

# Letters To the Editor...

Dear Editor:

Re: The Backlash; Affirmative Discrimination at U.P.E.I.

We are amused! In fact we couldn't agree more with Hanus & Murphy's suggestion that some male professors should step down and give their jobs to women. Goddess knows there are a few old dinosaurs around here who punish us all with their uninspired ramblings in class. Aside from not contributing much in the way of new knowledge, these "tenures drones" also seem to squawk the loudest about affirmative action.

And do tell us what the philosophy department knows about the "means" of affirmative action. It hardly strengthens your arguments to make some obscure reference such as "the philosophy department should know about this" (wink, wink). This tells us nothing although it does allude to some mysterious activity in the philosophy department. (What? there's movement in the philosophy department???)

With Great Reverence to Academic Freedom,

Dear Editor

Do you ever imagine about the unknown (what the people here on Earth call the unknown). Think about it! Is Earth really the only planet with living things? Do you ever wonder if the things are similar to things on Earth? Is the universe infinite? How far does the universe go? Can the universe go on forever? What does forever mean? How long is forever? A subject close to the body is, how does the human brain work? When you think about it can people actually see into the past and future? Is that possible?

These are only a few questions that can be asked and thought about. It can boggle the mind how little that humans do know about the area around and in us. As a university student do we think about such things? Probably(!) in a rare moment when we are in solitude, where there is peace and quite. I think as uni-

## Health Centre Hours

Monday:	Dr. Tweel	10:00 - 1:00
Tuesday:	Dr. MacKenzie	1:30 - 4:00
Wednesday:	Dr. Stewart	10:00 - 1:00
Thursday:	Dr. Reid	9:30 - 12:30

The nurse is available from 8:30 - 4:30 Monday to Friday. Phone 566 0616 for an appointment and we'll do our best to accommodate your needs.

Sharon Mullin-Zimmermann, R.N. U.P.E.I.  
Health Nurse

versity students we should reflect and ponder on such questions, for it is up to each generation to contribute to the knowledge of the world. People that are reading this are probably wondering how thinking about the meaning of forever will help Earth. But it will, for if each generation is inquisitive about the unknown then the less the unknown there will be. University is not only about sciences, business, or arts, it is about developing the human mind and spirit. Thus pondering or imagining about the unknown will help develop a person's mind. It will help them to be open to new ideas and things. This is and will continue to be important, since new ideas and actions are developing each month, each day, each hour.

Therefore fellow students ponder, speculate, and imagine for the unknown will soon be the known with your help!!!!!!!!!!!!!!
