THE DAILY EXAMINER

SEPTEMBER 1, 1897. "SAUCE FOR THE GOOSE".

Mr. M. Cameron, M. P., in replying to the Golderich Signal, explains the difference between a Conservative public man getting a relation appointed to public office and a Liberal M. P. acting in the same way. The Conservative is responsible for an act of nepotism; the Liberal gives his friends to serve his country. Because of this distinction Mr. Cameron writes: "I did not denounce Sir R. J. Cartwright because he had two sons serving the country did not assail Sir O. Mowat because he made his son sheriff of Toronto, or the Hon. John Dryden because he made his brother registrar of Ontario, or the Hon. A. S. Hardy because he secured a judgeship or his brother."

CAUGHT BY A BAUBLE.

Sir Wilfred Laurier said in London, Ontario, that he would get a trade preference for our products in the British market. This was during the election. Then Sir Wilfred went to London, England, and violently opposed such a preference when it was offered him. This was after the election. But Sir Wilfred is bringing over with him a large shiny Cobden Club medal. So that if he has lost preferential trade and its immense benefits for Canada and the Empire, we have at least the consolation of knowing that he has earned a medal with which to decorate himself.—Mail and Empire.

GREETINGS.

The Arabians shake hands six or eight times. Once is not enough. If, however, they be persons of distinction, they embrace and kiss one another several times, and also kiss their own hands. In Turkey the salute is to place the hand upon the breast and bow, which is both graceful and appropriate. In Burma when a man meets a woman, he puts his nose and his mouth close to her cheek and draws a long breath, as if inhaling a delicious perfume. He does not kiss her cheek, strange to say. A man is greeted in exactly the same way. In the greater part of Germany it is considered an act of politeness, not of gallantry, for a man to kiss a woman's hand. In Italy that privilege is allowed only to near relatives, while in Russia it is extended to kissing the fore head. The men of Continental Europe have a custom that would seem queer, not to say laughable, here. They greet one another with a kiss, if they be friends, not on the cheek but right on the lips.—Harper's Round Table.

OBITUARY.

Suddenly passed away, on the 5th inst., at Rollo Bay, aged 58 years, Margaret Jane, beloved wife of Richard Keefe and daughter of the late Hon. James Dingwall. A family of seven children survive her. She was a woman possessed of many good qualities both of head and heart. As wife and mother she was affectionate and devoted. As a neighbour she was kind and obliging, and in all the other relations of life upright and conscientious. The funeral services were conducted by Rev. J. R. McKay and were most impressive. Her remains were accompanied by a large number of persons to the cemetery at Bay Fortune where they were laid away, beside loved ones gone before, to await the resurrection morn.

Mary Kyle Dallas, the well known writer, died at New York last week from heart failure. Mrs. Dallas was fifty years of age. Her husband was Jacob A. Dallas, an artist well known in New York art circles.

Dyspepsia

Is weakness of the stomach. It is the source of untold misery. It may be cured by toning and strengthening the stomach and enriching and purifying the blood with Hood's Sarsaparilla. Many thousands have been cured by this medicine and write that now they "can eat anything they wish without distress."

Hood's Sarsaparilla Is the best—in fact the One True Blood Purifier. Hood's Pills act easily, effectively. 25c.

NEWS NOTES.

A despatch from Bombay says that cholera has broken out in the North Hampshire Regiment. Cincinnati has been chosen as the place for holding the next encampment of the Grand Army of the Republic. It is expected that the first hundred miles of the Crows Nest Pass railway will be completed by November 1st.

The alien tax law has been decided to be unconstitutional by Judge Acheson, of the United States Court at Pittsburgh, Pa.

The strike of progressive tailors in New York, which was begun on Sunday has been declared off, the demands of the strikers for an increase of wages being granted.

A great American scientist is now busily engaged in perfecting an instrument which carries words on the rays of light. He has already succeeded in telephoning by this means for one mile.

