THE DAILY EXAMINER

FEBRUARY 12, 1900

AGRICULTURE GENEROUSLY ASSISTED

A month or two ago we noted the generosity of the Ontario Government toward agriculture, and, while we knew the comparison was between great and small, lamented the fact that our restricted revenue was not being used, to some extent at least, to foster the interests of the farm, dairy and garden in this entirely agricultural country. Since the Directors' report of the Fruit Grower's Association made a statement that horticultural associations were helped to the extent of \$10,000 in Ontario many marvelled at this. But it was after all only one fourth of the sum expended, some \$40,823.93 having been paid in "Horticultural Grants" by the Ontario Government in 1899. As a matter of interest to all, we appeal the expenditure in Agriculture in Ontario last year, taken from the most authentic sources:

Societies, Agricultural and Horticultural.....	\$73,312 00
General Associations.....	20,434 30
Incidentals, (Reports, Bulletins, etc.).....	17,118 20
Live Stock Registration.....	1,500 00
San Jose Scale, Extermination Experimental Fruit Stations..	27,770 02
Fruit Spraying.....	2,727 21
Apicultural Experiments.....	2,865 70
Dairy Schools, Eastern.....	300 00
Dairy Schools, Western.....	7,525 06
Dairy Schools, Guelph (included in Agricultural Coll.)....	1,312 91
Pioneer Farm.....	1,330 72
Bureau of Industries.....	4,877 64
Ontario Agricultural College and Experimental Farm....	49,348 90
	\$210,923 08

Horticultural grants included in the above..... 40,523 93

Of course our depleted treasury may be pleaded in extenuation of the government's utter disregard of agricultural interests. But where thousands are being raised to bungle and bungle on the road system, a few hundred dollars could surely be found to continue the grant to the F. G. A., whose excellent work all admit, as well as to enable the other agricultural institutions of the country to extend their usefulness. It is too bad to think that our farmers, the mainstay of the land, receive little or nothing from this precious government, while Ontario farmers are helped to the tune of \$210,923.08!

NOTES AND COMMENTS.

—Sir Alfred Milner has sent most hopeful and encouraging reports to the Government regarding the prospects of the campaign, and it is understood, that his views are shared by Lord Roberts.

—There were some eight hundred irregularly marked ballots dealt with in the Winnipeg election recount, and the Montreal Gazette rises to remark that much of the political noise the Prairie City makes would seem to be based on something else than popular intelligence.

—One of the United States newspapers reports that the fact that the sum of \$355,000,000 had been drawn from the national treasury up to February 1 on account of the Spanish and Philippine wars, is something worthy of sober reflection. And the rate of expenditure has not been decreased.

—The Dominion Alliance intend having a resolution on prohibition this year. The resolution reads as follows:

"That in view of the declaration of this house, made March 26, 1881, that prohibition is the right and most effectual legislation for the evils of intemperance, and that this House is prepared, so soon as public opinion will sufficiently sustain stringent measures, to promote such legislation."

—And, further, in view of the substantial majority in favor of prohibition, of the votes polled throughout the Dominion in the plebiscite on September 29th, 1898, including an overwhelming majority in all the provinces but one, and a large proportion of all the possible votes in those provinces this House is now of the opinion that it is the duty of the Dominion Parliament to enact without delay, such legislation as will secure the prohibition of the liquor traffic for beverage purposes in at least those provinces and territories which have voted in favor of prohibition."

—The United States Philippine Commission has reported in favor of giving the people of the island home rule. The Montreal Gazette remarks that "if General Otis could get them rounded up long enough to receive the remedy for their trouble, it would probably be effective for a time. It is just a little doubtful, though, if what home rule would beget would not be quite as troublesome as Aguinaldoism. Home rule is good for colonies, but the Filipinos are not colonies, and have none of a colonists' regard for the superior power. The question that Dewey's victory created is only beginning to worry those who have to deal with it."

