VOL. 27.—NO. 13

R. M. H. S.

Testimonial From Duluth, Minnesota.

DEAR Mrs. Ross,—Having tested your "MAGIC HEALER," I wish to express my gratitude to you by this testimonial, which you can use, if you think it will assist you in selling it: Having cut my hand severely with a chisel, the corner of the chisel having entered the palm of my hand, making a long and deep cut, I applied your "MAGIC HEALER" at once, and after three applications I was able to go to work, and in three days the cut was healed up.

Yours truly,
ALONZO H. LAVERS.

Scientific Miscellany.

ARTIFICIAL SKULL-SHAPING.—Astonish-
ing success has attended the efforts of Dr.
Luncheon, an eminent specialist of
Paris, to give intelligence to a little idiot
girl. Though four years old, the child
could neither walk nor stand, and never
smiled nor took notice of anything. The
doctor concluded that the abnormal narrow-
ness of the head obstructed the growth of
the brain, and in May last he made an in-
cision in the centre of the skull and cut a
piece of bone from the left side. The re-
sult was marvelous. Within less than a
month the child could walk, and she has
become quite bright—playing, smiling and
taking notice of everything around her.

PAIN-JOY.—A German anatomist has
called the attention of his class to certain
hysterical women who are affected with a
kind of "pain-joy"—not only experienc-
ing no pain from surgical mutilation, but
having a morbid desire to bear without
anesthetics operations which should prove
very painful. A young woman was intro-
duced who had seriously injured her lower
jaw during a paroxysm of hysteria, but who
had insisted upon having the necessary re-
moval of part of the jaw and ligature of
two arteries performed without an anes-
thetic, and subsequently declared that the
operations had given her great pleasure.

THE MOON-WEATHER PROBLEM.—From
tables made by the use of synoptic charts,
eliminating local disturbances, Dr. G.
Meyer believes he has accomplished what
other investigators have sought to do with-
out success—shown an influence of the
moon on the weather. The height of the
barometer, in months of September to
January, is lowered at the time of full
moon and raised during the first quarter.
No effect can be traced for other months.

ELECTRICALLY-AIMED GUNS.—In a new
invention, a small dry battery, an electro-
magnet and a circuit-closer of mercury are
so arranged in the stock of a gun that the
weapon can be discharged only when ele-
vated to a predetermined angle. At
other positions the trigger is locked and
cannot be pulled. The device is claimed to
ensure precision in range, and accuracy of
firing at night when the range has been
previously obtained.

ANOTHER SILK.—A substance having all
the essential qualities of silk has been
made from wild hemp by Nayanura
Sakusaburo, of Hikone, Japan. The plant
grows on moors and hillsides, and could be
cultivated. The fibre is strong and glossy,
and several silk factories are said to have
found it to be in no way inferior to silk.

THE POTATO DISEASE.—In Denmark,
some interesting, and perhaps very valu-
able, researches into the potato disease
have been made by Prof. J. L. Jensen.
The disease is found to consist of a fungus
whose spores are carried by the wind, and
which first attacks the foliage of the plants.
It spreads to the tubers in about seven
days by spores washed down from the stem
and foliage. Considering these facts, it
was thought that the tubers might be pro-
tected by moulding the soil into a broad
ridge, 3 or 4 inches high and 10 or 12
inches wide, after the first weeding, and a
further earthing up on one side only—caus-
ing the plants to bend so that the spores
would fall away from the ridges—within 7
days after the appearance of the disease on
the foliage. Some 150 farmers are said to
have experimented in this way, with these
astonishing results: Where no moulding or
earthing up was done, the percentage of
diseased potatoes was 34; where the moulding
was imperfect, 12; and where the
moulding was perfect, only 1. Infection
during harvest was prevented by allowing
the tubers to remain in the ground for a
month after the withering of the tops.