As the result of drinking whiskey bought in a Siska saloon five Indians are dead and the remainder are dying. The whiskey was a mixture of whiskey, coal oil, lemon juice, and alcohol.

A musical bicycle has been invented by a man in Prestberg, Austria. The motion of the wheel sends out a tune like a hand-organ, and the rider rolls along to the strains of delightful harmony.

A family of unenviable character at Oxford, N. S., recently invited a Jewish pedlar to dinner and while he was eating they ransacked his valise, taking goods therefrom. He discovered them and protested but he was thrown into the streets. A crowd afterwards smashed every window in the house with sticks and stones.

It is estimated that at the beginning of the present century not more than 5,000,000 or 6,000,000 copies of the Scriptures were in existence in the world. Later years more copies than that are being printed every year, and the total number of Bibles published since the year 1800 is said by a recent statistician to be 404,000,000.

Mr. Henry Crank, of New York, has been permitted by the New York courts to change his name. In his appeal the petitioner set forth that he was handicapped in life by the name. He was a Crank, and yet he was no crank. When his name was mentioned people smiled, and their mirth made it impossible for them to take him seriously. The courts saw the point.

Twelve years ago a young man in Rockland, Me., was struck by a wooden picket thrown by his playmate, which went through his left cheek, the scar making a small dimple when healed. A few months ago the young man, while bridling a horse, the animal swung around, kicking him in the face, the kick on one shoe cutting through the right cheek. It has healed now so as to make an exact match for the dimple on the other side made twelve years ago.

The establishment of a sort of "Siberia" for the anarchists of all nations has been proposed by Spain; a penal colony where dangerous anarchists, who have not yet taken the life of a king, emperor or president can be confined for life. It is said that Austria, Germany, Italy and Russia have received the proposal favorably, but Great Britain, France, Switzerland and the United States have not yet been heard from, and will probably not consent to the proposal.

After an agitation which began more than one hundred years ago, and which has been carried on vigorously ever since, in Norway, the National Legislation has at length, by an overwhelming majority, abrogated the law which excluded the Roman Catholic religious orders and congregations from this formerly ultra-Protestant country. Only the Jesuits are still to be kept out. But with this exception the emancipation of the Norwegian Catholics is complete. A number of Lutheran pastors who occupy seats in Parliament voted with the majority.

The expedition of Prince Luigi di Savoia, who has arrived at Victoria, B. C., to the summit of Mount St. Elias, Alaska, has fixed finally the altitude of Mount St. Elias at 18,120 feet. (There was not the slightest indication of volcanic origin anywhere. A new glacier was discovered by the explorers from the eminence of Mount St. Elias, between the Augusta Mountains and Great Logan and was named by the prince "Colombo." At the summit of Mount St. Elias there was neither wind nor fog and only 20 below freezing. The prince does not consider the ascent difficult, except for the last few hundred feet, which is a solid mass of ice.

The first census of Russia has been completed, and shows that the population in European as well as Asiatic Russia amounts altogether to 129,000,000 inhabitants; that is to say, 3,500,000 more than the figures at which the empire has until now been officially rated. In point of population, therefore, Russia comes third in rank. China comes first with an estimated horde of 400,000,000, while the British Empire comes next with 208,000,000 figures based not on guesswork, as in China, but upon the most recent census. Russia in Europe has 94,000,000; Poland 9,500,000; the Caucasus, 9,700,000; and Siberia, 5,700,000. St. Petersburg has a population of 1,267,000 inhabitants; Warsaw, 614,000, and Odessa, 404,000.

COTESVILLE, Pa., Aug. 29.—In a fit of ungovernable rage, Frank Moore instantly killed grandfather Ruben Segner and seriously wounded Victor Segner, his uncle, and Charles and Benjamin Moore. There was a dispute among the five men, and young Moore becoming incensed, rushed into the house with the threat that he would shoot his opponents' heads off. A moment later he appeared at an upstairs window with the gun and fired directly into the group. He made his escape, but was soon afterwards captured.

