No. 11 Queen Street, Aug. 7, '80.

THE DAILY EXAMINER.

AUGUST 19, 1880.

Though the Marquis of Anglesey is six
times a millionaire, English and French
society is cutting his acquaintance; be-
cause, being pledged to marry Mrs. Wet-
more, he left her to "suicide," and married
another lady.

The Montreal Herald (Opposition) re-
ferring to the bargain about to be effected
by the Government and the matter of the
Pacific Railway, says:

"If Sir John should bring over with him
such a contract as this—the land grant
being the chief remuneration given by the
country—we shall think that he has done a
good work, and we hope that the Citizen's
announcement will be the harbinger of it."

At a meeting held on the 6th inst., the
Anglo-American Cable Company received
reports showing that the total receipts
from 1st January, 1880, including a balance
of £5,169 16s 9d brought over from the
last account, amount to £272,231 16s 9d,
and that the traffic receipts show a decrease
of £19,970 as compared with the corres-
ponding period last year.

The total expenses of the half-year, in-
cluding income tax and repair of cables,
&c., as shown by the revenue account,
amount to £55,044 9s 9d. The directors,
under the powers conferred upon them by
the articles of association, have, before de-
claring the net profits, set apart the sum of
£75,000 to the Renewal Fund, leaving an
available balance of £141,187 7s 0d.

As Others See Us.

A Correspondent of the Moncton Times
concludes an interesting account of his
recent visit to the Island as follows:—

"No people can be more sociable and
hospitable than the friends. They keep
open houses for their friends, and welcome
them at all times. 'We harness up and
drive to a friend's, and stay all day, when-
ever we feel like it,' we are told by one of
them. 'There are more than the average
number of pretty girls, and social circles do
not assume the airs of exclusiveness which
are so common in many places. The ladies
are literary in their tastes, carry books
with them everywhere, and read while sail-
ing, visiting and picnicing. The long and
lonely winters, where there is little inter-
course with the outside world, are favorable
to this taste for literature, and reading
circles, literary clubs, and classes meeting
from house to house, combining social in-
tercourse with study, are numerous at the
season.

The hay and grain crops were never
better, and potatoes look promising. Most
of the hay has been secured, and the re-
apers are gathering the grain. In some dis-
tricts the wheat is slightly affected by
weevil, but the crop is so large that this
will hardly be felt in the aggregate. A
very large quantity of grass seed will be
gathered this year, many acres of grass hav-
ing been cut so as to save the seed. With
the good crops, mackerel plenty, busi-
ness brisk generally, and the hotels and
boarding houses full of strangers, the people
cannot help feeling good. One will, in fact,
see more general prosperity on the Island,
and fewer signs of poverty than almost any-
where else.

The whole Island is not, by any means, un-
der cultivation. Thousands of acres of fertile
land are lying idle, because those who should
have cleared and planted them have gone else-
where. A very much larger population than
the Province has at present could obtain a
comfortable living by the cultivation of its
soil.

Truth Speaking.

SIR JOHN BLAMED FOR SPEAKING PLAINLY
TO ENGLISHMEN.

What is the Toronto "Globe" at now,
but lecturing Sir John Macdonald is if he
were a school boy, for his plain speaking to
the Manchester manufacturers! "A judi-
cious statesman," it says, "seeking aid
from the capitalists of a foreign country
would hardly run full tilt at the cherished
convictions of its Administration, its Opposi-
tion, and nearly all its inhabitants." This
gives us to understand what the
"Globe" thinks he should have done. He
should have talked "soft sawder" to the
English public, and should have deceived
them by holding out the hope that protec-
tion would soon be abandoned in Canada.
Supposing he had done this, while all
the time secretly determined to stick
to protection to the last, the organ
that now blames him for speaking the
truth would have been unable to
find language severe enough for his con-
demnation. We dare prophesy that his
courage in speaking the truth so plainly he
will receive the hearty approval of the Cana-
dian people; and further, that he will by
so doing, command the respect of the En-
glish public as well. Our friends in the old
land are not admirers of prevarication and
deceit; downright plain speaking is what
they like to hear, even should it not be on
their own side of the question at issue.

New Canadian Industries.

THE MANUFACTURE OF SILK.

