

CIMN'S WEEKLY REPORT TO YOU RADIO WAVES

How to tune into CIMN.

Why to tune into CIMN.

If you live in Marian or Bernardine Hall, tuning in is easy. Just plug your radio into any wall socket and turn the dial to 700 on the AM band. If you live in Orchard Hall or off campus, our signal is carried on the Island Cablevision network. Call us at 66-0417 and we'll help to get you wired for sound. This is your radio station. We offer a fresh alternative to the programming currently offered by other island stations. So tune in and give us a chance, you just might like what you hear.

1. Listeners of CIMN can expect to hear the best new music first. We don't wait for songs to become hits before we play them.
2. Lots of on air give aways. CIMN listeners can expect to win CD's, tapes and records, and they don't have to compete with 10,000 other listeners when calling in to win.
3. News that matters. CIMN's news is student orientated.
4. We don't play the same songs over and over again.
5. Campus events calanders.
6. No fakes. Our programers are all real people with real lives outside the studios. They are as in touch with the reality of university life as anyone can possibly be because they are, for the most part, students.(We do have a couple of professional DJs who just wish they were students.)
7. No Fishing shows.
8. Enviromentaly friendly.
9. Safer than safe sex.
10. Leonard Cohen contest.(see details below)

Win! Win! Win!

...re it is. Your chance to win a complete collection of Leonard Cohen's musical works worth over \$200. Just write down your most outrageous yet some what believable prediction for 1993 and drop it at the station or in the Student Union desk in the Pit; we'll do the rest. Every Wednesday evening we will be picking the best prediction of the week and awarding the author with some Leonard Cohen goodies. At the end of February we'll make a draw using the ballots to decide who gets the grand prize, a complete collection of Cohen's musical works from Sony Music.

Leonard Cohen Future
Ballot

I predict that in 1993...