IN VAIN

Sing to the narrowed soul and hardened heart full well Songs of the fairest truth and purest love that be, No thoughts rise up to greet; no joy, no sympathy, Nor hope, nor aspiration gladly answers thee; For beauty stirs no soul where beauty does not dwell.

—Preston Cooke Farrar in August Lippincott's.

TEMPERANCE LECTURES.—In the brick Methodist Church on Sept. 5th, at 8.15 p. m. "The Temptations that Surround that Boy of Yours" will be discussed by Rev. E. O. Taylor. It is an important subject. All parents and teachers should hear him. He also speaks in Baptist Church on Monday evening, 6th, at 8 o'clock and in Zion Church on Tuesday evening 7th at the same hour.

HIGHWAY ROBBERY.—While Milton Graham and sister, of Moulton River, were driving home from Richebucto on Saturday evening about 8 o'clock they were held up by four men, and at the point of a revolver, compelled to hand over what money they had, which happened to be quite a sum. Mr. Graham had \$180 and his sister \$15, all of which the highway-men got. It was too dark to recognize these and no definite knowledge is known as to their identity.

There is no place where you get so hungry as at an exhibition, therefore prepare yourself by getting an early dinner at Large & Sons showrooms on Great George Street, where each day of the exhibition you can get a substantial dinner for only 25 cents, and an extra good tea at the same price. Dinner will be ready at eleven o'clock and you can have it on your way to the exhibition. Tea can be had from four o'clock for those who wish to leave for home earlier. When we say the ladies of Grace Church are providing the good things for the tables that is sufficient to ensure perfect satisfaction.

To investors.—The Jubilee Mining and Developing Company are giving to investors a better advantage than any other company in the market today. Besides the shareholders holding shares in the Klondyke, they also obtain an interest in the eleven gold claims which the company own at British Columbia. These claims, which will begin operation in the spring are: The Maria, Manitoba, Stanford, Aggie, Vista, Ella, Elina Last Chance, Vancouver, North Star, and Brown Jug. Investors should particularly note this. A limited number of shares now for sale at 10 cents per share. Apply to E. Redmond, agent for the Island. 1w

The Waltham and Elgin factories advanced the price on their watches. W. W. Wellner bought largely before the rise and sells at the old price.

We are always busy selling towels, sheeting and pillow cottons. We suppose it is because we sell good qualities at low prices.—Stanley Bros, The Always Busy Store. 2u.

Health is a luxury that only the rich can afford, and that no one can enjoy. Every woman is not so situated that she can be an interesting invalid, or rather, an uninteresting invalid, for there never was an interesting one.

The woman who suffers from weakness and disease of the distinctly feminine organs is certain to become an invalid. No woman can suffer in this way and be a healthy, happy, amiable wife and a competent mother. Troubles of this nature sap the strength, rack the nerves, paint lines of suffering upon the face, destroy the temper, make the once bright eyes dull and the once active brain sluggish, and transform a vivacious woman into a weak, sickly invalid.

The one sure, speedy, permanent cure for all disorders of the distinctly feminine nature is Dr. Pierce's Favorite Prescription. It acts directly on the delicate and important organs concerned, and makes them strong, healthy, vigorous and elastic. It cures the internal ulceration and inflammation that give rise to a debilitating drain on the system. It is the best medicine for overworked, "run-down" women.

"About six years ago my wife became afflicted with female weakness," writes the Rev. E. J. Coppedge, of Elmo, Kaufman Co., Texas. "She could not stand on her feet or get in any position in which she did not suffer great pain. She despaired of ever again being well. She took six bottles of Dr. Pierce's Favorite Prescription and has been well and happy for twelve months."

It is a druggist's business to give you, not to tell you, what you want. Thirty-one one-cent stamps cover the customs and mailing of a paper-covered copy of Dr. Pierce's Common Sense Medical Adviser. Cloth-bound, 50 stamps. Send to Dr. R. V. Pierce, Buffalo, N. Y.

