Oil From Ships Kills Birds But Conviction Chance Slim

By THE CANADIAN PRESS

Hundreds of dead waterfowl are reported littering the beaches in the Bay of Fundy area as a result of oil pollution, and the chances of getting convictions against the ships probably responsible for the slaughter appear to be slim.

Wickerson Lent, a lighthouse keeper on Brier Island off the Nova Scotia coast, said the wild fowl in the thousands have died in the area during the last three months.

Hundreds of dead birds have also been reported floating in oil near Grand Manan Island, off the New Brunswick coast. Both islands are near the mouth of the Bay of Fundy.

The oil, floating on top of the water, sticks to the birds' feathers and prevents them flying. They waste away and eventually perish. Winds and currents bring the bodies ashore.

The lighthouse keeper said he thought ships going into Saint John, N.B., were to blame for the pollution. He speculated oil was dumped from their tanks before entering port.

HARD TO PROSECUTE

A spokesman for the transport department steamship inspection service in Halifax said Thursday it was difficult to collect evidence that would convict ships of oil pollution.

The inspector said it was against the Canada Shipping Act to dump oil in territorial waters and it was an international violation to dump it within 100 miles of the coast. He believed the coast guard had been asked to patrol the area.

His office had received reports of dead birds being found in the area, the latest in March from Fred Payne, a Nova Scotia wildlife biologist.

The inspector said that for a conviction it is not enough to see a vessel dumping oil. Oil would have to be taken from the water and tested to prove it came from a particular ship. This evidence would then have to be taken into court.

CAPTAIN CONVICTED

The captain of a foreign ship was recently convicted in a Halifax court when such evidence showed he was guilty of dumping oil in Halifax Harbor.

Dr. Donald G. Dodds, Nova Scotia assistant director of conservation at Kentville, said he knew a number of birds had been picked up by a department biologist after they had been killed by oil pollution, but he was not aware the situation was as serious as reported by the lighthouse keeper.

However, oil pollution was out of his department's jurisdiction and such incidents could only be reported to the transport department.

The dead birds being washed ashore include eiders, old-squaws murres, puffins and brants.

Detailed Planning Required In Sale Of Telephone Stock

MONTREAL (CP) — When Bell Telephone Company shareholder John Doe decides to buy some of the current issue of Bell capital stock, he fills out a form and mails it with his cheque.

About two weeks later he gets his stock in the mail. It's as simple as that.

But it's only that simple on the surface. Since last December, computers have been clicking, phones ringing, and Bell's employment office has been busy.

That's when detailed planning began for Bell's offering of 2,233,795 shares at $38 each to shareholders of record March 26.

The issue is designed to raise approximately $85,000,000 and the company says proceeds "will be used to finance the extension and improvement of the company's services and for the general purposes of the company."

Bell estimates expenditures for new telephone facilities at $221,000,000 this year and $238,000,000 in 1965.

The behind-the-scenes problems in making the operation run smoothly are multiple. Some 615 persons—about 500 of them, mostly women, hired for the purpose from outside the company—will work an average of five to six weeks on the project.

Office space—on three floors of a downtown Montreal building—had to be found. Then there was office equipment, even paper clips. Equipment obtained for handling the issue includes 717 desks and tables, 109 typewriters, 141 adding machines and 142 filing cabinets.

Printing supplies had to be procured. More than 3,000,000 circular forms and the like were printed and either forwarded to shareholders or kept for use within the company.

It is the 13th offer made by Bell since the Second World War, but not the highest in number of shares offered. In 1959, 2,606,935 shares were offered at $33 and with a 99.47-per-cent subscription the company raised $85,588,338. The last offer was in 1962 when 2,011,654 shares were offered at $39 and a 99.41 - per - cent subscription produced $77,990,328.

WOLF MAN FOUND DEAD

CANMORE, Alta. (CP) — Alexandre Gapiney, 57, known as the Wolf Man of Pigeon Mountain, is dead, police said here.

They found his body in his cabin Sunday after shooting his half-dog, half-wolf companion, Jaijai.

Police said Jaijai stood guard over his master's body and defied entrance to the shack at the base of Pigeon Mountain.

M. Gapiney was seen in the past in the pine forests near Banff National Park, carrying a club with sharpened spikes sticking out in several directions.

He was said to own three of the clubs, which resembled a medieval mace. He once said the largest, with eight-inch spikes, was used to kill bears.

Police said no inquest will be held.

Pigeon Mountain is about 50 miles west of Calgary on the Trans-Canada Highway.

