Today's Byelections Could Prove Decisive

Polls in 5th Prince and 1st Kings will open at 9 a.m. today for the first byelections to be held in the province since the Conservatives were returned to power in the Dec. 10, 1962, general election.

The polls close at 5 p.m. when election returns will be handled by the office of the provincial secretary in Charlottetown.

Some political observers say a general election is likely within a year if the Conservatives pick up both seats, and an early election is thought unlikely if the Liberals win both seats.

Contesting the 5th Prince seat are Conservative Claude Ives, 55, insurance businessman, and Liberal Alex Campbell, 50, Summerside lawyer.

208-VOTE MARGIN

Conservative Lorne Monckley won the seat by a margin of 208 votes over Liberal candidate Morley Bell in the 1962 general election.

The seat has been vacant since early 1963, when Mr. Monckley resigned to contest unsuccessfully the Prince County seat in the last federal election.

The 5th Prince contest is for the seat has been vacant since last fall when House Speaker John MacLean led.

In 1st Kings, the seat is being contested for the Conservatives by Souris fish packer Albert Griffin and for the Liberals by Souris salesman William Acorn.

The seat has been vacant since last fall when House Speaker John MacLean led.

HALIFAX (CP) — The weather office says rain or drizzle were reported from all regions Monday evening as a disturbance moved northeastward through New Brunswick. Drier and colder air will sweep through the three provinces as the disturbance moves off toward Newfoundland today. This will bring clearing skies but colder temperatures to all sections.

A high pressure area approaching from Ontario will provide sunny but cold weather Wednesday.

Regional forecasts:
Prince Edward Island, Eastern N.B. Counties, Lower St. John River Valley: Cloudy, clearing about noon; colder; northwest winds 20. Early morning and mid-afternoon temperatures at Charlottetown and Moncton 5 and 25, Fredericton

BLADDER IRRITATION MAY DISTURB SLEEP

After 21 twice as many women as men are made miserable by common urinary irritation caused by a virus, Escherichia Coli. To quickly combat the secondary aches, muscular pains and disturbed sleep caused by kidney and bladder irritations, try taking 2 little GYSTEK tablets with a glass of water 3 times daily for a few days. GYSTEK is a cleansing urinary antibiotic, also an analgesic pain reliever for Rheumatism, Gout, Sciatica, Headache, Backache, and muscular pains. Get GYSTEK from drugstore. Feel better fast.

MRS. OSBORNE RECEIVES AWARD FROM LIEUT. GOV. MACDONALD

'64 Islander Of The Year Officially Given Award

The Evening Patriot's 1964 Islander of the Year award was presented to Mrs. Fred G. Osborne, Brackley Point Road, at yesterday's luncheon meeting of the Charlottetown Rotary Club at the Charlottetown Hotel.

The presentation was made on behalf of the paper by Lieutenant Governor W. J. Macdonald.

In accepting the award, Mrs. Osborne said "it is with the utmost surprise and wonder and deep pride that I find myself recipient of the award." She said "spiritually, it fills me with determination to be a better Islander than in the past."

Mrs. Osborne said she "regretted that her husband could not be present to share her honor." She said "if it has not been for his help and confidence, I would not be receiving this award today. He allowed me to open our home to make it a haven for many unfortunate persons and went to much expense in helping me carry out many of my projects. What is my honor, is his, too."

NO EASY TASK

In introducing the presentation by the lieutenant governor, W. J. Hancox, publisher and general manager of The Evening Patriot said "the judges had no easy task in selecting the recipient of the 1964 award and are to be congratulated on their choice."

Mr. Hancox read the citation of the judges. It said: "For her initiative in using her talents and skills in the world wide organization of Girl Guides and for her interest in the Lone and Extension Guides of this province, for her province-wide organization of the Unitarian Service program and for the adoption, in 1964, of refugee children in the Middle East; for her selection of 'Mother of the Year' in 1964 for the University of Iowa which resulted in the visit to this province last summer of 50 Iowa students, and for many more contributions to worthy Island projects for which she has received no remuneration except the satisfaction of a work well done, the panel of judges has selected Mrs. Fred G. Osborne, Brackley Point Road, as the Islander of the Year for 1964."

