QUEEN INSURANCE COMPANY

Is the Queen of Fire Companies.
DESBRISAY & STEWART, AGENTS FOR P. E. I.
OFFICE—Next to Bank of Nova Scotia, Charlottetown. Low Rates. Prompt Settlements.

WHERE IS IT?

EVERYBODY now appears to know that I (W. P. DOULL) am the proper man to whom to send repairs; yet, notwithstanding the fact that the location of my headquarters has been announced, people frequently say: "I see by your ad., etc., where is your shop?" For the benefit of those persons, and so all may be able to find it, I will try to describe its whereabouts.

It is the shop formerly occupied by Cairns & McLean for their Marble Works; it is located on the north side of Kent Street, between Prince and Hillsborough Streets; it is next door to Dr. Johnson's residence, and second door from A. S. Johnson's Drug Store; it is almost directly opposite Murphy & Son's Bakery, and is less than half a block from McInnis Bros' Carriage Shop; it is on the same street and block as Mark Wright & Co's. Factory (only further west), and is within a stone's throw of Rackham's grocery and Messrs Findley's boarding house.

After a time I may possibly put out a sign. However, in the meantime, if from the above description you cannot find the place, ask some of your friends, or drop me a post card through the mail.

WALTER P. DOULL.

Charlottetown, December 28, 1892—dy 1w

Disappoints!

To the Free and Independent Electors of the City of Charlottetown.

HAVING been requested by a large number of the electors to offer myself as a candidate for the position of Water Commissioner, made vacant by the death of the late John K. L. King, I have reluctantly consented. Not being the nominee of any clique or party of politicians, I promise, if elected, to use my best endeavors for the interests of the citizens in general. As the time at my disposal is so short I am unable to make a personal canvass; I therefore take this opportunity of soliciting your votes.

Yours truly,
THOS. CAMPBELL.

To the Electors of Charlottetown and Common.

HAVING nominated for the vacant Commission of the election to be held on Wednesday, the 11th of January, I respectfully solicit your votes and interest on that day. The time being so short to make a personal canvass of the city, please accept this notice in lieu of a personal visit. As the water works are now a passing institution, it is time that some free hydrants for the use of the people were put up, and if possible to lower the water rates by consumers. This and other reforms would be effected by you, receive the support of your obedient servant.

J. H. GATES.

Charlottetown, Feb. 25, 1892

SYRUP OF FIGS

ONE ENJOYS
Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation. Syrup of Figs is the only remedy of its kind ever produced, pleasing to the taste and acceptable to the stomach, prompt in its action and truly beneficial in its effects, prepared only from the most healthy and agreeable substances, its many excellent qualities commend it to all and have made it the most popular remedy known.

Syrup of Figs is for sale in 75c bottles by all leading druggists. Any reliable druggist who may not have it on hand will procure it promptly for any one who wishes to try it. Manufactured only by the

CALIFORNIA FIG SYRUP CO.,
SAN FRANCISCO, CAL.
LOUISVILLE, KY. NEW YORK, N. Y.
W. R. WATSON, Wholesale Druggist,
Charlottetown. nov1 j31

GILLETT'S
PURE
POWDERED
LYE
PUREST, STRONGEST, BEST.
Ready for use in any quantity. For making Soap, Softening Water, Bleaching, and a hundred other uses. A can equals 30 pounds Sal Soda.
Sold by All Grocers and Druggists.
E. W. GILLETTE, Toronto.

Feed a Cold
Yes, but feed it with Scott's Emulsion. Feeding the cold kills it, and no one can afford to have a cough or cold, acute and leading to consumption, lurking around him.

SCOTT'S EMULSION
Of pure Norwegian Cod Liver Oil and Hypophosphites
strengthens Weak Lungs, checks all Wasting Diseases and is a remarkable Flesh Producer. Almost as Palatable as Milk. Prepared only by Scott & Bowne, Belleville.

CARD.

To the Electors of Charlottetown.
GENTLEMEN,—As I have been earnestly requested by a large number of electors to offer myself as a candidate for the Water Commission, made vacant by the lamented death of the late respected John Kelly, Esq., I have consented to allow myself to be put in nomination. As it is impossible for me to make a personal canvass of all the citizens, I therefore take this opportunity of soliciting your support. Having resided in this city for the last forty-five years, and being personally acquainted with its requirements, I feel myself in a position to elect—to faithfully and economically discharge the duties pertaining to the office of Water Commissioner.

P. HALLORAN.

Charlottetown Board of Trade.

ANNUAL MEETING.

TUESDAY, JAN. 10th, at 10 a. m.
MISS RUSSELL, Principal.

Age of the World

GEOLOGISTS ARE SLOWLY WORKING OUT THE PROBLEM.
At a recent meeting of the British Association a discourse was delivered by the new president, Sir Archibald Geikie, on the most interesting problem of modern science—the age of the world. Over a century has elapsed, says the San Francisco Call, since James Hutton wrote his "Theory of the Earth," which was the first attempt to formulate a chronology of creation in accordance with the discoveries of modern science; since then knowledge has made vast strides, and his followers have access to a mass of information which he did not possess.