The manufacture of silk and satin dress
goods promises to assume large proportions.
At present, the factory of Messrs. Corri-
veau & Co., of Montreal, is turning out
considerable quantities for which the firm
find a ready demand and which are con-
sidered equal, and in some important
points superior, to the imported articles.
Messrs. Corriveau states the existing tariff
protects and fosters their interests, whilst
it enables them to place their manufactures
in the hands of retailers from 20 to 40 per
cent. less than similar grades of imported
goods. The factory is fitted with a very
complete complement of the best machin-
ery, which though of an expensive and in-
tricate character, is nevertheless nearly all
of Canadian construction, only some two
or three machines being brought from the
States. One loom is successfully adapted
for steam power by Mr. Corriveau him-
self, a result not hitherto accomplished on
this continent. With but one exception,
all the labor employed is Canadian, so that,
practically speaking, both in machinery
and labor, it is thoroughly a Canadian in-
stitution. Mr. Corriveau is adding new
machinery preparatory to commencing the
manufacture of silk and satin ribbons, for
which he confidently anticipates a demand
more than equal to his power of production.

Still another cotton factory to be started—
Mr. Whittaker, a large manufacturer of
Manchester, England, and who visited Cana-
da in the spring with a view to establishing
one of his sons in business here, has written
fully a friend in Ottawa stating that he has
made up his mind to start a cotton fac-
tory in Canada capable of giving employ-
ment to 300 hands. The site will be fixed
on when he returns in the spring, and
among the places mentioned are Lachute,
Port Hope, Valleyfield, and Beauharnois.

Clippings from Late Papers.

MR. W. H. OGLIVIE, a prominent merchant
of Montreal, has gone to the Northwest to
establish a number of wheat-buying stations
there.

CHOLERA INFANTUM has caused a great
many deaths in Truro and vicinity this sum-
mer. Some cases have been reported in
Moncton.

NOVA SCOTIA'S Provincial Exhibition is to
be held at Kentville on the five days com-
mencing September 27th. The total amount
of prizes offered is \$6,534.95.

It is said that along the line of the Red
River, spring wheat in many places has
yielded from 35 to 40 bushels per acre—an
important factor in the calculations of new
settlers.

The brigantine W. N. H. Clements, of St.
John, Captain Mitchell, which was cleared at
Halifax on Saturday for London by Mr. I. H.
Mathers, takes 13,476 boxes of lobsters,
valued at \$65,837, and other cargo, making a
total value of \$68,277.

A Winnipeg despatch of the 10th says:
"A harvest about completed, and harvest-
ing of grain has commenced. A great quan-
tity of barley and oats is already out.
Wheat is ripening beautifully, and will be
ready for the reaper on Monday next. A
heavy yield is predicted everywhere.

A recent English Parliamentary return
shows that notwithstanding a very consider-
able reduction in the rate of taxation in
Cyprus, since it was acquired by the
British Government, the revenues have in-
creased. In the fiscal year, 1879-80, the
receipts were £115,165 sterling, being
£37,000 in excess of the expenditure.

The Governor General is expected to return
to Quebec by the 4th September, on which
date arrangements are being made for a grand
dinner and ball to take place there. It is ex-
pected to be one of the grandest affairs that
have ever taken place there. The English
fleet and two American frigates are expected
to be in port about that time, and probably
some French war vessel also.

LARGE EXPORTATION OF LIVE STOCK.—A
large exportation was made per the steamer
Texas, of the Dominion line, which left the
Mersey for Quebec on Monday, consisting of
22 bulls, 105 cows, and 16 calves, all of the
Hereford breed, selected from the herds of
Messrs. J. E. and J. A. Green, Mr. Price, and
Mr. Rodgers. Also sheep: 5 rams, 15 ewes
Cotswolds, and 25 rams and 54 ewes Shrop-
shires, selected from the flocks of Mr. Bird,
Leightonwood, and Mr. Ward, Brampton.
Horses: 2 Clydesdale and 3 sire stallions.
Dogs: 2 greyhounds and 5 collies. The
"tween decks of the steamer Texas presented
the appearance of a show yard.—Liverpool
Journal of Commerce.

The Toronto "Globe" being cornered,
admits that had the late Government con-
tinued in power, Sir Richard Cartwright
would have been compelled to lay new taxes
on the people. But says the "Globe" he
would not have given protection. That is,
he would have raised the duty a two and a
half per cent, all round, just as he did in
1875, which, while imposing new burdens
on the people, would not foster a single in-
dustry. Tea and molasses would have paid
their 2½ per cent extra, just as cotton and
other goods which this country is capable of
manufacturing, instead of the duty on tea
being actually reduced and a protective im-
post placed on goods that can be manufac-
tured in this country as at present. It was
this policy that the people overwhelmingly
condemned in 1878, and Mr. Cartwright
lacks the opportunity to carry out his tariff
ideas.—Moncton Times.
