

A Feature For Every Friday Among The Farmers Federation Of Agriculture News

Harvest Days

What amounts to a minor disaster has swept three of our most important crops this season. A very substantial portion of the hay crop is a complete loss from a feeding standpoint. Early cut grain has suffered serious damage in stock while a percentage of the later grain is badly lodged and if rusted will not ripen or fill satisfactorily.

It is difficult to appraise damage by blight to the potato crop but certainly it will be of considerable magnitude, loss to our farmers in the three crops mentioned will run into very large sums.

The corn crop looks very promising and if not damaged by frost for another two weeks will provide valuable supplementary feed for cattle.

Prospects are for a bumper root crop, a crop which is not so prone to damage from weather conditions. To summarize the situation, hay, grain, potatoes and fruit have taken it on the chin while corn, roots, and grass still have plenty of fight left.

Island Organizations Meet

A significant meeting took place on Wednesday evening when directors and executive officers of the Women's Institutes, Credit Union League, Co-operative Union, and Federation of Agriculture met together for the first time to consider jointly the possibility of co-ordinated effort and action in the carrying out of their various programs.

It would appear sensible and reasonable that organizations that have in the main, a common objective, the improvement and enrichment of rural life, should work more closely together in furthering their aims.

The draft of a very thorough analysis of organized progress in the past, our present shortcomings and a blueprint for the future, submitted by L. P. McIsaac formed the basis of the discussion.

A committee was named to give the report intensive study and instructed to bring its findings to a future meeting of the organizations involved.

Folk Schools

Plans are now being made for an announcement in detail will shortly appear of a Folk School to be held in the latter part of November at Cavendish.

Folk Schools are, in brief, a means of making better citizens and educating people to accept more responsibility in organization and community work.

In other provinces the Folk School movement is gaining in popularity and is credited with a real contribution in rural uplift.

To warrant such a school a minimum of twenty students is necessary and it is hoped that various organizations will be interested to the point of sponsoring suitable candidates.

Rural Youth Fair

September 18th is going to be a big day for the Exhibition grounds for rural young people of the Province. On display for judging will be club calves, poultry, grain, cooking, needle work, and vegetables.

In the afternoon winners in the Provincial Public Speaking Contest will be decided and at night the Junior Farmers clubs will stage a square dance competition. It all adds up to a full day for the young people and a profitable one too, for the older ones who attend and show their interest in the work of our young people.

Reserve September 18th and give the young people our support.

The Bag Situation

Feed and potato bags are made from burlap, burlap is made from jute which is practically all grown in Pakistan. Before the partition of India the crops and the mills to process it were all in India, but after the partition all the mills were in India and practically all the jute in Pakistan.

These two countries have engaged in a series of political, religious and currency squabbles in complete dislocation of the jute industry. Pakistan placed heavy export duty on jute, the mills in India closed down and chaos resulted.

The whole incident demonstrates the fact that what happens in far away countries can have a very important effect on our local economy.

Federation Meetings

Federation meetings are being held at four different points for the convenience of members in surrounding districts. On September 8th members in the Eton area gathered to hear the chairman of the Potato Board explain last year's operation and outline prospects and plans for this season.

The Secretary of the Federation outlined the policies and achievements of the past and plans for improving and strengthening the organization. Similar meetings are planned for the 7th at Fort Augustus; the 11th at Bedouque, and the 13th at Brookfield.

Members and others interested are urged to attend these meetings, take part in the discussions, criticize where necessary and make suggestions for improvement.

Farm Forum

Although Farm Forum does not commence until October 29th, it is now too early for discussion groups to start planning the coming season's program. Last year's leaders can be contacted by the members and seeking to interest new ones.

In districts where Forums operated in the past but fell by the wayside last year, this is the year to reorganize and make use of a project which has much to offer in the improvement of community life and in the laying of a firm foundation for other organizations.

Cattle Exports

Statistical reports show that during the past three years the numbers of cattle and calves sold from the Province to public stock yards, packing plants, and for direct export, has been steadily increasing. In 1946-10,965 cattle and calves were sold. In 1950-16,218, and up to the last of July this year—10,305.