Pluvial and Kelvin improved upon this work, and now Geikie and the school to which he belonged have gone beyond them. Geologists have ascertained that the rate at which erosion takes place can be measured; by applying their scale to the sedimentary rocks they have formed a hypothesis as to the time which has elapsed since erosion began.

To put the proposition in simpler language, the surface of the globe is constantly wearing away under the influence of water and wind. The portions which are worn off are carried down to the sea or into hollows, where they are deposited and form sedimentary rocks. If we can ascertain how long it takes to form a sedimentary rock we can figure out when the process of wearing away and redepositing began.

Sir Archibald states that on a reasonable computation the stratified rocks attain an average thickness of 100,000 feet. The material of which they consist was all washed down from high places, deposited and left to stratify. By the inspection of river banks it is found that in places the surface of the land which has been carried down as sediment in rivers has been reduced at the rate of a foot in 730 years, while in other places, where the land was more stubborn, or less flexible, it has taken 6,800 years to lower the surface one foot.

The deposit must be equal to the denudation. Thus we find that while some of the sedimentary rocks have grown a foot in 730 years, others have taken 6,800 years to rise to that height. Thus the period of time that was required to build up 100,000 feet of sedimentary rock has varied according to locality from 73,000,000 years to 680,000,000 years.

It follows that the active work of creation lasted for a cycle intermediate between these two figures. The cycle varied with endless succession of periods of disturbance by volcanic forces and glacial action and the frequent submergence of dry land, alternating with the emerging of continents out of the seas. These may have retarded the growth of sedimentary rocks, but they cannot have accelerated it.

A study of fossils teaches the steady uniformity with which the work of creation proceeded. Since man began to observe, there has been no change in the forms of animal or vegetable life. A few species have disappeared; not one new species has been evolved.

Not only do we find the fauna and flora of ancient Egypt, as depicted on monuments which are probably 8,000 or 10,000 years old, identical with those which are found in that country to-day, but shells which inhabited our seas before the ice age and grew in an ocean whose bed overlaid the Rocky Mountains, are precisely the same species that are found in the Bay of Monterey and the waters of the Chesapeake.

It is evident that there has been no essential change in the condition of life since these animals and these vegetables were first created; yet how vast the shortest period which we can assign to the gap that divides us from that remote epoch.

Little by little the geologist is lifting the veil which covers the prehistoric record of our planet. The era which preceded the age of civilized man, with its vast rivers carrying down diluvial floods to the ocean and the bursting forth of mountain ranges from contraction of the earth's crust, has been painted to the life.

But no one has exercised his pencil on that preceding age when the forests made way for clumps of stunted larch and willow, incessant snowfalls covered the plains, glaciers crept down from the north, and gradually a vast sheet of ice half a mile thick drove mankind, with the mammoth and the reindeer, to those fortunate regions which, like California, escaped the agony of the last ice age.

Nor have we any distinct perception of that subsequent age when the ice melted or receded to the pole, or dense tropical jungle grew up in the morasses it had left, swamps steaming with tropical heat swarmed with uncounted batrachian and reptile life, trees of monstrous growth shed their shade over slimy pools and black ooze, and in the distance low mountain ranges poured a never ceasing flood of lava down their sides.

This is a page of history which is yet to be written, but the materials are accumulating and the historian will not be long wanting.

FOR OVER FIFTY YEARS Mrs. Winslow's Soothing Syrup has been used by millions of mothers for their children while cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best-known remedy for diarrhoea, whether arising from teething or other causes. Twenty-five cents a bottle. Be sure and ask for "Mrs. Winslow's Soothing Syrup," and take no other kind. Lyr

"Deception never pays," said the moralizer.
"Oh, doesn't it," said the demoralizer.
"I know a man who made \$25,000 out of false teeth last year."
SKODA'S SEBACEAN SOAP.
"Soft as Velvet," "Pure as Gold," that tells the whole story. Most highly medicated soap ever made. Try one cake. It is elegant. At all Druggists. Price, 25 cts.

In the Wide Awe and Wisdom of the Night.

BY CHARLES G. D. ROBERTS.
In the wide awe and wisdom of the night I saw the round world rolling on its way, Beyond significance of depth or height, Beyond the interchange of dark and day, I marked the march to which is set no pause, And that stupendous orbit round whose rim The great sphere sweeps, obedient unto laws That utter the eternal thought of Him, I compassed time, outstripped the starry speed, And in my still soul apprehended space, Till, weighing laws which these but blindly heed,
At last I came before Him face to face; And knew the universe of no such span As the august infinitude of Man.

Entertainment at South Melville.

One of the best entertainments ever given in this section was held in the schoolhouse at the above named place on Friday evening 29th ult. James W. Villet, Esq., occupied the chair, and although the room was crowded to its utmost capacity, perfect order prevailed. The programme consisted of dramas, dialogues, recitations, readings, vocal and instrumental music, etc. The musical portion of the programme was under the direction of Mrs. David Marchbank and Mr. P. Trainor, to whom great credit is due, as they made a pleasing variety. While all performed their part in a manner that would do credit to professionals, we do not wish to particularize but we cannot but mention the solo by Miss M. E. Ready and the dialogue entitled "Shaving the Darkey" by Messrs. John Cutcliffe, Philip Beer and Douglas McKinnon. "Phil" is quite a comedian of the family.

