Pullets Should be Laying.

Young pullets hatched in March and April ought all to be laying this month. Later hatched ones if not laying in November will probably, if left to themselves, not lay before spring when eggs are down to fifteen cents per dozen. A well known poultry farmer showed us his account for December with 125 pullets. The net profit for that month from eggs alone was $39.39; from the same pullets in April following, the profit was $14.97, and he got 50 dozen more eggs in April than in December. Now this is a striking lesson to all who keep hens for profit. Get all the eggs you can at this season; if other crops are short, eggs always bring cash. Probably 45 cts. per doz. by Christmas. Therefore get the pullets to laying early when prices are highest. Rev. S. W. Squires, of Franklin, Mass., says: "For the purpose of seeing how many eggs I could obtain last winter from twelve hens, I used four large cans of Sheridan's Condition Powder. I believe it is the best preparation known to increase egg production. I saved part of the eggs for hatching after forcing the hens four months for all they were worth with the Sheridan's Powder, and I never had a greater per cent. of fertile eggs or more vigorous chickens. In brief, I do not believe I can afford to be without the powder to give health and vigor to young hens." If you cannot get it near home, I. S. Johnson & Co., Boston, Mass., the only makers of Sheridan's Powder, will send for 50 cents two 25 cent packs, five packs for $1.00; or for $1.20 one large two pound can of Powder, postpaid; six cans $5.00, express prepaid. Sample copy of the best poultry magazine sent free.

A PRINTER'S ILLS.

A Brantford Compositor has Diabetes—He Drops 40 pounds in weight in a short time—How he was Cured.

BRANTFORD, Oct. 15—Thomas Hazelhurst, a compositor in the Courier office in this city, has seen some ups and downs in health within the past few months. Last spring he found himself suffering from diabetes in a very severe form. In a few weeks, he lost forty pounds in weight. His system kept on running down and Mr Hazelhurst was very naturally alarmed. After trying many remedies without benefit, he began using Dodd's Kidney Pills. Three boxes made a big change in his condition, and six bottles worked a complete cure. Mr. Hazelhurst is to-day better than he has been for years. Add one more to the list of diabetes cases cured by Dodd's Kidney Pills.

"Well, Tommy, I'm glad to see you are getting along so much better at school," said that young man's uncle.

"You have gone a whole week without being whipped, haven't you?"

What is CASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhœa and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."
DR. G. C. OSGOOD, Lowell, Mass.

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other hurtful agents down their throats, thereby sending them to premature graves."
DR. J. F. KINCHELOE, Conway, Ark.

Castoria.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."
H. A. ARCHER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it."
UNITED HOSPITAL AND DISPENSARY, Boston, Mass.

TO MY GIRL.

If I should ask you to be mine,
What would you say?
Would you my proffered hand decline
And say me nay?

Or would you temporize, and say
Nor No nor Yes?
And have me, tortured by delays,
To try to guess?

Or would you tell me Yes to-day,
You little flirt,
And No to-morrow, just in play,
To see it hurt?

Or would you grant me happiness
For good and all,
And make me earnest answer Yes,
Without recall?

I wish you'd tell me, dear, the truth
Without a mask;
For if you promise Yes in sooth,
Perhaps I'd ask!

HAS NO SCIENTIFIC BASIS.

Vaccination Has, However, the Support of Incontestible Experience.

Ought we to continue to vacinate if we cannot give a scientific why and wherefore for our work? asks the London Hospital. This question may be answered by asking another, or several others. Ought a baker to bake bread and his customers to eat it if he cannot give a scientific demonstration of the process of fermentation which takes place in the dough? Ought a farmer to sow corn who is not able to explain the chemico physiological progress of the development of the radicle and the pulmule? The truth is—and we are almost ashamed to put such an elementary proposition into the pages of a scientific journal—that the facts and empiricism, arts and manufacturers, all take precedence of science in the order of human development. Whole generations of men—the majority, indeed, of mankind—have lived and worked and died without the consciousness that science was so much as possible. Science—the knowledge andcomprehension of things in their essence and causes—is the latest of all human developments.

We must, then, do with vaccination as we do with opium. We ask of opium What is its history? What has it done in medicine? And the answer is that of all substances which mankind has yet discovered it is the most indispensable for the beneficent work of the relief of human pain. Therefore, though we still lack a complete demonstration of the therapeutic modus operandi of opium, we continue to use it and shall probably go on doing so to the end of time. Similarly we ask of vaccination this question of questions: What has it done in the world? And the answer is that it has defeated in open conflict one of the deadliest enemies of mankind, and has put us on lines of investigation which may rob all pathogenic organisms of their terrors. If such should be the grand result, it is obvious that the mind of man, by how much it is delivered from ignoble bodily fears, by so much will it rise to greater and greater heights of boldness and intellectual achievement. This we can all see. But medical men, as custodians of the science as well as the art of healing, must constantly remember that vaccination and inoculation can never achieve these magnificent results until they are firmly established upon a basis of scientific reason, as well as upon a foundation of solid and unchallengeable fact.

Sacred Rights of Property.

A curious fact has been brought to public notice in England by the conduct of Rev. John Vallancy, perpetual curate of Rosliston, who, in the Burton County court, prosecuted the daughter of one of his parishioners for trespassing in "his" churchyard, and damaging "his" hay, by visiting her sister's grave and placing flowers thereon. For this outrage on the sacred rights of property he claimed damages to the amount of 1s 6d. He contended, says the New York Evening Post, that the churchyard was his private property, and that no one had a right to go into it without his permission. He cut the hay and stacked it in his yard, and had by a formal notice interdicted the defendant from damaging the crop by trimming the grass over her sister's grave, which has been done for three years. When the young lady persisted in visiting the grave he followed her, took hold of her, and, with a contemptuous remark upon the flowers which she had placed there, knocked them off the grave with his stick. The reverend suitor lost his case because he was only a perpetual curate. Had he been a rector he could have recovered. A London newspaper in commenting upon the case says: 'By two sentimental fictions the churchyard is God's acre, and the church the national or the people's church. But in dry law God's acre is the incumbent's freehold, and the only right of the people in the 'national' churchyards is the right to be buried there. 'The rude forefathers of the hamlets' the 'village Hampdens,' and all the rest, when once laid to sleep, merely serve the purpose of enriching the parson's hay crop, and their posterity may only visit their graves subject to the permission and convenience of the lord of the soil.'

Simple Explanation of Grip.

Medical writers make it clear why grip is so fatal. They tell of hemorraghic and pyæmic or septico-pyæmic results, with purulent and gangrenous inflamation of the lung tissues and frequent metastasis to other organs. One case of hemorraghes and hematomas in the muscular tissue, parenchymatons bleedings by diapedesis, pachymeningitis hemorrhagica interna, is mentioned. In many cases there is hyperæmia of the pia, also meningeal inflitration and suppurative meningitis and hemorrhage into the lateral ventricle, and very frequently lobar pneumonia.—St. Louis Post Dispatch.

Sissy Wayback's Natural Mistake.

Johnny Wayback—Did you see that young lady from the city? She's got on a coat, and vest, and shirt, and collar, and necktie, and a man's hat, and most everything!

Little Sister—Hush! It's wicked to make fun of crazy people.—Cincinnati Enquirer.