—Mr. Foster very happily said that the Governor General's last speech "was eloquent in what it did not touch. These

gentlemen are coming up to the end of their existence. They have seen the lightning flashes. Behind them stalk the ghosts of unfulfilled pledges. The member from Norfolk knew that it was the ghost of the promise of economical administration. There was another after the Minister of Trade and Commerce. Who took the Patron beauty on his knee and wooed her in soft language, and promised that if she would take him for life they would waddle down the path of life in accord in one thing at least. 'No more subsidies to railways.' There was one other member. He had the hardihood to stand up, and say to an Ontario audience that they had redeemed all their promises. Mr. Foster recalled a few of them, the promise to reduce the expenditure by at least three million dollars. The awful thing about it was not that they did not fulfill their pledges, but to have the hardihood, to say they did. My hon. friend said here was no greater calamity than war. Yes there is. It is to sit down in cowardly obedience to wrong and insult. (Cheers). It was bad enough to not fulfill pledges, but it was worse to brazen it out."

ESTEEMED EXCHANGES.

Montreal Gazette: It will be noted with interest that Sir Wilfrid Laurier's latest speech in parliament agrees with a former utterance, to wit: his October interview in the Toronto Globe. In his Toronto interview he said there was no power, no need and no intention in his Government to send Canadian troops to South Africa. In his speech he said the Government only sent the troops when it saw that there was a practically unanimous feeling in the country that they should be sent. Left to act on his own ideas Sir Wilfrid Laurier would have stood on Mr. Monet's platform, and no troops would have been sent.

Canal Enlargements.

Mr. Foster, in the course of his speech on the address, drew attention to the paragraph in relation to the deepening of the canals. He quoted the premier of Canada "let loose on the country," and showed that the deepening of the Welland Canal to fourteen feet was under way when Mr. McKenzie assumed power in 1873. Mr. Foster quoted Mr. Mackenzie's statement that deepening the St. Lawrence canals to 14 feet was impracticable. From 1879 to 1896, a period during which the premier declared the work proceeded at snail's pace, the Conservative Government spent \$32,414,691 on the canals. Mr. Foster quoted the returns brought down last session of the work completed and under contract on July, 1896, and it showed that the work to be done only amounted to \$6,151,000. This showed what a hazardous thing it was for his party to let the Premier of Canada entirely loose on a public platform in this country.

Filipino Tricks.

MANILA, Feb. 8.—The insurgents attacked the 1st Battalion of the 45th Infantry near Niac. A major and a captain were wounded, and one sergeant killed, but details of the engagement are lacking.

Ships arriving from Legaspi report that the insurgent General Pana concentrated a large force about the top of the town and made a sharp night attack on Major Shipman's battalion of the 47th Infantry, which occupied a large convent as a fort. One battalion and a battery have sailed as reinforcements for Shipman. The casualties are unknown.

A corporal and 4 men, while patrolling the railroad near Mabalacat recently, disappeared, and are supposed to have been captured. A searching party looking for them was ambushed and a corporal killed.

Troops Leaving Ireland.

CORK, Feb. 8.—Six British troopships will sail for Queenstown for South Africa within the next ten days denuding Ireland of regular troops. The transport Dictator has sailed for the Cape, taking drafts of the Gloucestershire, East Lancashire, North Staffordshire, and 2nd Norfolk Regiments.

ITCHING PILES...

Positively and permanently cured by Dr. A. W. Chase's Ointment.

Dr. A. W. Chase's Ointment is an absolute cure for piles, and has never been known to fail to cure the worst form of this disease which has baffled medical skill for ages.

This statement may sound rather strong to persons who do not know the superior merits of Dr. A. W. Chase's Ointment, but it is perfectly true, and heartily endorsed by the grateful testimony of thousands of men and women who have been cured by it after years of suffering, and after trying many preparations and consulting the best doctors.

Mr. H. Bull, Belleville, Ont., says: "I take pleasure in stating that after thirty years of suffering with Itching Piles, Dr. Chase's Ointment has completely cured me. I tried every remedy that was advertised, with little or no benefit, but as I have told different persons affected as I was, Dr. Chase's Ointment made a perfect cure."

Dr. Chase's Ointment has a record of cures unparalleled in the history of medicine. It is guaranteed to cure any case of piles. For sale by all dealers, or Edmanson, Bates & Co. Toronto.

JUR POULTRY EXPORTS.

