son is in the hospital and so is my two-year-old daughter. Another son has been severely burned. I live with my mother-in-law who doesn't like me because our nationalities are different. She put a curse on the house or me, when we moved here, but it has fallen on my children.

P. R.

ANSWER: The misfortunes that have befallen you are not due to my curse of your mother-in-law or anyone else. Only God knows why these things happen, and no human can bring them about through a curse.

If your children are in a large hospital, there is a social service or welfare worker there to help you. Contact this organization or the welfare worker immediately and I'm sure you'll be helped.

Miss Nissen cannot reply personally to readers but will answer problems of interest through this column.

The Stars Says

ear, you may find yourself drawn into some form of public or community enterprise and, if so, proper handling of this opportunity could yield enormous benefits in prestige and popularity.

A child born on this day will be gentle, sensitive and romantic in nature.

GARDEN RARITY

DRUMHELLER, Alta. CP—Twin dahlias, yellow and perfectly formed, were reported by Jack Brand in this east-central Alberta coal-mining town. The flower-grower said it was the first time he had seen such a rarity.

Columbus was the first white man to sight the delta of the Orinoco river on his third voyage in 1498.

U. S. - Spain Pact Signed

—In the Palacio de Santa Cruz in Madrid, U.S. and Spanish officials sit down to sign a military and economic aid treaty linking them as allies for the first time

in their history against Communist aggression. Left to right at the pact table are Maj. Gen. A. W. Kissner, USAF, head of the U.S. military mission; Spanish Minister

of Trade Manuel Arburua; Mutual Security Administrator George Train, and U.S. Ambassador James Clement Dunn, who signed for the United States. (NEA Radio-Telephone)

Federation Of Agriculture

longed operation and at the moment sizeable quantities of grain are either in stock, waiting to be bound, or in cases where the crop became weary and laid down on the job waiting for combining.

The combine has proven its worth this season in its ability to handle crops which were beyond the power of a binder. It is apparent that we have something to learn on the point of growing heavy crops with sufficient strength of straw to weather our Island gales and herein maybe the necessity of experimental work to determine where the difficulty lies in obtaining the proper balance of plant food and rate of seeding to promote maximum strength of straw.

Freight Assistance

The freight assistance Policy on feed grains and their by-products was inaugurated in October 1941, and up to August 31, of this year, freight assistance to the amount of \$4,460,195 had been paid on feeds imported into this Province at an average rate of \$9.36 per ton. The present assistance amounts to 66¢c per hundred weight and purchasers of feed will appreciate the fact that this amount if added to present feed prices would naturally increase production costs.

Help The U. S. Farmer

A. P. O'Shea general Secretary of the Federated Farmers of New Zealand thinks N. Z., should help show American farmers how to reduce production costs particularly in dairying where competition from vegetable oils is a serious problem. Mr. O'Shea would like to see American farm leaders visit N.Z. with a view to studying production methods and to forming an understanding which would lead to an alliance with American farmers.

Who Represents Farmers

The Country Gentlemen a publication which is not noticeably partial to farm organization in discussing where the American Dept. of Agriculture should seek guidance expresses the opinion

that too often policy is based on information and opinions obtained from officials and individuals which does not always represent the thinking of the majority. Reference is made to the Illinois Farm Bureau with a membership of 116,900 each paying \$15 per year, a group such as this says the Country Gentlemen while it may not represent all farmers in the state does represent a sufficiently large number to make it a safer guide—assessing farm opinion than individuals picked at random.

N. B. Potato Growers

A recent meeting of 600 potato growers held in N. B. demanded

increased producer representation and influence on their potato board and the paying of more attention to the growers interest and welfare.

Maritime Winter Fair

The Maritime Winter Fair will be in full swing by Nov. 1, and exhibitors are reminded that entries must be made shortly and visitors advised that it is not too early to start planning for a late fall vacation.

HALIFAX, (CP)—The port of Halifax prepared Wednesday night to handle ships diverted from New York by the threat of a United States east coast dock strike.

Sends Scrap of Flag To Admiral Peary's Widow

OTTAWA, (CP)—Prime Minister St. Laurent sent by registered mail Monday a scrap of a United States flag to the widow of Rear Admiral Robert Peary.

Accompanying the piece of flag was a letter from the prime minister asking Mrs. Peary to accept it as a symbol of Canada's high respect for the admiral's valuable work in the Canadian north. The piece of flag was recovered

Mrs. Duncan Finlayson, Quinley, Massachusetts, were recent visitors of Mrs. Agnes Stuart, Whim Road.

Mr. and Mrs. Gerald Lannigan and family, Montague, spent Sunday at Whim Road with Mrs. Lannigan's parents, Mr. and Mrs. Freeman Millar.

Mr. and Mrs. A. J. MacPherson and family Bellvue, were Sunday visitors of Mr. and Mrs. Robert Campbell, Whim Road. —GU.

WATER COSTS PLENTY

You may have sung that song about "cool water". On the Sahara desert you might trade your camel for a cup of it. But just in case you think this has nothing to do with you—in the next few days you may pay a lot more than you expect for cool water.