EQUINE HISTORY.

The skin of the horse is valuable for both gloves and shoes. The first English riding academy was founded by William III.

The trotting horse is an institution of the present century. Before 1800 running was the only method of racing. In most countries of Europe horses were not employed in agricultural labor until a comparatively recent period.

The best known horse of Napoleon was Marengo. From first to last, Napoleon had 19 horses shot under him in battle.

As a rule, wild horses, though not so large as the domesticated animals, are more muscular and can better endure protracted labor. The working age of a horse rarely exceeds 15 years, though his natural life sometimes extends to more than twice this period.

The first mention of the horse in the Hebrew Scriptures is in the blessing bestowed by Jacob upon Dan, in which the patriarch alludes to the animal as well known—"Dan shall be a serpent by the way, an adder in the path that bite the horse heels, so that his rider shall fall backward."—St. Louis Globe-Democrat.

KLONDYKE!

The Land of Golden nuggets

JOSEPH LADUE, the new Bonanza King of the Klondyke, dike Gold Regions, gives the facts. His book reads like "The Arabian Nights" BUT Joseph Ladue KNOWS whereof he writes. He was the first man on the spot when the first gold was discovered last August, 1896. He located one rich claim, and immediately purchased twelve others at a low price before their value was known. He has refused \$100,000 for any ONE of these claims, as they are rich with virgin gold nuggets beyond the dreams of avarice. Joseph Ladue then

Established Dawson City,

at the mouth of the Klondyke and Yukon Rivers, by erecting the first house in the region in September, one month after the gold was first discovered. He bought 178 acres from the government on the city site where his town lots, 150x50, are now selling for \$5,000 each.

Mr. Ladue was fortunate enough to be successful in his trading post investments to have on hand ample capital to carry out his plans, and there is no man living who is better posted on Alaska and the great North West Territories than Mr. Joseph Ladue. He has just returned from that country to his old home in Schuyler Falls, N. Y., where he passed a large portion of his boyhood and early manhood. Mr. Ladue left his home nearly twenty years ago to seek his fortune in the West, going first to the Black Hills, where he was successful in gold mining, thence to Arizona and the Pacific Coast, and finally located in Alaska and the North West, where he has covered almost the entire country since 1882. Mr. Ladue is a typical pioneer; strong, hardy and resolute—a man of iron as one must needs to be to go through the hardships he has and come out with a constitution unbroken and unimpaired at the age of about forty-three. Mr. Ladue has not only worked his muscles to good advantage to himself with the result of an abundance of the world's goods far beyond the dreams of men, but he has evidently all his time been closely observing the conditions of that strange country—the Yukon Valley—which has so suddenly become one of the great centres upon which human interest throughout the world is focussed.

When the wonderful stories began to come down from the Yukon country it was naturally concluded that it was at least half exaggeration. That any such amount of gold could be taken in so short a time from a country like that under the most unfavorable conditions was held to be incredible. But when the great bags of virgin gold began to be poured out upon mint counters in San Francisco under the eyes of the whole world (for modern journalism does this, annihilating time and space), people began to wonder, and the wonder grew day by day as the real facts were disclosed, and now people who are well informed as to the facts declare that half the truth has not been told of the golden treasures of the Yukon Valley.

As we have already said, there is no man alive to day who knows more about this wonderful country than does Mr. Ladue. What makes his talk of it specially interesting and reliable is the fact that his knowledge of it is practical. It has not been gained from hearsay nor from desolatory visits made now and then at certain favorable seasons of the year, but from steady living there through the long summer days and the long winter nights year in and year out for 15 years, where he now owns the best mining claims on the Klondyke and its tributaries.

In presenting his book to the public we do so knowing that it is by an authority on the subject of which he writes. His first work entitled

"KLONDYKE NUGGETS"

is a brief description of the new gold regions, and anyone desiring authentic information should not fail to avail themselves of our
