

British Lift Secrecy On New Aircraft

LONDON (AP) — Britain partly has lifted secrecy from its revolutionary new bomber, the TSR-2, which Aviation Minister Julian Amery has claimed will prove "the outstanding combat aircraft of this decade."

The air ministry released photos of a model of the needle-nosed plane, which still is unfinished and scheduled for its first test flight sometime next year.

The TSR-2 is designed to fly at twice the speed of sound, both on high-level and at low-level attack or reconnaissance missions under a defence radar screen.

The TSR-2 will have special equipment to deliver accurately a wide selection of weapons including nuclear weapons, air-to-ground missiles, non-guided rockets and high-explosive bombs. Its long-range capability would enable it to deploy rapidly to any part of the world.

Smoked Fish In Plastic Frowned On

VANCOUVER (CP) — An international expert on botulism says there should be a ban on smoked fish packaged in plastic wrappers.

Mr. Claude E. Dolman, head of the bacteriology and immunology department at the University of British Columbia, was commenting on a warning by United States officials.

The U.S. Food and Drug Administration warned that smoked fish products from the Great Lakes area may contain the botulism organism which has caused several deaths recently.

Dr. Dolman said smoked fish should always be cooked before being eaten to eliminate the risk of botulism poisoning. This was especially true if the fish is packaged in plastic wrapping because the organism grows best out of contact with the air.

In fact, I think smoked fish packaged in this way should be banned from sale. It doesn't matter where the fish is caught. The same organism is in our local waters."

He said there have been 20 deaths from botulism on the Pacific Coast during the last 15 years.

Alberta Town Is Bidder For Water Plant

EDMONTON (CP) — Mike Maccagnio, Liberal member of the Alberta legislature and mayor of Lac la Biche, said here his northern Alberta town is a leader in the bidding for a \$30,000,000 heavy water plant.

He made the comment in an interview following his return from Ottawa after three days of meetings with federal officials concerning the proposed plant whose product would be used in atomic research and development work.

His trip was on behalf of both the town and the provincial government, which provided information after it was learned Lac la Biche was a possible site because of its large supplies of gas and water.

Mr. Maccagnio said selection of a site may be made by one of four private companies which have submitted bids for the plant. The government has guaranteed it a market.

He said there are indications the location of the plant, which would employ 75 to 100 men, may be announced soon.

Graham Describes Nocturnal Tour

NEW YORK (AP)—Evangelist Billy Graham, describing an anonymous nocturnal tour of Times Square, said here he found an unbelievable display of pornography and heard himself criticized by a street writer.

Wearing dark glasses and an uncustomed hat over his wavy blond hair, Graham strolled with an associate Wednesday night through the area he once packed with thousands who came to hear him preach.

"Everything was packed with emotion — sex everywhere, pornography everywhere," he said.