COLD WAVES.—A cold wave is defined
by Prof. T. Russell as a fall of tem-
perature in twenty-four hours of 20
degrees over an area of 50,000
square miles, the temperature in a
part of this area descending to 34 degrees.
Between 1880 and 1890 no less than 691
cold waves were recorded in the United
States. In the great cold wave of Jan. 17,
1882, the fall of 20 degrees extended over
an area of 1,101,000 square miles, and the
fall of ten degrees included 2,929,000
square miles. In six cold waves of the ten
years the area of the fall of 20 degrees was
more than a million square miles. Cold
waves follow a day after an area of low
pressure, or occur to the southeast of an
area of high pressure, reaching their greatest
extent when both conditions are present.

NESTS FOR GERMS.—The impurities that
collect under finger nails have been in-
vestigated in the bacteriological laboratories
of Vienna. The matter obtained in 78 ex-
aminations was placed in culture solutions,
and gave 36 kinds of micrococci, 18 of
bacilli, and 3 of sarcinae. Cleanliness of
the nails is especially necessary for all who
come near a wound, and for those who live
in a neighborhood where an epidemic pre-
vails.

A REMARKABLE PRESERVATIVE.—A Bel-
gian chemist has found that the green tar
left after extracting the oil from the white
bark of the birch will effectually preserve
even the most delicate texture from decay.
It yields neither acid nor alkaloid, is re-
markably fluid in alcoholic solution, and
when once dried resists even the action of
alcohol.

A NEW IDEA.—A recent contract pro-
vides for street lighting in Paris on a novel
plan. Power is distributed by the com-
pressed air system to a great number of small
motors, each of which supplies electricity
for a small number of lamps.

ADVICE TO MOTHERS.—Mrs. Winslow's
Soothing Syrup has been used by millions of
mothers for children teething for over fifty
years with perfect success. It relieves the
little sufferer at once, produces natural quiet
sleep by freeing the child from pain, and the
little cherub awakes as "bright as a button."
It is very pleasant to taste, soothes the
child, softens the gums, allays pain, relieves
wind, regulates the bowels, and is the best
known remedy for diarrhoea, whether arising
from teething or other causes. Twenty-five
cents a bottle.

ISLAND PORK.—The Pictou News says:
Over 150 barrels of pork arrived here from
P. E. I. by the Princess of Wales, yesterday,
consigned to R. P. Season, Plymouth.

THE GOOD OLD TIMES.—A Nova Scotia
country paper says: Thirty-one years ago
better was selling in the country stores for 15
cents, and very plentiful at that. To-day it
is worth 20 cents and scarce.

Dyspepticure.—Is not a palliative, but
a cure; it first relieves, then controls, and
finally entirely subdues the irritation and in-
flammation of the stomach that causes in-
digestion and dyspepsia.

CHAMPIONS AT BILLIARDS.—Jacob Schae-
fer beat George T. Slosson last Monday
night in a billiard match at New York for
the championship of the world and \$1,000,
14 inch balk line, 800 points. Slosson's
score was 600. Schaefer's highest run was
128, Slosson's 60.

A JILTED LOVER'S REVENGE.—A man
named Andrew Maguire pushed a Miss
Tucker and her escort named Turner, be-
tween moving cars at Coburg, Ont., on
Tuesday night with the supposed intention
of killing them. They escaped with slight
injuries. Maguire was unsuccessful in his
suit for the lady's hand. He has escaped.

SALE OF THE WILLIAM.—The str. William,
of Charlottetown, owned by McMillan and
Faqnarsen, which has been lying at Pictou
in out of Admiralty in suit for men's wages
was at last sold yesterday, at noon, on the
Market Wharf, by Sheriff Harris, and bought
by Noonan & Davis. Bidding was for a time
pretty brisk between A. C. McDonald and
Noonan & Davis, it was knocked down to
the latter firm for \$8,500.

