FIGHT ACIDITY AND CONSTIPATION

TAKE PHILLIPS' MILK OF MAGNESIA TONITE

WAKE UP FRESH FULL OF LIFE

Strange But True

By F. H. MacArthur

The progress of civilization from the torch to the electric light is a remarkable achievement, yet there is room for further progress in illumination, for there are plants and animals able to make cold light, something which man is not yet able to do. Various sponges, jelly-fish, beetles and fishes carry their own lanterns to light them wherever they may go. In the vegetable kingdom there are luminous bacteria and moulds.

The sea and the sky both have a milky way. And the sea has also its meteors, and moons, and suns. The meteors of the sea are the luminous floating jelly-fish, often as numerous as the stars seen with the naked eye. Ships have been known to sail for weeks through waters lit up by them.

If scientists could produce this cold heat it would make Edison's electric light take a back seat, so to speak, as it is about one-twenty-fifth the cost of the cheapest electric light in use today.

Just what is this luminosity of animals and plants? It is known to be the result of a chemical combination of two substances in the glands and sap, and scientists now know that it can be extracted and will give off light even when diluted with water.

• • •

I predict that chemists will soon learn how to manufacture "cold light". If and when they do, the human race will enter on a new epoch of artificial illumination so cheap that even the poorest families in the land will be able to afford luminous fountains of fire in their yards.

Every dog has his day. And every dog is to have his plot in a burying ground — at least in St. Petersburg, Fla., where a nine-acre cemetery for dogs has been set aside by Mr. and Mrs. C. Burbank, and the three animals which now rest in it have stone markers on their graves.

Death ended driving taxis for Wallace Richter, 90, oldest cab driver in the United States. He started out with a horse-drawn hack in 1904. When the automobile replaced the horse, Richter bought himself a taxi. He was driving his own taxi the day before he died!

A pound of white wheat bread contains enough explosive energy to throw itself 14 miles, and every ear of grain hanging in a field of oats is an explosive bomb, and as full of potential energy as a gallon can of gasoline. Indeed, there is heaps of energy stored up in all green vegetables. When we eat the vegetation its energy enters into our bodies, thus we are all grass-eaters, and, in more than one sense, our flesh is like grass.

• • •

The total surface of the leaves of a clover plant exceed twenty-six times the area of land taken up by the plant. To put it another way, an acre of clover is equal to twenty-six acres of green surface. The sainloin has a leafy surface 38 and lucerne 85 larger than the areas they occupy.

Though Scotland has less sunlight than England, its inhabitants are just as healthy and strong as the English, and the English, with less sunlight, quite as healthy as the Mediterranean peoples. Indeed, many of the most energetic races such as the Eskimo and the people of Greenland, have been bred and born and lived all their lives in ill-lit hovels. In spite of this lack of light in the home and out of it too — for the average cloudiness of these regions is very high — we find a people of great physical vigor.

This would seem to prove that light is of only secondary importance to animal organism. Not so with plants. They must have light or else they perish.

"Everything must go," read the sign in the window of Lloyd Shalman's store, in Vancouver, B. C. Thieves reading the sign carried off $4,000 worth of stock, which is what comes of taking things too literally, ey?

• • •

Elephant twins are a scientific rarity. But elephant girl twins are now safe in a Nebraska circus, having come by ship from their native Thailand. Photographers took their picture when they reached California. Only a year old they already weigh 350 pounds each.

The greatest single child employing occupation in the U. S. A., is agriculture. This is true today. It has always been true.

No less than half a million children of 7 to 15 years of age are working in the fields. If we include boys and girls of 16 and 17 we have a total of one million children thus employed! This astonishing fact is due largely to the share-cropper system in vogue in the states that raise cotton and tobacco.

The census does not list child workers under ten! But they work just the same.

Bedtime Snack solves laxative problem

"Constipation made me sullen all day. What a change since I started to use ALL-BRAN regularly! Even my wife notices it!" writes man from Ville Montmorency, Que. If *you* suffer from irregularity due to lack of bulk, try a bowlful of this toast cereal every night before bed. It may bring back the youthful regularity you thought long lost. ALL-BRAN is the only type ready-to-eat cereal that supplies all the bulk you may need. It's high in protein and iron. Not habit-forming. Kellogg's is so sure you'll like ALL-BRAN that if you're not *completely satisfied* after 10 days, send empty carton to Kellogg's, London, Ont., and get DOUBLE YOUR MONEY BACK!

Ellen's Diary

Continued from page 2

odd one it was, in the old Kirk of a summer morning."

• • •

"Put it on," James said of the hat, with a polite expression. "There" we settled it without benefit of mirror, "don't you think it's becoming?" "Not that way" James declared. "Perhaps, Ellen" he said, "you have it on backwards! I'd say" he eyed it as though it were some perplexing incidental to a piece of machinery, "that thing there—that feather—should go to this side!" "Ha," Jamie smiled shyly, "I bet she knows how it goes!"

Until tomorrow - - -Diary - - - Good-night .....

SPECIAL MEETING of Royal Black Preceptory, Central Bedeque, lodge room, Wednesday, October 1st. Initiation. Refreshments. A full attendance is requested.

POLICE COURT—In the City Police Court yesterday morning before Magistrate K. M. Martin, a motorist found guilty of driving a motor vehicle while his faculties were impaired by alcohol was fined $100 and costs or 20 days. One drunk and incapable was sentenced to 20 days without option while two others were fined $10 and costs or 10 days respectively.

ATTENDING MEETING—Lieut. Col. P. S. Fielding, M.M., Superintendent of Insurance and Registrar Under the Security Frauds Prevention Act, is attending a meeting of the Association of Superintendents of Insurance for Canada in Toronto today. This assembly was originally scheduled to take place at the Charlottetown Hotel on October 2nd, but was diverted to Toronto due to conditions which developed making it more desirable to hold the meeting in the Ontario city. Approximately 150 were expected to attend when the conference was scheduled for this city.

THE 10 COMMANDMENTS OF SAFETY

1. Treat every gun with the respect due a loaded gun. This is the cardinal rule of gun safety.
2. Carry only empty guns, taken down or with the action open, into your automobile, camp, and home.
3. Always be sure that the barrel and action are clear of obstructions.
4. Always carry your gun so that you can control the direction of the muzzle even if you stumble.
5. Always be sure of your target before pulling the trigger.
6. Never point a gun at anything you do not want to shoot.
7. Never leave your gun unattended unless you unload it first.
8. Never climb a tree or a fence with a loaded gun.
9. Never shoot at a flat hard surface or the surface of water.
10. Do not mix gunpowder and alcohol.