The trouble with water is, it gets too cool in the wrong places. For instance, water got too cool in Mr. Smith's car radiator last year—and he paid \$29.50 for frost damage repairs. Mr. McDonald also paid a big repair bill of \$59.75 which included replacing parts and extensive welding. From coast to coast there were thousands more.

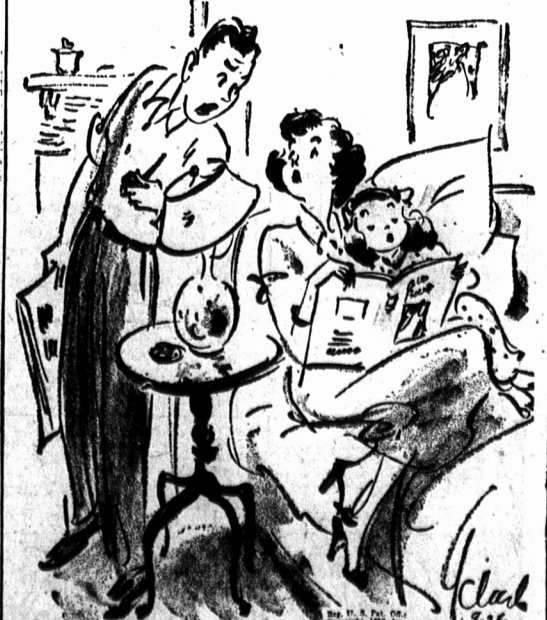

The funny thing is, in spite of repeated reminders the same thing happens year after year. Folks, like yourself, who are normally cautious, play a long shot with the water in the radiator of your cars... and come the cold weather you lose. It may be a throw-back to the days when all anti-freeze boiled away. But you don't have to take these chances now, that's for sure. You can put Chryco Glycol anti-freeze in your rad today—and

whether it freezes tonight or stays "Indian Summer" warm for weeks, you can be sure that your rad and engine block will be fully protected—because Chryco Glycol won't boil away. We repeat—Chryco Glycol anti-freeze won't boil away—even in warm weather!

So why wait for the rush—when mechanics are busy fixing busted rads—and the junk-man does a land-office business lugging damaged parts away? It costs no more to get your Chryco Glycol now—and it may cost you a pretty penny less. But that's not all. Chryco Glycol contains a rust-resistor which prevents your rad and engine parts from rusting, as well as giving complete protection against frost-damage. You have a double gain for sure—and no risk of loss. So, while you are thinking about it—just drop in to your Chrysler-Plymouth-Fargo or Dodge-DeSoto dealer's place. Don't be a sucker and contribute to the annual Jack Frost fund, for a damaged cooling system. Get Chryco Glycol today—it won't boil away!

"All that stuff you read to her about handsome princes and gold palaces—she's going to be disappointed in the guy she really marries someday."

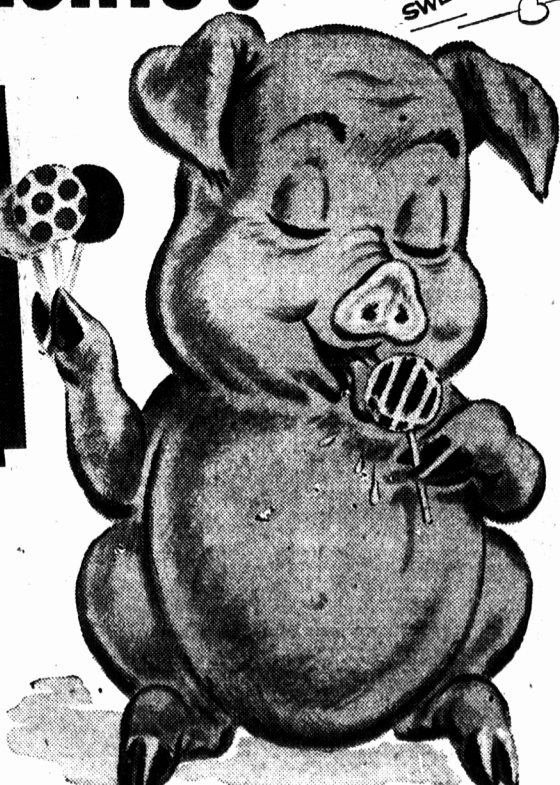

SENSATIONAL NEW STARTER INCREASES WEANING WEIGHTS!

BABY PIGS HAVE A SWEET TOOTH!

NEW "SUGAR-COATED" PELLETS OFFER BIG BENEFITS

- ✓ Pigs start eating solid feed much sooner
- ✓ Pigs grow much faster
- ✓ Increases weaning weight approximately 10 lbs.

NEW FUL-O-PEP PIG STARTER PROMOTES RAPID GROWTH!

Ful-O-Pep Pig Starter, built on oatmeal and containing the latest scientific balance of ingredients including valuable antibiotics, is now further improved by the coating of sugar. Increased palatability results in pigs eating more at an earlier age when bigger gains are made on less pounds of feed. Then, too, pigs build up greater resistance to disease... develop into healthier pigs that weigh up to 10 pounds more at weaning.

For full particulars—
