

PROVINCIAL EXHIBITION. GOOD WEATHER. Large Attendance. Opening Address and Reply.

A Fine Exhibit of Roots and Vegetables, Grains and Live Stock.

Those who accompanied His Honor the Lieutenant Governor to the platform in the Exhibition Building, at 12 o'clock to-day, included the Misses Haviland, Mrs. Carvell, and Mrs. Sullivan, Senators Haythorne, Montgomery and Carvell; F. Brecken, M. P., and A. C. McDonald, M. P.; Commanders Hon. W. W. Sullivan, Hon. W. Campbell, John Balderston, M. L. C.; James Nicholson, M. L. C.; A. C. Holland, M. P. P.; Major Peake, A. D. C.; Major Hodgson, A. D. C.; Hon. J. Longworth, Prothonotary of the Supreme Court; His Worship Mayor Hooper; W. Murphy, Esq., C. C.; J. C. Underhay, Esq., and Herman McDonald, Esq.

Senator Haythorne, on behalf of the Board of Exhibition Commissioners, read the following ADDRESS:

His Honor Lieut. Governor THOMAS HEATH HAVILAND, ESQUIRE, etc., etc.

May it please your Honor,— The Board of Commissioners appointed by your Honor in Council to conduct the Provincial Exhibition of the year 1883, have much satisfaction in addressing your Honor on the present occasion, when the results of their labors are apparent in this hall and surrounding grounds and in the stockyard adjoining.

Their satisfaction is enhanced by certain other considerations of an agreeable character, First, Divine Providence has been bountiful to our Province in giving and thus far preserving to our people the kindly fruits of the earth for our future support and comfort. The undersigned believe that the crops of cereals are generally large and of excellent quality, that the hay crop has been well saved, and is not very deficient in quantity, and that roots promise to be abundant.

Another source of satisfaction is the recent splendid success attained by the Island Exhibitors at the Dominion Exhibition held at St. John, New Brunswick, on the centennial anniversary of the immigration of the United States Loyalists. It is no part of the Commissioners' duty to enter into details on this subject; they mention it as a matter of general congratulation, and especially because it cannot be doubted that the County and Provincial Exhibitions, by exciting a spirit of competition and desire to excel, stimulate at the same time the skill, taste, and industry of exhibitors, and thus lead by a very direct process to the successful results which have crowned the efforts of the Islanders at Montreal, at Halifax, and at St. John.

The Commissioners reject the idea that the successful horse and stock breeders and other exhibitors at this Province, will be content in the future to rest and be thankful with the reputation already obtained; on the contrary they believe that greater efforts still further to improve their position, will be required, and will cheerfully be made; but, at the same time, it will of course be expected that where private efforts cease, Government will interpose and assist, by maintaining at the Stock Farm none but the choicest animals, and of variety to suit all purposes, also by liberal grants to the County and Provincial Exhibitions, which, it is clear, help to train competitors for the more important arena of Dominion Exhibitions.

One other consideration arises out of the recent contest at St. John—it is that the Island Province, having contributed to the success of three Dominion Exhibitions, is now entitled to a grant from the Dominion Treasury for the purpose of holding one on her own soil, inviting of course the competition of the adjoining, and other Provinces. This subject has incidentally occupied the attention of the Board, and will probably be referred to in the more formal report of their proceedings, which will be made by your Honor in Council.

A very ancient industry has recently been assuming a new character in our midst. The domestic dairy is to some extent superseded by butter and cheese factories. To make this new enterprise completely successful, it will be necessary to breed cows specially adapted for the production of the largest quantity of rich milk, and next, to provide for them at all seasons an ample supply of suitable food. Our Province, it is certain, has special capabilities for this business. The pasturage during some months is excellent, the water pure and plentiful. The soil produces roots of all kinds, fodder corn and sweet hay in perfection, while the market for choice butter and good genuine cheese may truly be said to be insatiable. It seems likely, therefore, that butter and cheese factories will increase; and if it is important that some breed or breeds of cattle, specially adapted to the production of milk, should be imported and kept at the Stock Farm.

In concluding their address, while thanking Your Honor for the countenance and support Your Honor always so readily affords, the Commissioners would ask Your Honor to cast a glance over the contents of this Hall, diverted to-day from its ordinary military use to a peaceful use, over the animals in the show-field bred on the Island, and then say whether a country capable of producing fruits, and flowers, roots, and vegetables, cereals and pulse, horses for pleasure and labor, and other domestic animals of such a quality as are here displayed, is not a suitable home, not only for its own rising generations, but also for large numbers of the Agricultural classes who now seem disposed, to expatriate themselves from the British Isles.

All which is respectfully submitted by the undersigned Commissioners.