EXPECTING BRITONS

Between 12,000 and 15,000 Britons are expected to settle in South Africa in 1964.

CONTRACT BRIDGE

By B. JAY BECKER

FAMOUS HANDS

North dealer.
North-South vulnerable.

	NORTH	
	♠ AJ852	
	♥ —	
	♦ 95	
	♣ 865432	
WEST		EAST
♠ 97		♠ KQ1043
♥ J102		♥ K8765
♦ Q10876 2		♦ 4
♣ Q7		♣ 10 9
	SOUTH	
	♠ 6	
	♥ AQ943	
	♦ AKJ3	
	♣ AKJ	

The bidding:

North	East	South	West
Pass	Pass	1 ♣	Pass
1 ♠	1 ♠	2 ♣	Pass
3 ♣	Pass	3 ♥	Pass
4 ♣	Pass	5 ♣	Pass

Opening lead—nine of spades.

This hand occurred in the match between Argentina and the United States during the world championship played in Buenos Aires in 1961.

At the first table, Howard Schenken, author of the recently published Better Bidding in 15 Minutes— Expert Bidding in a Week, and widely regarded as one of America's top players, held the South hand and opened the bidding with a club.

This bid was artificial and showed a good hand with at least 17 points. North, Peter Leventritt, made the negative (also artificial) response of a diamond to deny 8 or more points.

From then on, after Schenken had cuebid spades, the bidding was natural and a sound contract of five clubs was reached. The adverse cards being divided the way they were, Schenken made six for a score of 620 points, losing only a heart trick to the king.

At the second table, the Argentine North- South pair lost control of the bidding and wound up in the poor contract of six notrump, going down one against the jack of hearts lead.

The bidding followed this peculiar course:

North	East	South	West
Pass	1 ♥	Dble	Pass
2 ♦	Pass	4 NT	Pass
5 ♦	Pass	5 NT	Pass
6 ♣	Pass	6 NT	

The premature use of Blackwood—before a trump suit had been agreed upon— led to the fatal contract. South managed to discover through Blackwood that North had an ace and no kings, but did not learn until dummy appeared that North had a club suit he had never been able to show.

The result would have been much worse if West had been sufficiently inspired to choose a spade instead of a heart as his opening lead. In that case dummy's entry for the clubs would have been cut off and South would have gone down several more tricks.

As it was, the United States gained 720 points on the deal.

Glaciers Seen Possible Cause Of Earthquake

EAST LANSING, Mich. (AP) The earthquake in Alaska may have been triggered by the shifting weight of great glaciers, a Michigan State University geologist said here.

Dr. Maynard Miller, who has made an 18-year study of icefields and glaciers in Alaska and who was the chief geologist of the American expedition that conquered Mount Everest last year, said the glaciers at high altitudes in Alaska are growing bigger. Those at low elevations are shrinking.

"This changing weight of millions of tons of ice in this tremor-sensitive area could possibly set off an earthquake by creating an imbalance of stress in the earth's crust," he said.

The glaciers could not have been the direct cause, he said.

The primary cause rests with a series of faults—breaks in the earth's crust—along the Alaska coast, he said. When one of these faults slips a few feet, or inches, an earthquake results.

Whatever the effects of glaciers on earthquakes, Miller said, the reverse is certainly true: Earthquakes affect glaciers.

After the 1899 earthquake in Alaska, he said, the glaciers advanced spectacularly for several years. Similar advances might start now, he said, but the glaciers are not located in areas where they could cause damage to any large communities.

New Jet Airliner Goes In Service

LONDON (Reuters) — Britain's three - jets-at-the-tail airliner, the Hawker Siddeley Trident, has soared into regular scheduled service.

The 90-seat, 610-mile-an-hour airliner, took off on a first regular service for British European Airways to Zurich, Switzerland.

BEA has two Tridents at present with another 24 Tridents on order at a cost of more than £1,000,000 ($3,000,000) each.

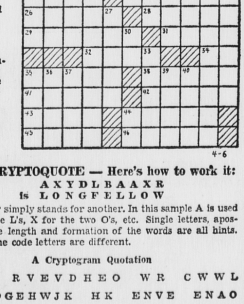
Saturday's Answer



DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation

E N A R V E V D H E O W R C W W L
T A K W D G E H W J K H K E N V E E N A O
V T A V D F V O F E W W D V E A. — F H D L A

Saturday's Cryptoquote: REPROOFS FROM AUTHORITY OUGHT TO BE GRAVE AND NOT TAUNTING.—FRANCIS BACON
