**LOOKING FOR A BARGAIN?**

With prices so much higher than they were before the war, bargains are hard to find these days.

For example... materials used in building houses have gone up 179%.

Food is up 107%.

The average wholesale price of all the things people buy has gone up 116% (and those are government figures) but during the same period the price of gasoline has gone up only 35% (less than one-third of the average).