R. P. HAYTHORNE, Acting Chairman.

His Honor replied in a speech of some length. He expressed the pleasure he had had in being present at the Dominion and Centennial Exhibition at St. John, and the pride it gave him to see that in almost every department of Agriculture, the products of the Island were among the best there,—drawing handsome first prizes in a competition with the larger Provinces of Canada. Our cattle, sheep, grain, and dairy products ranked high at St. John, and it was acknowledged on all hands that our horses were, as a whole, the best shown. The horse barometer was a wonder to the visitors. It was also pleasing to see a very fine exhibit of Cloth from the Tryon Mills, for which a bronze medal was deservedly awarded. It was to be regretted that the other Island factories had not, at least, sent samples of their wares to the Provincial Exhibition. The labors of the husbandman have been greatly blessed this year. Wheat is an excellent crop and much money, formerly ex-

changed for flour, will this year be saved. There has also been a fine yield of oats, and the New Zealand white oats, lately introduced, is likely to find a good market in the West Indies. These exhibitions mark how we are advancing, and also tell us where we are losing ground. They are established institutions, and they are invaluable. The motto of our farmers should be "Excelsior," and the policy of our Governments should be to aid and encourage them by continually importing the best kinds of animals. Not only should there be Short-horns and Ayrshires of the very best quality on the Government Stock Farm, but Jersey's as well. We should pay more attention to butter making; and the Jersey's are unrivalled as givers of rich milk for butter. The farmers on their parts should procure for their wives the very best implements for use in their dairies. Farmers should be proud of their calling. It is the first and noblest of occupations; and it is astounding to see young men leave it to go behind counters and enter businesses in which, in nine cases out of ten, they fail. Some idea of the wealth it brings to the Island, may be obtained from the following statement of some of our exports in 1882: Horses, \$136,307.00; Cattle, 34,472.00; Sheep, 23,559.00; Eggs, 241,873.00; Cheese, 5,000.00; Potato Starch, 68,074.00.

not to speak of oats, potatoes, and other raw products. This is a short and imperfect summary of His Honor's remarks previous to declaring the Exhibition open.

GENERALLY. The exhibition building looks barker than usual, owing to the absence of exhibits from our cloth factories. But there is a good show of roots, vegetables, grains, butter, cheese, fancy and artistic articles, etc. The show of stock is large and good.

MESSRS. BEER & SONS exhibit samples of the various soaps manufactured at their new factory in Charlottetown. The exhibit is the first of its kind on this Island. Besides the ordinary household soaps there are two kinds of mottled soaps. The exhibit is in charge of Mr. J. Laphorne, the manager of the factory, and compares more than favorably with the exhibits of soap at St. John.

MR. W. H. LYNCH of Quebec, is here with his patent scientific dairying apparatus, consisting of strainer, milking pail, creamer, butter worker, air tight tub, and rotary churn. The patent for the latter has been purchased by Mr. R. K. Bruce of this city, whose efforts in the promotion of one of the most important industries of the Island are worthy alike of praise and reward. Mr. Lynch is, we understand, willing to give lectures on the subject, which he has made a speciality, and for which his name is well known throughout Canada; and we trust that our leading farmers and their wives will avail themselves of this opportunity of gaining information respecting the making of good butter.

MR. ABRAM GILL, of Little York, shows a very fine collection of fruit: nine varieties of apples, five of crab apples, one of magnolia bonum plums and one of grapes, grown in the open air. The latter are as perfectly matured as any of the kind imported, the plums are delicious, and altogether Mr. Gill's exhibit is a most creditable one.

MR. MURPHY, Manager of the Charlottetown Gas Works, exhibits a gas heating stove, which is guaranteed to heat a large bedroom. No coal to be taken up stairs; no ashes to be brought down; no dust or smoke about the room—a very important consideration in cases of illness. The stove is air, elegant ornament for any room; and while it gives heat to boil the kettle it also gives light to do any necessary work about the room.

MR. SMALLWOOD has a fine exhibit of foliaged plants and geraniums. The latter consist of gold and silver tri-colors, golden bi-colors, bronze, silver, variegated, single, double, and round flowered, hybrid nose-gay, scented, ivy-leaved, etc. He also shows mosses, echeverias, etc., very chaste and beautiful. The foliaged plants consist of acacias, abutilons, the fever gum tree of Australia, graviola and robusti; there are also hanging pots filled with various basket plants. Mr. Smallwood's exhibit occupies a large portion of the space allotted to his plants, and reflects credit upon his taste.

MR. HAZARD exhibits foliaged plants consisting of celosia, rex begonias, ferns, acacias, palms; together with single and double and tri-color, and bronze geraniums, carnations, pansies, fuchsias, lilies, etc.

MR. W. E. HICKEY, of this City, exhibits an elegant suit of Turkish drawing-room furniture in tapestry. It is the only exhibit of the kind; and is well worthy of inspection.

MR. J. T. FERGUSON exhibits the Excelsior organ for which he is the agent in this Province. It is in elegant style and altogether one of the finest instruments of the kind ever brought to P. E. Island.

MESSRS. MILLER BROTHERS exhibit organs by first class makers, a variety of sewing machines etc.—a very nice selection—drawn from the stock they have on sale at their store on Queen street. The organs are excellent in tone, and elegant in style and finish.

MR. H. BLACHE exhibits a very handsome toilet and card table of his own manufacture. It is inlaid with ash, and artistically ornamented with cillerettes. It is in two parts and may be used either as a toilet or card table. For the work of an amateur it is remarkable, and attracts a great deal of attention.