AFTER BIG DAMAGES.—According to a
late Providence, R. I., despatch, the Tele-
gram last week published an article de-
claring that the elevator at the Narragan-
sett hotel had been giving considerable
trouble, and that the employes of the
house were becoming almost afraid to ride
on it. Landlord Humphreys has brought
a civil suit against the Telegram for \$10,000
damages.

CATTLE DISEASE IN MAINE.—A Bangor,
Me., paper says: A case of tuberculosis has
just been reported in the western part
of the State Portland being the place where
it was found. It was seen that something
was the matter with the cow and word was
sent to Dr. Geo. Baily, state veterinarian,
who pronounced the cow suffering from
tuberculosis. The cow was ordered killed.
The cattle commissioners will before long
again go to Orono, to examine the Maine
State college cow which was put in quar-
antine for thirty days at their former visit.

THE NICHOLSON SCANDAL.—A St. John
despatch of the 4th says: Nicholson vs. Grant
was before Judge Palmer in the equity court
this morning again. The judge permitted
counsel for the defendants to state their
desire for a thorough and speedy investigation.
The statements that were prepared show the
estate was not only not mismanaged but care-
fully and judiciously managed; that all securi-
ties have been approved by the trustee
(Jones), and they court the fullest and speed-
iest enquiry possible. The judge considered
it better at this stage that the procedure
be altered and ordered a bill file, costs to be
paid out of the estate.

THE WORLD WILL BE STARTLED.—Sir
Joseph Lester, who recently returned from
Berlin, in the course of a speech at King's
College, London, said that within a month
the world would be startled by two new
discoveries. He said Dr. Koch's consump-
tion cure hinted at and involved the cure
and prevention of two of the most terrible
contagious diseases known. Dr. Koch had
practically concluded this work of discov-
ery, but desired to make further tests. The
new remedy is a simple chemical sub-
stance which anyone would be able to pre-
pare.

GOOD WORK.—The Woodstock Press
says: During the session of the circuit
court last week, Frank H. Risteen, the of-
ficial stenographer, gave an astonishing ex-
hibition of speed in shorthand writing. In a
test of five minutes consecutive writing,
he wrote 1045 words, or an average of over
208 words a minute, reading the same from
the notes without an error. Mr. Risteen's
fastest minute contained 224 words, and
his slowest 192. This is believed to be
ahead of any record ever made by a writer
of the Scovill system of shorthand, which is
a mode of writing less remarkable for speed
than any other good qualities.

A \$750 COTTAGE.—Or its equivalent in cash
will be given to the person detecting the
greatest number of errors, words wrongly
spelled or misplaced in the December issue
of "OUR HOMES." In addition will be given
two cash prizes of \$200 each, four of \$100, eight
of \$50, ten of \$25, twenty-five of \$10, fifty of
\$5, one hundred of \$2, and one hundred and
fifty of \$1, distributed in the order mentioned
in rules and regulations, which will be sent
with a copy of December issue on receipt of
15 cents in stamps. Special cash prizes given
away almost every day during competition
which closes February 1st, 1891. Address
Our Homes Publishing Co, Brockville, Canada.
nov28 dy w 2w.

CHIEF CLARKE EXPLAINS.—The general
committee of the St. John City Council had
Chief of Police Clarke before them on Wed-
nesday afternoon when they asked him to
give his reasons for reducing Officer Weather-
head. In explaining this matter, the chief
said that Weatherhead had been hostile to
him all along, that he had charged him (the
chief) with receiving money for which he
never made any returns to the city, and that
he appropriated to himself \$6 of a \$10 deposit
made with him. Weatherhead, he said, had
left his duty to go and waken officers out of
their bed to make charges against him. The
St. John correspondent of the Moncton Times,
commenting upon this statement of Chief
Clarke, says the whole trouble seems to be
that since Clarke has taken hold of affairs
Weatherhead has been obliged to do his duty.
When Marshall was chief Weatherhead did
about as he liked, and the change for him is
not a very pleasant one.
