Where there was Progress

Throughout the land, Canadians made progress in 1954.

They prospected, staked, drilled and mined; they cleared, ploughed and planted; they fished and they hunted; they planned and constructed; they manufactured, and they bought and sold. And working with Canadians in their ventures from coast to coast—helping with counsel, service and money—was the Bank of Montreal.

In 1954, B of M loans and investments—amounting to some two billion dollars—worked for Canada and Canadians. Wholesaling and retailing enterprises... petrochemical, smelting and mining developments of every type and manufacturing in all its phases... farms and ranches... the grain trade... co-operative production and marketing... housing developments... municipalities... churches, hospitals and schools... many industries, many organizations, and many people in all walks of life counted on the B of M for counsel and credit.

Canada is on the march today. And moving ahead with the nation are 625 B of M branches from coast to coast, at the service of the men and women who are forging the Canada of tomorrow.

Yes, where there was progress in 1954...

There was the Bank of Montreal

ATOMIC ENERGY AT CHALK RIVER... Canadian enterprise in this vital field has made Chalk River a famous name. Nearby, at Deep River, townsite of Defence Industries Limited, the Bank of Montreal opened the first banking office—in May, 1945, to serve scientists and workers at the Atomic Energy plant.

ST. LAWRENCE SEAWAY AND POWER PROJECT... long discussed and now under way, destined to open the Great Lakes to world shipping, and cement friendship between two great nations. The B of M opened the first banking office at Mille Roches, near Cornwall, Ont., last October for the convenience of seaway workers.

OIL AND GAS—FROM THE RICH WEST... The Interprovincial Pipe-line speeds the flow of oil from source to market and cuts transportation costs. The B of M assisted in the financing of this great undertaking. And it is equally ready to assist in the plan to pipe gas from western wells to eastern markets.