Large Volume of this Business Between Canada and the United States

The magnitude of the business done between Canada and the United States in lambs and poultry is somewhat beyond the comprehension of those not immediately or indirectly connected with it.

To a Montreal Star reporter entreats Mr. S. H. Jones, who might be described as the Poon Bah of Sabrevois, Que., gave some figures which go to show what an important industry this is. Mr. Jones has been in the business for thirty years, besides being the vice-president of the United Counties Railway, mayor and postmaster of Sabrevois.

During the months of September, October and November, according to Mr. Jones' figures, there were shipped out of Canada 112,000 lambs, making altogether 569 car loads. These lambs were worth on the average about \$2.50 apiece, and the total value was therefore about \$270,000. There was paid in duty on these lambs to the United States Government \$90,000. They were handled by the New England Dressed Meat and Wool Company, of Somerville, Mass. The figures for the same period of 1898, however, show that there was somewhat of a dropping off in the business, for in the corresponding months of that year there were sent across the line 139,228 lambs. These lambs come from all over Canada, and during the period mentioned the number of carloads passing into the States at Rouses's Point from the west was 161.

POULTRY EXPORTS.

As regards poultry, S. H. Jones & Son, of which firm Mr. Jones is the head, has stated that there were eight to ten thousand live geese shipped to the poultry yards of Chas. M. Austria, of Mansfield, Mass., for feeding purposes. Mr. Jones states that he has seen at this place as many as 11,500 live geese and 5,000 live ducks at one time, and that it took 125 bushels of grain a day to feed them. This same firm has had as many at one time as 25,000 geese and 15,000 ducks, and killed 75,000 hens and chickens besides. Over half of the geese and ducks are exported from Canada.

Mr. Jones is an extensive buyer for the above mentioned concerns, and he states that most of his purchases are made in the townships, New Brunswick and Prince Edward Island.

FOLLOWING THE HOUNDS.

It is not alone in exceptional recreations like fox-hunting, that a woman needs steady nerves, strong muscles and a healthy, vigorous constitution. She needs them in her every day duties and pleasures. Recently a Buffalo lady called upon Dr. R. V. Pierce of that city and stated that she was so nervous that after months of trial she could not learn to ride a bicycle.

She was put under a scientific course of treatment, consisting of Dr. Pierce's Golden Medical Discovery before meals and his "Favorite Prescription" after meals. The "Favorite Prescription" promptly cured the weakness and disease of the organs distinctly feminine, from which she suffered and restored strength and steadiness to the nerves. The "Golden Medical Discovery" cleansed the blood, making it pure, rich and invigorating, and built up solid, muscular flesh. The lady now rides her bicycle with grace and ease and without trepidation. Both medicines are for sale by medicine dealers. Dr. Pierce answers letters from ailing women without charge.

"I suffered with a bearing down pain in my pelvis and a hurting in my back and loins," writes Mrs. Tillie Cunningham of Weir, Choctaw Co., Miss. "Whenever I would take a walk or ride very far it would always make me sick. After using Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery' for three months I can ride or walk and feel well afterwards. My appetite is good, all of my bad feelings have disappeared and I am strong and well."

You can secure Dr. Pierce's Medical Adviser free by sending stamps to cover customs and mailing only. Paper-covered, 31 one-cent stamps; cloth-covered, 50 stamps. Address Dr. R. V. Pierce, Buffalo, N. Y.

CARD!

To the Electors of Ward 4.

LADIES AND GENTLEMEN,—At the solicitation of a large number of the electors of Ward Four, I have nominated as a candidate for the election, on Wednesday next. I confidently appeal for your suffrages on my record, as Chairman of the Finance Committee for the past two years. I have not made a personal canvass, as I believe the electors will exercise their franchise for the candidates they think best suited to conduct the business of the city.

As the debenture debt of the city, when the sewers are completed, will be over \$500,000 I am opposed to any further addition to that debt without first consulting the citizens at a public meeting called for the purpose.

Yours truly
SIMON W. CRABBE.
Charlottetown, Feb 8th, 1900.

Glove Goodness

The only man who does not recommend our gloves, is the man who has some other kind to sell, our gloves are full of the quality that gives wear and warmth.
