North Sydney carrying produce under deck, and live stock between decks.

For further information apply to  
N. RATYENBURY,  
Agent

The J. D. Bell Manufacturing Co  
Stove and Hardware Merchants,  
Montague, June 7-1m

**Aching and Ulcerating Teeth**

Treated and filled.  
Decayed teeth crowned with gold.  
Moderate prices.

DR. J. P. MURRAY

**"THE RIDDLE OF THINGS THAT ARE."**

We walk in a world where no man reads  
The riddle of things that are,  
From a tiny fern in the valley's heart  
To the light of the largest star,  
Yet we know that the pressure of life is hard  
And the silence of death is deep  
As we fall and rise on the tangled way  
That leads to the gate of Sleep.  
We know that the problems of sin and pain  
And the passions that lead to crime  
Are the mysteries locked from age to age  
In the awful vault of Time,  
Yet we lift our weary feet and strive  
Through the mire and mist to grope  
And find a ledge on the mount of Faith  
In the morning land of Hope.  
—Harper's Weekly.

**RICHES IN TRIFLES.**

Some Big Fortunes That Have Come From Little Inventions.

It has become almost an axiom with the majority that larger fortunes are to be raised from some simple invention than from difficult and expensive inventions that involve a great outlay of money to manufacture. This is to a certain extent true. A certain American patent for fastening kid gloves has yielded a fortune of several hundred thousand dollars for its fortunate owner, and the inventor of a collar clasp enjoys \$20,000 royalty a year as the reward for his endeavor. A new kind of sleeve button has made \$50,000 in five years for its patentee, and the simple twisting of safety pins in such a way that there is no possible danger of the point sticking in the child promises to enrich its owner beyond any of his early dreams of wealth. A man one day turned a piece of wire so as to hold a cork more securely in a bottle and forthwith somebody saw a brilliant idea and patented the modern wire stopper holder, which is now used annually on several million bottles. The accidental bending of a hairpin by a woman to prevent it from sliding out of her hair so easily produced a fortune for her husband, who immediately saw the possibilities of a crinkled hairpin for women.  
Instances could be multiplied indefinitely of large fortunes being made from small inventions, but fortunately for those inventors who make a life study of intricate problems of mechanics and disdain to waste their talents upon trivial, popular articles of the day there is often also ample reward held in store for the products that take years to produce and which revolutionize existing methods of industry and mechanics.

Edison has reaped honors and riches of a princely character from his discoveries; McCormick has realized in his reaper the fortunes of a millionaire; the Corliss engine brought honors and decorations to its inventor and enabled him to amass a great fortune in a few years; Professor Bell found in his telephone not only the consummation of his early hopes and ambitions, but a substantial pecuniary reward; harveized steel armor has become synonymous with the inventor's name, and it brings an annual income of huge proportions to its discoverer; Elias Howe, the inventor of the sewing machine, realized over \$2,000,000 from his inventions, and Nikola Tesla, though still young and rich in promises, finds an abundance of money in his work.—George Ethelbert Walsh in Cassier's Magazine.

**Saved by a Cat.**  
Sir Edward Osborne, lord mayor of London in his time, bought an ancient house in Yorkshire, and sent his children thither. There were two boys. The elder dutifully obeyed when summoned to his lessons one morning in a turret, but the younger, loitering, "hopped to light upon a cat which he delighted to play with and crept after her to catch her under a table in the room, which was covered over with a carpet hanging down to the floor." Thus he disappeared, and had instant a terrible rush of wind overthrew the turret, in which his brother and the tutor sat at work, crushing them to death. Supposing that both her sons were there, the mother fell into convulsions, and we imagine the scene. One of the maids, running in a distracted manner from room to room, caught sight of the small boy peeping from under the table, with the cat in his arms, snatched him up and bore him in ecstasy to his mother, he only crying, "I pray thee, I pray thee, do not whip me!" So it may be said that the Duke of Leeds now owes his existence to a cat.—Pall Mall Gazette.

**YOU NEED Hood's Sarsaparilla**  
if your blood is impure, your appetite gone, your health impaired. Nothing builds up health like HOOD'S.

Read W D MacKay's advertisement in to-day's issue, low prices, grand value.

CHARLOTTETOWN.

**WEATHER CYCLES.**

Under the heading "Weather Predictions," the "Observatory Magazine" for June says:—The past month has been sufficiently un-May-like in character. The rainfall at Greenwich for the month was somewhat above the average, and the general gloominess of the month, with a succession of excessively wet days about the 20th, have tended to give a general impression, based on no very sufficient reason, that the coming season is likely to be a wet one. It has been pointed out, apropos of a 19-year weather cycle, that the Summers of 1860 and 1879 stands out in the memories of many as sunless and dripping, and that the Summers of 1857, 1858, 1859, were respectively not unlike those of 1876, 1877, 1878, and also those of 1895, 1896 and 1897. It is not argued that because nineteen years from 1860 brought a gloomy 1879 that therefore another nineteen years must bring a gloomy 1898, but the other coincidences give ground for watching whether 1898 will not prove like 1879 and 1860.

Nothing is easier to make facts and circumstances fit in with theories as to cycles and periods, but it is not unscientific to collect information which may bear on such a theory. Now, there is abundant record that the year 1594 was a very wet year. In Stowe's "Chronicle" it is said of this year that "in the month of May fell many great showers of rain, but in the months of June and July much more, for it commonly rained every day or night till St. James's Day, and two days after most extremely; all which notwithstanding in the month of August there followed a great harvest, but in the month of September fell great rains." The above is extracted from the introduction of Shakespeare's "Midsummer Night's Dream," by Professor Morley, where he gives other references to show that 1594 was a remarkably unpleasant year, and as this was about the time the play was written, suggests that this year's experience of Shakespeare is described in Titania's speech, Act II., Scene 2:—  
"That rheumatic diseases do abound;  
And through this distemperature, we see  
The seasons alter; hoary-headed frosts  
Fall in the fresh lap of the crimson rose,  
It need no scap be added that from 1594 to 1798 is 204 years, in which would exactly cover 16 cycles of 19 years each.  
An obvious point in this matter would be to examine the records of the year 1841, although numerical records of rainfall are not exactly the data required, but rather generally experience as to rain and want of sunshine during daylight hours. The records show, however, that in 1841 the temperature was low from July to October and that there were a large number of rainy days in these months, but in both respects 1841 does not stand out so much as 1860 or 1879.

**SICK HEADACHE**

Positively cured by these Little Pills.

They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coated Tongue, Pain in the Side, TORPID LIVER. They Regulate the Bowels. Purely Vegetable.
