

### CHURCHILL IN BRONZE

Sir Winston Churchill, seated on platform with Lady Churchill, gazes upward at controversial statue of himself during unveiling ceremonies in London. Some critics have found fault with the bulldog-like pose depicted by the two-ton bronze statue, the work of sculptor David McFall, but not Winnie. His comment: "It's nice. Yes, it's nice." ## Intelligence Test For College Said Gruesome Experience

By G. K. HODENFIELD  
Associated Press Writer  
WASHINGTON (AP)—Purely in the interests of science, I took a test to see whether I'm smart enough to go to college. It was a gruesome experience. About 100,000 American high school seniors will take the same test next Saturday. How they fare will play a part in determining whether they can get into the college of their choice next fall.

Frankly, I don't see how hardly anybody gets into college these days. The test was that tough. The test I took was put together by science research associates of Chicago for the American college testing program. Its tests will help colleges determine in advance which students are best qualified for admission.

The test took three hours—180 of the longest minutes I've ever spent—and covered English, social science, natural science and mathematics.

**WIDE-OPEN CHOICE**  
I was given some samples for your amusement and edification. All the questions are multiple choice, which means if you don't know the answer you can take a wild guess.

For instance, in the mathematics section:

1. How many digits are there to the left of the decimal place in the square root of 692038.427537? (A) 3; (B) 4; (C) 5; (D) 6; (E) 8.

2. When added to both the numerator and denominator of 13/20, what number makes the resulting ratio equal to 3/4? (A) 4; (B) 5; (C) 7; (D) 8; (E) 10.

3. Two oil-wells pump oil continuously. The first produces 4,000 barrels of oil a day, which is 33 1/3 more than the second. What is the total daily production for both wells? (A) 5,333 1/3; (B) 6,666 2/3; (C) 7,000; (D) 8,333 1/3; (E) 9,000.

4. If a car travels "A" miles in "B" seconds, how long will it take to travel "C" miles?—(A) CB over A; (B) C over A; (C) AB over C; (D) C over B; (E) C over AB.

We'll get to the answers to these questions a little later on.

**SCIENCE TOUGH**  
Following is a sample of the science test. Read the passage, then answer just one question about it.

"When cosmic rays enter the earth's atmosphere from outer space, they frequently collide with atoms of air and occasionally produce nuclear reactions. One of these products is an isotope called carbon-14 or radio-carbon. During the millions of years the earth has been in existence, a large quantity of radio-carbon would have accumulated. This has not happened because carbon-14 'decays' after a time and transforms into atoms of an entirely different element.

"Before this occurs, however, radio-carbon unites with oxygen to form carbon dioxide gas, which circulates freely in the atmosphere with non-radioactive carbon dioxide already present. Living plants and animals absorb both types of carbon dioxide. On the death of the organism, radio-carbon is no longer taken up, and the existing radio-carbon slowly but inexorably begins to decay until, after many thousands of years, there is virtually none left.

"By measuring the amount of radio-carbon in an ancient piece of wood such as an Egyptian funerary bark and knowing at what rate it decays, archeologists can reckon on the time at which the parent tree died."

**REDWOOD OR VIOLET**  
Now, what can be inferred from the passage about the amount of carbon-14 in a flourishing giant redwood tree compared with a freshly picked violet?—(A) The amounts would be the same; (B) The redwood would have more; (C) The violet would have more; (D) None of these.

Oh, yes; the answers to those questions above, Mathematics: A, D, C, A. Social studies: B. Natural science: A.

**CAMPAIGN GOING WELL**

OTTAWA (CP)—Sales of Canada savings bonds are running 27 per cent ahead of last year, with the campaign just past the halfway mark, the finance department announced Tuesday. Total purchases of \$272,000,000 have been recorded for the first 14 days of the campaign compared with \$214,000,000 for the same period last year.

NEWS AT 6 P.M.

A very enjoyable evening was spent at the home of Mr. and Mrs. Harold MacWilliams on Wednesday evening Oct. 26th, when relatives and friends gathered to tender a shower in honor of Mr. and Mrs. Junior Rix. The livingroom was tastefully decorated for the occasion.

The newly-weds were escorted to their decorated seats of honor. They received many lovely and useful gifts including a sum of money which was opened by Mrs. George Wood assisted by Miss Clareta MacWilliams. Miss Thelma Currie, Junior in a few well chosen words thanked all for their lovely gifts and good wishes. All joined in singing "For they are jolly good fellows". Lunch was served by the hostess assisted by several of the ladies. The remainder of the evening was spent in social chat. D.U.

### Ladies Aid Plans Rummage Sale

SUMMERSIDE — Mrs. Heath Strong presided over the November meeting of the Ladies Aid at the Prince County Hospital yesterday afternoon in the Memorial Nurses residence.

Plans were made for a rummage sale to be held Nov. 27, in St. Mary's Hall with Mrs. R. E. Ellis, Mrs. W. F. Strong, Mrs. W.P. Callaghan, and Mrs. LeRoy Holman the committee in charge.

It was decided to hold a pantry sale Nov. 13 at Holman's. Mrs. K.K. Beer was requested to show slides of her European trip and a date will be set for a future time.

A discussion was held on a marathon bridge to begin after Christmas and a committee comprising Mrs. Callaghan and Mrs. W.A. Allen was appointed to make the arrangements. The possibility of an amateur cavalcade to be held in Summerside was discussed and Mrs. Beer was appointed to look into this matter.