OTHER 'ISLANDERS'

Mrs. Osborne is the first woman Islander of the year, since the award was created by The Evening Patriot in 1959. The other recipients are Lieut. Col. E. W. Johnstone, Burlington, 1959; Capt. Carl Burke, Charlottetown, 1960; Dr. Frank MacKinnon, Charlottetown, 1961; Dr. Eric Found, Charlottetown,

1962, and James Pendergast, Charlottetown, 1963.

The panel of judges which selected Mrs. Osborne was made up of Mrs. Beth McGowan, Montague; Charles Linkletter, Summerside, and

Gordon Bennett, Charlottetown. All were guests of Rotary yesterday.

Also attending were former Islanders of the Year, Dr. Found, Dr. MacKinnon and Lieut. Col. Johnstone.

dence of venereal disease among teen-agers is alarming as it is in the Central Canadian provinces.

"Without a continued control program, tuberculosis will go through the same cycle.

"Measles and chicken pox are still with us — the complications of these conditions can be very serious.

"In all the aforesaid contagious diseases, except venereal disease, medical research has discovered an immunizing agent or one attack produces a life-long immunity.

"Tuberculosis is different — here we are dealing with a disrupting, socio-economic, relapsing, contagious disease for which we have no 100 per cent vaccine."

INTERNAL EFFORTS

In conclusion, Dr. Found emphasized that tuberculosis, as a world problem, must be attacked through international efforts. He said "it will find its solution only by keeping alive the voluntary tuberculosis movement in this province, in Canada and throughout the world."

"The prime purpose of tuberculosis associations, which include all strata of society, medical and non-medical, is to make known the importance of the tuberculosis problem — local, national and world-wide.

"We in Canada cannot afford to be complacent about our own tuberculosis situation. At the same time we must help the world."

Other Rotary guests yesterday were W.H. Ward, managing editor of The Evening Patriot; Warren Osbourne, Ottawa; Aubrey Found, Charlottetown; and Rev. Clayton Lewis of Spring Park United Church.

GUAYAQUIL, Ecuador (AP)

Ecuador's four-man ruling junta has returned decorations awarded to them by French President de Gaulle during his Latin American tour last September. The junta members didn't regard the honors as equal to their rank as chiefs of state, a government spokesman said.

INCIDENCE ALARMING

"In the United States the inci-

heart disease, mental disorders and alcoholism. Infectious or contagious diseases have been pushed into the background but in public health circles they remain a tremendous problem.

Through medical research, tremendous progress has been made in the control of infectious diseases. For example, diphtheria and smallpox are rarely heard of, thanks to modern methods of immunization. Poliomyelitis, in which Rotary has always been interested, is now a very rare disease, thanks to the Salk and Sabin Vaccines.

"World Health Organization officials are greatly concerned about the alarming rise in incidence of venereal disease — there being an estimated 65,000,000 new cases throughout the world each year. Part of the blame for this resurgence is placed on the shoulders of physicians and public health workers who became complacent after the introduction of drugs which produced prompt therapeutic effects."

NEEDED COMBINATION

According to Dr. Found, his experience has "convinced me that clinical medicine, coupled with governmental agencies that are supplemented by volunteer associations, are a necessary combination to develop an effective tuberculosis control program. To these I would add research."

Dr. Found said "today the spotlight appears to be focussed on such abnormal conditions as

RUSTPROOFING?

WE SPILL MORE THAN OTHERS USE.

We don't just gloss over the winter rust problem. Our unique deep-dip rustproofing seeps into every nook and cranny to seal out the ravages of rust!

Some years ago we decided that normal rustproofing methods—spraying and coating—weren't adequate.

Our engineers went to work and came up with a solution: deep-dipping. Dipping the entire car in rustproofing—right up to its roofline! We didn't stop there. For complete rustproofing, the metal surface must be absolutely clean and free of all impurities.

That's why the body of every '65 Ramblor is submerged to the roofline in six separate tanks. The metal is cleaned, scoured and purified.

The car is then completely dipped in rustproofing primer paint. A second primer is sprayed on for good measure; then thorough wet-sanding removes any blemishes. Fifteen pounds of rustproofing primer coats the steel.

Three coats of chip-resistant, salt-resistant, super enamel are then sprayed on and baked. Corrosion-resistant wax and sealer compounds are sprayed inside, rockers, panels, fenders and on under-body areas—those critical places where rust does its worst damage.

The result? Ramblor is the world's most completely rustproofed car. Every 1965 Ramblor can beat the worst slush-and-salt winter conditions—year after year.

Stick with Ramblor and let the rust of the world go by.