Mrs. Marchbank is always a favorite with an audience in this vicinity, and her solos and accompaniments delighted everybody. She possesses a rare knowledge of music, and a rich, sweet and melodious voice.

At the conclusion a cordial vote of thanks was tendered Mr. J. H. Monaghan, the popular school teacher, who conducted the entertainment, and to Mrs. Marchbank for kindly loaning the organ for the occasion, and after singing the National Anthem the audience dispersed, more than pleased with the evening's amusement. The proceeds go to procure a map for the use of the school.

The Family the Unit.

As a matter of historical fact, as well as of scientific determination, the family is the unit, and the well-being of the individual can be rightly sought only in and through the well-being of the family. It is just precisely the neglect of this principle set forth in such clear-cut definition in the bishop's pastoral that is one of the poisons of the social organism, and seriously hurts the growth and efficiency of practical religion. The fact is that it is the environments of a man in most cases that need reforming more than the man himself, at least it is difficult to keep a man clean while he is sitting walking in the mud and filth. It is the closest environment of a person that has the most to do with making his character; and these are the family life. God first deposited a knowledge of Himself in the family, and for centuries of the world's history, religion, morals, and politics were preserved in the patriarchal institution. The family was the Church, the family was the State, the family determined the social life. The father, the patriarch was the head of the family, the priest of the Church, the chief of State, and the director of society. The individual separate from the family had no standing, and was entirely outside the warm currents that connect the common brotherhood with the common Father. Certain it is that one of the mistakes of modern life is going upon the principle that the individual is the unit of society. There are thousands of men who have lost the sweet constraint and the gracious influence of the home life; which touches that which is best and truest in a man, and are stranded along the wastes without religion, without any noble ideas in life, and do not count anything in the makeup of what goes for the most in human welfare. Practically, it makes all the difference in the world whether or not a child receives his impressions of what life really is in a healthy loving, Christian home. It is one of the important missions of the Church to cultivate the family life, and to show to parents their duties and responsibilities.—St. Louis Church News.

The juvenile dancing class, being the second and last term for the season, will open at Terpsichore Hall on Thursday, 12th inst., at 4 p. m.—E. Burris. 13 41—1 m w

HAWKER'S BALSAM OF TOLU AND WILD CHERRY is the best, surest and best known remedy for the cure of coughs, colds, bronchitis and all throat and lung troubles. The children's favorite. Sold by all druggists and dealers.

Philanthropic visitor (to jailbird)—My friend, may I ask what brought you here? Jailbird.—The same thing that brought you here—the desire to poke my nose into other people's business. Only I used generally to go in by way of the basement window.

MOST GINGER ALES are costive. The laxative qualities of Spa Spring Water makes the Wilmot Royal Belfast Ginger Ale, Lemon and Spa Water gently purgative.

In Portugal the wine reeling is done by a gang of men dancing to the music of a bag-pipe. The work is hard, the weather warm, the results indescribable.

PUTNER'S EMULSION of Cod Liver Oil still retains and justifies the good opinion of the best medical practitioners. Its virtues are attested by thousands of its patrons everywhere.

She—What did you find in me to love; it surely wasn't my beauty? He—No, dear, it was your fine intellectual gifts. (Then she broke the engagement)

The world's production of the golden metal in 1891 was 6,010,000 ounces; of silver 140,865,000 ounces.

PURIFY YOUR BLOOD with SKODA'S DISCOVERY.

Rev. H. MILLS.
Skoda Victorious!
Palpitation of the Heart, Kidney and Liver Trouble, Deathly Faintness and Loss of Appetite
CURED!!

THE FOLLOWING LETTER PROVES THE WONDERFUL MEDICAL POWERS OF THE GREAT GERMAN-AMERICAN REMEDY, THE NAME OF REV. H. MILLS (THAT WHERE THERE IS NO BETTER KNOWN MAN IN THE MINISTRY) IS WELL KNOWN IN THOUSANDS OF HOUSEHOLDS IN THE PINK TREE STATE.

GENTS—I am now 57 years old, and for over 10 years I have been afflicted with weak kidneys so badly at times that I could not rest nights. I could get no position that would be comfortable my back was so lame.

My liver also became affected, causing me to feel very ill. I had a Dull Headache continuing accompanied by a sluggish tired feeling.

My Appetite was very poor, and I would lose a desirable fatness at pit of stomach.

For the last two years I have been greatly troubled with palpitation of the heart and in long protracted meetings it would become very serious.

I have used the two Courses of SKODA'S DISCOVERY and LITTLE TABLETS you kindly sent me, and through the blessing of God, I am now completely cured—have GOLD not felt better for 20 years.

REV. H. MILLS,
Tracy Mills, Carleton Co., N. B.