### GERMAN CITIES

Munich, with a population of 1,600,000, is Germany's third largest city, after Berlin and Hamburg.

### SO YOU DON'T BELIEVE IN DEMONS?

You'll be amazed at the evidence to support their existence—and to learn of the famous people who believe in them. Read about it in this week's Star Weekly.

## Irregularities In Union Voting Alleged In Ballot By Seamen

By JOHN LeBLANC  
Canadian Press Staff Writer  
OTTAWA (CP)—Irregularities in union certification votes among seamen of two west coast companies were alleged Wednesday by the Canadian Brotherhood of Railway, Transport and General Workers (CLC).

Brotherhood counsel Maurice Wright of Ottawa charged before the C.A.A. Labor Relations Board that voting lists had been "padded" in favor of the rival Seafarers' International Union (I.U.), which won majorities over the brotherhood in both companies.

The challenged votes were on the tugs of Straits Towing Limited, where the count was 38 to 20, and Gulf of Georgia Towing Company, where it was 15 to 8.

The brotherhood gained majorities in eight other west coast companies during votes held last week. These results were not challenged by the SIU at a hearing Wednesday.

**NO FORMAL EVIDENCE**  
The brotherhood presented no formal evidence to back up its claim of irregularities, and SIU

into the west coast situation, where the two unions have been engaged in a stiff fight for dominance among British Columbia seamen.

Chairman Smith said the board has received applications from the SIU for certification as bargaining agent, not only for the two companies in which it has majorities, but in seven of the eight won by the brotherhood.

They were dated Oct. 26 and 27, the latter the day of the vote. The strategy of the move was not explained. The SIU lawyer said he had no information on it.

**NEW SERIES OF VOTES?**  
Purpose could be to precipitate a new series of votes. The SIU lawyer has been certified for the west coast companies, though holding contracts with most. The latest votes were called when the brotherhood, claiming majorities, applied for certification. The SIU went on the ballot as "intervenor."

The brotherhood lawyer asked the board to throw out the new applications and grant certifications on the basis of last week's votes, except in the two cases he challenged.

**COMPLICATING FACTOR**

Meanwhile, the board made it known that the Seafarers had thrown a new complicating factor

A type of concrete was used by Roman builders centuries before Christ.

**GIVE-A-AWAYS...  
GIMMICKS...  
STAMPS...  
NOT FOR ME  
I OWN MY OWN BUSINESS...  
I'M A CO-OP MEMBER**

**YOU'VE HEARD THE OLD SAYING: "YOU CAN'T GET SOMETHING FOR NOTHING." SO I DO IT THIS WAY:**

- (1) I BELONG TO THE CH'TOWN CO-OP!**  
As a member I'm a shareholder and PART OWNER of a flourishing business. So, when I shop, I'm buying from myself!
- (2) I GET MORE THAN GOODS**  
You've probably never thought of putting such things as savings, retirement funds or freedom on your shopping list. But I buy these with every dollar I spend at my CO-OP.
- (3) I'M PART OF A POPULAR PLAN**  
No matter what we do to earn a living, we are all consumers of goods. We want our dollars to go further. By joining a CO-OP, people become partners with their neighbors. The more members, the more people there are sharing ownership and control, so the more democratic business becomes. CO-OPS can never become monopolies.
- (4) AS CO-OPERATORS WE'RE FREE**  
No one becomes a shareholder in a CO-OP to make a profit! CO-OP member-owners pay COMPETITIVE prices for their needs. Surplus money, after all costs of operating are paid, is returned to members—not according to the number of shares owned, but according to their patronage.
- (5) AS CO-OPERATORS WE'RE OWNERS**  
When we spend money at the CO-OP we're helping to pay for the buildings and other facilities. But as CO-OP members, we share ownership of what we pay for!
- (6) CO-OP DOLLARS DO GO FURTHER**  
SURPLUS dollars returned to CO-OP members are "YOURS TO USE AGAIN!" Sometimes these dollars may be needed for working capital in your CO-OP, and a certain part may be temporarily retained to be paid out in cash to you with interest later on. But they are credited to you and belong to you!
- (7) CO-OP DOLLARS REPRESENT SECURITY**  
Your share capital, which is started when you apply for membership, always belongs to you! So do the dollars credited to you from surpluses. Even if not refunded in cash from time to time, this money belongs to you and can be withdrawn if you move away or reach retirement age.
- (8) YOU'LL BE DOING A SMART THING**  
Joining the Charlottetown CO-OP gives people a new self-respect and dignity. You'll be joining millions of consumers, all over the world, who have decided that business should be a servant of people—not a master who seeks to make a profit from people, thereby making people his servant.
- (9) WHERE DO YOU STAND?**  
Are you a member? Do you make full use of YOUR CO-OP? Do you benefit by the savings co-operation makes possible, or do you depend on Give Aways, Gimmicks, green stamps?

**GIMMICKS GIVE-A-WAYS STAMPS**

**ONE DOLLAR DEPOSIT....**

It is all that is required to become a member and a partner with your neighbors, regardless of race, color, creed, religion or political belief... in a flourishing, democratic business, established by local folks like yourself to provide goods and services at COST. The money you spend and the savings accumulated stay right in your own community, SHARED EQUALLY by the members according to their patronage.

**Nobody EVER becomes so big, that they can tell EVERYBODY else what to do!**
